PHASE I ENVIRONMENTAL SITE ASSESSMENT
Montrose Area and Midtown Drainage and Pavement Sub-Project II
WBS No. M-000290-002-3
City of Houston

1 EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment (ESA) was performed for HR Green (client) for the two street corridors made up of nine street segments in the Montrose and Midtown areas of the City of Houston (See Figure 1.). This report was prepared using This Phase I ESA was performed in accordance with the ASTM Practice E 1527-05 and the City of Houston Department of Public Works & Engineering Design Manual Chapter 11. Any exceptions to, or deletions from, this practice are described in this report.

Land use observed along the Project Area is a mixture residential and commercial businesses. Residences observed were comprised of single family homes and condominiums, although recently constructed high-rises were observed along Gillette and Elgin. Commercial properties consisted of boutiques, restaurants, automotive mechanic shops, convenience stores, and dry cleaners.

In summary, Kleinfelder's research revealed evidence of recognized environmental conditions (RECs) and historical RECs for the Project Area associated with soil and groundwater remediation activities. Numerous properties along the corridor have a history of land use for dry cleaning and automotive services. Residual contamination may remain that could impact proposed construction activity for the proposed sewer line.

Findings, opinions, and conclusions are presented in Section 9. *De minimus* and other relevant findings are also discussed in Section 9 of this report. This report is subject to the limitations in Section 2.5.

2 INTRODUCTION

Kleinfelder conducted a Phase I ESA of the subject site. Kleinfelder understands this report will assist the Client in understanding environmental conditions associated with the subject site's past and current use. The following report is a summary of work performed using the guidelines set forth in the ASTM International Standard E-1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Standard) and the City of Houston Department of Public Works & Engineering Design Manual Chapter 11. This report was prepared in general conformance with the ASTM Standard's suggested table of contents. Minor format modifications have been made to aid the presentation of our findings. The subject property is hereafter referred to as the "Project Area."

2.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the scope of services defined in our Proposal, (Kleinfelder, Proposal for A Phase I Environmental Site Assessment – City of Houston Montrose-Midtown Phase 2 Design, Proposal No. 129362, dated October 26, 2012) and limitations discussed in this report, "recognized environmental conditions (RECs)" and other related environmental issues for the subject site. As defined in the ASTM Standard, a REC is:

The presence or likely presence of any hazardous substances or petroleum products on a site under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the site or into the ground, ground water, or surface water of the site. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

Kleinfelder professionals conducting this site assessment included Ms. Artemis Harbert and Mr. Jordan Smith. Ms. Harbert and Mr. Smith conducted the site reconnaissance and interviews. The report was reviewed by Ms. Carol Hall, CHMM. Resumes of environmental professionals are included in Appendix A.

2.2 SCOPE-OF-SERVICES

This ESA was performed in accordance with the general provisions of the ASTM International (formerly American Society for Testing and Materials International) Standard E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and the City of Houston Department of Public Works & Engineering Design Manual Chapter 11. The scope of work and limitations for this ESA were specified in Kleinfelder's proposal dated October 26, 2012, which was approved by HR Green, Inc. (HR Green) on December 4, 2012 (see Appendix A).

The following sections describe Kleinfelder's work scope:

- Section 2, **Introduction**, includes a discussion of the purpose/reason for performing the Phase I ESA, significant assumptions (i.e., property boundaries if not marked in the field), limitations, exceptions, special terms and conditions (i.e., contractual), and user reliance parameters.
- Section 3, **Location and Environmental Setting**, is a compilation of information concerning the site location, legal description, the current and proposed use of the subject site, a description of structures and improvements on site at the time of Kleinfelder's assessment, and adjoining property use. In addition, topography, soil conditions, regional geology and hydrology, surface water quality, relationship of the site to a floodplain and groundwater gradient and depth information are included, if readily available from governmental agencies or other public sources.
- Section 4, **User Provided Information**, includes records and information provided by the User of this report, the Client, such as information about environmental liens and activity and use limitations, specialized knowledge or

experience, actual knowledge, prior environmental reports, and the purchase price relative to environmental conditions, as applicable.

- Section 5, **History of the Site**, summarizes the history of the subject site and adjoining properties. This site history is based on various sources which include: a review of historical aerial photographs, Sanborn Fire Insurance Maps, city or suburban directories, historical topographic maps, building department records (if available), interviews regarding historical use and development, if readily available and applicable.
- Section 6, **Records Review**, is a compilation of Kleinfelder's review of several databases available from federal, Texas, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the subject site; and for off-site facilities within the search distance specified in the ASTM Standard. Interviews and telephone conversations conducted by Kleinfelder with regulatory agency representatives, as applicable are included.
- Section 7, **Site Reconnaissance**, describes Kleinfelder's observations during the site reconnaissance. The methodology used and the limiting conditions are described.
- Section 8, **Interviews**, is a summary of telephone and personal interviews conducted with "Key Site Managers" that may include the owner/manager of the facility, occupants/tenants, local government officials, and the Client. Additional interview sources may be contacted if "Key Site Managers" are not available prior to production of this report, and may include adjoining landowners and people with historical knowledge of the area.
- Section 9, **Summary, Conclusions, and Opinions**, is a presentation of our findings and opinions regarding the information described in the previous sections, and presents our conclusions regarding the presence of recognized environmental conditions connected with the site and data gaps/data failures. Recommendations for additional services are included as applicable. Data gaps and data failures relative to the identification of RECs are described.
- Section 10, **Acronyms**, is a summary of some of the acronyms used throughout this report.

- Section 11, **References**, is a summary of some of the resources used to compile this report. Additional references are presented throughout the report.

Pertinent documentation regarding the subject site is included in appendices of this report.

2.3 ADDITIONAL SERVICES

An evaluation of business environmental risk associated with the site was not included in Kleinfelder's scope of work. The scope of this Phase I ESA does not incorporate ASTM Standard non-scope considerations such as asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage power lines.

2.4 SIGNIFICANT ASSUMPTIONS

The subject site is hereafter referred to as the "Project Area".

The findings in this report reflect our observations based on visual inspections, examination of available public records, and interviews with individuals associated with or potentially having useful knowledge of the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further study at the site; analysis of the data; and reevaluation of the findings, observations, and/or conclusions in the report.

This report includes unverified information supplied to Kleinfelder by third-party sources. While efforts have been made to substantiate this third-party information, Kleinfelder cannot guarantee its completeness or accuracy, but reserves the right to rely on this information in forming a professional opinion regarding the potential for contamination at the site.

2.5 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and may not identify all possible environmental concerns, and will not eliminate all risk at a site. This report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations can yield more information, which in turn, may help a Client understand and better manage potential risks. Please contact the signatories of this report if you would like to discuss this issue of risk further.

This work was performed in a manner consistent with that level of care and skill ordinarily exercised by other members of Kleinfelder's profession practicing in the same locality, under similar conditions and at the date the services are provided. Our conclusions, opinions, and recommendations are based on a limited number of observations and data. It is possible that conditions could vary between or beyond the data evaluated. Kleinfelder makes no other representation, guarantee, or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service.

This report should not be relied upon after 180 days from the date of its issuance (ASTM Standard E1527-05, section 4.6). This report may be used only by the Client and only for the purposes stated for this specific engagement within a reasonable time from its issuance, *but in no event later than one year from the date of the report*, provided that the interviews with owners/occupants, environmental lien search, records search, and site reconnaissance were conducted or updated within the prior 180 days. Land or facility use, on-site and off-site conditions, regulations, or other factors may change over time, and additional work may be required with the passage of time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings and opinions can be considered valid only as of the date of the site visit.

Any party other than the Client who wishes to use this report shall notify Kleinfelder of such intended use. Based on the intended use of the report, Kleinfelder may require

additional work be performed and an updated report be issued. Non-compliance with any of these requirements by the Client or any other party will release Kleinfelder from any liability resulting from the use of this report by an unauthorized party, and Client will defend, indemnify, and hold harmless Kleinfelder from any claim or liability associated with such unauthorized use or non-compliance.

2.6 SPECIAL TERMS AND CONDITIONS

At times our scope of work requires that our services be performed in a confidential manner and that our efforts to obtain information and records be limited to contacting those parties with knowledge of this effort, knowledge of a potential impending sale, or parties specifically provided as contacts for this work. All interaction with public employees, regulatory entities, or other parties can be limited by this confidentiality request to minimize disclosure of information related to the assessment or its purposes.

3 LOCATION AND ENVIRONMENTAL SETTING

3.1 LOCATION AND DESCRIPTION

The Project Area consists of two street corridors made up of nine street segments in the Montrose and Midtown areas of the City of Houston. The northern corridor begins north of Allen Parkway adjacent to Buffalo Bayou, and extends south along Gillette Street to West Dallas Street (west) to Genesee Street (south) to Tuam Avenue (southeast), and ends at the intersection of Louisiana Street and Tuam Street. The southern corridor begins at the intersection of Drew Street and Smith Street. The southern corridor crosses Tuam Street and the northern corridor and continues southwest along Smith Street to Elgin Avenue. The corridor includes the section of Elgin Street that extends northwest from the intersection of Elgin Street and Smith Street to Brazos Street (one city block). The southern corridor continues along Elgin Street to the southeast and the intersection of Elgin Street and Milam Street. The southern corridor terminates at the intersection of Milam Street and West Alabama Street near Highway 527. The total of both corridors total approximately 12,700 feet in length. A vicinity map with street segment descriptions was provided by the Client, HR Green, and is included in Appendix B.

A legal description of the corridor properties was not provided for Kleinfelder's review. Assessor Parcel Numbers associated with the corridor were not provided prior to production of the report.

3.2 SITE VICINITY AND CHARACTERISTICS

The site is located in an area that has been developed since the early 20th Century. Most of the Project Area was a mix of residential and commercial businesses. Residential properties range from single family homes to condominium high-rises. Commercial businesses in the Project Area include boutiques, restaurants, offices, automotive mechanic shops, convenience stores and drycleaners. The Federal Reserve Bank of Dallas (formerly Jefferson Davis Hospital) is near the northern extreme of the Project Area. Abraham Lincoln Junior/Senior High School is located in the northern section of the Project Area, and Holy Rosary Catholic Church is located near

the southern extreme. In general, population density and traffic increase in the southern portion of the Project Area.

Proposed uses of the properties along this corridor are being evaluated by the City of Houston. New storm sewer lines will be constructed along the street segments. The exact locations of the proposed lines will be determined in the Phase II design services.

3.3 PHYSICAL SETTING

As part of the Phase I ESA process, Kleinfelder utilized multiple sources to develop an understanding of the Project Area and surrounding area’s physical setting. This information was obtained from published data and maps, interviews with public agencies, and/or from previous investigations conducted by Kleinfelder in the vicinity of the Project Area.

Physical Setting:

Topography:	Based on review of the 1995 USGS Houston Heights and Bellaire, Texas Topographic Quadrangles, much of the Project Area appears to be located on a topographic high of 55 feet above mean sea level (AMSL). The northern extreme slopes predominately to the north toward Buffalo Bayou. The southern portion of the Project Area is relatively level and depicted at between 51 and 55 feet AMSL.
Soil:	According to the United States Department of Agriculture Soil Conservation Service, <i>Soil Survey of Harris County, Texas</i> . The soil that underlies the Project Area is identified as Urban Land. The Urban Land unit consists of extensively built up areas where 75 percent or more of the surface is covered with buildings and pavement. The soils in these areas have been altered or covered during urban development; therefore, surface and near surface soils may not be consistent with regional mapped soil units. The soil units in the Project Area include Vamont-Urban Land near the northern extreme, and Beaumont-Urban Land and Bernard-Urban Land throughout most of the Project Area. All three units are described as being somewhat poorly to poorly drained with very low permeabilities.
Geology	According to the Geologic Atlas of Texas Houston Sheet, the Project Area is underlain by the Beaumont Formation (Qb) of Pleistocene age. The Beaumont Formation consists of “light- to dark-grey and bluish- to greenish-grey clay and silt, intermixed and interbedded; contains beds and lenses of fine sand, decayed organic matter, and many buried organic-rich, oxidized soil zones that contain calcareous and ferruginous nodules.”

<p>Hydrogeology:</p>	<p>The Beaumont Formation, along with the underlying Montgomery, Bentley, and Willis Sand Formations, comprise the Chicot Aquifer, which extends approximately 400 feet below surface in the Project Area. The Evangeline Aquifer is approximately 600 feet thick and extends from the base of the Chicot Aquifer to approximately 2,000 feet below surface (Stratigraphic and Hydrogeologic framework of Part of the Coastal Plain of Texas, 1979, Texas Department of Water Resources). The Chicot and Evangeline Aquifers are the principal sources of groundwater in southeast Texas; however, the drinking water in Harris County is primarily obtained from treated surface water. The project area uses municipal drinking water from the City of Houston.</p>
<p>Surface Water:</p>	<p>The nearest surface water body to the Project Area a Buffalo Bayou, approximately 100 feet northeast of where the Project Area begins in Buffalo Bayou Park.</p>
<p>Floodplain:</p>	<p>Review of 2007 FEMA Flood Insurance Maps (48201C0670L and 48201C0860L) indicated the portion of the project area immediately adjacent to Buffalo Bayou and 300 feet north of Allen Parkway is located in Zone AE, which is defined as an area inside the 100-year floodplain, and partially in the Zone AE Floodway, defined as area adjacent of floodplain adjacent to a stream which must be kept free of encroachment. A segment of the Project Area extending approximately 200 feet north and 100 feet south of Allen Parkway is in the shaded Zone X, which is defined as areas outside of the 100-year floodplain but within the 500-year floodplain. The remainder of the Project Area is located in un-shaded Zone X, which is defined as areas determined to be outside of the 500-year floodplain.</p>
<p>Groundwater gradient and depth:</p>	<p>In the vicinity of the Project Area, shallow groundwater is typically encountered at a depth of between 10 to 25 feet below ground surface. The general direction of groundwater flow in Harris County is toward the southeast but can be influenced by local surface water features such as streams and bayous. Due to the influence of local bayous in the vicinity of the Project Area, the groundwater flow gradient is anticipated to the northeast toward Buffalo Bayou in the portion of the Project Area north of Westheimer Road and to the southeast toward Brays Bayou in the portion of the Project Area south of Westheimer Road.</p>

4 USER PROVIDED INFORMATION

In accordance with the ASTM E-1527-05 Standard Practice for ESAs, the user (HR Green) is responsible for providing the information listed below. A questionnaire was completed by Mr. Stephen Sparks of HR Green. The information provided is summarized below and a copy of user-provided information is included in Appendix B.

4.1 SITE BOUNDARIES MAP AND SITE CONTACT

Mr. Sparks provided a map of the Project Area, including the two corridors that consist of nine street segments, totaling 12,700 feet in length. According to Mr. Sparks, new storm sewer lines will be constructed along the street segments. The exact locations of the proposed lines will be determined in the Phase II Design Services.

4.2 REVIEW OF ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

No information was provided by HR Green.

4.3 SPECIALIZED KNOWLEDGE OR EXPERIENCE

No information was provided by HR Green.

4.4 ACTUAL KNOWLEDGE OF THE USER

No information was provided by HR Green.

4.5 PURCHASE PRICE

As part of the ASTM E 1527-05 process, information must be gathered regarding the prospective purchase price of the property relative to the fair market value of the subject site. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference could be attributed to environmental degradation of

the property. The Project Area is within existing City of Houston roadway right-of-way and no property acquisitions are required.

4.6 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

No information was provided by HR Green.

4.7 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports were provided by HR Green or the City of Houston.

5 HISTORICAL USE OF SITE

5.1 CHAIN-OF-TITLE REVIEW

The Project Area is within existing City of Houston right-of-way and no property acquisitions are required; therefore, a chain-of-title review was not included in the scope of work for this ESA.

5.2 AERIAL PHOTOGRAPHS

A review of historical aerial photographs can indicate past development activities at a site that may not be documented by other means, or observed during a site visit. The effectiveness of this resource depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from GeoSearch. A tabulation of the aerial photographs reviewed specific to the Project Area is presented in the following tables. Copies of available aerial photographs are included in Appendix C.

Aerial Photography Review:

Year:	Scale:	Observations:
1944	1"=700'	<p>Site: All roadways within the Project Area are present. Land along Buffalo Bayou is primarily undeveloped with the exception of some structures along the banks of the northern bend. Adjacent to Gillette Street, the Jefferson Davis Hospital complex is visible. South of the hospital are structures and garages in the area owned and operated by the City of Houston at that time. Areas immediately adjacent to Genesee Street, Tuam Avenue, Smith Street, Elgin Avenue, and Milam Street appear to be developed primarily for residential use. A series of warehouse type buildings are visible on Genesee Street, south of West Gray Avenue.</p> <p>Surrounding Area: Buffalo Bayou is visible north of the Project Area. The surrounding area appears to be developed primarily for residential use, with larger buildings present to the east toward downtown. A development of multi-family homes is visible approximately 500 feet east of the Project Area. A school is visible southeast of Milam Street.</p>
1953	1"=700'	<p>Site: There are no significant changes from the 1944 aerial photograph, with the exception of some additional development of residential structures along the northern segment of Gillette Street.</p> <p>Surrounding Area: There is further commercial development east and southeast of the Project Area.</p>
1969	1"=700'	Aerial photograph is of poor quality. Features are not clear.

Aerial Photography Review:

Year:	Scale:	Observations:
1979	1"=700'	<p>Site: The residential development along Gillette Street is no longer present; a warehouse is visible on the eastern side of the street. A school is visible at the southwest corner of Genesee Street and West Gray Avenue. There is further commercial development along Smith Street, Elgin Avenue, and Milam Street. The 527 Spur is visible at the intersection of Elgin Avenue and Bagby Street.</p> <p>Surrounding Area: Extensive commercial development is visible in the downtown area and west of the Project Area along Montrose Boulevard. The surrounding area around Smith Street, Elgin Avenue, and Milam Street also exhibits further commercial development.</p>
1989	1"=700'	<p>Site: There are no significant changes from the 1979 aerial photograph.</p> <p>Surrounding Area: There is further commercial development in the downtown area.</p>
1996	1"=700'	<p>Site: There is further commercial development along Elgin Avenue, and Milam Street.</p> <p>Surrounding Area: Further commercial development is visible east, southeast, and west of the Project Area.</p>
2004	1"=700'	<p>Site: The Jefferson Davis Hospital complex has been demolished and the Federal Reserve Bank is under construction. Many of the warehouses along Genesee Street have also been demolished and have been replaced with condominiums. High-rise commercial and residential structures are visible along Elgin Avenue.</p> <p>Surrounding Area: East of Gillette Street, condominiums have been constructed.</p>
2010	1"=700'	<p>Site: More condominiums are present along Genesee Street.</p> <p>Surrounding Area: There is more large scale commercial and residential development east and southeast of the Project Area.</p>

Note: Aerial photographs only provide information on indications of land use and no conclusions regarding the release of hazardous substances or petroleum products can be drawn from the review of photographs alone.

5.3 FIRE INSURANCE MAPS

Fire insurance maps were developed in the mid-1800s to determine insurance rates by identifying fire hazards (such as gasoline), building construction materials, and the locations of fire protection equipment and fire stations. Sanborn Fire Insurance Maps were reviewed from online sources including ProQuest, LLC and University of Texas Libraries. An abstract of the maps reviewed is included below:

Fire Insurance Map Review:

1907	The 1907 Sanborn Map does not show many details pertaining to structures present at the time of its publication. The Project Area and surrounding area is comprised entirely of residential dwellings, shops, stables, and undeveloped land. The Fannin School, located in the 2900 block of Smith Street is listed as having "Steam Heat." The northern portion of
-------------	---

Fire Insurance Map Review:

	<p>Genesee Street north of George Street (a.k.a. West Gray Avenue) is named Castania Street.</p>
<p>1924-1950</p>	<p>The 1924-1925 Sanborn Map covers the entirety of the Project Area and shows a significant amount of development from the 1907 map.</p> <ul style="list-style-type: none"> • On the northernmost boundary of the Project Area near Buffalo Bayou, the headquarters of the 56th Calvary Brigade is present northwest of the Project Area. • Gillette Street: Jefferson Davis Hospital is present at the southwest corner of Buffalo Drive (Allen Parkway) and Gillette Street. City of Houston Public Works Department properties are located along the eastern and western sides of the street (800 and 700 blocks). These properties show three truck/auto repair shops and at least four gasoline tanks. • West Dallas Street: A gasoline station/auto repair shop with three gasoline tanks is present at 1702 West Dallas Street to the west of the Project Area. Nearby the Project Area along West Dallas Street, there is another auto repair shop at the northwest corner of Robita Place and a gasoline station with two gasoline tanks on the northeast corner of Taft Avenue. • Genesee Street: There are primarily dwellings and apartment buildings along Genesee Street north of West Gray Avenue. South of West Gray Avenue there are several commercial and industrial facilities. At the northeast corner of West Gray Avenue and Genesee Street (240 West Gray) is an auto repair shop and electric supply warehouse. On the southeast corner (237-225 West Gray) is an auto repair shop and a dry cleaner with a “solvent tank”. Gasoline stations are located a block away on both the northeast and southeast corners of Gillette Street (220 and 219 West Gray). A drycleaner is located on the northwest corner of Genesee Street and West Gray Avenue (244 West Gray). On the southeast corner of Genesee Street and Webster Avenue is the Public Laundries, Inc. facility (1600 Block of Webster). Adjacent east of Public Laundries is Horlock Ice Industries (1500 Block of Webster), which has three gasoline tanks, and “A” Cleaners and Dryers (1400 Block of Webster). Across the street at the corner of Mason Street and Webster Street (1919 Mason) approximately 250 feet east of the Project Area is a “Uniform Factory”. Approximately 500 feet west of the Project Area, a gasoline station with three gasoline tanks is shown on the northeast corner of Webster Avenue and Taft Street (1901 Taft). • Tuam Avenue: An auto repair shop is present at the east corner of Genesee Street and Tuam Avenue. A dry cleaning facility with “solvent tanks” is present at 312 Tuam Avenue. • Smith Street: A gasoline station with six gasoline tanks is present on the northeast corner of Smith Street and Elgin Avenue (3115 Smith), and an additional gasoline station is present on the southeast corner (3201 Smith). A mirror silvering facility is present on the northeast corner of Smith Street and Dennis Avenue (2615 Smith) approximately 250 feet north of the Project Area. • Elgin Avenue: A gasoline station with two gasoline tanks is located on the northwest corner of Elgin Avenue and Brazos Street (419 Elgin) and a gasoline station with three tanks is on the southeast corner (502 Elgin). An additional gasoline station is present at 602 Elgin Avenue. An auto repair shop is present at the northwest corner of Louisiana Street and Elgin Avenue (621 Elgin). The Ideal Laundry and Dry Cleaning is present at the southwest corner of Elgin Avenue and Louisiana Street (3210 Louisiana). • Milam Street: Gasoline stations with four gasoline tanks are present on the northeast corner of Milam Street and Francis Avenue (3316 Milam), on the northeast corner of Milam Street and Elgin Avenue (3116 Milam) and on the northeast corner of Milam Street and West Alabama Avenue (3715 Milam). Approximately 250 feet offsite, on the southeast corner of Holman Avenue and Milam Street is a gasoline station with three

Fire Insurance Map Review:

gasoline tanks (3501 Milam).

5.4 CITY DIRECTORIES

City Directories can provide information regarding property occupants by address. Information provided by GeoSearch was reviewed in approximately ten year intervals. Commercial and industrial facilities that potentially use or store hazardous substances and petroleum products within 500 feet of the Project Area are summarized. Full copies of the city directories are included in Appendix D.

As noted in the table above, there are numerous automotive shops, gas stations, and laundry/cleaners located adjoining or within 500 feet of the Project Area.

5.5 HISTORICAL TOPOGRAPHIC MAP REVIEW

Kleinfelder reviewed available historical topographic maps of the Project Area vicinity to aid in the understanding of development at the Project Area and surrounding properties. A summary of our review of the available topographic maps is provided below. Copies of available topographic maps are provided in Appendix C.

Historic Topographic Map Review:

<p>1915 (Houston Heights and Bellaire Quadrangles; 1:31,680 scale)</p>	<p>The scale and level of detail of the 1915 topographic map makes it difficult to discern specific site features. Site: Almost all of the roadways that comprise the Project Area are present north of West Gray Avenue. Multiple residences are shown along Genesee Street, Tuam Avenue, Elgin Avenue, and Milam Street. Surrounding Area: Much of the surrounding area to the east of the Project Area is depicted as developed. Buffalo Bayou is adjacent north of the project area and Brays Bayou is located approximately 1.7 miles south of the Project Area. Glenwood Cemetery is approximately 400 feet shown north of the Project Area. Railroads/street car lines are south and west of the Project Area.</p>
<p>1929 (Pearland Quadrangle Only; 1:62,500 scale)</p>	<p>The scale and level of detail of the 1929 topographic map makes it difficult to discern specific site features. Site: There are no significant changes from the 1915 topographic map. Surrounding Area: There are no significant changes from the 1915 topographic map.</p>
<p>1947 (Houston Heights and Bellaire Quadrangles; 1:25,000 scale)</p>	<p>Site: The Project Area and adjoining land are shaded pink to denote development. Buffalo Parkway (Allen Parkway) is shown running adjacent to Buffalo Bayou. A Jefferson Davis Hospital is present off of Gillette Street. The Fannin School is present on Smith Street. Surrounding Area: The surrounding area exhibits far more development than previous maps. US Route 59 and State Highway 288 are depicted trending southeast of the Project Area. The Southern Pacific Railroad is visible south of the Project Area.</p>
<p>1955 (Houston Heights and Bellaire Quadrangles; 1:24,000 scale)</p>	<p>Site: There are no significant changes from the 1947 topographic map. Surrounding Area: Memorial Drive is depicted as "Under Construction" north of the Project Area.</p>
<p>1967 (Houston Heights and Bellaire Quadrangles; 1:24,000 scale)</p>	<p>Site: Buffalo Parkway has changed to Allen Parkway. The 527 Spur is present at Brazos Street. Surrounding Area: US Route 59 has been rerouted along the former right of way of the Southern Pacific Railroad, southeast of the Project Area.</p>
<p>1982 (Houston Heights and Bellaire Quadrangles; 1:24,000 scale)</p>	<p>Site: There are no significant changes from the 1967 topographic map. Surrounding Area: Abraham Lincoln Junior High school is visible at the southeast corner of Taft Street and West Dallas Street.</p>
<p>1995 (Houston Heights and Bellaire Quadrangles; 1:24,000 scale)</p>	<p>Site: There are no significant changes from the 1995 topographic map. Surrounding Area: There are no significant changes from the 1995 topographic map</p>

Note: Historic topographic maps only provide information or indications of land use and no conclusions regarding the release of hazardous substances or petroleum products can typically be drawn from the review of maps alone.

5.6 INTERVIEWS REGARDING HISTORICAL USE AND DEVELOPMENT

Interviews were conducted with adjoining industrial businesses, and are discussed further in Section 8. Records of communication are included in Appendix G.

5.7 SUMMARY OF HISTORICAL INFORMATION

Based on a review of historical aerial photographs and topographic maps (Houston Heights Quadrangle and Bellaire Quadrangle, TX), the Project Area and surrounding areas have been developed since the late 1900s as mixed commercial/residential with interspersed industrial sites. Based on city directories and available Sanborn Fire Insurance Maps, there were numerous automotive shops, gas stations, and dry cleaners throughout the site and surrounding area, many dating back to at least the early 1940s with some as early as the 1920s. There was no evidence of oil and gas exploration or commercial waste disposal activities observed on historical records within or immediately adjacent to the site.

6 RECORDS REVIEW

6.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review is to obtain and review records that can help to evaluate RECs of potential concern in connection with the Project Area and nearby properties.

Federal, state and local regulatory agencies publish databases or “lists” of businesses, facilities, and properties that handle hazardous materials or generate hazardous waste, or are the known location of a release of hazardous substances to the environment. The regulatory database list was provided by GeoSearch, of Austin, Texas (Order No. 22185) on December 28, 2012 and included a listing of specific databases required by the ASTM Standard.

In accordance with the City of Houston requirements, the minimum search distance for Standard Environmental Record Sources, except for Federal National Priorities List (NPL), Federal Resource Conservation and Recovery Act – Treatment, Storage, and/or Disposal (RCRA TSD) Facilities, and Texas Hazardous Waste Sites (HWS)/Texas State Superfund Sites, were reduced, pursuant to ASTM Standard E1527, to a radius of 500 feet unless there was a justifiable reason to maintain a larger radius. The minimum search distance for Federal NPL, Federal RCRA TSD and Texas HWS facilities were maintained at the ASTM specified distance of 1.0 mile.

A listing of the search distances and databases evaluated are included in the regulatory database search provided as Appendix E to this report. The ASTM databases searched and the search distances are listed below:

<u>Federal Records</u>	<u>Search Distance</u>
Superfund Sites (NPL)	1 mile
CERCLIS (NPL) Sites	0.5 mile
RCRA Corrective Action Sites	1 mile
RCRA TSD Sites	1 mile
RCRA Generator Sites	1 mile
ERNS/NRS Sites	0.2 mile

<u>State Records</u>	<u>Search Distance</u>
Superfund Sites	1 mile
Landfill/Solid Waste Sites	0.5 mile
LPST Sites	0.5 mile
PST Sites properties	Project Area & adjoining
VCP Sites	0.5 mile
Brownfields Sites	0.5 mile
Spill Sites	Project Area only
Oil and Gas Well Sites	0.25 mile

As stated in Section 3.3, the Project Area is located in an area with an elevation of approximately 55 feet above sea level, sloping to the north in its northern portion and relatively level in the southern portion. The start of the Project Area is adjacent to Buffalo Bayou, and Brays Bayou is located approximately 1.7 miles south of the terminus of the Project Area. Based on the topographic contour intervals in the 1995 topographic maps and the localized influence of the two bodies of water, the direction of groundwater flow in the Project Area is assumed to be toward the northeast for the Project Area north of Westheimer Road and toward the southeast for the project area south of Westheimer Road for the purposes of assessing potential impacts from regulated sites. Groundwater flow direction anticipated is based on regional information sources. Site-specific conditions may vary due to a variety of factors including geologic anomalies, utilities, nearby pumping wells (if present), and other developments.

Kleinfelder evaluated the above listings with regard to the nature of potential chemicals of concern, the lateral-extent of known releases, the distance of the listing from the Project Area boundary, and the physical setting of the Project Area and surrounding properties (e.g. soil properties, topographic relationship, anticipated groundwater gradient). In general, reported or potential releases likely to impact the property are those located within 500 feet of the Project Area.

6.2 RESULTS OF DATABASE SEARCH

A summary of potential RECs, historical RECs, and facilities noted that required further analysis based on information obtained from historical and interview sources during Kleinfelder's regulatory review are detailed below. The locations of these facilities are shown in Figure 2.

Adjoining Property Listings:

Figure 2 Site No.*	Regulatory Listing (Facility ID)	Facility Name/Address	Distance** (feet)	Direction, Gradient Relative to the Project Area	Potential REC
1	GWCC (105219) IHW (77614) LPST (092363) LPST(105219) NOV (RN102459492) PST (0033502) SPILLS (9/6/94015) TIER II (1RK81Z006M63) TIER II (1SLA0Z003Q7S) VCP (2503) FRSTX (110041811331) FRSTX (110034227147) APAR (T1826)	Federal Reserve Bank/City of Houston Public Works and Engineering Fleet Maintenance Facility/San Felipe Park 801 Gillette	Adjoining	East, Down-gradient	Y

Comments: The former City of Houston Public Works and Engineering (PWE) Fleet Maintenance Facility on Gillette St. is part of a complex of former PWE properties that have a documented history of contamination and completed and ongoing remediation efforts. The facility had a reported GWCC in 1992 in which diesel contamination was reported in local groundwater. The TCEQ initiated action to address the contamination, and the remedy has been implemented and the case is considered closed. The facility had a total of 15 registered PSTs that have been removed. A summary is provided below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	20,000	Unknown	FRP	1/1/1971	3/3/2011
2	20,000	Unknown	FRP	1/1/1980	3/2/2011
3	500	New Oil	FRP	1/1/1971	11/17/1992
3	20,000	Unknown	FRP	1/1/1971	3/3/2011
4	10,000	Gasoline	Steel	1/1/1960	10/13/1992
4	20,000	Unknown	FRP	1/1/1980	3/3/2011
5	2,000	Diesel	Steel	1/1/1960	10/13/1992
5	1,000	Unknown	FRP	2/1/1993	3/4/2011
6	20,000	Unknown	FRP	1/1/1980	3/4/2011
6	500	Kerosene	Steel	1/1/1960	10/13/1992
7	20,000	Unknown	FRP	1/1/1980	3/3/2011
11	500	Unknown	Steel	1/1/1961	11/2/1992

12	2,000	Kerosene	Steel	8/31/1987	3/3/1993
13	3,000	Diesel	Steel	8/31/1987	3/3/1993
14	4,000	Gasoline	Steel	8/31/1987	3/3/1993

The facility had a reported release/LPST (LSPT ID# 092363) in 1988 and another in 1992 (LPST ID# 105219). Groundwater was reportedly impacted in both cases with no apparent threats or impacts to receptors noted. No tank information was provided for LSPT ID# 092363, but for LPST ID# 105219, the contamination originated from the 500 gallon Tank #3. Final concurrence was issued for LSPT ID# 092363 on 11/17/1997 and for LPST ID# 105219 on 02/24/2006. It is not clear from the data provided why some tanks share a common Tank ID#.

The facility was issued an NOV in for failing to maintain a vapor recovery system in 2006. In 1994 a spill of 50 gallons of gasoline into the storm sewer adjacent to the facility was reported. This facility is also listed in TIER II FRSTX databases as a City facility and a park. It is also listed as an inactive CESQG and IHW generator. The facility is listed as a VCP in 2012 for heavy metal contamination in soil and groundwater in a 10.53 acre area, and the adjacent San Felipe has an active APAR filed in 2003 for arsenic, chromium, and lead contamination. While the address 801 Gillette does not specifically appear in obtained city directories, 711 and 803 both appear as City of Houston properties dating back to at least 1950. Additionally, the facility appears in the 1924-1950 Sanborn Fire Insurance Map. At the time of the site reconnaissance all structures at the facility had been demolished.

Given the proximity of the facility to the Project Area, the site's long history of operation, documented cases of leaking USTs impacting groundwater, known soil contamination, and an ongoing VCP and APAR, there is a potential for contaminated soil and groundwater within the ROW. **The facility is considered a REC.**

2	IOP (108) IOP (170) LPST (107101) PST (0077776) PST (0025145) FRSTX (11005047065) FRSTX (110037845348) RCRAGR06 (TXR000080510) IHW (71343)	Former Jefferson Davis Hospital, Federal Reserve Bank of Dallas-Houston Branch, Food and Drug Administration, City of Houston Maintenance Facility 1801 Allen Parkway	Adjoining	West, Upgradient	Y
---	---	---	-----------	------------------	---

Comments: The former Jefferson Davis Hospital and former Food and Drug Administration Building and the current site of the Federal Reserve Bank of Dallas- Houston Branch is listed in multiple databases due to both its proximity to contaminated City of Houston sites (see above) and past operations. The former Jefferson Davis Hospital is listed twice as an IOP site. For the first (IOP ID# 108), groundwater was found to be contaminated with BTEX and LNAPL. In the second (IOP ID# 170) groundwater was found to be contaminated with BTEX, TPH, and MTBE. Certificates of completion for both IOPs were issued on 10/10/00.

The Federal Reserve Bank of Dallas- Houston Branch has three registered PSTs, two of which have been removed from the ground; a summary is provided below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
300324	10,000	Diesel	Steel	05/01/2005	In Use
1	5,000	Diesel	FRP	01/01/1980	12/31/1991
2	1,000	Diesel	FRP	01/01/1970	12/31/1991

An LPST (LPST ID# 107101) was reported in 1993 for Tank #2. Minor soil contamination was found around the

tank, and a RAP was not required. The case was closed and final concurrence was issued on 01/03/1994. The facility was listed in the FRSTX database as the Food and Drug Administration Building, Jefferson Davis Hospital, and the City of Houston Maintenance Facility. The former Food and Drug Administration is listed as a RCRA CESQG for ignitable and corrosive wastes. The former Jefferson Davis Hospital is listed as an inactive IHW CESQG. The hospital is present on the 1924-1950 Sanborn Fire Insurance Map. Additionally, part of the City Maintenance facility overlaps the site in the south. At the time of the site reconnaissance, only the Federal Reserve Bank was observed.

Given the anticipated groundwater flow gradient, the site's past use, and its history of contamination and remediation, particularly as an IOP with documented groundwater contamination, there is a potential for contaminated groundwater in the ROW. **The site is considered a REC.**

3	PST (0067521)	Frederick Scaffold 255 West Gray	Adjoining	West/ Up-gradient	Y
---	---------------	-------------------------------------	-----------	----------------------	---

Comments: The site is listed as a former PST site with three removed tanks, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
A	"0"	Unknown	Unknown	08/31/1987	07/13/1999
B	"0"	Unknown	Unknown	08/31/1987	07/13/1999
C	"0"	Unknown	Unknown	08/31/1987	07/13/1999

At the time of the site reconnaissance, and previous structures located on the site had been demolished. Because of the lack of posted addresses, the precise location of the former site could not be verified in the field. A monitoring well was observed through the facility's fence. The facility does not appear in any city directories.

Given the anticipated groundwater flow gradient, and the limited information available in the Radius Report regarding the contents and capacity of the USTs that were present at the site, and the observation of a monitoring well at the site during site reconnaissance, while there were no reported leaks, there could be the potential impacts to groundwater in the ROW. **The property is considered a REC.**

4	PST (62802)	Bee Line Corporation 501 Elgin	Adjoining	North/ Up-gradient	Y
---	-------------	-----------------------------------	-----------	-----------------------	---

Comments: The site is listed as a former PST site with three removed tanks, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	8,000	Gasoline	Steel	01/01/1978	07/13/1987
2	8,000	Gasoline	Steel	01/01/1978	07/13/1987
3	8,000	Gasoline	Steel	01/01/1978	07/13/1987

At the time of the site reconnaissance, the Bee Line Corporation was no longer present, and the property is presently a Social Security Administration office.

The Federal Underground Storage Tank Program which set standards for regulating PST and LPSTs under RCRA Subtitle I (40 CFR Part 280) became effective 12/22/1988, meaning that when the USTs at the site were removed, confirmation sampling for potential contamination was not required.

Given the land use history, anticipated groundwater flow gradient, the site's proximity to the Project Area, and the lack of regulatory requirements and oversight at the time at which the USTs were removed, there could be potential impact to the ROW. **The property is considered a historical REC based on former land use and lack of regulatory oversight when the USTs were removed.** If contamination remains, this facility would be considered a REC, however, insufficient information is available about soil and groundwater conditions.

5	ICISNPDES (TXG830095) NPDESR06 (TXG830095) FRSTX (110020147893)	Federal Reserve Bank of Dallas 812 Gillette	Adjoining	West/ Up-gradient	Y												
<p>Comments: The property is listed as a former ICISNPDES facility. Thirty-nine violations are noted from 2005-2006 due to overdue discharge monitoring reports. The owners received warning letters in 2005 and 2006, and the permit was terminated in 2007. The facility is listed as an industrial, non-classifiable establishment under the NPDES and the FRSTX database. The facility appears as "City (of Houston) Street Repair" in the 1989-1990 city directory and appears in the 1924-1950 Sanborn Fire Insurance Map. In the 1951 city directory, 810 Gillette is listed as the "City (of Houston) Motor Shop." At the time of the site reconnaissance, a condominium building was under construction from the corner of Gillette and West Dallas up to the Federal Reserve Bank. Because of this, the exact location of the property boundary was not possible to verify in the field.</p> <p>Though the facility has been redeveloped, due to the past use of the site and those of the sites surrounding it, and the history of contamination in the area, it is possible that the facility has been impacted. Whether this contamination could be from past site activities or from migration to the facility is unknown; However, given the groundwater flow gradient, the site's proximity to the Project Area, its past operation as a City of Houston facility and historical mechanic shop, there is the potential for contamination in the ROW. The Site is considered a historical REC based on historical land use.</p>																	
7***	IHW (71462)	Arrow Graphics 3511 Milam	Adjoining	East/Down- gradient	N												
<p>Comments: The facility is listed as an inactive IHW CESQG. The business is no longer present at the property, but a Copy Source has taken over the space. A vacant grass lot behind the business was observed during the site reconnaissance and is discussed further in Section 7. Based on the regulatory status, no adverse environmental impacts are anticipated from this facility.</p>																	
8	IHW (51158) FRSTX (110005056296) IHW (71527)	Page Printing, Commercial Letter Service 2907 Louisiana	Adjoining	Southeast/Down -gradient	N												
<p>Comments: This facility is listed as an inactive IHW CESQG. The office building was vacant at the time of the site reconnaissance. Based on the regulatory status, no adverse environmental impacts are anticipated from this site.</p>																	
9	LPST (107551)	H A Franz Co. 3315 Milam	Adjoining	East/Down- gradient	Y												
<p>Comments: The facility is listed as having an LPST (LPST ID# 107551) that was reported in 1993. No information is available from the Radius Report regarding the size, material, or contents of neither the tank nor when it was installed and removed. The case was closed; however, the date of final concurrence is not provided. While the facility does not appear in any of the city directories, two auto mechanic shops are listed in the city directories at 3309 and 3313, the location of the site's current parking area. The shop listed at 3309 Milam appears in city directories from 1951-1970, and the shop listed at 3313 appears in the 1950 city directory.</p> <p>While the LPST case was closed, the release of a quantity of gasoline great enough contaminate the groundwater, the property's distance from the Project Area, and the former auto mechanic shops previously operating on what is presently the property's parking area creates the potential for contamination in the ROW. The site is considered a historical REC because of prior land use and a documented release which has case closed status.</p>																	
10	LPST (108959) PST (008907) DCR (RV106301112)	Stop N Go 2822 Downtown Cleaners 305 Tuam	Adjoining	North/Down- gradient	Y												
<p>Comments: The facility is a commercial complex that houses both a convenience store (former Stop N Go 2822) and Downtown Cleaners. The former Stop N Go is listed as a former PST site with two removed tanks, summarized below:</p>																	
<table border="1"> <thead> <tr> <th>Tank ID#</th> <th>Capacity (gallons)</th> <th>Contents</th> <th>Tank Material</th> <th>Date Installed</th> <th>Date Removed From Ground</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> <td> </td> <td> </td> <td> </td> <td> </td> </tr> </tbody> </table>						Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground						
Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground												

1	6,000	Gasoline	Steel	04/01/1976	12/19/1994
2	6,000	Gasoline	Steel	04/01/1976	12/19/1994

An LPST (LPST ID# 108959) was reported in 1994 for Tank #2. It was reported that groundwater had been impacted at that location but that there were no apparent threats or impacts to receptors; the case was closed and final concurrence was issued on 04/23/2004. At the time of the site reconnaissance, six plugged monitoring wells were observed in the parking lot of the complex. According to an employee on-duty at the time of the site reconnaissance, monitoring of the wells had stopped 15 years ago; however, this contradicts the LPST report.

Adjacent to the former gasoline station is Downtown Cleaners. The site is listed as a drop station and dry cleaning is not conducted at the facility; this was confirmed by the owner at the time of the site reconnaissance. She also confirmed that the plugged wells are from the former gasoline station.

This facility is considered a REC because while the historical LPST case was closed (historical REC status), residual contamination may remain, Based on the site's proximity to the ROW and the presence of former monitoring wells adjacent to the Project Area, residual concentrations of groundwater contamination migration may affect the ROW

11	PST (0059134)	Central Well C 19 715 Gillette	Adjoining	East/Down- gradient	Y
----	---------------	--------------------------------------	-----------	------------------------	---

Comments: This facility is listed as a former PST site that appears to be located within the boundaries of the investigation activity associated with 801 Gillette (See Site No. 1). The facility had one UST that is summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	1,000	Gasoline	Steel	Not Reported	11/29/1993

Given the proximity of this property to 801 Gillette (see discussion in #1 above), **this facility is also considered a REC.**

12	PST (0071342)	Aquilina Tire & Supply 1712 West Dallas	Adjoining	Northeast/Up- gradient	Y
----	---------------	--	-----------	---------------------------	---

Comments: The facility is an auto mechanic shop and former gasoline station. The four former PSTs are summarized below:

Tank ID#	Capacity (gallons)	Contents***	Tank Material	Date Installed	Date Filled In Place
1	2,000	Gasoline	Unknown	08/31/1987	11/30/1999
2	2,000	Gasoline	Unknown	08/31/1987	11/30/1999
3	2,000	Gasoline	Unknown	08/31/1987	11/30/1999
4	1,000	Gasoline	Unknown	08/31/1987	11/30/1999

***The site owner confirmed that the tanks were gasoline.

The owner of the facility stated at the time of the site reconnaissance that the facility had been operating as a mechanic shop since the 1920s and as a gasoline station since at least the 1960s. The facility appears as a combination gasoline station and auto mechanic shop on the 1924-1950 Sanborn Fire Insurance Map. The filled USTs were observed adjacent to the office of the shop. More details from the site reconnaissance are included in Section 7.

The USTs that were listed as removed from the site were installed in 1987; therefore, there were other unregistered tanks present at the site prior to that time. There was no reported release, however there was also no record of soil or groundwater investigation associated with the historical land use of this facility. Because the facility has been an operational auto mechanic shop for at least 90 years, and was an operating gasoline station for at least 30 years, there is the potential for contaminated soil and groundwater in the ROW. **The site is considered a REC.**

13	PST (0063825)	Mellon Mortgage Company 3100 Travis	Adjoining	Northeast/Up-Gradient	N
----	---------------	--	-----------	-----------------------	---

Comments: The facility is listed as a former PST site with two removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	3,000	Gasoline	Steel	06/01/1953	06/01/1963
2	10,000	Gasoline	FRP	06/01/1976	05/14/1999

At the time of the site reconnaissance, the facility had been redeveloped into a retail building. It is unknown why Tank #1 was removed from the ground only ten years after installation. Based on the regulatory status as a PST site with no reported releases or investigation resulting from the UST removal in 1999, and the facility has been entirely redeveloped, no adverse environmental impact is anticipated from this facility.

14	PST (0066442)	Leasing Associates 3101 Smith	Adjoining	Northeast/Up-gradient	N
----	---------------	----------------------------------	-----------	-----------------------	---

Comments: The facility is listed as a former PST site with one removed tank that is summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	12,000	Gasoline	Steel	Not Reported	01/19/1995

The entire facility had been excavated to approximately 15 feet below the ground surface on the southern and eastern side and was a construction yard at the time of the site reconnaissance. The facility appears as a gasoline station and an auto mechanic shop on the 1924-1950 Sanborn Fire Insurance Map.

Based on the regulatory status as a PST site with no reported releases or investigation resulting from the UST removal in 1995, and the facility has been excavated and is in the process of being redeveloped, no adverse environmental impact is anticipated from this facility.

15	SPILLS (8/9/93023) PST (0000055)	Angelica Healthcare Services Group 1919 Mason	Adjoining	West/Up-gradient	Y
----	-------------------------------------	--	-----------	------------------	---

Comments: The facility is listed as a former PST site with one removed tank that is summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	6,000	Diesel	Steel	01/01/1966	12/18/1990

The facility is also listed in the SPILLS database under Houston Lighting and Power. One gallon of transformer oil was spilled in 1993. No other information is provided. At the time of the site reconnaissance, the facility had been redeveloped into a residential building that incorporates parts of the original structure into the design. The facility is denoted as a "Uniform Factory" is present in the 1924-1950 Sanborn Fire Insurance Map.

PCB contamination is a potential concern associated with transformer oil. Because the release was handled under regulatory authority (SPILLS), and there is no record of ongoing investigation, this release is assumed to have been

handled in accordance with applicable disposal requirements and no longer poses an environmental concern for the property. Additionally, the Angelica Healthcare Services Group is a company that launders hospital linens. It is possible that both the Angelica Healthcare Services Group and the Uniform Factory listed on the Sanborn map may have used PCE or other hazardous chemicals in their process. However, there are no records to support or refute this.

Based on the regulatory status as a PST site with no ongoing investigations, no adverse environmental impact is anticipated from this facility which is **considered a historical REC based on the prior release history.**

18	PST (0071500)	The Bunch Co 2814 Bagby	Adjoining	North/Down-gradient	N
----	---------------	-----------------------------------	-----------	---------------------	---

Comments: The facility is listed as a former PST site with one removed tank that is summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	1,000	Unknown	Unknown	08/31/1987	12/09/1998

At the time of the site reconnaissance, the building appeared to be vacant.

Based on the regulatory status as a PST site with no reported leaks or investigations associated with the tank removal in 1998, no adverse environmental impacts are anticipated from this facility.

19	PST (0071500)	Car Spa 2801 Brazos	Adjoining	Northwest/Up-gradient	Y
----	---------------	-------------------------------	-----------	-----------------------	---

Comments: The facility is listed as a PST site with two tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	15,000	Gasoline	FRP	03/01/2000	In Use
2	10,000	Gasoline	FRP	03/01/2000	In Use

This is an active gasoline station / carwash with an attached mechanic shop. The manager stated at the time of the site reconnaissance that inspections for leaks are conducted. The carwash process water is reused, and he did not know of any spills or releases onsite. Covers for two USTs were observed in the parking area. Two monitoring wells were also observed. Based on the regulatory status as a PST site with monitoring wells present, this facility is **considered a potential REC.** However, if further evaluation or records are provided that indicate that the monitoring wells are associated with leak detection monitoring at the facility, then no adverse environmental impact would be anticipated from this facility.

20	VCP (835)	International Laundry Machinery, Inc. 1601 West Webster	Adjoining	East/Down-gradient	Y
----	-----------	---	-----------	--------------------	---

Comments:
A VCP is listed for the International Laundry Machinery, Inc. facility in which a 30,000 square foot area was found to be contaminated with solvents. Affected media included both soil and groundwater. A certificate of completion was issued in 1999. At the time of the site reconnaissance, the facility had been redeveloped into a mixed commercial-residential building that incorporates parts of the original facility structure into its design. It is possible that Site No. 31 below is also related to contamination that may have partially originated from the former facility. The facility is present on the 1924-1950 Sanborn Fire Insurance Map.

Even though the VCP has been completed with the TCEQ, based on the history of contamination at the site, and its past operational history as an industrial laundry facility, there is still a potential for both residual groundwater and soil contamination in the ROW. **The site is considered a historical REC and file review at TCEQ is recommended to evaluate whether residual contamination is likely to affect the Project Area.**

22	IOP (390)	514 Interests, LTD 514 Elgin	Adjoining	West/Cross- gradient	Y
----	-----------	------------------------------------	-----------	-------------------------	---

Comments: This is a former vacant property that had been redeveloped into a retail property at the time of site reconnaissance. The facility is listed as an IOP in which both soils and groundwater were found to be contaminated with VOCs. The area of the IOP was 0.43 acres. A certificate was issued for the facility in 2003.

The TCEQ issued a certificate of completion for the IOP and the remediation of 0.43 acres. Because of the site's history of contamination **this facility is considered a historical REC and file review at TCEQ is recommended to evaluate whether residual contamination is associated with the IOP that could affect the Project Area.**

28	IHW (41759)	Nationwide Disposal 3223 Smith, STE 306	Adjoining	Southwest/Up- gradient	N
----	-------------	--	-----------	---------------------------	---

Comments: This facility is an inactive IHW site. The reason for the inactivation is returned mail as of 2003. Nationwide Disposal is listed as an IHW transporter; no waste codes or activities are reported. At the time of the site reconnaissance, the building had been destroyed and replaced with apartments (Courtland Square). The facility is immediately adjacent to Site No. 33. There was no reported release of a hazardous substance or petroleum product and the site has been redeveloped. Therefore, no adverse environmental impacts are anticipated from this facility.

33	PST (0070883) VCP (1450) LPST (112547)	Courtland Square 3210 Louisiana	Adjoining	Southwest/Up- gradient	Y
----	--	---------------------------------------	-----------	---------------------------	---

Comments: The site is listed as a former PST site with three removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	550	Used Oil	Steel	01/01/1963	04/30/1998
2	5,000	Gasoline	Steel	01/01/1963	05/01/1998
3	5,000	Gasoline	Steel	01/01/1963	05/01/1998

An LPST (LPST ID# 112547) was reported in 1997 for Tank #1. It was reported that groundwater had been impacted at that facility but that there were no apparent threats or impacts to receptors; the final concurrence has been issued and case is closed. The LPST was part of the VCP on the property in which soil and groundwater were found to be contaminated with VOCs, metals, and TPH. The VCP done over a 0.5 acre area and was completed in 2004. 602 Elgin and 616 Elgin (which comprise part of the facility) are listed in city directories as a gasoline station from 1960-1970 and as a dry cleaner from 1940-1951, respectively. On the 1924-1950 Sanborn Fire Insurance Map, both Ideal Laundry (and Dry Cleaning) and a gasoline station are present.

The VCP has been completed with the TCEQ, therefore this facility is **considered a historical REC this facility is considered a historical REC and file review at TCEQ is recommended to evaluate whether residual contamination is associated with the IOP that could affect the Project Area.**

- * Figure 2 site numbers correspond to the numbers assigned to the sites in the Radius Report.
- ** Some properties have been demolished/redeveloped, and their distances from the Project Area have been approximated.
- *** The address for Site No. 6 was incorrectly mapped into the Project Area. The site is three miles away from the site.

The following off-site regulated facilities were identified as potential RECs during the review of the regulatory database. The locations of these facilities are shown in Figure 2.

Off-Site Regulatory Listings:

Figure 2 Site No.*	Regulatory Listing (Facility ID)	Facility Name/Address	Distance** (feet)	Direction, Gradient Relative to the Project Area	Potential REC
16	FRSTX (110034549040)	Midtown Agean Auto Works 102 Fairview	140	Southwest/Up-gradient	N
<p>Comments: This facility is included in the FRSTX listings as an auto mechanic shop. At the time of the site reconnaissance, owner stated that he has owned the property since 2004, but that it was another auto mechanic shop before then; though, he did not know of its age.</p> <p>Based on regulatory status, and proximity to the ROW (not adjacent), no adverse environmental impacts are anticipated from the facility.</p>					
17	LPST (117833)	Vacant Property 234 West Gray	100	East/Down-gradient	N
<p>Comments: An LPST (LPST ID# 117833) was reported in 2008 for the facility. No information on the tank is provided. The status of the assessment for the site is incomplete, with no apparent receptors impacted.</p> <p>While final concurrence on the LPST was issued, the assessment was incomplete. However, given the distance from the ROW and the direction of the anticipated groundwater gradient, no adverse environmental impacts are anticipated from the site.</p>					
21	NFRAP (TXD988085478) CERCLIS (TXD988085478)	Allen Parkway Village 1600 Allen Parkway	400	East/Down-gradient	Y
<p>Comments: This facility is a large-scale apartment development. The facility is listed as both a CERCLIS site and a NFRAP site. Constituents of concern are not provided. Discovery was completed on 02/05/1993, with a preliminary assessment completed on 09/24/1993. Site inspection activities (sampling and site characterization) were conducted from 01/02/1994 through 06/27/1994, after which the site was archived. The archival of the site means that hazard level for the site was such that enforcement support was not deemed necessary and no further activity is planned at this site.</p> <p>Given its proximity to the former City of Houston properties, it is possible that the request for support was due to contamination originating from off-site. During the site reconnaissance, the site was a large-scale apartment complex. This facility is considered a historical REC because of the release history. Because of the current regulatory status, the anticipated groundwater flow gradient, and its distance from the ROW, no continuing adverse environmental impacts are anticipated from the site</p>					
23	PST (0031614) LPST (103339)	Centel 3102 Milam	150	Northeast/Cross-gradient	Y

Comments: The facility is listed as a former PST site with one removed tank that is summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	2,000	Unknown	Steel	Not Reported	06/01/1992

An LPST (LPST ID#103339) was listed for the facility for Tank #1. Minor soil contamination was discovered and no remedial action was required. Therefore, it is assumed that residual contamination may remain. At the time of the site reconnaissance, the previous building appeared to have been demolished and a new high-end retail business was present onsite. In the 1970 city directory, the facility appears as the Fisk Electric Co, and electrical equipment containing PCBs may have been stored at the facility. Additionally, the corner of the site (3116) is listed as a gasoline station in the city directories from 1951-1960 and is present on the 1924-1950 Sanborn Fire Insurance Map. There was no obvious evidence of previous site activities at the time of the site reconnaissance.

Based on the final concurrence of the LPST site after finding minor soil contamination, this facility is **considered a historical REC**. Because soil was the only reported media affected and in low concentrations that did not require remedial action; and the location of the property relative to the ROW and anticipated groundwater flow gradient, this historical release is not considered likely to adversely affect the ROW. Therefore, it is **not considered a REC**.

24	PST (003164) PST (0073491)	Baby Giant Food Stores, Houston Zero Cold Storage 2700 Smith	200	Northeast/Cross -gradient	N
----	-------------------------------	--	-----	------------------------------	---

Comments: The facility is listed as a two former PST sites. The first site (Baby Giant Food Stores) had three removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	2,000	Gasoline	Steel	01/01/1972	03/29/1991
2	2,000	Gasoline	Steel	01/01/1972	03/29/1991
3	2,000	Gasoline	Steel	01/01/1972	03/29/1991

The second facility (Houston Zero Cold Storage) had three removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	2,000	Gasoline	Steel	01/01/1972	03/29/1991
2	1,000	Gasoline	Steel	01/01/1972	03/29/1991
3	2,000	Gasoline	Steel	01/01/1972	03/29/1991

At the time of the site reconnaissance, the original structure appeared to have been demolished, and the facility had been redeveloped as commercial properties. Based on the regulatory status as a PST site with no reported releases, no adverse environmental impacts are anticipated from this site.

25	PST (0053669)	H A Franz Co 606 Dennis	200	Northeast/Cross -gradient	N
----	---------------	-----------------------------------	-----	------------------------------	---

Comments: The facility is listed as a former PST site with one removed tank, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	3,000	Gasoline	Steel	01/01/1981	03/29/1993

At the time of the site reconnaissance, the facility was in operation as a commercial vending machine company. Based on the regulatory status as a PST site with no reported leaks, no adverse environmental impacts are anticipated from this site.

27***	IHW (90051)	Paul McCain Typographer 256 West Gray	200	West/Up- gradient	N
-------	-------------	--	-----	----------------------	---

Comments: This facility is an inactive IHW CESQG. At the time of the site reconnaissance, the building was vacant and under restoration. Based on the regulatory status, no adverse environmental impacts are anticipated from this site.

29	PST (0068907) LPST (099730)	Former Billups Station 7938 101 Westheimer	150	Northwest/Up- gradient	Y
----	--------------------------------	---	-----	---------------------------	---

Comments: The facility is listed as a former PST site with three removed tanks, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	10,000	Unknown	Steel	01/01/1961	02/27/1991
2	10,000	Unknown	Steel	01/01/1961	02/27/1991
3	10,000	Unknown	Steel	01/01/1961	02/27/1991

An LPST (LPST ID# 099730) was reported for Tank #1 in 1991. Groundwater was reported to be impacted, but there were no other apparent threats or impacts to receptors. A risk based analysis and site closure request were submitted on 02/19/1997 and the final concurrence was issued on 03/24/1997.

This facility is considered a REC because while the historical LPST case was closed (historical REC status), residual contamination may remain, Based on the site's proximity to the ROW, and the anticipated groundwater flow gradient residual concentrations of groundwater contamination migration may affect the ROW

30	IHW (51264)	Wood Allen Photographers 3505 Louisiana	264	North/Up- gradient	N
----	-------------	--	-----	-----------------------	---

Comments: The facility is listed as an inactive IHW facility. The registration for the facility was inactivated because the facility was registered prior to 1994 and no generated wastes were reported between 1994 and 1996. At the time of the site reconnaissance, the site appeared to be a residential property. Based on the regulatory status, no adverse environmental impacts are anticipated from the site.

31	IOP (297) IOP (415) PST (0059349) VCP (1384) BSA (G001)	Block 92 WR Baker Addition SSBB, Senior Nutrition Center, Webster-City of Houston NWC Cook and Gillette, 1501 West Webster	250-500	East/Down- gradient	Y
----	---	---	---------	------------------------	---

Comments: The facility is comprised of several points in 1500 block of West Webster Street, bounded by Gillette Street and Bailey Street to the west and east, and West Webster Street and Cook Street to the north and south. The facility is also immediately adjacent to the former International Laundry, Inc. facility (Site No. 20) The facility (Senior Nutrition Center) is listed as a former PST site with two removed tanks, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	"0"	Unknown	Steel	Not Reported	11/19/1993
2	"0"	Unknown	Steel	Not Reported	11/19/1993

The facility is listed as undergoing a BSA in 1997, as a VCP site in 2001, and as an IOP site twice in 2002 and 2004. Under the BSA, the site is listed as a Vacant Property/Concrete Rubble Piles with affected soils. The certificate of completion for the BSA was issued on 12/09/1997 after affected soils and concrete were excavated and removed from the facility. The description does not list what the soil contaminants were.

The VCP at the NWC of Cook and Gillette Streets was for VOC, SVOC, and TPH contamination in both the soil and groundwater over an area of "150 by 150 acres". The remedy for the contamination is not reported, nor is the certificate of completion status.

The first IOP for the site was submitted for VOC and TPH contamination in the site's groundwater over an area of one acre on 05/15/02. The certificate of completion was issued on 01/24/03. The second IOP was submitted for VOC contamination in the site's groundwater for an area of 0.34 acres on 02/17/04. The certificate of completion was issued on 10/14/04.

As stated above the facility is immediately adjacent to the former International Laundry, Inc. facility site. Additionally, the 1924-1950 Sanborn Fire Insurance Map shows 1501 West Webster as the Horlock Ice Industries facility. At the time of the site reconnaissance, the NWC of Cook and Gillette Streets was a condominium complex; 1501 West Webster Street had been redeveloped as a playground and dog park.

Due to the well-documented history of contamination of groundwater and soil at the facility, and the facility's former status as a BSA site, this facility is considered a historical REC. Because there were some investigations that did not appear to have certificates of completion, there is the potential for groundwater contamination to adversely affect the Project Area ROW. **Therefore, this facility is considered a REC.**

32	LPST (118678) PST (0062018) LPST (106345)	Former Greater Houston Convention and Visitors Bureau 3300 Main Street	350	Southeast/Down -gradient	N
----	---	--	-----	-----------------------------	---

Comments: The facility is listed as a PST site with two removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	4,500	Gasoline	Steel	03/01/1968	03/08/1993
2	4,500	Gasoline	Steel	03/01/1968	03/08/1993

An LPST (LPST ID#106345) was reported for Tank #1 in 1993. Minor soil contamination was discovered that did not require a remedial action plan. Final concurrence was issued and the case was closed on 04/14/1994. A second LPST (LPST ID#118678) was reported in 2011. No apparent receptors were impacted and the final concurrence is pending documentation of well plugging. At the time of the site reconnaissance, the facility was vacant.

Though the facility is listed as having two LPSTs, the distance from the Project Area, media affected (soil with no groundwater impact reported) and the anticipated groundwater flow gradient are such that no adverse environmental impacts are anticipated from the site.

34	PST (0019179) LPST (114921)	Southwestern Bell Telephone Co., Vacant City Block 3808 Main	450	Southeast/Cross -gradient	N
----	--------------------------------	--	-----	------------------------------	---

Comments: The facility is listed as a former PST site with one removed tank, summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	6,000	Gasoline	FRP	01/01/1982	12/13/1999

An LPST (LPST ID# 114921) was reported for Tank #1 in 1999. Groundwater was reported to be impacted with no apparent threats or impacts to receptors. Final concurrence was issued and the case was closed on 01/30/2002.

Though the facility is listed as having a LPST, the case status, distance from the Project Area ROW and the anticipated groundwater flow gradient are such that no adverse environmental impacts are anticipated.

35	PST (0063146)	Words Mail Service of Texas 2700 Brazos	400	Northwest/Cross -gradient	N
----	---------------	--	-----	------------------------------	---

Comments: The facility is listed as a PST site with two removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	10,000	Gasoline	Steel	08/01/1979	06/07/2007
2	6,000	Gasoline	Steel	08/01/1979	06/07/2007

At the time of the site reconnaissance, the facility was a vacant lot. Based on the regulatory status as a PST site with no reported releases, no adverse environmental impacts are anticipated from this site.

36	DCR (RN103954640)	Pilgrim Cleaners 127 1818 West Dallas	500	West/Up- gradient	N
----	-------------------	---	-----	----------------------	---

Comments: The facility is listed as a dry cleaner drop station. At the time of the site reconnaissance, the facility was no longer a drop station and was instead converted into a carwash (see Section 7). On the 1924-1950 Sanborn Fire Insurance Map, the site is shown as a gasoline station.

Given the regulatory status of the site, and the site's distance from the Project Area ROW, no adverse environmental impacts are anticipated from the site.

37	IHW (20341)	Calico 1803 Taft	450	West/Up- Gradient	N
----	-------------	----------------------------	-----	----------------------	---

Comments: The facility is listed as an inactive IHW SQG facility. Waste for the facility was listed as treated off-site. At the time of the site reconnaissance, the facility had been redeveloped into condominiums.

Given the regulatory status of the site, no release reported, treatment of waste reported at an off-site location, and the site's distance from the project area, no adverse environmental impacts are anticipated from the site.

38	IHW (72467)	Blue Bonnet Printing 2711 Bagby	350	East/Cross- gradient	N
----	-------------	---	-----	-------------------------	---

Comments: The facility is listed as an inactive CESQG IHW facility. The registration for the facility was inactivated because the facility was registered prior to 1994 and no generated wastes were reported between 1994 and 1996. At the time of the site reconnaissance, the facility appeared to be a residential property.

Based on the regulatory status, no adverse environmental impacts are anticipated from the facility.

39	PST (0069796) VCP(1362) APAR (1362)	219 W Gray, 219 West Gray Property, Vacant Lots 219 West Gray	330	East/Down-gradient	N
----	---	---	-----	--------------------	---

Comments: The facility is listed as a PST site with four removed tanks that are summarized below:

Tank ID#	Capacity (gallons)	Contents	Tank Material	Date Installed	Date Removed From Ground
1	1,000	Gasoline	Steel	01/01/1940	06/12/1997
2	1,000	Gasoline	Steel	08/01/1979	06/07/2007
3	1,000	Gasoline	Steel	01/01/1940	06/12/1997
4	1,000	Gasoline	Steel	08/01/1979	06/07/2007

The facility is described as a “gas station” a VCP for 0.22 acres filed in 2001. Soils and groundwater on site were contaminated with VOCs, metals, and TPH. The VCP was completed on 07/02/2002. An APAR related to the VCP for lead and BTEX was submitted for the facility in 2002 and listed as inactive. The facility appears in city directories as a gasoline station from 1940-1960. The gasoline station is also present on the 1924-1950 Sanborn Fire Insurance Map. At the time of the site reconnaissance, the facility had been redeveloped into townhomes.

While there is potentially residual contamination associated with the facility, based on the distance from the Project Area ROW and the anticipated groundwater flow gradient, no adverse environmental impacts are anticipated from the facility.

* Figure 2 site numbers correspond to the numbers assigned to the sites in the Radius Report.

** Some properties have been demolished/redeveloped, and their distances from the Project Area have been approximated.

***Site No. 26 was incorrectly mapped into the Project Area.

Based on distance, regulatory status, topographic relationship to the site, or other site-specific criteria, none of the remaining listed facilities were considered potential RECs.

6.3 STATE OF TEXAS RECORDS REVIEW

A written request to review various public records under the Freedom of Information Act (FOIA) was submitted by Kleinfelder to the City of Houston Fire Department, Department of Health and Human Services, and the TCEQ on January 21, 2013 for the Project Area. Records requested for viewing included UST records, Oil/Gas permits, chemical usage, fires, spills, as-built drawings, building permits, building inspection documents, and other records of environmental significance related to the Project Area. Copies of FOIA requests and responses can be found in Appendix F.

A response dated January 19, 2013 from Ms. Evelyn Phillips of the Department of Health and Human Services stated that no information regarding the Project Area was found in the department’s files.

A response dated February 4, 2013 from Ms. Stacey Harper of the TCEQ stated that no information regarding the Project Area was found in the agency's files

A response dated January 30, 2013 from Ms. Nekiea Corpening of the City of Houston Fire Department stated that four pages of responsive documents were found for the Project Area. The records were received by Kleinfelder on February 6, 2013. Of the listed HAZMAT Chemical Release sites, four were located within 500 feet of the project area and are summarized below:

Date	Address	Chemical Released	Amount Released (Gallons)	Approximate Distance from Site (feet)	Direction, Gradient Relative to the Project Area
12/17/2006	500 Gillette	Diesel	800	Adjoining	West, Up-gradient
03/02/2004	1500 West Dallas	Butyric Acid	Undetermined Amount	300	East, Down-gradient
08/26/2006	206 Drew	Unknown	1	300	North, Down-gradient
02/20/2007	1300 Gillette	Natural Gas	Undetermined Amount	270	East, Down-Gradient

The FOIA request to the City of Houston Fire Department identified a spill of 800 gallons of diesel at 500 Gillette Street in 2006. The address corresponds to the intersection of Allen Parkway and Gillette Street. After a request for addition information was submitted, the Fire Department responded stating that the Custodian of Records did not locate records for 500 Gillette on December, 17 2006 or from 2005 through the present. The custodian stated that either the date or address was loaded wrong into the Hazmat Search Database by the chief at that time.

6.4 OIL AND GAS WELL AND PIPELINE RECORDS

The Railroad Commission of Texas (RRC) maintains maps of exploration and production oil and gas well locations. No pipelines or wells were identified within or near the Project Area.

6.5 SUMMARY OF RECORDS REVIEW

Based on a review of the regulatory database obtained from GeoSearch on December 28, 2012, there were 2 DRC sites, 10 IHW sites, 12 LPSTs, 24 PSTs, 1 Tier II site, 9 FRSTX sites, 1 NOV site, 2 SPILLS sites, 4 IOP sites, 1 CERCLIS site, 1 RCRA sites, 1 NPDES site, 1 BSA site, and 5 VCP sites, 2 APAR sites, and 1 GWCC site reported within 500 feet of the Project Area. Based on the regulatory statuses of these sites, no adverse environmental impacts are anticipated except for the following potential REC or REC facilities:

Figure 2 Site No.	Regulatory Listing (Facility ID)	Facility Name/Address
1	GWCC (105219) IHW (77614) LPST (092363) LPST(105219) NOV (RN102459492) PST (0033502) SPILLS (9/6/94015) TIER II (1RK81Z006M63) TIER II (1SLA0Z003Q7S) VCP (2503) FRSTX (110041811331) FRSTX (110034227147) APAR (T1826)	Federal Reserve Bank/City of Houston Public Works and Engineering Fleet Maintenance Facility/San Felipe Park 801 Gillette

29	PST (0068907) LPST (099730)	Former Billups Station 7938 101 Westheimer
31	IOP (297) IOP (415) PST (0059349) VCP (1384) BSA (G001)	Block 92 WR Baker Addition SSBB, Senior Nutrition Center, Webster-City of Houston NWC Cook and Gillette, 1501 West Webster

A FOIA request to the City of Houston Fire Department identified a spill of 800 gallons of diesel at 500 Gillette Street in 2006. The address corresponds to the intersection of Allen Parkway and Gillette Street, adjoining the ROW. After a request for addition information was submitted, the Fire Department responded stating that the Custodian of Records did not locate records for 500 Gillette on December, 17 2006 or from 2005 through the present. The custodian stated that either the date or address was loaded wrong into the Hazmat Search Database by the chief at that time.

The following adjoining and nearby facilities are considered historical RECs. Based on information reviewed, these facilities do not appear to have soil or groundwater contamination considered likely to affect the ROW. However, additional information from TCEQ may be available about residual concentrations of contaminants left in place following completion of remedial activities associated with the hazardous substance or petroleum product release reported at these facilities.

7 FACILITY RECONNAISSANCE

7.1 METHODOLOGY AND LIMITING CONDITIONS

On January 18, 2013 a facility reconnaissance of the site was performed by Ms. Artemis Harbert and Mr. Jordan Smith of Kleinfelder. Observations were made regarding the presence of hazardous substances and petroleum products, and obvious evidence of past spills or releases on the site.

Weather conditions on the day of the site visit were clear and sunny.

The facility reconnaissance included a visual inspection that was performed by driving and walking the ROW and adjoining properties. The corridor location is depicted on a Project Area Map included as Figure 3. Selected photographs are included in Appendix H.

Adjoining properties were visually inspected to the extent possible. Access restrictions which limited observations within the ROW included parked vehicles. There were also fences that limited observations of some adjoining properties. Road construction was present between the 1000 and 1100 block of Genesee and at the intersection of Tuam Avenue and Bagby Street at the time of the site reconnaissance.

7.2 PROJECT AREA OBSERVATIONS

Current Use of Project Area

The Project Area is defined as the nine street segments, totaling approximately 12,700 feet in length. The new storm sewer lines will be constructed underneath the pavement. The Project Area passes through mixed residential and commercial areas. Indicators of recent redevelopment were observed throughout the area.

Hazardous Substances and Petroleum Product Use and Storage

There was no evidence (observation or odors) of hazardous substances or petroleum product use and storage noted within the Project Area. There were no chemical storage or chemical mixing areas observed. There were no drums or other containers of hazardous substances or petroleum products observed. There was no industrial waste treatment equipment observed.

Solid and Hazardous Wastes

There was no evidence of hazardous wastes noted within the Project Area. Unauthorized dumping of garbage, yard waste, used tires, and old furniture was observed at the intersection of Genesee Street and O'Neil Street. There was no burned or buried debris observed.

Loading/Unloading Areas

There were no loading/unloading areas or docks for businesses located adjacent to the ROW that had stained pavement.

Soil Piles

There were no soil piles observed within the Project Area.

Fill Dirt From A Known or Unknown Source

There was no obvious evidence of fill dirt observed within the Project Area.

Landfills

There was no obvious evidence of a landfill noted within the Project Area.

Surface Impoundments, Pits, Ponds, Lagoons

There were no obvious surface impoundments noted within the Project Area.

Underground Storage Tanks

There were several gasoline stations adjoining the Project Area, but there was no obvious evidence of underground storage tanks noted within the ROW. There were no sumps or clarifiers observed.

Aboveground Storage Tanks

There was no obvious evidence of any aboveground storage tanks noted within the Project Area.

Wastewater

No industrial process wastewater discharges were noted within the Project Area. The area businesses and residences are connected to the city sanitary sewer system.

Storm Water and Surface Water Drainage

Storm sewers were observed throughout the entirety of the Project Area. Storm drains were noted along Gillette Street, West Dallas Street, Genesee Street, Tuam Avenue, Smith Street, Elgin Avenue, and Milam Street. Surface runoff along the streets was conveyed primarily by paved and unpaved gutters, though a segment of Genesee between Dennis Street and Fairview Street had drainage ditches along either side of the street with 1-foot diameter culverts. No evidence of contaminated storm water was noted during the site reconnaissance.

Air Emissions

Other than dust related to road construction at the intersection of Tuam and Bagby, there were no obvious sources of air emissions noted associated with businesses within the Project Area at the time of the site reconnaissance.

Stained Soil, Stained Concrete, and Stressed Vegetation

There was no stained soil or stained concrete that was inconsistent with *de minimis* staining expected for an active. No stressed vegetation was observed the time of the site reconnaissance.

Electric Transformers, Capacitors and other Polychlorinated Biphenyls (PCBs) Sources

There were numerous pole-mounted transformers throughout the Project Area. The transformers were not marked as to their polychlorinated biphenyl content (e.g., PCB-free, non-PCB). No obvious evidence of a release was noted in the areas of the pole-mounted transformers.

Railroads

There were no railroads within the Project Area.

Water Wells

There was no obvious evidence of water supply wells observed in the Project Area. Monitoring wells were observed on properties adjoining the ROW. There were no irrigation or domestic water wells, or dry wells observed.

Oil and Gas Wells

There was no obvious evidence of oil and gas wells observed in the Project Area.

Pipelines

There was no obvious evidence of pipelines observed in the Project Area.

Utilities

Overhead power lines were observed throughout the Project Area. Below grade vaults observed were associated with water, sewer, lighting, and other utilities.

7.3 ADJOINING AND SURROUNDING PROJECT AREA RECONNAISSANCE

A facility reconnaissance included a visual inspection of the adjoining and surrounding properties by walking the area and by vehicle. Adjoining properties were visually inspected to the extent possible from the sidewalk adjacent to the ROW. There were fences that limited observations of adjoining properties. Road construction was present between the 1000 and 1100 block of Genesee and at the intersection of Tuam Avenue and Bagby Street at the time of the site reconnaissance.

Most of the Project Area was a mix of residential and commercial businesses. Residences observed were comprised of single family homes and condominiums, though recently constructed high-rises were observed along Gillette and Elgin. Commercial properties consisted of boutiques, restaurants, offices, automotive mechanic shops, convenience stores, and dry cleaners. Adjoining commercial facilities that typically store and/or use hazardous chemicals and petroleum products as well as locations selected prior to the facility reconnaissance from the Radius Report, Sanborn Fire Insurance Maps, and City Directories as places of interest are tabulated and summarized below. Interviews were conducted and records of communication are included in Appendix G.

Site/Address	Description
San Felipe Park SEC of Allen Parkway and Gillette	The park did not appear open to the public and was overgrown with weeds and tall grass at the time of the site reconnaissance. Three 55-gallon drums were observed within the fenced portion of the park outside of the Project area. Labels were not visible from the fence line; though, one of the drums appeared to have "Purge Water, PWE" written on it in yellow paint pen. All three of the drums appeared to be in good condition. This site is listed in the Radius Report as having an APAR under the address 801 Gillette.

<p>Vacant Lot (Former Public Works and Engineering Fleet Maintenance Facility) 801 Gillette</p>	<p>The structures once present on the property have been demolished; however, the site is still paved in concrete and some remaining foundations are visible. Grass overgrowth was observed coming through the concrete on the northern and central portions of the site. Four monitoring wells (“MW-1”, “MW-2”, “MW-3”, “MW-5”, and “TMW-1”) and six plugged monitoring wells were observed onsite, concentrated primarily in the northern and eastern portions of the site. Three rusted pole-mounted transformers were observed near the site’s entrance along Hopson Street; the transformers were not labeled “non-PCB”, but there was an outline of where a label may have been present on all three units. No stressed vegetation was observed underneath the transformers. Two water valves were observed onsite. The water well for the site listed in the Radius Report was not located during the reconnaissance. The southern portion of the property that is on the southern side of Hopson Street was locked. City vehicles were staged in the lot.</p> <p>As stated in Section 4, this property has a long, documented history of releases of hazardous substances or petroleum products as an LPST, GWCC, VCP, IHW, and SPILLS site. It appears in both the obtained city directories (as 810 Gillette) and the 1924-1950 Sanborn Fire Insurance Maps; the activities at the property date back to at least 1950.</p>
<p>Federal Reserve Bank of Dallas, Houston Branch (Former Jefferson Davis Hospital), 1801 Allen Parkway</p>	<p>The former hospital has been demolished and the property is currently the Federal Reserve Bank Building. There was no obvious evidence of the former LPST or any past site activities apparent. The grounds appeared well maintained.</p>
<p>New Condominium Construction (Former City of Houston Public Works and Engineering Facility) 812 Gillette</p>	<p>Former structures at the property have been demolished and a new condominium was under construction at the time of the site reconnaissance.</p>
<p>Aquilina Tire & Supply 1712 West Dallas</p>	<p>This is an operating auto mechanic shop. According to an interview conducted with Mr. Aquilina who identified himself as the owner, the shop has been in his family since the 1920s. The owner stated that there were four gasoline USTs at the property that were installed sometime in the 1960s. They were filled in place after preliminary sampling in the 1990s. Used oil is kept in an AST that is emptied when needed. Other generated waste is collected by Safety Kleen. Spray painting is conducted in a ventilated booth onsite. The owner did not know of any spills or releases of hazardous substances or petroleum products that have occurred at the site.</p> <p>During the site reconnaissance, four patches were observed in the concrete floor of the shop that reportedly corresponds to the locations of the USTs.</p> <p>The site is present on the 1924-1950 Sanborn Map as a combination auto shop and gasoline station and is listed as a PST facility in the Radius Report.</p>

<p>Xtreme Hand Car Wash 1818 West Dallas</p>	<p>The facility is a presently a commercial carwash. An employee onsite at the time of the facility reconnaissance stated that the site was once a dry cleaning drop station and was a gasoline station before that. She had no knowledge of any former USTs at the site. She stated that water from the car wash is drained into a sump that is emptied approximately every three months. Solvents are rarely used to clean carpets, but no other hazardous chemicals are used.</p> <p>The facility is present on the 1924-1950 Sanborn Map as a combination auto shop and gasoline station. No obvious evidence of a former UST system was observed.</p>
<p>Vacant Building (Former Lucky Food Mart) 1019 Gillette</p>	<p>The facility was vacant at the time of the site reconnaissance. The facility appears in city directories as a food store from 1970-2008. The structure appeared to be a converted house, and no evidence of a gasoline station was observed on the site.</p>
<p>Townhomes (Former Dry Cleaner) 219 West Gray</p>	<p>The property is presently townhomes, but appears in the 1970 city directory as a dry cleaner. Both are present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Townhomes (Former Gasoline Station, Former Dry Cleaner) 227 West Gray</p>	<p>This former VCP, APAR site is now townhomes. The property appears in city directories as a gasoline station from 1940-1970 and a dry cleaner as early as 1970. Both are present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Vacant Lot (Former Gasoline Station, Former Auto Mechanic Shop) 220 West Gray</p>	<p>The property was a vacant lot at the time of site reconnaissance, and all previous structures have been demolished. No evidence of a former UST system was observed. The property is listed in the city directories from 1940-2008 as a gasoline station/auto mechanic and appears on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Vacant Building 234 West Gray</p>	<p>The property is a vacant commercial building. There was no obvious evidence of the former LPST or any past activities at the time of the site reconnaissance.</p>
<p>Buddhist Temple (Former Auto Shop, Former Gasoline Station) 240 West Gray</p>	<p>The property has a corrugated metal shack that advertised it as a Buddhist Temple. Based on the city directories, this site was an auto shop/ gasoline station from 1940-1951. It also appears on the 1924-1950 Sanborn Fire Insurance Map. No evidence of a former UST system was observed</p>
<p>Vacant Building (Former Dry Cleaner) 244 West Gray</p>	<p>The building was under restoration at the time of the site reconnaissance, but is listed in city directories as a dry cleaner in 1951 and is present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Vacant Lot (Former Fredrick Scaffold, Former Public Laundries, Former Webb Oil Co./Ace Oil Co.) 253, 255, 259 West Gray</p>	<p>All of the former structures on this block have been demolished. The lot is still paved and was fenced at the time of site reconnaissance. A monitoring well was visible from the adjacent sidewalk near the center of the property The property has a record of a PST for Fredrick Scaffold at 255 West Gray. The 1951 city directory lists 253 West Gray as a dry cleaner, and 259 is listed as Webb Oil Co./Ace Oil Co. from 1960-1971</p>
<p>Carnegie Vanguard High School (Former Gasoline Station) 270 West Gray</p>	<p>A high school has been constructed on the property of a former service station listed in city directories in 1940.</p>
<p>Restaurant (Former Gasoline Station) 1901 Taft</p>	<p>A former gas station noted on the 1924-1950 Sanborn Fire Insurance Map has been redeveloped into a Mexican restaurant. The original building is still present but has been renovated. No obvious evidence of a former UST system was observed.</p>

<p>Redeveloped Mixed Use Commercial-Residential Building (Former International Laundry Machinery, Inc., Former Public Laundries, Inc. Facility) 1601 West Webster</p>	<p>The former International Laundry Machinery, Inc./ Public Laundries, Inc. facility is listed as a VCP site and has been redeveloped into a mixed commercial-residential building that incorporates parts of the original facility structure into its design. The facility is present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Park (Former Horlock Ice Industries Facility) 1500 Block of West Webster</p>	<p>This park is the former location of the Horlock Ice Industries facility. The park appeared to be recently developed. The area surrounding the property consists of redeveloped condominiums.</p> <p>The property is listed as an IOP, PST, VCP, and BSA site in the Radius Report and is present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Condominiums (Former Auto Mechanic Shop) 1904 Genesee</p>	<p>The former auto mechanic shop listed in the city directory has been redeveloped into condominiums. The shop appears in the 1940 city directory. No obvious evidence of past operations was observed at the property.</p>
<p>Redeveloped Residential Building (Former Uniform Factory, Former Houston Lighting and Power Facility, Former Angelica Healthcare Services Group) 1919 Mason</p>	<p>The former industrial/healthcare facility has been redeveloped into a residential building that incorporates parts of the original structure into the design.</p> <p>The property is listed as a SPILLS and former PST site, and the "Uniform Factory" is present in the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Midtown Agean Auto Works 102 Fairview</p>	<p>This is an operating auto mechanic shop. The owner, Mr. Kavourgias, stated in an interview at the time of the site visit that he has owned the property since 2004, but that it was another auto shop before then; although, he did not know of its age. He was not aware of any USTs previously present at the site and stated that drums that are used to store waste oil and spent chemicals are stored outside of the shop under a covered awning. He stated that he had no knowledge of any spills at the property.</p> <p>During the site reconnaissance, two rectangular patches in the concrete outside of the shop were apparent. It is unknown if these patches correspond to USTs that may have been present.</p>
<p>Ronnie Jackson Mercedes 221 Tuam</p>	<p>This is an active auto mechanic shop and used car dealership. The owner, Mrs. Jackson, stated that the property had been a mechanic's shop since the 1950s and was owned by Mr. Jackson's grandfather. She had no knowledge of any USTs at the site. Waste oil and chemicals are stored in ASTs and are collected regularly. She stated that she had no knowledge of any spills at the site.</p>

<p>Sunny Food Store (Former Stop 'N Go) and Downtown Cleaners 305 Tuam</p>	<p>This is a shopping complex that contains a convenience store and a dry cleaner/Laundromat. Six plugged monitoring wells were observed in the parking lot.</p> <p>The convenience store is a listed LPST, PST, and DCR site. An employee at the store stated that monitoring at the site stopped "15 years ago", but the gentleman's English skills were limited. Ms. Tran, the owner of the dry cleaner/Laundromat, stated that the facility is only a drop site, that no dry cleaning occurs on the premises, and he confirmed that the plugged monitoring wells were related to the former gas station.</p>
<p>Restaurant (Former Dry Cleaner) 312 Tuam</p>	<p>This facility is a restaurant that appeared to be constructed recently. There was no visible evidence of the former dry cleaner listed on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Vacant Commercial Building 2814 Bagby</p>	<p>This building is listed as a PST site and appeared to be vacant at the time of the site reconnaissance.</p>
<p>Silvio's Autohouse 401 Tuam</p>	<p>This is an active auto mechanic shop. Mr. Bucheler, the owner, stated at the time of the facility reconnaissance that the facility had been a garage since 1953 and that all ASTs are stored inside on a concrete floor. Waste oil and spent chemicals are removed regularly. He had no knowledge of any USTs or spills or releases.</p>
<p>Conoco Station/Car Spa/Express Lube 2801 Brazos</p>	<p>This is an active gas station/carwash with an attached mechanic shop. A manager stated that the facility has been in operation for at least 15 years and inspections for leaks are conducted daily. The carwash process water is reused, and he stated that he did not know of any spills or releases.</p> <p>Covers for two USTs were observed in the parking area. Two monitoring wells were also observed, but if the facility is not listed in the Radius Report as an LPST.</p>
<p>Construction Lot (Former Fleet Fueling Facility, Former Gasoline Station, and Former Auto Mechanic Shop) 3101 Smith, 3315 Smith, 621 Elgin</p>	<p>The entire facility has been excavated to approximately 15 feet below the ground surface on its southern and eastern side at the time of the site reconnaissance. The facility is listed in the Radius Report as a former PST site. The facility appears as a gasoline station and an auto mechanic shop on the 1924-1950 Sanborn Fire Insurance Map. There was no visible evidence of the former gasoline station or prior activities.</p>
<p>Condominiums (Former Billups Station) 101 Westheimer</p>	<p>The facility is condominiums. There was no obvious evidence of the former gasoline station and LPST observed at the time of the site reconnaissance.</p>
<p>Parking Lot (Former Gasoline Station) 419 Elgin</p>	<p>The facility is currently a vacant lot used as a parking area. In the 1924-1950 Sanborn Fire Insurance Map, a gasoline station is present. At the time of the site reconnaissance, no obvious evidence of former PSTs was observed.</p>
<p>Social Security Administration Building (Former Bee Line Corporation) 501 Elgin</p>	<p>The facility is currently the Social Security Administration building. The original building is still present but has been renovated. There was no obvious evidence of a former PST system.</p>

Bar and Grill (Former Gasoline Station, Former Auto Mechanic Shops) 502 Elgin	The facility has been redeveloped as a bar and grill. The original building is still present but has been renovated. The facility appears in cities directories from 1989-1997 as a mechanic shop and is present on the 1924-1950 Sanborn Fire Insurance Map as a gasoline station.
Restaurant and Shops (Former Vacant Property) 514 Elgin	This property was an IOP site that has been redeveloped into shops and restaurants. There was no obvious evidence of previous facility activities at the time of the site reconnaissance.
Courtlandt Square Apartments (Former Gasoline Station, Former Ideal Laundry and Dry Cleaning, Former Nationwide Disposal Facility) 3210 Louisiana, 616 Elgin, 602 Elgin, 3223 Smith	The facility is an apartment complex that is listed as a LPST and VCP site in the Radius Report. Additionally, the facility was once Nationwide Disposal (IHW) and appeared in city directories as a gasoline station from 1960-1970 and as a dry cleaner from 1940-1951. On the 1924-1950 Sanborn Fire Insurance Map, both Ideal Laundry (and Dry Cleaning) and a gasoline station are present. There was no obvious evidence of the former LPST or previous facility activities at the time of the site reconnaissance.
Shopping Center (Former Gasoline Station) 719 Elgin	The facility is a high-rise shopping center. The facility is listed as a gasoline station in the 1940 city directory. There was no evidence of prior facility activities at the time of the site reconnaissance.
High Fashion Home (Former Mellon Mortgage Company Site) 3100 Travis	The facility is an upscale furniture store. There was no obvious evidence of the former PST site or previous activities at the time of the site reconnaissance.
High Fashion Fabrics (Former Centel Facility, Former Gasoline Station) 3102, 3116 Milam	The facility is an upscale fabrics store. The former Centel PST, LPST site and the former Shine Service Station have been demolished. The facility is listed as a service station in the city directories from 1951-1960 and is present on the 1924-1950 Sanborn Fire Insurance Map. There was no obvious evidence of previous activities at the time of the site reconnaissance.
Music Store (Former H A Franz Co., Former Auto Mechanic Shop, Former Paint and Body Shop) 3309, 3313, 3315 Milam	This is a music store and is listed as an LPST. Additionally, the facility appeared as auto mechanic shops in the city directories from 1951-1970. At the time of the site reconnaissance, the facility was comprised of a gated parking area and a main building. The parking area was inaccessible; however, a plugged monitoring well was observed in the parking area through the fence.
Vacant Lot (Former Gasoline Station) 3316 Milam	The facility is a vacant lot. All former structures have been demolished, but the lot is still mostly paved and some foundations were still visible. A plugged iron manhole that read "Grease Here" was observed near the center of the site. The site is listed as a gasoline station in the city directories from 1940-1970 and is present on the 1924-1950 Sanborn Fire Insurance Map.
Vacant Lot (Former Gasoline Station and Auto Mechanic Shop) 3501 Milam	The facility is a vacant lot, and all former structures have been demolished. The facility is gated and was inaccessible. In the 1940 city directory, the facility is listed as a gasoline station. The gasoline station is also present on the 1924-1950 Sanborn Fire Insurance Map. There was no evidence of prior activities at the time of the site reconnaissance.
Parking Lot (Former Auto Mechanic Shop) 3508 Milam	The facility is a parking lot. Based on the city directories, an auto mechanic shop was present on the site from 1981-1997. There was no evidence of prior activities at the time of the site reconnaissance.

Copy Source (Arrow Graphics) 3511 Milam	This facility is listed in the Radius report as an inactive IHW site. A Copy Source has taken over the space.
Parking Lot (Former Gasoline Station) 3715 Milam	This parking lot is listed in the city directories from 1940-1960 as a gasoline station. It is also present in the 1924-1950 Sanborn Fire Insurance Map. There was no evidence of a PST system at the time of the site reconnaissance.
Vacant Building (Former Greater Houston Convention and Visitors Bureau Facility) 3300 Main	This vacant building is listed as an LPST site. There was no obvious evidence of the former LPST.

7.4 SUMMARY OF SITE OBSERVATIONS

On January 18, 2013 a facility reconnaissance of the Project Area was performed by Ms. Artemis Harbert and Mr. Jordan Smith of Kleinfelder. Observations were made regarding the presence of hazardous substances and petroleum products, and obvious evidence of past spills or releases on the Project Area. The facility reconnaissance was performed by driving and walking the Project Area. Access restrictions which limited observations along the ROW included parked vehicles. Road construction was present between the 1000 and 1100 block of Genesee and at the intersection of Tuam Avenue and Bagby Street at the time of the site reconnaissance.

Unauthorized dumping was observed in the Project Area on the sidewalk at the northeast corner of Genesee Street and O'Neil Street. The materials consisted of garbage, yard waste, used tires, and old furniture. Storm drains were observed throughout the Project area along curbs. Storm drains reportedly drain to Buffalo and Brays Bayous, according to the City of Houston Public Works an Engineering Geographic Information and Management System. Airborne dust due to roadway construction was observed at the intersection of Bagby Street and Tuam Avenue and limited visibility in the immediate area.

Most of the Project Area was a mix of residential and commercial businesses. Residences observed were comprised of single family homes and condominiums, although recently constructed high-rises were observed along Gillette and Elgin. Commercial properties consisted of boutiques, restaurants, automotive mechanic

shops, convenience stores, and dry cleaners. Hazardous substance and petroleum product use and storage is considered likely within the Project Area from the following facilities based on site observations and preliminary review prior to the facility reconnaissance of historical and regulatory data:

Site Name/Address	Description
<p>San Felipe Park SEC of Allen Parkway and Gillette</p>	<p>The park did not appear open to the public and was overgrown with weeds and tall grass at the time of the site reconnaissance. Three 55-gallon drums were observed within the fenced portion of the park. Labels were not visible from the fence line; though, one of the drums appeared to have "Purge Water, PWE" written on it in yellow paint pen. All three of the drums appeared to be in good condition. This site is listed in the Radius Report as having an APAR under the address 801 Gillette.</p>
<p>Vacant Lot (Former Public Works and Engineering Fleet Maintenance Facility) 801 Gillette</p>	<p>The structures once present on the property have been demolished; however, the site is still paved in concrete and some remaining foundations are visible. Grass overgrowth was observed coming through the concrete on the northern and central portions of the site. Four monitoring wells ("MW-1", "MW-2", "MW-3", "MW-5", and "TMW-1") and six plugged monitoring wells were observed onsite, concentrated primarily in the northern and eastern portions of the site. Three rusted pole-mounted transformers were observed near the site's entrance along Hopson Street; the transformers were not labeled "non-PCB", but there was an outline of where a label may have been present on all three units. No stressed vegetation was observed underneath the transformers. Two water valves were observed onsite. The water well for the site listed in the Radius Report was not located during the reconnaissance. The southern portion of the site that is on the southern side of Hopson Street was locked. City vehicles were staged in the lot.</p> <p>As stated in Section 4, this site has a long, documented history of contamination as an LPST, GWCC, VCP, IHW, and SPILLS site. It appears in both the obtained city directories (as 810 Gillette) and the 1924-1950 Sanborn Fire Insurance Maps; the activities at the site date back to at least 1950.</p>
<p>Aquilina Tire & Supply 1712 West Dallas</p>	<p>This is an operating auto mechanic shop. According to the owner, the shop has been in his family since the 1920s. The owner stated that there were four gasoline USTs at the site that were installed sometime in the 1960s that, after preliminary sampling, were filled in place. Used oil</p>

	<p>is kept in an AST that is emptied when needed. Other generated waste is collected by Safety Kleen. Spray painting is conducted in a ventilated booth onsite. The owner did not know of any spills or releases that have occurred at the site.</p> <p>During the site investigation, four patches were observed in the concrete floor of the shop that correspond to the locations of the USTs.</p> <p>The site is present on the 1924-1950 Sanborn Map as a combination auto shop and gasoline station and is listed as a PST site in the Radius Report.</p>
<p>Vacant Lot (Former Fredrick Scaffold, Former Public Laundries, Former Webb Oil Co./Ace Oil Co.) 253, 255, 259 West Gray</p>	<p>All of the former structures on this block have been demolished. The lot is still paved and was fenced at the time of site reconnaissance. A monitoring well was visible from the adjacent sidewalk near the center of the site. The site has a record of a PST for Fredrick Scaffold at 255 West Gray. The 1951 city directory lists 253 West Gray as a dry cleaner, and 259 is listed as Webb Oil Co./Ace Oil Co. from 1960-1971</p>
<p>Redeveloped Mixed Use Commercial-Residential Building (Former International Laundry Machinery, Inc., Former Public Laundries, Inc. Facility) 1601 West Webster</p>	<p>The former International Laundry Machinery, Inc./Public Laundries, Inc. facility is listed as a VCP site and has been redeveloped into a mixed commercial-residential building that incorporates parts of the original facility structure into its design.</p>
<p>Park (Former Horlock Ice Industries Facility) 1500 Block of West Webster</p>	<p>The adjacent dog park is the former site of the Horlock Ice Industries facility. The dog park appeared to be recently developed. The area surrounding the two sites consists of redeveloped condominiums. The property is listed as an IOP, PST, VCP, and BSA site in the Radius Report and are present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Ronnie Jackson Mercedes 221 Tuam</p>	<p>This is an active auto mechanic shop and used car dealership. The owner stated that the site had been a mechanic's shop since the 1950s and was owned by Mr. Jackson's grandfather. She had no knowledge of any USTs at the site. Waste oil and chemicals are stored in ASTs and are collected regularly. She had no knowledge of any spills at the site.</p>
<p>Sunny Food Store (Former Stop 'N Go) and Downtown Cleaners 305 Tuam</p>	<p>This is a shopping complex that contains a convenience store and a dry cleaner/Laundromat. Six plugged monitoring wells were observed in the parking lot of the site.</p> <p>The convenience store is a listed LPST, PST, and DCR site. An employee at the store stated that monitoring at the site stopped "15 years ago", but the gentleman's English skills were limited. The</p>

	owner of the dry cleaner/Laundromat stated that the site is only a drop site and that no dry cleaning occurs on the premises and confirmed that the plugged monitoring wells were related to the former gas station.
Silvio's Autohouse 401 Tuam	This is an active auto mechanic shop. The owner stated that the site had been a garage since 1953 and that all ASTs are stored inside on a concrete floor. Waste oil and spent chemicals are removed regularly. He had no knowledge of any USTs or spills or releases at the site.
Condominiums (Former Billups Station) 101 Westheimer	The property is now condominiums but is listed in the Radius report as and LPST site. There was no obvious evidence of the former gasoline station and LPST observed at the time of the site reconnaissance.
Social Security Administration Building (Former Bee Line Corporation) 501 Elgin	The site is currently the Social Security Administration building. The original building is still present but has been renovated. There was no obvious evidence of a former PST system.
Restaurant and Shops (Former Vacant Property) 514 Elgin	This site was an IOP site that has been redeveloped into shops and restaurants. There was no obvious evidence of previous site activities at the time of the site reconnaissance.
Courtlandt Square Apartments (Former Gasoline Station, Former Ideal Laundry and Dry Cleaning, Former Nationwide Disposal Facility) 3210 Louisiana, 616 Elgin, 602 Elgin, 3223 Smith	The property is an apartment complex that is listed as a LPST and VCP site in the Radius Report. Additionally, the site was once Nationwide Disposal (IHW) and appeared in city directories as a gasoline station from 1960-1970 and as a dry cleaner from 1940-1951. On the 1924-1950 Sanborn Fire Insurance Map, both Ideal Laundry (and Dry Cleaning) and a gasoline station are present. There was no obvious evidence of the former LPST or previous site activities at the time of the site reconnaissance.
High Fashion Fabrics (Former Centel Facility, Former Gasoline Station) 3102, 3116 Milam	The property is an upscale fabrics store. The former Centel PST, LPST site and the former Shine Service Station have been demolished. The site is listed as a service station in the city directories from 1951-1960 and is present on the 1924-1950 Sanborn Fire Insurance Map. There was no obvious evidence of previous site activities at the time of the site reconnaissance.
Music Store (Former H A Franz Co., Former Auto Mechanic Shop, Former Paint and Body Shop) 3309, 3313, 3315 Milam	This is a music store and is listed as an LPST. Additionally, the site appeared as auto mechanic shops in the city directories from 1951-1970. At the time of the site reconnaissance, the site was comprised of a gated parking area and a main building. The parking area was inaccessible; however, a plugged monitoring well was observed in the parking area through the fence.

<p>Vacant Lot (Former Gasoline Station) 3316 Milam</p>	<p>The property is a vacant lot. All former structures have been demolished, but the lot is still mostly paved and some foundations were still visible. A plugged iron manhole that read "Grease Here" was observed near the center of the site.</p> <p>The site is listed as a gasoline station in the city directories from 1940-1970 and is present on the 1924-1950 Sanborn Fire Insurance Map.</p>
<p>Parking Lot (Former Auto Mechanic Shop) 3508 Milam</p>	<p>The site is a parking lot. Based on the city directories, an auto mechanic shop was present on the site from 1981-1997. There was no evidence of prior site activities at the time of the site reconnaissance.</p>
<p>Parking Lot (Former Gasoline Station) 3715 Milam</p>	<p>This parking lot is listed in the city directories from 1940-1960 as a gasoline station. It is also present in the 1924-1950 Sanborn Fire Insurance Map. There was no evidence of a PST system at the time of the site reconnaissance.</p>

8 INTERVIEWS

Kleinfelder conducted interviews as part of this Phase I ESA to aid in the evaluation of past and current Project Area use with regard to hazardous substances and petroleum products. Key Site Managers, likely to have information about historical and current land uses and other individuals about land use along the corridor were interviewed.

8.1 INTERVIEW WITH PROJECT AREA REPRESENTATIVE

As stated in Section 3, a user questionnaire was completed by Mr. Stephen Sparks of HR Green regarding his knowledge of the Project Area. According to the information provided, no deed restrictions, property price reductions, past environmental concerns, previously produced environmental reports, or knowledge of pending, threatened, or past litigation regarding the Project Area were known by the Client.

8.2 INTERVIEW WITH OCCUPANTS

The Project Area consists of street segments in the City of Houston ROW; therefore, there were no occupants to interview during this assessment.

8.3 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Local government officials were contacted to obtain further information about environmental enforcement actions pending or ongoing at the site and adjacent facilities, or relevant permits (e.g., building, air quality, well abandonment, etc.) for the Project Area and adjoining properties under the FOIA. Information obtained is discussed in Section 6.3 of this report.

8.4 INTERVIEWS WITH ADJACENT SITE REPRESENTATIVES

During the course of the site reconnaissance, representatives of adjacent filling stations, auto industrial sites up to 500 feet from the Project Area were interviewed regarding petroleum products and hazardous substances at their facility. Interviews are summarized below; Records of Communication are included in Appendix G.

Figure 2 Site No.	Facility Name/Address:	Person Interviewed:	Summary:
10	Sunny Food Store (Former Stop N' Go) 305 Tuam	Employee	The interview spoke very limited English. He stated his is a convenience store and used to be a gas station. Monitoring stopped "15 years" ago.
10	Downtown Cleaners 305 Tuam	Ms. Christine Tran, Owner	She stated that dry cleaning is done onsite, only the Laundromat and dry cleaning drop station. She confirmed that the plugged monitoring wells in the parking lot were from the former filling station.
12	Aquilina Tire & Supply 1712 West Dallas	Mr. Marion Aquilina, Owner	He stated that the business had been in his family since at least the 1920s and had been a gas station since at least the 1960s. Four USTs are present. According to him, when the area around the tanks was tested and no contamination was found around them, the tanks were filled in place. ASTs are emptied by Safety Kleen and cars are not washed onsite. Lifts are above ground. Painting occurs onsite in a permitted booth. He had no knowledge of any historical spills or releases.
19	Car Spa 23 2801 Brazos	"Sam", Manager	He stated that the site has been a gas station for at least 15 years and that inspections for leaks are conducted daily; the car wash tunnel is also inspected daily. The water from car wash reused. The site has two gasoline USTs and aboveground hydraulic lifts. He did not know of any historical spills or releases.
16	Agean Autoworks 102 Fairview	Mr. Alex Kavourgias, Owner	He stated that the site was a garage before 2004 and that he did not know of any previous USTs onsite. Hydraulic lifts are above ground. Waste oil and chemicals are collected, stored in drums on side of shop.
39	Xtreme Hand Car Wash (Former Pilgrim Cleaners) 1818 West Dallas	"Tina", Employee	She stated that prior to being a car wash that it was a dry cleaner drop station, and service station at some point before that. She stated that solvents are rarely used, except on carpet stains and that the water drains to a sump that is emptied approximately every three months. She had no knowledge of the former UST system.
NA	Ronnie Jackson Mercedes 221 Tuam	Mrs. Anna Jackson, Owner	She stated that the building had been a mechanic's shop since at least 1950, owned by Mr. Jackson's grandfather. She had no knowledge of any USTs. Lifts are above ground. Waste oil is collected by an independent company.
NA	Silvio's Autohouse 401 Tuam	Mr. Silvo Bucheler, Owner	He stated that the site had been a garage since 1953 and that all of the tanks area stored inside on a concrete floor. Wastes (used oil,

			antifreeze, other spent chemicals) are removed regularly are removed regularly by a third party. Lifts are above ground. He expressed no knowledge of USTs or historical spills or releases.

9 SUMMARY, CONCLUSIONS AND OPINIONS

Kleinfelder performed this ESA of the subject site in conformance with the scope and limitations of ASTM Standard Practice E1527-05, the City of Houston Department of Public Works & Engineering Design Manual Chapter 11 and our authorizing agreement. The following sections describe Kleinfelder's findings and provide general background information about the site. Findings include RECs, historical RECs, and notation of de minimis quantities, as applicable to the Project Area. In summary, Kleinfelder's assessment revealed the following information about the Project Area:

9.1 FINDINGS

This Phase I ESA was performed in accordance with the ASTM Practice E 1527-05 and the City of Houston Department of Public Works & Engineering Design Manual Chapter 11. Any exceptions to, or deletions from, this practice are described in this report. The site is an approximately 12,700 foot long corridor located in Houston, Texas. The Project Area is owned by the City of Houston and is limited to the ROW proposed for storm sewer improvements.

Land use observed along the Project Area is a mixture residential and commercial businesses. Residences observed were comprised of single family homes and condominiums, although recently constructed high-rises were observed along Gillette and Elgin. Commercial properties consisted of boutiques, restaurants, automotive mechanic shops, convenience stores and dry cleaner.

The site geology is mapped as urban land use. The soil units in the Project Area include Vamont-Urban Land near the northern extreme, and Beaumont-Urban Land and Bernard-Urban Land throughout most of the Project Area. All three units are described as being somewhat poorly to poorly drained with very low permeabilities. According to the Railroad Commission of Texas there were no oil and gas wells or fields mapped on site or in the vicinity of the site. There were no pipelines reported near the Project Area.

Portions of the Project Area, northern extreme, are located within a 100-year flood zone. Other areas are within a 500-year flood zone. Drinking water for the Project Area

comes from treated surface water provided by the City of Houston. Based on groundwater investigations in the vicinity of the Project Area, the anticipated direction of groundwater flow is in a northeasterly direction.

Kleinfelder contracted with a commercial database service, Geotracker, to review the federal, state, and local regulatory agency lists for references to the site and listings within the appropriate ASTM Standard minimum search distance of the site.

Off-site regulated facilities within the a 500 foot distance of the Project Area with continuing investigations, documented residual contamination left in place, or that are considered otherwise likely to have resulted in a hazardous substance or petroleum product release that could adversely affect the Project Area include the following:

Figure 2 Site No.*	Regulatory Listing (Facility ID)	Facility Name/Address	Finding
1	GWCC (105219) IHW (77614) LPST (092363) LPST(105219) NOV (RN102459492) PST (0033502) SPILLS (9/6/94015) TIER II (1RK81Z006M63) TIER II (1SLA0Z003Q7S) VCP (2503) FRSTX (110041811331) FRSTX (110034227147) APAR (T1826)	Federal Reserve Bank/City of Houston Public Works and Engineering Fleet Maintenance Facility/San Felipe Park 801 Gillette	The adjoining facility has ongoing site investigation and is adjoining the ROW.
2	IOP (108) IOP (170) LPST (107101) PST (0077776) PST (0025145) FRSTX (11005047065) FRSTX (110037845348) RCRAGR06 (TXR000080510) IHW (71343)	Former Jefferson Davis Hospital, Federal Reserve Bank of Dallas- Houston Branch, Food and Drug Administration, City of Houston Maintenance Facility 1801 Allen Parkway	This facility had soil and groundwater investigations, which were closed to the satisfaction of the regulatory authority. However, residual contamination is considered likely. This property adjoins the ROW. File review at TCEQ is recommended.
3	PST (0067521)	Frederick Scaffold 255 West Gray	A monitoring well was observed at this facility. There was no UST release history revealed. This facility adjoins the ROW.
9	LPST (107551)	H A Franz Co. 3315 Milam	A risk based closure indicates residual contamination may remain at this nearby facility. File review at TCEQ is recommended for this

			property.
10	LPST (108959) PST (008907) DCR (RV106301112)	Stop N Go 2822 Downtown Cleaners 305 Tuam	A risk based closure indicates residual contamination may remain at this nearby facility. File review at TCEQ is recommended for this property.
12	PST (0071342)	Aquilina Tire & Supply 1712 West Dallas	Although there is no record of a release, based on land use for automotive services for more than 90 years and a gasoline station for 30, undocumented releases are considered likely. This property adjoins the ROW.
20	VCP (835)	International Laundry Machinery, Inc. 1601 West Webster	File review at TCEQ is recommended for this property to evaluate whether residual contamination is present.
22	IOP (390)	514 Interests, LTD 514 Elgin	File review at TCEQ is recommended for this property to evaluate whether residual contamination is present.
29	PST (0068907) LPST (099730)	Former Billups Station 7938 101 Westheimer	A risk based closure indicates residual contamination may remain at this nearby facility. File review at TCEQ is recommended for this property.
31	IOP (297) IOP (415) PST (0059349) VCP (1384) BSA (G001)	Block 92 WR Baker Addition SSBB, Senior Nutrition Center, Webster-City of Houston NWC Cook and Gillette, 1501 West Webster	Some former investigations did not have certificates of completion associated with site investigation.
33	PST (0070883) VCP (1450) LPST (112547)	Courtland Square 3210 Louisiana	File review at TCEQ is recommended for this property to evaluate whether residual contamination is present.

*Figure 2 site numbers correspond to the numbers assigned to the sites in the Radius Report.

The FOIA request to the City of Houston Fire Department identified a spill of 800 gallons of diesel at 500 Gillette Street in 2006. The address corresponds to the intersection of Allen Parkway and Gillette Street. No further information regarding the release was provided, but a request for addition information from the department related to the incident was made on February 6, 2013, following receipt of this information. Unless further information is received that demonstrates that the release has been remediated

to the satisfaction of the appropriate regulatory agency, this facility will also be considered a REC.

The history of the site was reviewed to identify obvious uses of the site from the present to first developed use, or back to 1940, whichever is earlier, from readily available resources. Available sources date to 1902 (topographic map) and include aerial photographs, city directories, and historical topographic maps. Aerial photographs only provide information on indications of land use and no conclusions may be drawn from photographs alone.

Based on city directories, there were numerous automotive shops, gasoline stations, and laundry/dry cleaner adjoining the ROW, many dating back to at least the early 1950s, including:

Address:	Years:	Name:
Gillette Street		
711 Gillette	1970 1989-1990	Houston Traffic Signs City Fleet Management
812 Gillette	1989-90	City Street Maintenance
West Gray Avenue		
225-237 West Gray	Between 1924 and 1950	Auto Repair Shop and dry cleaner with "solvent tank"
240 West Gray	1940 1951	West Gray Service Station West Gray Garage Faulkner Electric Co.
244 West Gray	Between 1924 and 1951	Dry cleaner; Parnell Cleaners (1951)

	1970	T N Hays Texaco
3715 Milam	1940-1960	Humble Oil Service Station
Louisiana		
3210 Louisiana	Between 1924 and 1950	The Ideal Laundry and Dry Cleaning

Kleinfelder conducted a facility reconnaissance of the Project Area on January 18, 2013. Based on the observations and interviews conducted with business owners/operators during the site reconnaissance, the following adjoining facilities were identified, which based on the type of operation are considered likely to have activity associated with hazardous substances and petroleum products:

Address:	Name:	Comments:
221 Tuam	Ronnie Jackson Mercedes	This is an active auto mechanic shop and used car dealership. The owner stated that the site had been a mechanic's shop since the 1950s.
401 Tuam	Silvio's Autohouse	This is an active auto mechanic shop. The owner stated that the site had been a garage since 1953.

Neither of these facilities were included on the GeoSearch regulatory database search listings.

9.2 OPINIONS

It is Kleinfelder's opinion that hazardous chemicals or petroleum products could be present at locations adjoining the Project Area and the ROW as listed above. The proposed storm sewer improvements will disturb subsurface soil. Groundwater may be encountered during construction depending on design specifications based on the relatively shallow groundwater reported in the area (e.g., 20-25 feet bgs.). Therefore, it is important to consider adjoining properties that have known releases of hazardous substances or petroleum products to soil and/or groundwater that may affect the Project Area; and nearby properties that have known releases of hazardous substances or petroleum products to groundwater that may affect the Project Area.

Due to the widespread use of perchloroethylene (PCE) by dry cleaning facilities prior to 2000, there is a strong potential for remaining residual contamination at historical dry

cleaning facilities that were present and conducted dry cleaning operations at the facility for more than ten years. Some dry cleaning facilities are only drop-off locations for clothing and do not operate dry cleaning equipment, however, records do not typically reveal whether dry cleaning was conducted at the facility. Therefore, all dry cleaning operations listed, that do not have records of closure without residual contamination remaining, are considered RECs for purpose of this report.

In addition, former gasoline stations or garages/auto shops that had USTs prior to the TCEQ's PST regulations in 1986 commonly did not register tanks nor conduct sampling during tank removal to assess possible releases. The Federal Underground Storage Tank Program in 1988 mandated UST evaluations. Therefore, there is a potential for contamination at these types of sites, in particular those located adjoining or nearby the Project Area to have residual contamination that could have affected groundwater.

Historical land use for automotive services in the 1950s adjoining the Project Area and at nearby properties (e.g., City Motor Repair Shop, 810 Gillette in 1951, West Dallas Street gasoline stations, 1924-1950, etc.) that have not since resulted in environmental regulatory agency reporting are not considered RECs because of their regulatory status and the time elapsed (e.g., automotive facilities observed during the site reconnaissance). Dry cleaning facilities contamination to groundwater may have longer impacts, however. Kleinfelder does not recommend Phase II investigation of automotive facilities, however, if during excavation evidence of contamination (e.g., odor, soil staining) is encountered, further assessment may be required. Phase II investigation of historical dry cleaning facilities that have not been the subject of a prior investigation is recommended (e.g., 225-237 West Gray above).

The hospital (Jefferson Davis Memorial/Harris County) that was located at the northern extreme of Gillette Street at 726 Gillette Street, between at least 1924 and 1981, is not considered a REC because there are no ongoing investigations of contamination associated with this property.

9.3 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope of work required by ASTM Standard Practice E 1527-05 and our Proposal Number 129362, dated October

26, 2012, for the Project Area as described on the Site Map provided by HR Green. Any exceptions to, or deviations from, this practice are described in Section 2.5 of this report. This assessment has revealed evidence of RECs in connection with the site.

In the professional opinion of Kleinfelder, an appropriate level of preliminary inquiry has been made into the previous uses of the Project Area to assess recognized environmental conditions. Based on the current City of Houston guidelines, which require further investigation of areas of anticipated contamination, a Phase II ESA is recommended at the following locations. Site locations are shown in Figure 3.

Address:	Facility Name:	Figure 3 No.
801 Gillette	Federal Reserve Bank/City of Houston Public Works and Engineering Fleet Maintenance Facility/San Felipe Park	1
Comments: This property has a long, documented history of contamination as the former City of Houston PWE Fleet Maintenance Facility. All of the structures had been demolished at the time of the reconnaissance, but monitoring wells were still present throughout the property. There is an ongoing APAR for the portion of the property included in the Radius Report as San Felipe Park.		
1801 Allen Parkway	Former Jefferson Davis Hospital, Federal Reserve Bank of Dallas- Houston Branch, Food and Drug Administration, City of Houston Maintenance Facility	2
Comments: This property is the present location of the Federal Reserve Bank of Dallas- Houston Branch, and the former location of Jefferson Davis Hospital, the Food and Drug Administration, and the City of Houston Maintenance facility. The property has been entered two times into the IOP program, both times for groundwater contamination. The property was designated as a LPST site.		
255 West Gray	Frederick Scaffold	3
Comments: Given the groundwater flow gradient, and the limited information available in the Radius Report regarding the contents and capacity of the USTs that were present at the property, and the observation of a monitoring well at the property during site reconnaissance, while there were no reported releases, there could be potential impacts to groundwater in the ROW.		
3315 Milam	H A Franz Co.	4
Comments: The facility is listed as a closed LPST site, but no information was reported regarding the size, material, or contents of neither the tank(s) nor installation or removal dates. However, the property's location immediately adjacent to the Project area, the documented groundwater contamination, and the possibility of residual contamination at the facility, creates the potential for contamination in the ROW. The parking lot of the facility is located at approximately 3309 Milam, the location of an historical auto mechanic shop (see below).		
305 Tuam	Stop N Go 2822	5
Comments: The former gasoline station is listed as a closed LPST site; however, the facility's location immediately adjacent to the Project area, the documented groundwater contamination, and the possibility of residual contamination at the site, creates the potential for contamination in the ROW.		

1712 West Dallas	Aquilina Tire & Supply	6
Comments: The facility has been an operational auto mechanic shop for at least 90 years, and was an operating gasoline station for at least 30 years. Four PSTs were filled in place at the site in 1999. Given the site's continuous operation for nearly a century, there is the potential for contaminated soil and groundwater in the ROW.		
1601 West Webster (Adjacent to ROW)	International Laundry Machinery, Inc.	7
Comments: This property is a former industrial laundry facility (Public Laundries, Inc., 1924-1950 city directory) that has been redeveloped into mixed-use commercial/residential. A VCP investigation with a total area of 30,000 square feet was conducted for solvent contamination in soil and groundwater at the site immediately adjacent to the Project Area. Though the investigation was closed, there is the potential for residual contamination.		
514 Elgin	514 Interests, LTD	8
Comments: Prior to its redevelopment as a retail building, the property was entered into both the VCP and IOP for soil and groundwater contaminated with VOCs over an area of 0.43 acres immediately adjacent to the Project Area. Though the investigation was closed, there is still the potential for residual contamination.		
3102 Milam (Adjacent to ROW)	Centel	9
Comments: The facility was designated as an LPST and was ultimately found to have minor soil contamination. However, in the 1970 city directory, the site is listed as electric company facility. The use of PCB containing materials prior to the late 1970s at such facilities in transformer oil was widespread. Additionally, the site had a gasoline station present at the corner immediately adjacent to the Project Area for at least nine years. There could be the potential for contamination in the ROW from the prior activities at the site.		
711 Gillette	Historic Fleet Vehicle Management	10
Comments: The property was operated as a fleet vehicle management facility and an auto mechanic shop from at least 1970 to 1990, based on City Directories and is located immediately adjacent to the Project Area.		
225 – 237 West Gray	Historic Auto Repair/Dry Cleaners	11
Comments: The property was operated as an auto repair shop and dry cleaners facility with a solvent tank from at least 1924 to 1950 based on City Directories and Fire Insurance maps and is located immediately adjacent to the Project Area.		
240 West Gray	Historic Gasoline Station and Auto Mechanic Shop	12
Comments: The property was operated as a gasoline station and auto mechanic shop from at least 1940 to 1951 based on City Directories, and is located immediately adjacent to the Project Area.		
244 West Gray	Historic Dry Cleaner Facility	13
Comments: The property was operated as a dry cleaner facility from at least 1924 to 1950 based on City Directories, and is located immediately adjacent to the Project Area.		

502 Elgin	Historic Auto Mechanic Shop	14
Comments: The property was operated as an auto mechanic shop from at least 1989 to 1997 based on City Directories, and is located immediately adjacent to the Project Area.		
602 Elgin	Historic Gasoline Station	15
Comments: The property was operated as a gasoline station from at least 1960 to 1970 based on City Directories and Fire Insurance maps, and is located immediately adjacent to the Project Area.		
616 Elgin	Historic Dry Cleaner Facility	16
Comments: The property was operated as a dry cleaning facility from at least 1940 to 1951 based on City Directories, and is located immediately adjacent to the Project Area.		
3309 Milam	Historic Auto Mechanic Shop	17
Comments: The property was operated as an auto mechanic shop from at least 1951 to 1970 based on City Directories, and is located immediately adjacent to the Project Area.		
3316 Milam	Historic Gasoline Station	18
Comments: The property was operated as a gasoline station from at least 1940 to 1970 based on City Directories and Fire Insurance maps, and is located immediately adjacent to the Project Area.		
3508 Milam	Historic Auto Mechanic Shop	19
Comments: The property was operated as an auto mechanic shop from at least 1981 to 1997 based on City Directories, and is located immediately adjacent to the Project Area.		
3715 Milam	Historic Gasoline Station	20
Comments: The property was operated as a gasoline station from at least 1940 to 1960 based on City Directories, and is located immediately adjacent to the Project Area.		
221 Tuam	Auto Mechanic Shop	21
Comments: The property has been operated as an auto mechanic shop from at least the 1950s to the present based on an interview with the current occupant, and is located immediately adjacent to the Project Area.		
312 Tuam	Historic Dry Cleaner Facility	22
Comments: The property was operated as a dry cleaner facility with a solvent tank from at least 1924 to 1950 based on Fire Insurance maps, and is located immediately adjacent to the Project Area.		
401 Tuam	Auto Mechanic Shop	23

Comments: The property has been operated as an auto mechanic shop from at least 1953 to the present based on Can interview with the current occupant, and is located immediately adjacent to the Project Area.

9.4 DATA GAPS

Although Kleinfelder attempted to obtain reasonably ascertainable information regarding the site, some information was either not received or not readily available at the time of this report. In summary:

- Legal Description and Assessor Parcel Maps
- Aerial Photographs
- City Directories
- User Provided Information
- Regulatory Agency Records: Fire Department

The availability of historical aerial photographs and topographic maps was limited and there were data gaps (more than 5 year intervals). In addition, the review of was limited by the scale and quality of the aerial photographs. Due to the scale and quality of the photographs not all commercial/industrial structures were apparent.

In addition, city directories were not provided for all street segments for the Project Area by the vendor. Missing street segments are being produced, but were not available prior to production of this report.

Access restrictions from parked vehicles and fences limited observations of adjoining properties along the ROW.

HR Green did not provide Kleinfelder with information about environmental liens and activity and use limitations associated with the ROW, if any exist. A chain-of-title search was not included in Kleinfelder's scope of work. Kleinfelder assumes that a lien search and/or chain-of-title search will be conducted as a part of HR Green's User responsibilities for due diligence activity required by the ASTM Standard. Also,

Kleinfelder requested copies of Assessor's Parcel Maps and a legal description of the property, which were not received prior to production of the Phase I ESA. These documents are considered relevant to identification of hazardous substances and petroleum product use and impact to the ROW.

APPENDIX A

Proposal, Agreement, and Qualifications

October 26, 2012
Proposal No: 129362

Mr. Steve Sparks
HR Green, Inc.
11011 Richmond Ave., Suite 375
Houston, Texas 77042

**Subject: Proposal for a Phase I Environmental Site Assessment
City of Houston Montrose-Midtown Phase 2 Design**

Dear Mr. Sparks:

Kleinfelder is pleased to present this proposal to HR Green, Inc. (HRG, the Client) to perform a Phase I Environmental Site Assessment (ESA) for the City of Houston Montrose-Midtown project (referred to as the "Site"). This proposal was prepared pursuant to your request, and is a statement of our understanding of your needs. The following sections describe our understanding of the proposed project, scope of services, fee, and schedule.

If a portion of this proposal does not meet your needs, or if those needs have changed, Kleinfelder is prepared to consider appropriate modifications, subject to the standards of care to which we adhere as professionals. Modifications such as changes in scope, methodology, scheduling, and contract terms and conditions may result in changes to the risks assumed by HRG as well as adjustments to our fees.

BACKGROUND AND PROJECT UNDERSTANDING

It is our understanding that the Site is composed of two corridors. The first begins north of Allen Parkway, continues along Gillette Street to Dallas Street to Genesee Street to Tuam Street ending at Louisiana Street. The second corridor begins at the intersection of Tuam Street and Smith Street, continues along Smith to Elgin Street, stretches along Elgin from Brazos Street to Milam Street, continues along Milam to Francis Street, and picks up again on Milam at Berry Street and ends at Alabama Street.

Kleinfelder has been tasked by the Client to submit one report which covers both project corridors. In addition, the site reconnaissance will be performed in one mobilization. The Client should note that according to ASTM standards, a Phase I Environmental Site

Assessment is considered valid for a period of one year, after which a new report is required. If the reports are to be generated and submitted at different times and/or the site reconnaissance is to involve separate mobilizations, additional costs may be incurred.

PROPOSED SCOPE OF SERVICES

The proposed Phase I ESAs will be performed in accordance with Chapter 11 of the City of Houston Design Manual and in general accordance with, but modified from, the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, published by ASTM International (ASTM) with ASTM Designation E 1527-05 (the "Standard Practice"), the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the "Federal Brownfields Law"), and the scope, assumptions, and limitations contained in this proposal. The scope of services proposed has been developed to provide a preliminary screening of the Site. If our Phase I ESA reveals evidence of recognized environmental conditions (RECs), we will present recommendations and discuss these with you to outline a possible Phase II ESA scope of services. The modifications from ASTM standards will be discussed in the following sections.

Task 1 – Regulatory Agency and Other Records Review

Kleinfelder will review reasonably ascertainable records that will help identify "recognized environmental conditions" (RECs) in connection with the Site. These records include Federal and State regulatory agency lists of hazardous waste generators, landfills, military reservations, contaminated surface waters, Superfund sites, and facilities with underground storage tanks (USTs) and leaking USTs (LUSTs) (also referred to as leaking petroleum storage tanks [LPSTs]). These lists, as well as reasonably ascertainable existing documentation as subsequently cited, will be reviewed to assess whether there were prior investigations or events and conditions, or institutional or engineering controls on the property and in the immediate vicinity, relating to spills, discharges, or other activities resulting in contamination or presence of hazardous materials. Kleinfelder will review the following standard environmental record sources at minimum, which include published lists of regulatory agency investigations and/or enforcement actions, for facilities within 500 feet of the Site which is a modification from the ASTM standards which are indicated in parentheses:

FEDERAL:

- National Priorities List (NPL) (ASTM 1-mile radius);
- Delisted NPL (ASTM ½-mile radius);
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List (ASTM ½-mile radius);
- CERCLIS No Further Remedial Action Planned (NFRAP) List (ASTM ½-mile radius);

- Resource Conservation and Recovery Act (RCRA) Corrective Actions Facilities (CORRACTS) List (ASTM 1-mile radius);
- RCRA non-CORRACTS Transportation, Storage, and Disposal Facilities (TSD) List (ASTM ½-mile radius);
- RCRA Generator List for the Site and adjoining properties;
- Institutional control/engineering control registries for the Site only; and
- Emergency Response Notification System (ERNS) List for the Site only.

STATE/TRIBAL:

- NPL-equivalent lists of hazardous waste sites identified for investigation or remediation (ASTM 1-mile radius);
- CERCLIS-equivalent lists of hazardous waste sites identified for investigation or remediation (ASTM ½-mile radius);
- Landfill and/or solid waste disposal site lists (ASTM ½-mile radius);
- LUST lists (ASTM ½-mile radius);
- Registered UST lists for the Site and adjoining properties;
- Institutional control/engineering control registries for the Site only;
- Voluntary cleanup sites (ASTM ½-mile radius); and
- Brownfield sites (ASTM ½-mile radius).

We will enhance and supplement the standard environmental record sources with local and/or additional State or tribal records when, in our judgment, such additional records are readily ascertainable, sufficiently useful, accurate, and complete in light of the record review objective, and are generally obtained, pursuant to local good commercial or customary practice, in Phase I ESAs in the type of commercial real estate transaction involved. Such types of records may include:

- Brownfields lists;
- Lists of landfill/solid waste disposal sites;
- Lists of hazardous waste/contaminated sites;
- Lists of registered storage tanks;
- Land records, for activity and use limitations (if requested by the Client);
- Records of emergency release reports; and
- Records of contaminated public wells.

Sources of such records may include the local department of health/environmental division, fire department, planning department, building permit/inspection department,

local/regional pollution control agency, local/regional water control agency, and local electric utility company.

Task 2 – Physical Setting Review

The physical setting review is required by the Standard Practice to include a current United States Geological Survey (USGS) 7.5 Minute Topographic Map. The review may also include discretionary physical setting sources (e.g., for geologic and hydrogeologic information). This information may provide insight to the significance of off-site sources of contamination in relation to the Site. Where discretionary hydrogeologic information is available and reviewed, and to the extent possible, we will estimate the regional direction of groundwater flow and discuss how this might affect the potential for identified off-Site sources of contamination to impact the Site. Specific sources of physical setting information may include:

- USGS reports and maps;
- Information provided by public agencies (e.g., State Department of Water Resources, local flood control district, or local or county water agency);
- Information from previous Kleinfelder experience in the area; and
- Information provided by the Client (e.g., reports of previous Site environmental investigations or soils reports concerning the Site).

Task 3 – Historical Land Use Review

Kleinfelder will research historical information sources to develop a history of general types of previous uses of the Site and surrounding area (e.g., office, retail, residential, industrial, or manufacturing). Obvious uses of the Site will be identified from the present time back to the Site's first developed use, or back to 1940, whichever is earlier. The review will include as many standard historical sources as are necessary and both reasonably ascertainable and likely to be useful. For the purpose of this review, "developed use" is considered to include agricultural use and placement of fill dirt. The review will include documentation of gaps in the history of use.

Uses of the area surrounding the Site will be identified only to the extent that this information is revealed in the course of researching the Site itself, as per the Standard Practice.

The following information sources may be used, as necessary, to research the Site history:

- Aerial photographs;
- USGS topographic maps;
- Fire insurance maps (e.g., The Sanborn Library, LLC Fire Insurance Maps);

- Local street directories;
- Property tax files;
- Recorded land title records (if requested by the Client);
- Building department records; and
- Zoning/land use records.

Task 4 – Site Reconnaissance

Kleinfelder will perform a visual reconnaissance of the Site and associated structures by driving or walking areas that are accessible to observe the property condition and its current use with the unaided eye, and thereby obtain information indicating the likelihood of identifying evidence of RECs in connection of the Site. The Site property and structures located on the Site will be observed to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The periphery of the Site will be viewed from adjacent public thoroughfares. If roads or paths with no apparent outlet are observed on the Site, the use of the road or path will be identified to assess whether it was likely used as an avenue for disposal of hazardous substances or petroleum products. Accessible common areas of the interior of the structures on the Site (e.g., lobbies, hallways, utility rooms, recreation areas, etc.), maintenance and repair areas including boiler rooms, and a representative sample of occupied spaces will be observed, when the structure is identified as being of environmental interest. Uses and conditions will be noted and will be the subject of questions asked as part of interviews of occupants as discussed later in this proposal.

The following will be noted during the Site visit:

- Geologic, hydrogeologic, hydrologic, and topographic conditions of the Site;
- General description of structures or other improvements, including means of heating and cooling and fuel source;
- Public thoroughfares adjoining the Site and roads, streets, and parking facilities on the Site;
- Current use(s) of the Site, especially with respect to use, treatment, storage, disposal, or generation of hazardous substances or petroleum products;
- Past use(s) of the Site and adjoining properties to the extent that past uses are visible (e.g., a structure or signs indicating a past use), especially with respect to use, treatment, storage, disposal, or generation of hazardous substances or petroleum products;
- Obvious location(s) of suspected past and present chemical storage, application, use, and disposal areas;
- Obvious location(s) of above-ground and underground storage tanks, drums, pipelines, wells, and transformers and other electrical equipment suspected to

contain PCBs. Any pertinent information the Client has or can obtain regarding as-built drawings, on other similar documents, for underground tanks, or other structures, is requested to be made available for use by Kleinfelder prior to completion of the Phase I ESA report;

- Obvious location(s) of odors, pools of liquid, pits, ponds, lagoons, staining, and stressed vegetation;
- Obvious concerns as noted in the review of the aerial photography;
- Source of potable water supply;
- Sewage disposal system (and septic systems, to the extent visually observed); and
- Photographically document conditions at the time of the Site visit.

Task 5 – Vicinity Survey

Kleinfelder will perform a driving and/or walking reconnaissance of immediately adjoining properties to observe the properties' current use and past use(s) to the extent that past uses are discernible. This survey will be performed to note facilities that have an obvious potential to affect environmental conditions at the Site. However, these properties may be observed without physical access.

Task 6 – Interviews

Kleinfelder will attempt to interview Site occupants at the time of the reconnaissance with the objective of obtaining information indicating RECs in connection with the Site. This is a modification from ASTM standards which require attempts to interview past and present owners and occupants, including a "Key Site Manager," a person with good knowledge of the uses and physical characteristics of the property (e.g., a property manager, chief physical plant supervisor, or head maintenance person). If reasonably possible, Kleinfelder will attempt to interview the Key Site Manager(s) at the time of the Site visit. Interview questions may be asked in person, by telephone, or in writing.

Kleinfelder will also make a reasonable attempt to interview at least one staff member of the local fire department that serves the Site, the local/regional office of the health agency that serves the area, the local/regional agency having jurisdiction over hazardous waste disposal, or the local/regional agency responsible for the issuance of building permits or groundwater use permits.

Task 7 – Final Report of Findings

Kleinfelder will provide a final report for the Site, which will cover both corridors described above, that will include an evaluation of the information obtained from the Phase I ESA, and identify the environmental professional who performed the Phase I ESA. The report will include findings, opinions, and conclusions, and identify and discuss "significant data gaps" in the records, if present, including "data failures."

Should there be gaps in the Site history timeline and occupants identified, the report will identify sources consulted to address them and comment upon their significance with regard to the ability to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Site. The report will include illustrations and pertinent regulatory agency documentation regarding the Site.

Assumptions

The following assumptions were made in preparing this proposal:

- The Phase I ESA report will include findings, opinions, conclusions, and recommendations.
- The Client will provide or arrange right-of-entry and unrestricted access to the Site.
- The Client will supply an electronic plan that indicates landmarks showing the Site boundaries.
- As a modification to ASTM standards, Kleinfelder will not perform any review of property title information or environmental liens. Kleinfelder could perform this service for an additional fee and assumes the Client will obtain and provide a copy of the title commitment and underlying documents, as well as a Chain-of-Title report back to at least 1940, and provide said documents to Kleinfelder for review of environmental liens and activity and use limitations (AULs), and to assist Kleinfelder with identification of previous Site uses. If requested by the Client, and for an additional fee, Kleinfelder will contract with Environmental Data Resources, Inc. (EDR) to provide an environmental lien search for the parcels to be acquired by the Client.
- The cost includes reviewing aerial photographs from one standard source, which is assumed to contain adequate coverage of the Site and surrounding areas to assess historical Site usage for a period of time as far back as it can be shown that the Site contained structures or from the time the property was first used for residential, agricultural, commercial, industrial, or governmental purposes, as mandated by the Standard Practice. If insufficient coverage of the Site is available, with Client approval a secondary source will be consulted for an additional fee.
- The cost assumes that one set of topographic maps will be sufficient to provide coverage of each Site. If additional sets of topographic maps are required, with Client approval, additional sets will be obtained for an additional fee.
- The review of regulatory agency files is not considered part of this scope of services. If reviews of regulatory agency files for Site facilities are recommended, the Client may be contacted for authorization of additional fees.
- Only information received prior to issuance of the report can be included in the evaluation. Kleinfelder does not guarantee the accuracy of information supplied

by its sources, but reserves the right to rely on this information in formulating a professional opinion on the potential for subsurface contamination at the Site.

- Information requested to prepare this report but not received by Kleinfelder from the Client or others prior to the time of preparation of the Phase I ESA Report will be considered "data gaps," and will be discussed in the final report relative to the ability to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Site.
- The Phase I ESA does not include any sampling in the scope of services.
- Three copies of each report of findings will be delivered to the Client via regular United States Mail. In addition, the reports will be provided electronically to the Client via Kleinfelder's secure FTP website. Additional report copies can be provided for a fee of \$100 per copy.
- Each Site is believed to be comprised of two parcels with two APNs (Assessor's Parcel Numbers). If additional parcel numbers are found to be associated with the Site, additional costs may be incurred, and the Client may be contacted for authorization of additional fees.
- The Phase I ESA does **not** include an assessment for asbestos-containing building materials, radon, lead-based paints, lead in drinking water, molds and mildews, indoor air quality, cultural and historic resources, ecological resources, wetlands, threatened or endangered species, industrial hygiene, health and safety, and other Standard Practice non-scope considerations. However, Kleinfelder can perform these services for an additional fee, if requested.

FEE AND SCHEDULE

Kleinfelder will perform the described scope of services for a fee of **\$13,200**. The professional services will be invoiced on a lump sum basis. The cost breakout can be viewed in the attached Consultant Proposal Breakdown Table.

This amount is subject to change if the Site differs from our understanding. Our final draft report will be completed in six weeks from completed site reconnaissance visits. The final report will be issued two weeks after receiving comments from the Client. If additional assessment efforts are requested based upon our research, a separate scope of services, schedule, and budget will be prepared and submitted for your approval.

The fees presented in this proposal are based on prompt payment for services presented in our standard invoicing format. Additional charges will be applied for specialized invoicing if backup documentation is needed. These special services will be charged on a time-and-materials basis. Late fees will be charged if payment is not received in accordance with terms contained in the contract.

STATEMENT OF CONFIDENTIALITY/RELIANCE

All information gathered during the study by Kleinfelder is considered confidential and will be released only upon written authorization by the Client or as required by law. Texas law requires informing the State if a situation is encountered that can be considered an immediate endangerment to the public's health or welfare and/or to the environment.

The Phase I ESA report may be used only by the Client and only for the purposes stated within a reasonable time from its issuance, but in no event later than 1 year from the date of the report. Land or facility use, on- and off-Site conditions, regulations, or other factors may change over time, and additional work may be required with the passage of time. Any party other than the Client who wishes to use this proposal and the resulting report shall notify Kleinfelder of such intended use. Based on the intended use, Kleinfelder may require that additional work be performed and that an updated document be issued. Non-compliance with any of these requirements by the Client or anyone else will release Kleinfelder from any liability resulting from the use of this report by any unauthorized party, and Client agrees to defend, indemnify, and hold harmless Kleinfelder from any claim or liability associated with such unauthorized use or non-compliance.

Provided Kleinfelder's report is still reliable (as determined by Kleinfelder), Kleinfelder may issue a third-party reliance letter to a party that the Client identifies in writing under the following conditions: that the third party, including Client's successors and assigns, by such reliance, (1) agrees in writing to be bound by Kleinfelder's Terms and Conditions, and (2) agrees to pay Kleinfelder's then-current fee for issuing such letters.

AUTHORIZATION

If this proposal is acceptable, please execute the attached work order and indicate the date of the notice to proceed. All terms and conditions indicated in this proposal will be considered by both parties to be in effect from the effective date of the signed Work Order through completion of the project. If there is a need for any change in the scope of service or schedule described in this proposal, please call us immediately.

All information gathered during the study by Kleinfelder is considered confidential and will be released only upon written authorization by the Client or as required by law. Typically, State law requires informing the State if a situation is encountered that can be considered an immediate endangerment to the public's health or welfare and/or to the environment.

LIMITATIONS

Our work will be performed in a manner consistent with that level of care and skill ordinarily exercised by other members of Kleinfelder's profession practicing in the same locality, under similar conditions, and at the date the services are provided. Our conclusions, opinions, and recommendations will be based on a limited number of

observations and data. It is possible that conditions could vary between or beyond the data evaluated. Kleinfelder makes no guarantee or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service provided.

This proposal was prepared specifically for the Client and its designated representatives and may not be provided to others without Kleinfelder's express permission.

Kleinfelder offers various levels of investigative and engineering services to suit the varying needs of different clients. Although risk can never be eliminated, more detailed and extensive studies will yield more information, which may help understand and manage the level of risk involved. Since detailed study and analysis involves greater expense, our clients participate in determining levels of service that provide adequate information for their purposes at acceptable levels of risk. More extensive studies could be performed to reduce these uncertainties.

During the course of the performance of Kleinfelder's services, hazardous materials may be discovered. Kleinfelder will assume no responsibility or liability whatsoever for any claim, loss of property value, damage, or injury that results from pre-existing hazardous materials being encountered or present on the project Site, or from the discovery of such hazardous materials.

This proposal may be used only by the Client and only for the purposes stated. This proposal is valid for a period of 45 days from its date. Land use, Site conditions (both on Site and off Site) or other factors may change over time, and additional work may be required with the passage of time.

We thank you for the opportunity to provide Kleinfelder's professional engineering services and look forward to working with you on this project. If you have questions, please contact Mr. Michael Caraher at (281) 436-7523.

Respectfully Submitted,

KLEINFELDER CENTRAL, INC.

Michael F. Caraher, PG

Work Order No.001

Jordan Smith

From: Roxie Voran
Sent: Tuesday, December 11, 2012 2:57 PM
To: 'Sparks, Stephen'
Subject: RE: Authorization to Proceed with Phase I ESA

Steve,

We should be able to complete this work within no more than 8 weeks once we can get started, not including the time for response to comments that the City may have on the draft report which will come along sometime later. I will need to send the agreement up the line for approval, so it would be good to get a copy of it so we can get that process moving.

Thanks.

Roxie L. Voran, P.G.

Subject: RE: Authorization to Proceed with Phase I ESA

Thanks, Steve. Do you know if we have all the contracting done that is needed between our two firms in order to get underway? I haven't had a chance to check on that.

Subject: Authorization to Proceed with Phase I ESA

Roxie,

Please accept the email as your authorization to proceed with the Phase 1 ESA for the subject project. This authorization is based on your proposal letter dated October 26, 2012 and in the not to exceed amount of \$13,200.

Please provide a time schedule and completion date to me at your earliest convenience.

Please call should you have any questions.

PROJECT STAFF RÉSUMÉS

CAROL HALL

Environmental Regulatory Compliance Practice Leader

Summary of Experience

Ms. Hall has 23 years of environmental project experience in the areas of regulatory compliance, environmental audits, Phase I and II environmental site assessments, environmental project management, and data management. Ms. Hall works on multi-disciplinary projects involving assessment of water quality, hazardous material and waste management issues. She has prepared regulatory analyses and provided technical leadership in federal Superfund projects and California Environmental Quality Act (CEQA) projects. Her work experience includes environmental project management for the Department of Defense, Department of Energy and other federal agencies; State of California and local agencies; financial institutions; legal firms; industry, and business.

Education

BA, Social Science. Michigan State University, Michigan, 1979
Certificate, Biology, Field Ecology. Los Rios Community College, Sacramento City College, California, 2006

Registrations

Certified Hazardous Materials Manager (C.H.M.M.), No.13688

Certifications

OSHA 40-Hour HAZWOPER, 07/26/1990-present

Professional Affiliations

Academy of Certified Hazardous Materials Managers, Northern California Chapter, Chapter Board Member; Sacramento Section Programs Director 2006-2008, Sacramento Section Chair 2008-2013.

Academy of Certified Hazardous Materials Managers, National, Government Affairs, Subcommittee Member 2009-2013

American Society for Testing and Materials (ASTM), Member E50 Committee and E50.01 Subcommittee Member, Environmental Assessment, Risk Management & Corrective Action, 2010-2013.

Project Experience

The following is a representative selection of Carol Hall's project experience.

Del Monte Foods, Stockton, California.

Prepared Phase I ESA and assisted with Phase II investigation for Plant 33 and distribution facility.

SAFCA Area Wide Due Diligence Environmental Assessment for Natomas Basin Levees, Sacramento and Sutter Counties, California.

Carol Hall is the project manager and technical director for this area-wide due diligence assessment of properties owned by approximately 200 individual land owners along the Sacramento River, Natomas Cross Canal, Pleasant Grove Creek Canal, Natomas East Main Drainage/Steelhead Creek, and American River, which form the boundaries of the Natomas Basin in Sacramento and Sutter Counties. The parcel boundaries for this assessment cover about 45 perimeter miles of terrain. The purpose of the due diligence assessment is to evaluate environmental conditions that may affect the proposed levee upgrade project. In order to efficiently assess this large area in a timely and cost-effective manner, the due diligence assessment will be conducted in phases. In the preliminary evaluation, Kleinfelder screened properties for potential presence of hazardous materials, recognized environmental conditions (RECs), and identified “significant data gaps”. Based on the results of the preliminary evaluation, individual properties with potential RECs were further evaluated in accordance with the American Society for Testing and Materials (ASTM) Phase I Environmental Site Assessment Process (ASTM E 1527-05). Tasks associated with this due diligence evaluation include regulatory agency and records review; evaluation of physical site characteristics, including geology and hydrology; historical land use review including aerial photographs, topographic maps, zoning/planning maps, Sanborn maps, building department records and city directories; site reconnaissance to observe features indicative of potential RECs; interviews of owners/occupants; GIS data management; and reporting.

SAFCA Limited Phase II Site Assessments for Natomas Basin Levee, Sacramento and Sutter Counties.

Project manager for numerous limited Phase II sampling sites associated with the SAFCA Natomas Levee Improvement Program. Approximately 20 sites included based on the results of Phase I Environmental Site Assessment evaluation. Also, numerous borrow material locations evaluated for pesticides and metals in predominantly agricultural land use sections of the study area. Pre-construction and post-construction soil and groundwater sampling, hazardous substance and petroleum product impact evaluation, and remediation alternative evaluation as applicable.

Rosetta Resources, Due Diligence Assessment, Rio Vista, California.

Prepared area-wide due diligence assessment for natural gas pipeline acquisition project. The study area was an approximately 42-mile area of Rio Vista, California. Pipelines and substations were formerly owned and operated by Pacific Gas & Electric Company (PG&E). Hazardous substance/petroleum product release reports and other operating data provided by PG&E were reviewed for ongoing potential impact following acquisition, as well as standard document review under ASTM requirements.

Historical Site Assessment, Knolls Atomic Power Laboratory, Department of Energy, Niskayuna, NY.

Prepare HSA as a part of the closure process for the Separation Processes Research Unit (SPRU) at the Knolls Atomic Power Laboratory in New York State. Provided technical research lead for chemical and radioactive materials evaluation of the site, which is scheduled for decommissioning, decontamination, and demolition or other use. The project site is a former radioactive materials laboratory that developed methods to extract and enrich uranium into and plutonium from irradiated uranium in the 1950s. Initial classification of the site as impacted or non-impacted by chemical contaminants was completed using DOE and MARSSIM guidance. Identified potential contaminated areas, media affected, and potential contaminants remaining. Construction materials, equipment, subsurface soil, surface or subsurface water, biota, air, sewers, sediments, or volumetric contamination evaluated for chemical and radiological contaminants. Prepared historical time line, site photographs, and process flow diagrams.

Sacramento Regional Transit District, Sacramento, California.

Conducted numerous siting studies to evaluate potential locations for future bus maintenance facility. Prepared Phase I ESAs for facilities with potential environmental hazards that could limit/prevent future development.

California Department of Military Headquarters, Bear Hollow Parcel, Rancho Cordova, California.

Preliminary evaluation of the suitability of siting a 300,000 square foot office building for a National Guard Headquarters in Rancho Cordova, California. The suitability analysis addresses issues that may be relevant to the planning, design, and/or operational elements of the proposed project and location selected, including: (1) Environmental conditions on site and in the vicinity of the site (e.g., Phase I Environmental Site Assessment), (2) Geologic conditions on site (e.g. review a Preliminary Geotechnical Engineering Report and historical documents) to evaluate potential geotechnical constraints. (3) State of California school siting requirements for compatibility of the planned land use with schools due to the close proximity, and (4) Existing entitlements associated with the site and the mitigations required by California Environmental Quality Act (CEQA) and the City of Rancho Cordova Planning Commission: Entitlements reviewed including: Airport Compatibility/Siting, Traffic and Circulation (including Public Transit Services), Noise Levels, and Public Services.

Siting Study, Sacramento Regional Transit District, Sacramento, California.

Assisted with criteria and quantitative ranking scheme development in order to evaluate proposed bus maintenance facility locations. Conducted initial site reconnaissance to evaluate hazardous materials (e.g. USTs/ASTs, product releases, wells, septic, asbestos, lead-based paint, etc.) and neighborhood and surrounding area environmental concerns (e.g. protected/endangered species habitat, wetlands, etc.) for eight proposed sites. Three finalist locations were selected that required Phase I assessments. Prepared Phase I ESAs for the three finalist locations.

Hazardous Materials/Hazard Evaluation, Twelve Proposed Housing Project Sites, Folsom, California.

Regulatory agency database evaluation for twelve proposed affordable housing project sites in support of the Hazardous Materials/Hazard section for an Initial Study. Site reconnaissance conducted to obtain site setting information (e.g. structures and geology) and document the actual or potential environmental conditions on the sites (e.g. USTs/ASTs, evidence of prior land use associated with hazardous materials, wells, sumps, etc.).

Initial Site Assessment, EIP Associates, Lincoln, California

Prepared an Initial Site Assessment (ISA) according to Caltrans guidance documentation for an approximately 1-mile corridor that was proposed to be widened.

Confidential Clients (Home Improvement and other Retail Stores), Martell, Yuba City, Rancho Cordova, Sacramento, Elk Grove, California.

Conducted Phase I and Phase II investigations where the Phase I investigation revealed potential soil and/or groundwater contamination. The Phase I ESA scope were often more broadly defined to include regulatory compliance evaluation. Phase II investigations included soil, surface and groundwater evaluation, vapor intrusion assessment evaluation, and wetland assessments.

Capital Village Proposed Retail Center - Phase 1 Environmental Site Assessment. Rancho Cordova, California

Project Manager. Provided a Phase I Environmental Site Assessment (ESA) was conducted for DSL Service Company, a California corporation for the property in Rancho Cordova within Sacramento County. The subject site is a part of the Capital Village project, encompasses approximately 26 acres.

Phase I, Environmental Site Assessments (ESA), Various Confidential Clients.

Additional Phase I ESAs were conducted during the period between 1993 and 2012 according to ASTM standards and client specific standards, for a broad range of clients including banks, REITs and other financial institutions, real estate developers, attorneys, industry, and commercial businesses. Several of the Phase I site assessments have been of corridors ranging from 1 mile to 24-mile spans for pipeline routing (Mohave Pipeline), light-rail/transportation routing (Joint Power Authority), or recreational area development (Napa River). The sizes of the sites range from less than one acre to 20,000-acre parcels. Land use has included residential/school/recreational site development (e.g., urban redevelopment areas, or proposed subdivisions), agricultural properties, former and active landfills, and commercial/industrial property transfers.

Roxie Voran

Senior Project Manager

Summary of Experience

PROJECT MANAGER: Mr. Voran has over 30 years of experience, including 21 years as an environmental consultant with previous experience working as a petroleum geologist. He has managed multi-site contracts for local and state governmental agencies including previous City of Houston contracts, as well as contracts with Harris County, Houston METRO, TxDOT, Texas Railroad Commission, and federal agencies. These contracts involved Phase I and II ESAs for property acquisition; compliance and permitting; site investigations under Texas Risk Reduction Program (TRRP) and LPST regulations; spill response; remedial system design; bid documents and construction specifications; and remedial action cleanups for a wide variety of sites.

He has achieved a high degree of client satisfaction and has been complimented by his clients for his diligence in resolving problems and his ability to accommodate their needs on a daily basis. One of his strengths is obtaining closure of sites using the regulatory framework for risk assessments and risk-based closures.

Education

MBA, Business. University of Houston, Clear Lake, Texas, 1991

MS, Geology. Kansas State University, Kansas, 1977

BS, Geology. Kansas State University, Kansas, 1975

Registrations

Licensed Professional Geologist in the State of Texas (#1788)

Project Experience

The following is a representative selection of Roxie Voran's project experience.

Harris County - John Phelps Courthouse Assessment and Remediation - From 2006 To 2012
*****Non-Kleinfelder Project*****

Mr. Voran managed the completion of a Phase I and Phase II ESA for a 7-acre property in Pasadena, Texas that was being considered for acquisition for the construction of a new courthouse annex. The site was the former location of an automobile dealership, several retail gasoline stations, and a lumberyard. The assessment included surface and subsurface soil and groundwater sample collection and installation of monitoring wells in the uppermost

groundwater-bearing unit. One parcel was deleted from the transaction based on the results of the ESA. Upon completion of the investigation, an Affected Property Assessment Report (APAR) was completed. The property was remediated to Remedy Standard A by self-implementation of a Response Action during which soil was excavated and removed from four separate PCL Exceedance Zones. A bid document was prepared that was used to solicit bids from qualified contractors and services were provided for oversight and documentation of the contractor's activities. Upon completion of the Response Action, a Response Action Completion Report (RACR) was completed and submitted to the TCEQ, resulting in closure of the site.

Harris County - Downtown Fueling Center LPST Site - From 2008 To 2012

Managed accelerated assessment activities at this site that had been designated as a leaking petroleum storage tank site in the early 1990s. Previous consultants had installed monitoring wells and removed light non-aqueous phase liquid (LNAPL) by hand bailing and placement of absorbents in wells. Cone penetrometer was used together with the rapid optical screening tool (ROST) to obtain a detailed stratigraphic framework for the site and to define areas with maximum remaining LNAPL. Additional monitoring wells were installed after obtaining permits for well installation in public rights-of-way. A 72-hour mobile dual phase extraction (MDPE) event was conducted and monitored to determine the optimal duration of future events, if needed.

Texas Army National Guard - Statewide LPST Assessments - From 1996 To 2001

Mr. Voran managed projects to conduct assessment activities at more than 20 underground storage tank (UST) sites located at facilities across the state to verify previous reports of releases and to characterize the nature and extent of soil and groundwater impacts. The assessments included surface and subsurface oil and groundwater sample collection where additional was needed to follow up UST removals and make accurate determinations concerning possible releases. Monitoring wells were installed at two sites with documented groundwater contamination. Due to the presence of light non-aqueous phase liquid (LNAPL) at one site, a product skimming system was designed and installed to remove the LNAPL.

City of Houston - Former Holmes Road Incinerator Site - From 2001 To 2005

*****Non-Kleinfelder Project*****

Served as Project Manager for the assessment to identify and characterize the nature and extent of chemicals of concern in soil and groundwater at a former incinerator site where incinerator ash had been buried on a portion of the site. More than 25 soil borings were completed on the site to assess the extent of Protective Concentration Level Exceedance (PCLE) Zones in native soil and fill material. Installation of monitoring wells verified that the impacts were limited to surface and subsurface soil. Mr. Voran negotiated with the TCEQ to divide the site into two Partial Response Action Areas (PRAAs). Remediation of several small areas of soil by excavation was completed in one of the PRAAs resulting in approval of closure for that area. The other PRAA included more than two acres where incinerator ash had been buried and elevated lead concentrations were documented. A Response Action Plan (RAP) was completed for the second PRAA including the use of a proposed parking lot as an engineering control to function as a cap over the area and prevent exposure. The RAP was approved by the TCEQ, but not implemented pending resolution of funding issues. A Screening Level Ecological Risk Assessment (SLERA) was also completed for the site.

Chiang, Patel & Yerby - Oak Estates Water Line Replacement - From 2011 To 2011

Mr. Voran managed a Phase II environmental site assessment (ESA) in support of a City of Houston water line replacement project in an area of southwest Houston. The Phase II ESA assessed 12 areas of concern that had been identified during the Phase I ESA. These included current and former dry cleaners, a former dry cleaner site with documented off-site contamination, UST facilities, and automotive repair facilities. Utility clearance was completed and permits were obtained as required for drilling on City of Houston property. Soil borings were completed as near as possible to the areas of proposed water line replacement and in accordance with City of Houston guidelines. The soil samples were collected and analyzed for parameters appropriate to the potential source and a report was prepared to document the results.

Texas Department of Transportation - South Loop Drive Property - From 2011 To 2011

Mr. Voran managed a Phase II environmental site assessment (ESA) of a property adjacent to a TxDOT facility in Waco, Texas, that was being considered for acquisition to facilitate possible expansion. The property was formerly used as an auto salvage facility and an underground storage tank (UST) facility. Soil borings and temporary monitoring wells were completed in areas of previous site activities considered likely to have possibly caused a release. IN addition, records were reviewed for a hazardous materials incident related to a fire at the former auto salvage yard. Soil borings were also completed in that area to assess potential impacts.

Jordan Smith

Environmental Geologist

Summary of Experience

Mr. Smith has two years of experience as an environmental scientist, conducting Phase I Environmental Site Assessments (ESAs), subsurface investigations, groundwater sampling, environmental compliance audits, interpreting analytical data, and assisting with regulatory compliance and permitting. He completed ESAs of several operating and abandoned industrial/oil and gas facilities and has assisted in performing multi-media compliance audits to evaluate facilities' compliance and permitting statuses with respect to waste management, air emissions, wastewater, stormwater, drinking water, septic systems, and hazard communication. He has written several Stormwater Pollution Prevention Plans (SWPPPs) and has a working knowledge of the stormwater regulations and the permitting process. Mr. Smith has assisted in the preparation of RCRA Permit Renewal Applications for two hazardous waste facilities. Mr. Smith has participated extensively in groundwater monitoring well installations, groundwater sampling, and field operations at hazardous and non-hazardous waste sites. He also has experience researching regulatory requirements and agency databases.

Mr. Smith has participated in several Phase I ESAs. He has experience conducting historical research and experience reviewing agency database reports to identify regulated sites that may have an impact on the property. Mr. Smith has conducted site reconnaissance and interviews and has prepared Phase I ESA reports in accordance with ASTM standards. Recognized environmental conditions have included potential soil and groundwater contamination from historical activities and/ or on-going site activities and potential releases from adjoining operations on neighboring sites.

Education

BS, Earth Science. Rice University, Texas, 2010

BA, Environmental Science. Rice University, Texas, 2010

Registrations

Geologist-in-Training (G.I.T.), No.GIT-44, Texas Board of Professional Geoscientists, TX

Project Experience

The following is a representative selection of Jordan Smith's project experience.

Phase I ESAs

Phase I Environmental Site Assessment and Compliance Audit, Refugio and Victoria Counties, Texas - From 08/2011 To 09/2011

*****Non-Kleinfelder Project*****

Mr. Smith participated in two ESAs at oil and gas support facilities, conducting field investigations of both sites and authoring two reports. Site investigations consisted primarily of determining any known or potential sources of contamination at the facilities as well as observations of site practices from a regulatory standpoint. He conducted regulatory database searches and prepared multiple figures and maps for reports. On one site, he oversaw a naturally occurring radioactive materials survey.

Phase I Environmental Site Assessment and Compliance Audit, Wise County, Texas - From 02/2012 To 03/2012

Mr. Smith conducted a Phase I ESA at oil and gas support facility, carrying out all field activities, research, and report preparation. Site investigations consisted primarily of determining any known or potential sources of contamination at the facilities as well as observations of site practices from a regulatory standpoint. He conducted regulatory database searches and prepared multiple figures and maps for the report.

Phase I Environmental Site Assessment, Oklahoma City, Oklahoma - From 08/2012 To 09/2012

Mr. Smith conducted a Phase I ESA at an abandoned gas pipeline compressor station, carrying out all field activities, record review, and report preparation. The site investigation consisted primarily of determining any known or potential sources of contamination at the former facility, having to reconstruct a plan of how the site once looked. During the course of the site investigation, Mr. Smith observed evidence of a release from a formerly staged piece of equipment.

Phase I Environmental Site Assessment, Pontotoc County, Oklahoma - From 10/2012 To 11/2012

Mr. Smith assisted in conducting a Phase I ESA at an active oilfield totaling over 150 acres. The site investigation consisted primarily of determining any known or potential sources of contamination at the former facility, having to reconstruct a plan of how the site once looked. During the course of the site investigation, Mr. Smith observed evidence of releases from multiple pump jacks and oil-water separators.

Phase I Environmental Site Assessments, Harris County, Texas - From 08/2012 To 12/2012

Mr. Smith conducted three Phase I ESAs at a pipeline laydown yard, a vacant property, and a three-mile long pipeline easement, carrying out all field activities, record review, and report preparation for two of the three reports. The site investigation consisted primarily of determining any known or potential sources of contamination at the former facility, having to reconstruct a plan of how the site once looked. During the course of the site investigation, Mr. Smith observed evidence of a release from a recently plugged wellhead and illegal dumping on the sites.

Artemis Harbert

Environmental Geologist

Summary of Experience

Ms. Harbert has 4 years of experience in site investigations including soil, groundwater and surface water sampling. Ms. Harbert has conducted Phase I and Phase II environmental site assessments (ESAs) and closure projects for infrastructure construction projects, industrial facilities and single parcel property acquisitions utilizing the Texas Risk Reduction Program (TRRP), LPST program, Texas Railroad Commission standards, and Voluntary Cleanup Program (VCP). She has experience in drilling and sampling operations at hazardous and non-hazardous waste sites. She has performed contractor oversight and documentation of remediation projects. Ms. Harbert has also managed four LPST sites and was responsible for coordinating field activities, oversight of product recovery events, performing field work, preparing reports of the field work and correspondence with regulatory agencies. She has also conducted multi-media compliance audits of several light industrial and manufacturing facilities and evaluated the facility compliance status with respect to hazardous and solid waste; air emissions; wastewater and storm water discharges; drinking water; septic systems; and hazardous chemicals.

Education

BS, Geology. Rice University, Texas, 2008

Registrations

Geologist-in-Training (G.I.T.), No.GIT-15, Texas Board of Professional Geoscientists, TX

Project Experience

The following is a representative selection of Artemis Harbert's project experience.

Phase I and II ESAs

City of Houston Phase I and II ESAs, Harris County, Texas - From 2008 To 2012

Brief Summary: Conducted 12 Phase I ESAs, each covering multiple street corridors, to support street improvement and waterline construction projects for the City of Houston. Based on Phase I ESA findings, conducted a Phase II ESA for several areas to assess possible contamination (chlorinated solvents and hydrocarbons) in street rights-of-way due to documented contamination at adjoining dry cleaner, gas station, and auto repair facilities.

Specific Role: Conducted historical research, site reconnaissance and prepared Phase I ESA reports in accordance with ASTM standards and, where appropriate, provided recommendations for further investigations. Prepared street obstruction permits, street cut permits, and traffic control plans for Phase II site assessment. Oversaw drilling of soil borings, performed field screening and logging of soil borings, and collected soil samples.

Phase I ESAs for Oil & Gas Equipment Service Facilities Acquisition, Multiple Locations - From Sept. 2011 To Nov. 2011

Brief Summary: Conducted Phase I ESAs and limited compliance surveys for five active oil & gas field equipment manufacturing/repair facilities, to support possible acquisitions.

Specific Role: Conducted historical research, performed site assessments for three properties, and prepared or assisted in preparing Phase I ESAs for five properties. Trained additional staff in Phase I ESAs and reviewed reports from staff in training. Based on recommendations in Phase I ESAs, surveys for NORM were conducted at two properties.

TxDOT Waco District Headquarters Phase I and II ESAs, McLennan County, Texas - From Jan 2011 To Aug 2011

Brief Summary: Conducted a Phase I ESA of a vacant lot prior to development to expand the TxDOT Waco District Headquarters. Based on the results of the Phase I ESA, the Property was historically used as a gas station, an auto wrecker business, and auto storage yard. A Phase II ESA was conducted to assess potential TPH, BTEX, PCBs, and metals contamination in soil and groundwater.

Specific Role: Conducted historical research, site reconnaissance and prepared the Phase I ESA report in accordance with ASTM standards. Oversaw drilling of soil borings and temporary monitoring wells, performed field screening and logging of soil borings, and collected soil samples. Developed and sampled temporary wells. Oversaw boring plugging and abandonment and coordinated to manage waste disposal.

Street ROW Phase II ESAs, Hidalgo County, Texas - From Dec 2011 To Feb 2012

Brief Summary: Conducted soil and groundwater investigation to assess potential contamination within the ROW for several streets prior to utility construction.

Specific Role: Reviewed information for five previously identified PST sites. Coordinated with local TxDOT and utility personnel to identify underground lines and arrange site access. Oversaw drilling of 15 soil borings and two temporary groundwater monitoring wells, performed field screening and logging of soil borings, and collected soil samples. Developed and sampled temporary wells. Oversaw boring plugging and abandonment and coordinated to manage waste disposal.

Target Property:

***City of Houston Montrose-Midtown
HOUSTON, Harris County, Texas 77006***

Prepared For:

Kleinfelder-Houston

Order #: 22185

Job #: 51459

Project #: 131422

Date: 12/28/2012

TARGET PROPERTY SUMMARY

City of Houston Montrose-Midtown
HOUSTON, Harris County, Texas 77006

USGS Quadrangle: **Houston Heights, TX**
Target Property Geometry: **Corridor**

Target Property Longitude(s)/Latitude(s):

**(-95.381736, 29.739006), (-95.378803, 29.742678), (-95.381366, 29.744259), (-95.380470, 29.743723),
(-95.379004, 29.745612), (-95.378155, 29.745090), (-95.379019, 29.745626), (-95.378525, 29.746202),
(-95.379019, 29.745612), (-95.384052, 29.748654), (-95.384067, 29.753291), (-95.384006, 29.755998),
(-95.384006, 29.757700), (-95.383079, 29.757673), (-95.383110, 29.759831), (-95.383095, 29.761251),
(-95.381690, 29.761828)**

County/Parish Covered:

Harris (TX)

Zipcode(s) Covered:

Houston TX: 77002, 77003, 77004, 77006, 77007, 77019

State(s) Covered:

TX

***Target property is located in Radon Zone 3.**

**Zone 3 areas have a predicted average indoor radon screening level less than 2 pCi/L
(picocuries per liter).**

ACTION DESCRIPTIONS

DS - (DISCOVERY) - THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

PA - (PRELIMINARY ASSESSMENT) - COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

SI - (SITE INSPECTION) - THE PROCESS OF COLLECTING SITE DATA AND SAMPLES TO CHARACTERIZE THE SEVERITY OF THE HAZARD FOR THE HAZARD RANKING SCORE AND/OR ENFORCEMENT SUPPORT.

VS - (ARCHIVE SITE) - THE DECISION IS MADE THAT NO FURTHER ACTIVITY IS PLANNED AT THE SITE.

INDUSTRY CLASSIFICATION (NAICS) - **NO NAICS INFORMATION REPORTED**

SITE HISTORY (INCLUDES GENERATORS AND NON-GENERATORS)

DATE RECEIVED BY AGENCY: **08/03/2006**

NAME: **CACHE CLEANERS**

GENERATOR CLASSIFICATION: **LARGE QUANTITY GENERATOR**

ACTIVITY INFORMATION

GENERATOR STATUS: **CONDITIONALLY EXEMPT SMALL QUANTITY GENERATOR**

SUBJECT TO CORRECTIVE ACTION UNIVERSE: **NO**

TDSFs POTENTIALLY SUBJECT TO CORRECTIVE ACTION UNDER 3004 (u)/(v) UNIVERSE: **NO**

TDSFs ONLY SUBJECT TO CORRECTIVE ACTION UNDER DISCRETIONARY AUTHORITIES UNIVERSE: **NO**

NON TDSFs WHERE RCRA CORRECTIVE ACTION HAS BEEN IMPOSED UNIVERSE: **NO**

CORRECTIVE ACTION WORKLOAD UNIVERSE: **NO**

IMPORTER: **NO**

UNDERGROUND INJECTION: **NO**

MIXED WASTE GENERATOR: **NO**

UNIVERSAL WASTE DESTINATION FACILITY: **NO**

RECYCLER: **NO**

TRANSFER FACILITY: **NO**

TRANSPORTER: **NO**

USED OIL FUEL BURNER: **NO**

ONSITE BURNER EXEMPTION: **NO**

USED OIL PROCESSOR: **NO**

FURNACE EXEMPTION: **NO**

USED OIL FUEL MARKETER TO BURNER: **NO**

USED OIL REFINER: **NO**

SPECIFICATION USED OIL MARKETER: **NO**

USED OIL TRANSFER FACILITY: **NO**

USED OIL TRANSPORTER: **NO**

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 8/2012

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BF Brownfields Management System

VERSION DATE: 10/2012

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment.

BRS Biennial Reporting System

VERSION DATE: 12/2009

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 3/2012

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System

VERSION DATE: 10/2012

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

DNPL Delisted National Priorities List

VERSION DATE: 10/2012

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

DOCKETS EPA Docket Data

VERSION DATE: 12/2005

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

DOD Department of Defense Sites

VERSION DATE: 12/2005

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 11/2012

This database includes site locations where Engineering and/or Institutional Controls have been identified as part of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

ERNSTX Emergency Response Notification System

VERSION DATE: 12/2011

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSTX Facility Registry System

VERSION DATE: 5/2012

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

FUDS Formerly Used Defense Sites

VERSION DATE: 10/2011

The 2010 FUDS inventory includes properties previously owned by or leased to the United States and under Secretary of Defense jurisdiction. The remediation of these properties is the responsibility of the Department of Defense.

HISTPST Historical Gas Stations

VERSION DATE: 7/1930

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

HMIRSR06 Hazardous Materials Incident Reporting System

VERSION DATE: 6/2012

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ICIS Integrated Compliance Information System (formerly DOCKETTS)

VERSION DATE: 8/2012

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 8/2012

In 2006, the Integrated Compliance Information System (ICIS) - National Pollutant Discharge Elimination System (NPDES) became the NPDES national system of record for select states, tribes and territories. ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

LUCIS Land Use Control Information System
VERSION DATE: 9/2006

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System
VERSION DATE: 2/2012

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NFRAP No Further Remedial Action Planned Sites
VERSION DATE: 10/2012

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities
VERSION DATE: 11/2012

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

NLRRCRAG No Longer Regulated RCRA Generator Facilities

VERSION DATE: 11/2012

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 11/2012

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

NPDES06 National Pollutant Discharge Elimination System

VERSION DATE: 4/2007

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. This database includes permitted facilities located in

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data.

NPL National Priorities List

VERSION DATE: 10/2012

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

ODI Open Dump Inventory

VERSION DATE: 6/1985

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

PADS PCB Activity Database System

VERSION DATE: 10/2011

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCSR06 Permit Compliance System

VERSION DATE: 8/2012

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

PNPL Proposed National Priorities List

VERSION DATE: 10/2012

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 11/2012

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RCRAGR06 Resource Conservation & Recovery Act - Generator Facilities

VERSION DATE: 11/2012

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). This database includes sites located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous

waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

RCRASC RCRA Sites with Controls

VERSION DATE: 6/2012

This list of Resource Conservation and Recovery Act sites with institutional controls in place is provided by the U.S. Environmental Protection Agency.

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities

VERSION DATE: 11/2012

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 8/2012

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

SFLIENS CERCLIS Liens

VERSION DATE: 6/2012

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/2009

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/2010

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/2006

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

APAR Affected Property Assessment Reports

VERSION DATE: 11/2012

As regulated by the Texas Commission on Environmental Quality, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

BSA Brownfields Site Assessments

VERSION DATE: 10/2012

The Brownfields Site Assessments database is maintained by the Texas Commission on Environmental Quality (TCEQ). The TCEQ, in close partnership with the U.S. Environmental Protection Agency (EPA) and other federal, state, and local redevelopment agencies, and stakeholders, is facilitating cleanup, transferability, and revitalization of brownfields through the development of regulatory, tax, and technical assistance tools.

CALF Closed & Abandoned Landfill Inventory

VERSION DATE: 11/2005

The Texas Commission on Environmental Quality, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments in the State, has located over 4,000 closed and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail. For landfills located in the Capital Area Planning Council of Governments (CAPCOG) Region, both unpermitted and permitted landfills are contained in this database. The CAPCOG regional landfill data was originally developed by Southwest Texas State University (1997) and combined with aerial photography and other GIS data from CAPCO GIS (2002).

DCR Dry Cleaner Registration Database

VERSION DATE: 7/2012

The database includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

GWCC Groundwater Contamination Cases

VERSION DATE: 12/2011

This report contains a listing of groundwater contamination cases which were documented for the 2011 calendar year. Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The agencies reporting these contamination cases include the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

HISTGWCC Historic Groundwater Contamination Cases

VERSION DATE: NR

This historic report contains all agency groundwater contamination cases documented from 1994 to 2010. The agencies that reported these contamination cases included the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

IHW Industrial and Hazardous Waste Sites

VERSION DATE: 11/2012

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

IOP Innocent Owner / Operator Database

VERSION DATE: 10/2012

Texas Innocent Owner / Operator (IOP), created by House Bill 2776 of the 75th Legislature, provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination. The IOP database is maintained by the Texas Commission on Environmental Quality.

LIENS TCEQ Liens

VERSION DATE: 7/2012

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

LPST Leaking Petroleum Storage Tanks

VERSION DATE: 11/2012

The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality. This listing includes aboveground and underground storage tank facilities with reported leaks.

MSD Municipal Setting Designations

VERSION DATE: 7/2012

The Texas Commission on Environmental Quality defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.

MSWLF Municipal Solid Waste Landfill Sites

VERSION DATE: 8/2012

The municipal solid waste landfill database is provided by the Texas Commission on Environmental Quality. This database includes active landfills and inactive landfills, where solid waste is treated or stored.

NOV Notice of Violations

VERSION DATE: 12/2012

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is a written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

PIHW Permitted Industrial Hazardous Waste Sites

VERSION DATE: 11/2012

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

PST Petroleum Storage Tanks

VERSION DATE: 11/2012

The Petroleum Storage Tank database is administered by the Texas Commission on Environmental Quality (TCEQ). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

RRCVCP Railroad Commission VCP and Brownfield Sites

VERSION DATE: 11/2012

According to the Railroad Commission of Texas, their Voluntary Cleanup Program (RRC-VCP) provides an incentive to remediate Oil & Gas related pollution by participants as long as they did not cause or contribute to the contamination. Applicants to the program receive a release of liability to the state in exchange for a successful cleanup.

RWS Radioactive Waste Sites

VERSION DATE: 7/2006

This Texas Commission on Environmental Quality database contains all sites in the State of Texas that have been designated as Radioactive Waste sites.

SF State Superfund Sites

VERSION DATE: 12/2012

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). As required by the Texas Solid Waste Disposal Act, Texas Health and Safety Code, Chapter 361, the Texas Commission on Environmental Quality identifies and evaluates these facilities for inclusion on the state Superfund registry. This registry includes any recent developments and the anticipated action for these sites.

SIEC01 State Institutional/Engineering Control Sites

VERSION DATE: 10/2012

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination. The sites included on this list are regulated by various

www.geo-search.net · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

programs of the Texas Commission on Environmental Quality (TCEQ).

SPILLS Spills Listing

VERSION DATE: 8/2012

This Texas Commission on Environmental Quality database includes releases of hazardous or potentially hazardous materials into the environment.

TIERII Tier II Chemical Reporting Program Facilities

VERSION DATE: 12/2011

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2011 calendar years.

VCP Voluntary Cleanup Program Sites

VERSION DATE: 10/2012

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses. The VCP database is maintained by the Texas Commission on Environmental Quality.

WMRF Recycling Facilities

VERSION DATE: 11/2012

This listing of recycling facilities is provided by the Texas Commission on Environmental Quality's Recycle Texas Online service. The company information provided in this database is self-reported. Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ regulations or other applicable laws. This database is no longer maintained and includes the last compilation of the program participants before the Recycle Texas Online program was closed.

TCEQ Public Information Request number: 13-10969-PIR

Dear Ms. Smith:

The Texas Commission on Environmental Quality (TCEQ) has received your request for information under the Texas Public Information Act. After reviewing the appropriate resources of the TCEQ, we have been unable to locate any responsive records in the possession of the TCEQ concerning the above referenced site.

Although no files were found, the Waste Permits Division has provided the following listings of known unauthorized solid waste disposal sites they are maintained by the local Council of Governments. We encourage you to check the closed municipal solid waste landfill inventory, maintained by them. To determine your local Council, please visit this website for their address.

http://www.txregionalcouncil.org/display.php?page=regions_map.php

If you have any further questions concerning this matter, you may contact me at (512) 239-4805 or e-mail at: openrecs@tceq.texas.gov

Sincerely,

Stacey Harper

Please fill out our customer survey at: www4.tceq.state.tx.us/comm_exec/customersurvey

Open Records Request Form

Fill out the Open Records Request form below to request public information (PIR). TCEQ accepts Open Records Requests in any legible format; this form is intended to be a guide to help expedite requests.

*Make a copy of the form for your records. Call 512/239-3282 for questions about the form.

Please Mail completed form to:
Texas Commission on Environmental Quality
Attn: Public Information Officer, MC 197
P.O. Box 13087
Austin, Texas 78711-3087

Or Fax your request to 512/239-OPEN (6736); or E-mail your request to openrecs@tceq.state.tx.us

Open Records Requests (ORR) aka Public Information Act (PIA) requests should contain the following information:

Please input your contact information below. Required fields are marked with an asterisk (*).

* Name Jordan P Smith, GIT

Company/Organization Kleinfelder

Type of Requestor Business

* Mailing Address 12000 Aerospace Ave, STE 450

* City Houston * State TX * ZIP Code 77034

* E-Mail Address jsmith@kleinfelder.com (E-Mail is the preferred form of communication.)

* Phone Number 281-436-7525 Fax Number 281-922-4767

***Please provide the complete name(s) of the site/facility; including address, you are inquiring about:**

The site is an approximately 2 mile long right of way (ROW) corridor through the Montrose and Midtown neighborhoods of Houston, TX and does not have a specific address. The corridor is divided into two sections: The first begins north of Allen Parkway, continues along Gillette Street to Dallas Street to Genesee Street to Tuam Street ending at Louisiana Street. The second corridor begins at the intersection of Tuam Street and Smith Street, continues along Smith to Elgin Street, stretches along Elgin from Brazos Street to Milam Street, continues along Milam to Francis Street, and picks up again on Milam at Berry Street and ends at Alabama Street. A site map is attached.

Open Records Request Form

Many facilities are found in the TCEQ's Central Registry. For example a search by Regulated Entity (RN) will reveal permits and registrations regarding a facility's Air, Water, Waste or Remediation ID numbers.

Please provide any information which will enable the agency to perform a more comprehensive record search:

The site is an approximately 2 mile long ROW. A site map is attached. The start of the site is at approximately 1801 Allen Pkwy, and its terminus is at approximately 3790 Milam St.

All TCEQ records are available for public view unless one of the exceptions to disclosure listed in the Public Information Act applies. Government Code Chapter 552 - Public Information, lists the exceptions. Some types of information that may be kept confidential include:

- Private, personal information such as certain financial or medical information;
- Certain law enforcement information, which may include the identity of informers;
- Complainant's identity;
- Some information related to ongoing litigation;
- Proprietary information submitted by regulated entities;
- Attorney-client (privileged).

Are you requesting any and all documents including those that may meet an exception from disclosure under the Public Information Act (PIA)?

- Only publicly available documents
 Any and all documents (including confidential information)
(NOTE: 'Any and all documents' option may require an Attorney General ruling.)

Do you need the documents certified?

- Yes (additional fees apply)
 No

Individuals are entitled to request and review their personal information that the agency gathers on its forms. They may also have any errors in their information corrected. To review such information, contact us at 512/239-3282.

Subject: RE: Open Records Request

Dear: Jordan Smith,

In response to your above-referenced request, which was received by the City of Houston Fire Department on 1/22/2013; the custodian of records has located 4 page(s) of responsive documents. The fee for these documents is \$0.86 (\$0.40 for the copies, plus \$0.46 for postage). Please note that failure to respond to this letter in writing within 6 months of the date of this statement will result in withdrawal of your request. You may send your cash or check, payable to the City of Houston, to my attention at the below address. Upon receipt of your payment the records will be mailed to you. If you wish to pick up your documents, please contact me at the phone number below to arrange a mutually acceptable date and time. When picking up your documents, you will need to bring correct change or a check for the amount listed above, minus the postage, payable as detailed above.

If you have any questions regarding this matter, please contact me at 832.394.6867.

Sincerely,

Nikki Corpening

To: 'nekiea.corpening@houstontx.gov'
Subject: Open Records Request

Dear Ms. Corpening,

I am conducting Phase I Environmental Site assessments a 2 mile long right of way (ROW) that goes through the Montrose and Midtown. I am interested in any records pertaining to: spills or releases, USTs, ASTs, chemical storage/disposal areas, groundwater or monitoring wells, septic systems, permits and maps, inspections, citations, and any known hazardous building materials or impact identified at these properties.

As the site is a ROW, it does not have a specific address; however, I have included a site description and have attached a map. Please let me know if you need anything further.

The corridor is divided into two sections: The first begins north of Allen Parkway, continues along Gillette Street to Dallas Street to Genesee Street to Tuam Street ending at Louisiana Street. The second corridor begins at the intersection of Tuam Street and Smith Street, continues along Smith to Elgin Street, stretches along Elgin from Brazos Street to Milam Street, continues along Milam to Francis Street, and picks up again on Milam at Berry Street and ends at Alabama Street. The start of the site is at approximately 1801 Allen Pkwy, and its terminus is at approximately 3790 Milam St.

Thank you,
Jordan

Subject: RE: Open Records Request

Dear Ms. Corpening,

Thank you for the records; we received them this afternoon. I was wondering if there is any more information available regarding a release of 800 gallons of diesel at 500 Gillette Street on 12/17/2006.

Any further information you may have related to the incident would be appreciated.

Thank you in advance,

Jordan

Subject: RE: Open Records Request

Dear: Jordan Smith,

In response to your above-referenced request, which was received by the City of Houston Fire Department on 1/22/2013; the custodian of records has located 4 page(s) of responsive documents. The fee for these documents is \$0.86 (\$0.40 for the copies, plus \$0.46 for postage). Please note that failure to respond to this letter in writing within 6 months of the date of this statement will result in withdrawal of your request. You may send your cash or check, payable to the City of Houston, to my attention at the below address. Upon receipt of your payment the records will be mailed to you. If you wish to pick up your documents, please contact me at the phone number below to arrange a mutually acceptable date and time. When picking up your documents, you will need to bring correct change or a check for the amount listed above, minus the postage, payable as detailed above.

If you have any questions regarding this matter, please contact me at 832.394.6867.

Sincerely,

Nikki Corpening

Subject: Open Records Request

Dear Ms. Corpening,

I am conducting Phase I Environmental Site assessments a 2 mile long right of way (ROW) that goes through the Montrose and Midtown. I am interested in any records pertaining to: spills or releases, USTs, ASTs, chemical storage/disposal areas, groundwater or monitoring wells, septic systems, permits and maps, inspections, citations, and any known hazardous building materials or impact identified at these properties.

As the site is a ROW, it does not have a specific address; however, I have included a site description and have attached a map. Please let me know if you need anything further.

The corridor is divided into two sections: The first begins north of Allen Parkway, continues along Gillette Street to Dallas Street to Genesee Street to Tuam Street ending at Louisiana Street. The second corridor begins at the intersection of Tuam Street and Smith Street, continues along Smith to Elgin Street, stretches along Elgin from Brazos Street to Milam Street, continues along Milam to Francis Street, and picks up again on Milam at Berry Street and ends at Alabama Street. The start of the site is at approximately 1801 Allen Pkwy, and its terminus is at approximately 3790 Milam St.

Thank you,
Jordan
