Executive Summary

Corrigan Consulting, Inc. (CCI) was retained by Van de Wiele and Vogler, Inc. (VVI), on behalf of the City of Houston to conduct a Phase I Environmental Site Assessment (ESA) to support the Montrose Area Neighborhood Reconstruction Project (WBS No. N – 000400-0001-3). The project area is split into two sections, both located approximately one mile southwest of downtown Houston, Texas. The Montrose Project Area includes the rights-of-way (ROWs) along 12 street segments totaling 17,751 feet in length. The Austin Street Project Area includes the rights-of-way along one segment of Austin Street totaling 485 feet in length. The rights-of-way are assumed to be 20 feet wide on both sides of the street.

In January 2010, historical information, including city directories, available aerial photographs and topographic maps, and fire insurance maps, was reviewed to determine the historical use and development of the Project Area. A regulatory database report was obtained and reviewed to identify listed sites within the Project Area. A site reconnaissance and interviews were conducted in order to assess the possible presence of petroleum products and hazardous materials or releases within the Project Area.

Based on a review of historical aerial photographs and topographic maps, both the Section 1 and Section 2 Project Areas were developed as residential as early as the 1920s. By the 1960s, there was additional commercial development present on Alabama Ave, Montrose Rd, Richmond Rd, and Austin Street. The surrounding areas appear to be mixed residential and commercial as early as the 1920s. There was no obvious evidence of oil and gas exploration or production, large scale industrial activities, or commercial waste disposal activities within the Project Area, but there was some land scarring noted and there was extensive commercial development on some streets. Based on the city directory listings and fire insurance maps, there were gas stations, filling stations and dry cleaning facilities (>20 addresses), within the Project areas. There are potential impacts from the facilities listed below.

Based on a review of the regulatory database obtained from GeoSearch on January 15, 2010, there were spill sites, dry cleaning facilities, IHW sites, PST sites, LPST sites, APAR sites, IOP sites, Tier I sites, and VCP sites located within the search distance. Based on the locations of these facilities, there are potential impacts on the Project Area from one facility, near the Jack Street ROW.

A site reconnaissance was conducted on January 19, 2010. The Montrose Project Area is predominantly residential with mixed commercial located on Richmond, Alabama, and Montrose streets. The Austin Street Project Area was primarily residential with mixed commercial located north along the adjoining Caroline, Alabama and Truxillo streets. There were access restrictions which limited observations along the ROW including parked vehicles along many of the street segments within the Project Area, and parked vehicles in parking lots on adjoining properties. There were several recognized environmental conditions that could impact the Project Area including gas stations and dry cleaning facilities.

It is CCI's opinion that hazardous chemicals or petroleum products could be present at several locations (as shown in Figure 7-1). Based on the current City of Houston guidelines, which require investigating areas of anticipated contamination, a Phase II ESA should be conducted at the following sites, (as shown in Figure 7-1).

No.	Site	Address	Information	Distance from Project Area
7	Former PST site and former Houston Linen Service	602/604/606/610 Richmond	This site is a gated condo/ townhome complex. This site was listed as a dry cleaner in 2002. The Houston Linen Service was present in the 1950 fire insurance maps.	Along Jack ROW
11	Al's Washateria	701/703/707 W Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site was also listed as a washateria and dry cleaners since the 1970s and there are potential impacts from this site.	Along Greely ROW
12	Stanley Cleaners	602/ 610 W Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site has been a dry cleaner since the 1970s and there are potential impacts.	75 feet north, up-gradient of Jack
14	Inner Me Dance Studios/ former dry cleaner	607/609/617 Richmond	This site was a dance studio, but has been a dry cleaner (Grand Cleaners) since the 1960s and there are potential impacts.	Adjoining ROW, 100 feet south, down-gradient of Jack
15	Current Pak's Food Store/ Former Circle K and Pilgrims Cleaners and Laundry	301/303/305 W Alabama	This site was a dry cleaner from 1970-1984 and various filling stations from 1991 – 2007. There are potential impacts from this site.	Along Brandt ROW
16	Residence	539 W. Alabama	This site was a former dry cleaner from the 1940s – 1970s.	Along Greely ROW
17	Abandoned business/ former 1 st Stop Food Store, U-totem, and car care business	806/ 810 Richmond	This site was listed as a filling station/ auto shop from 1960 to 2002. There are potential impacts within the ROW.	Along Stanford ROW
19	Former Private Auto Garage	620 Richmond	This site is a gated condo/ townhome complex. This site was listed as a private auto garage in the 1950 fire insurance map.	Along Greely ROW

If groundwater is encountered during the Phase II Investigations, a groundwater sample from each site should be collected for laboratory analysis. In addition, the contractor should be informed that, during the construction of the water lines, if any evidence of spills or releases is encountered, the contractor should immediately notify VVI for further instructions. There were several data gaps identified during this ESA (see Section 7.3) and the impact of these data gaps on the findings is not known.

SECTION 1

Introduction and Background

1.1 Project Background and Objectives

Corrigan Consulting, Inc. was retained by Van de Wiele and Vogler, Inc (VVI) on behalf of the City of Houston to conduct a Phase I Environmental Site Assessment (ESA) to support the Montrose Area and Austin Street Neighborhood Street Reconstruction (WBS No. N – 000400-0001-3). The project area is split into two sections, both located approximately one mile southwest of downtown Houston, Texas. The Montrose Project Area includes the rights-of-way (ROWs) along 12 street segments totaling 17,751 feet in length (herein referred to as the “Montrose Project Area”). The Austin Street Project Area includes the rights-of-way along one segment of Austin Street totaling 485 feet in length (herein referred to as the “Austin Street Project Area”). The rights-of-way are assumed to be 20 feet wide on both sides of the street. A Project Area map with street segment descriptions is included as Figure 1-1 at the end of this section.

The City of Houston has requested this Phase I ESA to assess recognized environmental conditions associated with the Project Area. Because this project does not involve any property acquisition, the main focus of this ESA is to assess the potential for encountering contaminated media during the construction activities for the neighborhood street reconstruction.

1.2 Scope of Services, Limitations and Exceptions

The scope of work for this ESA included the general provisions of the American Society for Testing and Materials (ASTM) Standard E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and the City of Houston’s ECRA Standard with project-specific limitations and exceptions. The scope of work and limitations for this ESA were specified in the proposal dated December 9, 2009, which was approved by VVI and the City of Houston on February 5, 2010 (see Appendix A).

1.3 Changes in the Scope of Services

There were no changes in the scope of services for this project.

1.4 Reliance

This report has been prepared solely for use by Van de Wiele and Vogler, Inc. and the City of Houston. This report should not be distributed to or relied upon by third parties without written authorization and signed agreement from Corrigan Consulting, Inc.

1.5 Professional Qualifications

The historical research, database review, interviews, site reconnaissance and reporting that was performed for this Phase I ESA was completed by Ms. Ami Lillard, Field Geologist of Corrigan Consulting, Inc. and was directed and overseen by Ms. Gail Corrigan, President and Principal Environmental Scientist. Ms. Corrigan certifies that she meets the definition of an Environmental Professionals as defined in the ASTM Standard E1527-05 and Title 40 CFR Part 312, and has the specific qualifications based on education, training and experience to

assess a property regarding the nature, history, and setting of the property. Professional qualifications are included in Appendix A.

1.6 Certifications

This ESA has been performed in conformance with the standards and practices set forth in the ASTM E 1527-05 and the City of Houston's ECRA Standard. Any limitations, exceptions to, or deletion from, these requirements are referenced in Section 1.2 and detailed in Appendix A of this report.

SECTION 2

Location and Environmental Setting

2.1 Project Area Location and Description

The Montrose Project Area includes the ROWs along 12 street segments, totaling 17,751 feet in length, located approximately two miles southwest of downtown Houston, in Harris County, Texas. The approximate geographic center of the Montrose Project Area is latitude 29°44'12.30"N and longitude 95°23'14.78"W.

The Austin Street Project Area includes the ROW along a segment of Austin Street 485 feet in length, located approximately two miles southwest of downtown Houston, in Harris County, Texas. The approximate geographic center of the Austin Street Project Area is latitude 29°44'4.32"N and longitude 95°22'39.31"W.

The Project Area Vicinity Map is included as Figure 2-1 and at the end of this section.

2.2 Topography and Surface Water Drainage

Based on a review of the U.S. Geological Survey (USGS) Topographic Maps (Bellaire and Park Place Quadrangles), the Montrose and Austin Street Project Areas are located in an area with an elevation of approximately 55 feet above mean sea level. The general terrain of Harris County is relatively flat, with numerous small streams and bayous.

The Project Area is located approximately 1 mile south of Buffalo Bayou. The surface water drainage in the vicinity of the Project Area flows to the City of Houston storm water collection system. A copy of the USGS topographic map is included as Figure 2-2.

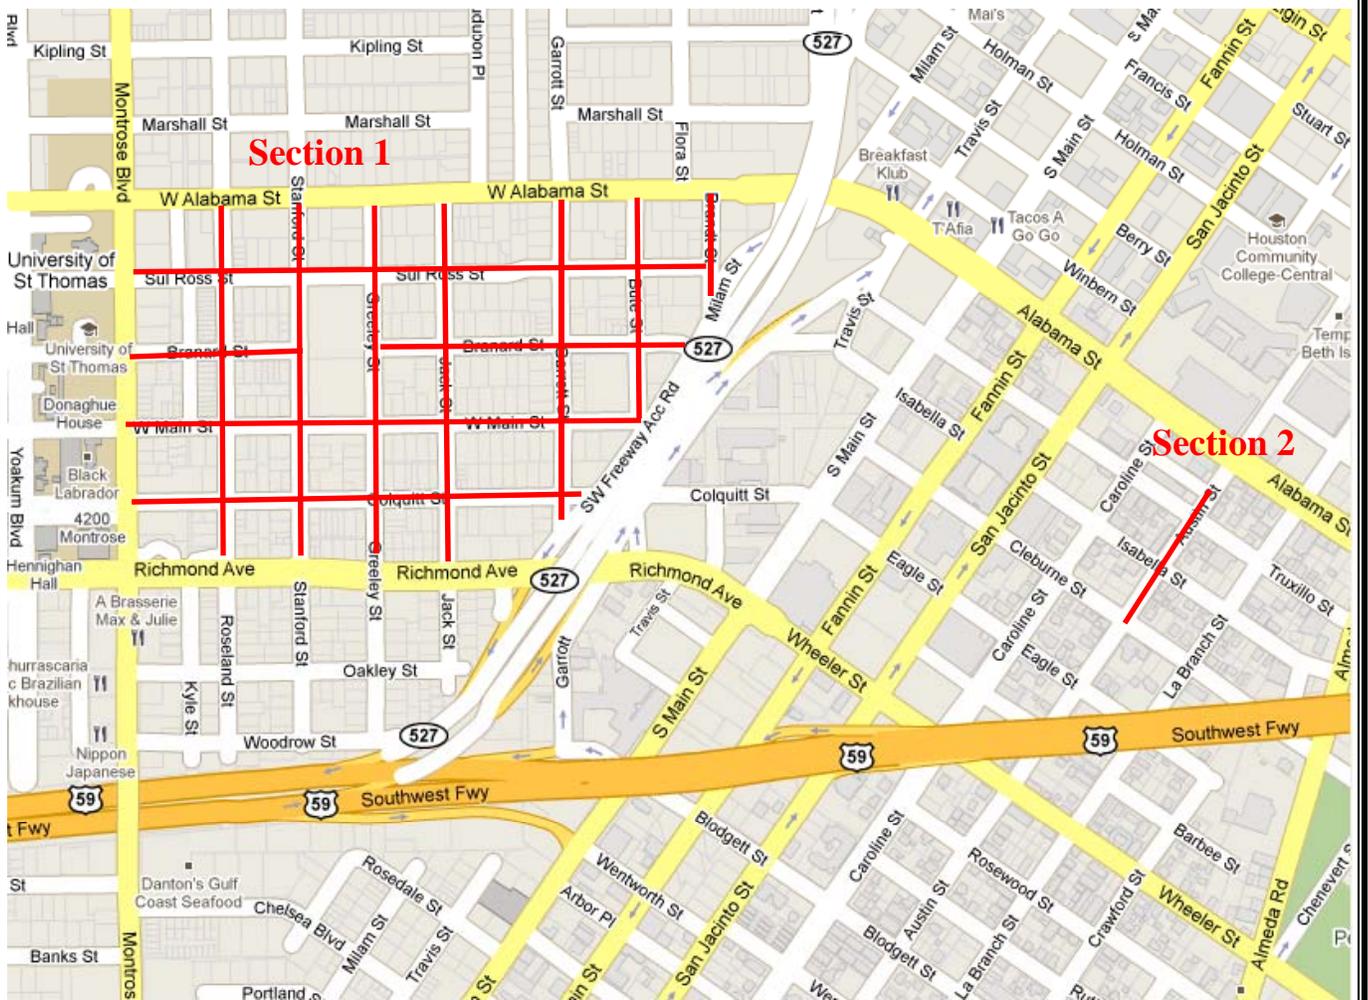

2.3 Geology

According to the 1982 Geologic Atlas of Texas, Beaumont Sheet, published by the University of Texas at Austin, Bureau of Economic Geology, the area of the Project Area is mapped as the Beaumont Formation of the Pleistocene Age. The formation is predominantly clay, with some silt, sand and gravel, and includes inter-distributary muds, abandoned channel-fill muds, and overbank fluvial muds, as well as stream channel and point bar deposits. The surface is almost featureless, characterized by relict river channels shown by meander patterns and pimple mounds on meander belt ridges. Pimple mounds are sandy-loam mounds, rising approximately one foot above the surrounding clay-loam soils. The Beaumont Formation is characterized by low permeability, high water-holding capacity, high compressibility, poor drainage, level-to-depressed relief, low shear strength, and high plasticity. The Geologic Map is included as Figure 2-3 in this section.

2.4 Hydrogeology

The Beaumont Formation, along with the underlying Montgomery, Bentley, and Willis Sand Formations, comprise the Chicot Aquifer, which extends approximately 400 feet below surface in the area of the Project Area. The Evangeline Aquifer is approximately 600 feet thick and extends from the base of the Chicot Aquifer to approximately 2,000 feet below surface (*Stratigraphic and Hydrogeologic framework of Part of the Coastal Plain of Texas*, 1979, Texas Department of Water Resources). Shallow groundwater can typically be encountered at

a depth of 10 to 20 feet below the surface in the Harris County area. The Project Area is not located in a recharge area (*Approximate Areas of Recharge to the Chicot and Evangeline Aquifer Systems in the Houston-Galveston Area, 1977, USGS*). The Groundwater Recharge Map is included as Figure 2-4. The Chicot and Evangeline Aquifers are the principal sources of groundwater in the area of the Project Area; however, the drinking water in Harris County is primarily obtained from treated surface water. The general direction of groundwater flow in Harris County is toward the southeast, but can be influenced by local surface water features such as streams and bayous.

Qb

Qb: Beaumont Formation

Mostly clay, silt and sands; includes mostly stream channel, point bar, natural levee, back swamps, and to a lesser extent coastal marsh and mud-flat deposits; concretions of calcium carbonate, iron oxide, and iron-manganese oxides in zones of weathering; surface almost featureless, characterized by relic river channels shown by meandering pattern and pimple mounds on meander ridges, separated by area of low, relatively smooth, featureless back swamp deposits without pimple mounds; thickness + 100 feet

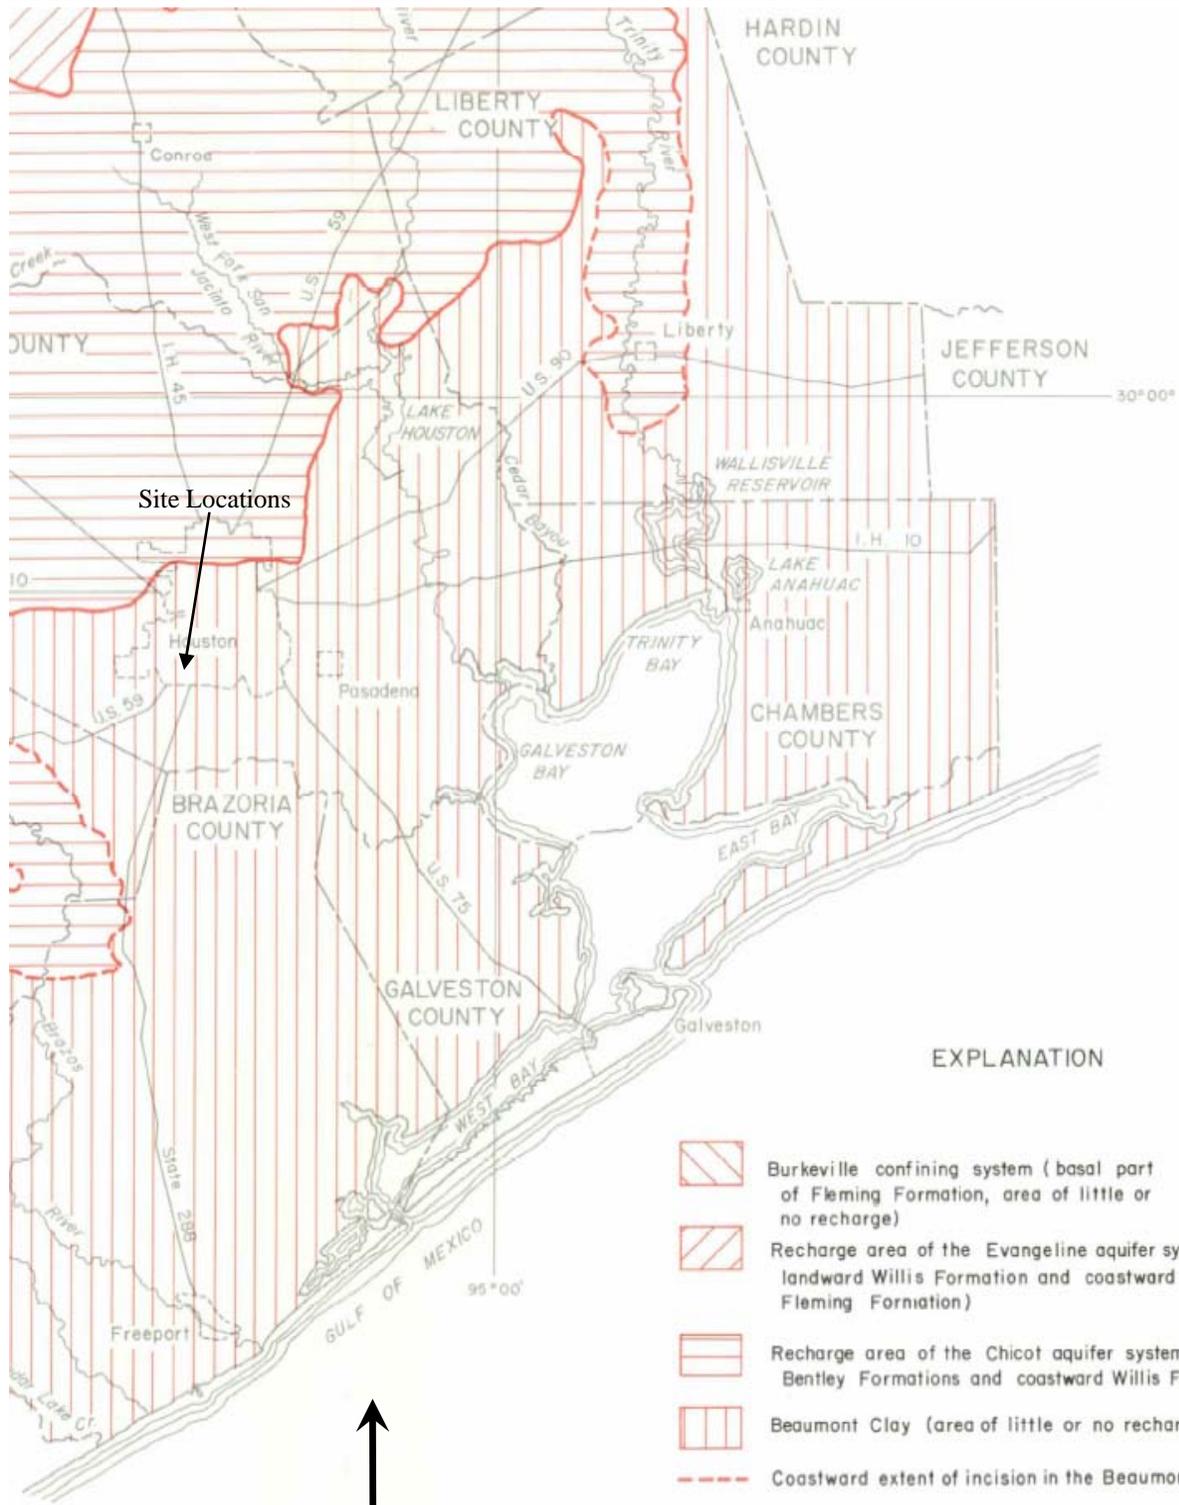

Qb

Dominantly Clay and mud of low permeability, high water-holding capacity, high compressibility, high to very high shrink-swell potential, poor drainage, level to depressed relief, low shear strength, and high plasticity; geologic units include interdistributary muds, abandoned channel-fill muds and overbank fluvial muds.

SECTION 3

User Provided Information

In accordance with the ASTM E-1527-05 Standard Practice for ESAs, the user (Van de Wiele and Vogler, Inc. or VVI) is responsible for providing the information listed below. Mr. Dan Simeone of VVI completed a questionnaire on February 5, 2010. The information provided is summarized below and a Record of Communication is included in Appendix A.

3.1 Chain-of-Title Review

A chain-of-title review was not included in the scope of work for this ESA because this was an infrastructure project with no planned property acquisition.

3.2 Review of Environmental Liens and Activity and Use Limitations

No information regarding environmental liens or activity and use limitations was provided by VVI. A records search for environmental liens was not included in the scope of work for this ESA.

3.3 Specialized Knowledge or Experience

VVI did not have any specialized knowledge or experience related to recognized environmental conditions associated with the Project Area.

3.4 Actual Knowledge of the User

VVI did not have any actual knowledge or experience related to recognized environmental conditions associated with the Project Area.

3.5 Reason for Significantly Lower Purchase Price

An evaluation of the purchase price was not necessary for this ESA because this was an infrastructure project with no planned property acquisition.

3.6 Commonly Known or Reasonably Ascertainable Information

VVI did not provide any information related to recognized environmental conditions associated with the Project Area.

3.7 Previous Environmental Reports

No previous environmental reports were provided during this ESA.

SECTION 4

Historical Use of Project Area

4.1 Review of Historical Aerial Photographs and Topographic Maps

Historical aerial photographs and topographic maps were reviewed to help establish prior land use and to identify on-site activities or obvious surface features that might indicate a recognized environmental condition. Aerial photographs and topographic maps were obtained from GeoSearch, Inc. and reviewed for potential recognized environmental conditions within the Project Area, which are listed below. A copy of the aerial photographs and topographic maps is included in Appendix B.

Section 1 Project Area – Montrose Project Area

Date	Property	Adjoining Properties	Potential RECs
1915 Topo	Residential	Residential, undeveloped further south	No
1929 Topo	(Poor Quality), Residential	(Poor Quality), Residential, undeveloped further south	No
1944 Aerial	Residential and commercial development, Houston School for Performing Arts present	Commercial development present to the southeast	No
1947 Topo	Same as 1944 Aerial	Commercial development present to the east, Hermann Park present to the south	No
1953 Aerial	Same as 1944 Aerial	Same as 1944 Aerial	No
1955 Topo	Same as 1944 Aerial	Same as 1944 Aerial	No
1967 Topo	Houston School for Performing Arts expanded	Additional commercial and residential development to the northwest and south	No
1969 Aerial	Commercial development present on W. Alabama, Montrose, and Richmond.	US 59 developed to the south and Spur 527 to the east, further southeast additional commercial development	No
1979 Aerial	Same as 1969 Aerial	Same as 1969 Aerial	No
1982 Topo	Same as 1969 Aerial	Additional commercial development to the west and northwest.	No
1989 Aerial	Same as 1969 Aerial	Same as 1969 Aerial	No
1995 Topo	Same as 1969 Aerial	Same as 1969 Aerial	No
1996 Aerial	Additional commercial development	Additional commercial development	No
2004 Aerial	Same as 1996 Aerial	Same as 1996 Aerial	No

Based on a review of historical aerial photographs and topographic maps, the Section 1 Project Area was developed as residential as early as the 1920s. By the 1960s, there was additional commercial development present on W. Alabama, Montrose, and Richmond. The surrounding

areas appear to be mixed residential and commercial as early as the 1920s. Additional development was present in the 1960s in the south and southwest. There was no obvious evidence of oil and gas exploration or production, large scale industrial activities, or commercial waste disposal activities within the Project Area, but there was some land scarring noted and there was extensive commercial development on some streets.

Section 2 Project Area – Austin Street Project Area

Date	Property	Adjoining Properties	Potential RECs
1915 Topo	Residential Development	Residential, commercial to the northeast	No
1929 Topo	(Poor Quality) same as 1915 Topo	(Poor Quality) same as 1915 Topo	No
1944 Aerial	Additional residential development present, commercial development present at intersection of Truxillo and Austin St.	Additional residential development, commercial development present along Alabama St.	No
1947 Topo	Same as 1944 Aerial	Same as 1944 Aerial	No
1953 Aerial	Same as 1944 Aerial	Same as 1944 Aerial	No
1955 Topo	Same as 1944 Aerial	Same as 1944 Aerial	No
1967 Topo	Same as 1944 Aerial	Expansion of commercial development in the northeast	No
1969 Aerial	Same as 1944 Aerial	Same as 1967 Topo	No
1979 Aerial	Same as 1944 Aerial	Commercial development present to the southwest	No
1982 Topo	Same as 1944 Aerial	Same as 1979 Aerial	No
1989 Aerial	Re development of commercial property on north end of Austin St.	Same as 1979 Aerial	No
1995 Topo	Same as 1989 Aerial	Same as 1979 Aerial	No
1996 Aerial	Same as 1989 Aerial	Same as 1979 Aerial	No
2004 Aerial	Commercial development in the central portion of the Property	Additional commercial development present to the northeast	No

Based on a review of historical aerial photographs and topographic maps, the Section 2 Project Area was developed as residential as early as the 1920s. By the 1960s, there was additional commercial development present towards the northern portion of Austin Street. The surrounding areas appear to be mixed residential and commercial as early as the 1920s. Additional development was present in the 1990s in the north. There was no obvious evidence of oil and gas exploration or production, large scale industrial activities, or commercial waste disposal activities adjoining the Project Area but there was some land scarring noted and there was extensive commercial development on some streets.

4.2 Review of City Directories

City directories, which identify businesses located by address, have been published since the 1700s to the present. The city directories were obtained from GeoSearch on January 15, 2010

and a copy of the directories is included in Appendix C. The following table shows city directory listings for the Project Area.

Section 1 – Montrose Area

Address	Date(s)	Occupant	Distance from Project Area
301 W. Alabama	1996-2007 1991 1980 1984 1970	Paks Food Store, Tiger Exp Circle K Food Store Dreamland Nite Club Dabney St. Nite Club Pilgrims Cleaners and Laundry	Along ROW
303 W. Alabama	1980	Pilgrims Cleaners and Laundry	Along ROW
305 W. Alabama	1984	Pilgrims Cleaners and Laundry	Along ROW
539 W. Alabama	1940-1970	Rainbow Laundry and Cleaners	Between Garrot and Jack ROW
602 W. Alabama	2007 1996-2002 1991	Stanley Cleaners Regency Cleaners The Perfect Press	Adjoining, north of Project Area
610 W. Alabama	1970	Gulf Port Cleaners & Launderers	Adjoining, north of Project Area
701 W. Alabama	1996-2002 1991 1970-1980	A&G Washateria AEC Washateria Washateria & Coin Dry Cleaning	Along ROW
707 W. Alabama.	1991-1996	Supermatic Cleaners	Along ROW
606 Richmond	2002	In & Out Cleaners	Along ROW
607 Richmond	1995	Grand Cleaners	Adjoining, south of Project Area
609 Richmond	1960-1984	Grand Cleaners	Adjoining, south of Project Area
617 Richmond	1991	Grand Cleaners	Adjoining, south of Project Area
806 Richmond	1995-2002 1960-1984	1 st Stop Food Store U-Totem Inc	Along ROW
810 Richmond	1995	Crane's Car Care	Along ROW
903 Richmond	1960-1965 1951-1955 1945 1940	Beacon Cleaners Richmond Cleaners Harris Cleaners and Laundry Richmond Cleaners and Dryer	Adjoining, south of Project Area
911 Richmond	1935	Richmond Cleaners and Dryers	Adjoining, south of Project Area
917 Richmond	1929-1930	Richmond Cleaners	Adjoining, south of Project Area
919 Richmond	1995 1984-1991 1980 1975 1960-1970 1951-1955	Carriage Car Care Hollywood Car Care Metric Motors Montrose Auto Haus Montrose Texaco Service Station Buckley A B Service Station	Adjoining, south of Project Area

Address	Date(s)	Occupant	Distance from Project Area
	1920-1955	Richmond Service Station	
920 Richmond	2007 1991-2002 1984 1970-1980 1960-1965 1940-1955	Montrose Shell Shell Service Station Montrose Shell Station Cordose Shell Station Montrose Gulf Station Various Filling / Service Stations	Along ROW

Based on the city directories data, there were several dry cleaners, service stations, and auto care facilities listed within the Project Area or adjoining to the Montrose Project Area. Montrose Area, historically, has had dry cleaners and service station as early as the 1940s. The listings on W. Alabama are in an up-gradient direction and there are potentials for impacts onto the Project Area. In addition, there are listings on Richmond adjoining the Project Area, and there are potential impacts to the Project Area.

4.3 Review of Fire Insurance Maps

Fire Insurance maps were developed in the mid 1800s to determine insurance rates by identifying fire hazards (such as gasoline), building construction materials, and the locations of fire protection equipment and fire stations. Fire insurance maps were available for the Project Area in 1924 and 1950, and the sites with environmental concerns are summarized below.

Address	Date(s)	Occupant	Distance from Project Area
539 W. Alabama	1950	Dry Cleaner	Along ROW
513 W. Alabama	1950	Filling Station	Along ROW
602/604/610 Richmond	1950	Houston Linen Service	Along ROW
620 Richmond	1950	Private Garage	Along ROW
903 Richmond	1940-1965	Dry Cleaner	Adjoining, south of Project Area

There were additional commercial businesses present in the Montrose Project Area but they were not within or immediately adjoining the Project Area. The Austin Street area was residential in both fire insurance maps.

4.4 Interviews Regarding Historical Use and Development

Neither Van de Wiele and Vogler, Inc. nor the City of Houston provided any information on the environmental conditions within the Project Area. During the site reconnaissance, interviews were conducted and the information from those interviews is included in Section 6.

4.5 Summary of Historical Information

Based on a review of historical aerial photographs and topographic maps, both the Montrose Area and Austin Street Project Areas were developed as residential as early as the 1920s. By the 1960s, there was additional commercial development present on W. Alabama, Montrose, Richmond, and Austin St. The surrounding areas appear to be mixed residential and commercial as early as the 1920s. There was no obvious evidence of oil and gas exploration or production, large scale industrial activities, or commercial waste disposal activities within the Project Area, but there was some land scarring noted and there was extensive commercial development on some streets. Based on the city directory listings and fire insurance maps, there were gas stations, filling stations and dry cleaning facilities present at >20 locations along the ROW within the Project Areas. There are potential impacts from the facilities listed below.

Address	Date(s)	Occupant	Distance from Project Area
301 W. Alabama	1991-2007 1970	Paks Food Store, Tiger Exp, Circle K Pilgrims Cleaners and Laundry	Along ROW
303 W. Alabama	1980	Pilgrims Cleaners and Laundry	Along ROW
305 W. Alabama	1984	Pilgrims Cleaners and Laundry	Along ROW
539 W. Alabama	1940-1970	Rainbow Laundry and Cleaners, dry cleaner present in fire insurance map	Along ROW
513 W. Alabama	1950	Filling Station	Along ROW
602 W. Alabama	1991-2007	Stanley Cleaners, Regency Cleaners, and The Perfect Press	Adjoining, north of Project Area
610 W. Alabama	1970	Gulf Port Cleaners & Launderers	Adjoining, north of Project Area
701 W. Alabama	1970-2002	A&G Washateria, AEC Washateria Washateria & Coin Dry Cleaning	Along ROW
707 W. Alabama	1991-1996	Supermatic Cleaners	Along ROW
602/604/610 Richmond	1950	Houston Linen Service	Along ROW
606 Richmond	2002	In & Out Cleaners	Along ROW
607/ 609 Richmond	1960 -1995	Grand Cleaners	South of Project Area
620 Richmond	1950	Private garage present in fire insurance maps	Along ROW
617 Richmond	1991	Grand Cleaners	South of Project Area
806 Richmond	1960-2002	1 st Stop Food Store, U-Totem Inc	Along ROW
810 Richmond	1995	Crane's Car Care	Along ROW
903 Richmond	1940-1965	Beacon Cleaners, various dry cleaners	Adjoining south of Project Area
911 Richmond	1935	Richmond Cleaners and Dryers	South of Project Area
917 Richmond	1929-1930	Richmond Cleaners	South of Project Area
919 Richmond	1975 -1995	Carriage Car Care, Metric	South of Project Area

Address	Date(s)	Occupant	Distance from Project Area
	1920-1970	Motors, Montrose Auto Haus Texaco, Various Service Stations	
920 Richmond	1940-2007	Shell Service Station, Various Filling/ Service Stations	Along ROW

The availability of historical aerial photographs and topographic maps was limited and there were data gaps (over 5 year intervals). In addition, the review of potential recognized environmental conditions was limited by the scale and quality of the aerial photographs. Due to the scale of the photographs, it was impossible to identify all of the commercial/light industrial structures and/or the type of commercial/light industrial activities. In addition, there were limited fire insurance maps available for the Project Area and city directories were not provided for all street segments.

SECTION 5

Regulatory Database Records Review

5.1 Database Search Distances & Assumptions

A regulatory agency database list was obtained and reviewed to identify listed hazardous material sites located within the Project Area and in the vicinity of the Project Area. The agency records were obtained on January 11, 2010 from a commercial source, GeoSearch, which reportedly updates their records at least every 90 days, or within 90 days of the last update published by the agency. This records review included information that was reasonably ascertainable, publicly available agency database records, retrievable by geographical location in relation to the Project Area. A copy of this report is included in Appendix D. The databases searched and the search distances are listed below:

<u>Federal Records</u>	<u>Search Distance</u>
Superfund (NPL) Sites	1.0 mile
CERCLIS & NFRAP Sites	0.5 mile
RCRA CORRACTS/ TSD/ Generator Sites	1.0 mile/0.5 mile
ERNS/NRS Sites	Project Area only
FRS Sites	Project Area only
<u>State Records</u>	<u>Search Distance</u>
State Superfund Sites	1.0 mile
LPST Sites/ UST Sites	0.5 mile/ Project Area & Adjoining
Dry Cleaner (DCR) Sites	0.25 mile
Industrial Hazardous Waste (IHW) Sites	0.25 mile
Tier II Chemical Reporting Program Sites	0.5 mile
Landfill Sites	0.5 mile
Voluntary Cleanup Program (VCP) Sites	0.5 mile
Brownfield Sites	0.5 mile
Institutional/Engineering Control Sites	0.5 mile
Spill Sites	Project Area only

The regulatory records were reviewed for sites within 500 feet of the Project Area, except for the NPL Sites, RCRA CORRACTS Sites, State Superfund Sites and State Hazardous Waste Sites, which were reviewed for sites within 1 mile (per the City of Houston's ECRA Standard). There were no listed sites identified within this modified search distance, except for the ones discussed in the following sections.

The Project Area is located approximately 2 miles south of Buffalo Bayou and the topography is relatively flat within the Project Area. The direction of groundwater flow in the Project Area is assumed to be toward the southeast for the purposes of assessing potential impacts from regulated sites.

5.2 Summary of Listed Facilities

The following table summarizes the listed facilities located within 500 feet of the Project Area. A map of all regulated sites is included as Figure 5-1. Additional discussion of selected facilities follows the table.

Section 1 – Montrose Area

Facility Name and Location	Distance from Project Area	Database Listing	Figure 5-1 #
Smith & Company Composition 711 W. Alabama	Adjoining Greely ROW. (up-gradient)	IHW, FRS, CESQG inactive	1
Stop N Go 235 3807 Greely	Along Greely ROW (up-gradient)	PST (2 USTs removed in 1994)	1
Al's Washateria 703 W. Alabama	Along Greely ROW (up-gradient)	FRS, DCR (drop station)	1
Shell/ TPG 570 07 920 Richmond	150 feet west of Roseland St. (side-gradient)	LPST, PST, FRS, GWCC	2
Exxon 67239 3807 Montrose	200 feet northwest of Sul Ross (up-gradient)	IHW, LPST, PST, FRS, GWCC (Groundwater contaminant extent not delineated)	3
University of St. Thomas 3812 Montrose	400 ft west of Sul Ross (up-gradient)	FRS	3
Montrose Dry Cleaners 3939K Montrose	75 feet north of Branard (up-gradient)	IHW, FRS, DCR (drop station), CESQE	4
House of Coleman printing services 901 W Alabama	Along Roseland ROW (up-gradient)	FRW, IHW, CESQG (inactive)	5
Residence 811 Richmond	150 feet southwest of Stanford (down-gradient)	LPST, soil contamination only case closed	6
600 Richmond 604 Richmond	Along Jack ROW at Richmond (side-gradient)	PST, 1 UST removed 1988	7
Berryman Chemical, Inc 626 W Alabama	125 feet north of Greely (up-gradient)	FRS	8
Malcher Investments 507 Colquitt	Along Colquitt ROW (down-gradient)	Spills (13 drums)	9
Performing and Visual Arts High School 4001 Stanford	Along Stanford ROW	FRS	10

Facility Name and Location	Distance from Project Area	Database Listing	Figure 5-1 #
HISD High School for Performing Visual Arts 700 W Main	Along ROW W Main St	FRS	11
Stanley Cleaners 602 W Alabama	75 feet north of Jack (up-gradient)	FRS, DCR (drop station)	12
Chevron 922 W Alabama	300 feet northwest of Roseland (up-gradient)	LPST, NOV, PST, FRS, IHW, case closed, inactive SQG	13
Estate of Norbert Choueroum 919 Richmond	200 feet southwest of Roseland (down-gradient)	LPST, case closed	14
Shell 1010 W Alabama	400 feet northwest of Sul Ross (up-gradient)	LPST, PST, IHW, Inactive waste generator, Groundwater contamination not delineated	15
Williams Brothers Construction Co Office 3800 Milam	Along Brandt ROW (cross-gradient)	FRS	16
Oakley Downs Trust 707 Oakley	400 feet south of Richmond and Greely (down-gradient)	PST (USTs removed)	17
Grand Cleaners 617 Richmond	100 feet south of Jack (down-gradient)	IHW, inactive CESQG	17
Stop N Go 1003 Richmond	300 feet southwest of Colquitt and Montrose (down/cross gradient)	PST, LPST, Groundwater contamination not delineated	18
Sunmart 165 / United Cleaners & Alterations 411 Richmond	350 feet southeast of Colquitt (down-gradient)	PST, DCR (drop station)	19

Stop N Go – Site No. 1

The former Stop N Go PST site is located on the southeast intersection of Greeley and Alabama along the Greely ROW. This location is now a Blue Bird Circle Resale Shop. There was no indication of a former gas station. The former Stop N Go had two USTs installed in 1976 and removed in 1994. The site was not listed as an LPST site and no impacts are anticipated in the Project Area.

Former Exxon – Site No. 3

The former Exxon gas station is located 200 feet north of the Project Area at the intersection of Montrose and W Alabama. Three USTs were removed in 2001 and groundwater was impacted.

This site is currently an auto shop, with on-going groundwater monitoring. No monitoring wells were noted in Project Area and no impacts are anticipated and no impacts are anticipated.

Montrose Dry Cleaners – Site No. 4

No records were available at the Houston TCEQ office for this site. This site is currently a drop station. There are no monitoring wells present on or near this business and no impacts are anticipated in the Project Area.

600 Richmond – Site No. 7

This location is currently an upscale, gated community of townhomes/ condos. This address was reported as having one UST installed in 1981 and removed in 1994. The site was not listed as an LPST site and no impacts are anticipated in the Project Area.

Malcher Investments – Site No. 9

Thirteen drums of an unknown substance were spilled at the intersection of Colquitt and Garrott along the ROW. This spill was reported in 1993 and there were no affected waterways. The responsible party is listed as Melcher Investments. This location is currently a residence, and no impacts are anticipated in the Project Area.

Shell Service Station – Site No.15

The Shell gas station is located 400 feet north of the Project Area at the intersection of Montrose and W. Alabama. Limited records were available from the TCEQ and copies are included in Appendix E. Groundwater was impacted but due to the distance of this site, no impacts are anticipated in the Project Area.

Grand Cleaners – Site No. 17

The former location of Grand Cleaners was registered as an IHW site. Grand Cleaners was listed in the city directories as 607-607 Richmond since the 1960s and there are potential impacts from this site.

Section 2 – Austin Street Area

Facility Name and Location	Distance from Project Area	Database Listing	Figure 5-1 #
143D ABN INF 3816 Caroline	400 feet northwest (up-gradient)	LPST, PST, UST removed, case closed	1
Texas National Guard Armory 3820 Caroline	450 feet northwest (up-gradient)	IOP	1
Hagio 4211 Caroline	500 feet southwest (down/cross-gradient)	IHW	2
Baker-Jones Co, Inc 4116 Caroline	500 feet southwest (down/cross-gradient)	PST	3
Houston Auto Bake 1502 Alabama	500 feet northeast (cross-gradient)	IHW	4

143D ABN INF – Site No. 1

The former Shell/Mobil gas station LPST site is located 400 feet northwest along Caroline and Alabama. The tank was removed in 1991. The site had minor soil contamination and the case was closed. Due to the status and location of this facility, there are no impacts anticipated within the Project Area

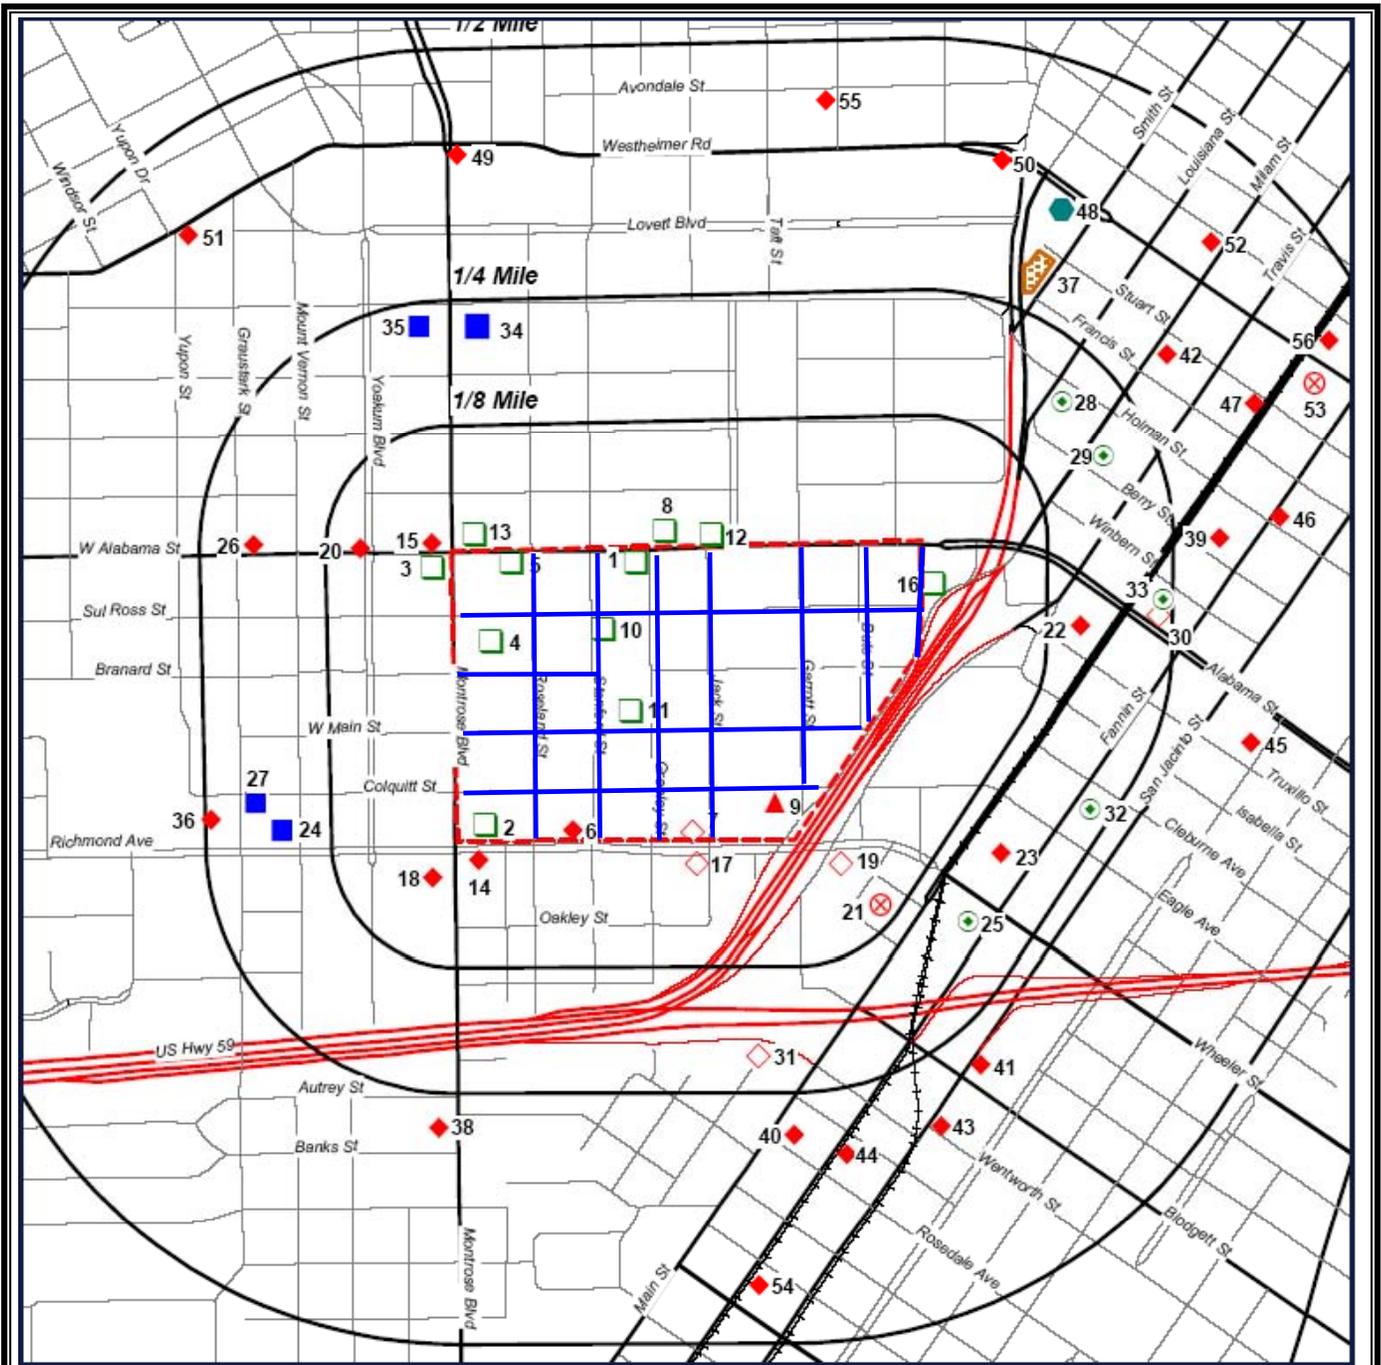

5.3 Oil and Gas Well and Pipeline Sites

The Railroad Commission of Texas (RRC) maintains maps of exploration and production oil and gas well locations. There were no mapped oil and gas wells or pipelines located within the Project Area.

5.4 Summary of Records Review

Based on a review of the regulatory database obtained from GeoSearch on January 11, 2010, there is potential for impact to the Montrose Area from the site listed below. There are no impacts anticipated from any of the sites to the Austin Street Area.

Facility Name and Location	Distance from Project Area	Database Listing	Figure 5-1 #
Grand Cleaners 617 Richmond	100 feet south of Jack (down-gradient)	IHW, inactive CESQG	17

SECTION 6

Results of the Site Reconnaissance

6.1 Site Reconnaissance Methodology

On January 19, 2010 a site reconnaissance of the Project Area was performed by Ms. Ami Lillard, Field Geologist of Corrigan Consulting, Inc. Observations were made regarding the presence of hazardous substances and petroleum products, and obvious evidence of past spills or releases within the Project Areas and adjoining properties.

The Project Area was inspected by walking and/or driving each street segment of the planned Neighborhood Reconstruction project. The Montrose Project Area was mostly residential, with commercial present in the central part of the Project Area. The Austin Street Project Area is currently residential with commercial along the northern section. There were access restrictions which limited observations along the ROW, including parked vehicles along many of the street segments within the Project Area and parked vehicles in parking lots on adjoining properties. A Site Features Map is included as Figure 6-1. Selected photographs are included in Appendix F.

6.2 Site Observations

6.2.1 Current Use of Project Area

The Project Area was primarily residential. The Houston School for Performing and Visual arts is located in the center of the Section 1 (Montrose). Commercial businesses are located along the outlying streets of Richmond and W. Alabama. Section 2 was residential with commercial located towards the northern section of Austin along Truxillo.

6.2.2 Description of On-site Structures

There were no structures located within the Project Areas, defined as a 20-foot wide right-of-way along the street segments.

6.2.3 Hazardous Substances and Petroleum Product Use and Storage

There were several commercial businesses that used and/or stored hazardous substances or petroleum products within the Project Areas. There were also historical businesses that used and/or stored hazardous substances or petroleum products. These are listed in Table 6.1.

6.2.4 Solid and Hazardous Wastes

There was no obvious evidence of hazardous waste used or stored within the Project Areas noted during the site reconnaissance.

6.2.5 Landfills

There was no obvious evidence of a landfill within the Project Areas.

6.2.6 Surface Impoundments

There was no obvious evidence of surface impoundments, pits, ponds or lagoons within the Project Areas.

6.2.7 Underground Storage Tanks

There was no obvious evidence of underground storage tanks (USTs) located within the Project Areas; however, there were USTs located at several of the businesses adjoining to the Montrose Area. There were no obvious USTs located within the Project Area or adjoining properties of the Austin Street Project Area.

6.2.8 Aboveground Storage Tanks

There was no obvious evidence of aboveground storage tanks (ASTs) observed within the Project Areas.

6.2.9 Wastewater

There was no obvious evidence of wastewater discharges or septic tanks observed within the Project Areas.

6.2.10 Storm Water and Surface Water Drainage

There was no obvious evidence of contaminated storm water discharges within the Project Areas. The surface water drainage in the vicinity of the Project Areas flows to roadside ditches and the City of Houston storm water collection system.

6.2.11 Wetlands

There was no obvious evidence of potential wetlands within the Project Areas.

6.2.12 Electrical Transformers, Capacitors and other Polychlorinated Biphenyls Sources

There were pole-mounted electrical transformers observed throughout the Project Areas but there was no obvious evidence of spills or releases, such as stressed or stained vegetation.

6.2.13 Railroads

There were no railroad tracks observed within the Project Areas.

6.2.14 Water Wells

There was no obvious evidence of water wells observed within the Project Areas.

6.2.15 Oil and Gas Wells

There was no obvious evidence of oil and gas wells observed within the Project Areas.

6.2.16 Pipelines

There was no obvious evidence of pipelines observed within the Project Areas.

6.2.17 Utilities

There were overhead utility lines, underground water lines, and underground cable lines observed throughout the Project Areas.

6.3 Surrounding Project Area Reconnaissance

A site reconnaissance of the surrounding properties was conducted by vehicle and three interviews were conducted at the dry cleaning facilities adjoining the Project Area (see Appendix G). These properties are also included in Table 6.1.

The Austin Street Project Area is primarily residential. There are no dry cleaners or gas stations located on or adjoining the Project Area.

Table 6.1 Montrose Project Area

No.	Site	Address	Information	Distance from Project Area
1	Former Stop N Go	3807 Greely	Facility is currently a blue bird circle resale shop. Former PST site, removed 1994. No obvious impacts noted.	Along Greely ROW
2	Shell	920 Richmond	Shell gas station, LPST site, with groundwater contamination. It has been a filling station since the 1940s. No obvious impacts noted.	150 feet, side-gradient west of Roseland
3	Montrose Car Shop/ former Exxon Station	3807 Montrose	Currently a car repair shop, and LPST site. No monitoring wells were noted within the Project Area and no impacts are anticipated.	200 feet northwest, up-gradient of Sul Ross
4	Montrose Dry Cleaners	3939 Montrose	Interview with owner states it is a drop-off facility. No monitoring wells on-site. No impacts are anticipated.	Adjoining
5	Shell	1010 W. Alabama	Shell station, LPST site. No impacts anticipated due to the distance from the Project Area.	400 feet northwest, up-gradient of Sul Ross
6	Notary Public/ former LPST site	811 Richmond	This site is a former LPST site, currently a commercial building with a notary service. No monitoring wells were noted and no impacts are anticipated.	150 feet southwest, down-gradient of Stanford
7	Former PST site and former Houston Linen Service	602/604/606/610 Richmond	This site is a gated condo/ townhome complex. This site was listed as a dry cleaner in 2002. The Houston Linen Service was present in the 1950 fire insurance maps.	Along Jack ROW
8	CVS/ former Stop N Go LPST site	1003 Richmond	This site is currently a CVS pharmacy, former LPST site located down-gradient and no impacts are anticipated.	300 feet southwest
9	Location of spill	507 Colquitt	Malcher Investments is the responsible party, 13 drums of unknown substance. No obvious impacts noted.	Along Colquitt ROW

No.	Site	Address	Information	Distance from Project Area
10	Chevron/ former LPST site	922 W. Alabama	This site was demolished and rebuilt as a new Chevron station. The TCEQ approved closure of the LPST site and no impacts are anticipated.	300 feet northwest of Roseland
11	Al's Washateria	701/703/707 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site was also listed as a washateria and dry cleaners since the 1970s and there are potential impacts from this site.	Along Greely ROW
12	Stanley Cleaners	602/610 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site has been a dry cleaner since the 1970s and there are potential impacts.	75 feet north, up-gradient of Jack
13	Current Bank/ former LPST site/ former dry cleaners	903/911/ 917/919 Richmond	Former service stations and LPST site, currently a Washington Mutual Bank. This site was historically a dry cleaner and a car care/ filling station since the 1920s. Due to the location of this site, no impacts are anticipated.	200 feet southwest, side-gradient of Roseland
14	Inner Me Dance Studios/ former dry cleaner	607/609/617 Richmond	This site was a dance studio, but has been a dry cleaner (Grand Cleaners) since the 1960s and there are potential impacts.	Adjoining ROW, 100 feet south, down-gradient of Jack
15	Current Pak's Food Store/ Former Circle K and Pilgrims Cleaners and Laundry	301/303/305 W. Alabama	This site was a dry cleaner from 1970-1984 and various filling stations from 1991 – 2007. There are potential impacts from this site.	Along Brandt ROW
16	Residence	539 W. Alabama	This site was a former dry cleaner from the 1940s – 1970s.	Along Greely ROW
17	Abandoned business/ former 1 st Stop Food Store, U-totem, and car care business	806/810 Richmond	This site was listed as a filling station/ auto shop from 1960 to 2002. There are potential impacts within the ROW.	Along Stanford ROW

No.	Site	Address	Information	Distance from Project Area
18	Residence	513 W. Alabama	This site was a former filling station during the 1950s. However, the site is located 150 feet from either ROW and no impacts are anticipated.	Between Greely and Jack, 150 feet from ROW
19	Former Private Auto Garage	620 Richmond	This site is a gated condo/ townhome complex. This site was listed as a private auto garage in the 1950 fire insurance map.	Along Greely ROW

Table 6.1 Austin Street Area

No.	Site	Address	Information	Distance from Project Area
20	Empty parking lot/ former LPST site	3816 Caroline	This is a former LPST site, but, due to the distance, no impacts are anticipated.	400 feet northwest of Austin Street

There was no obvious evidence of a release at any of these sites. However, several of these sites were listed LPST sites with groundwater contamination.

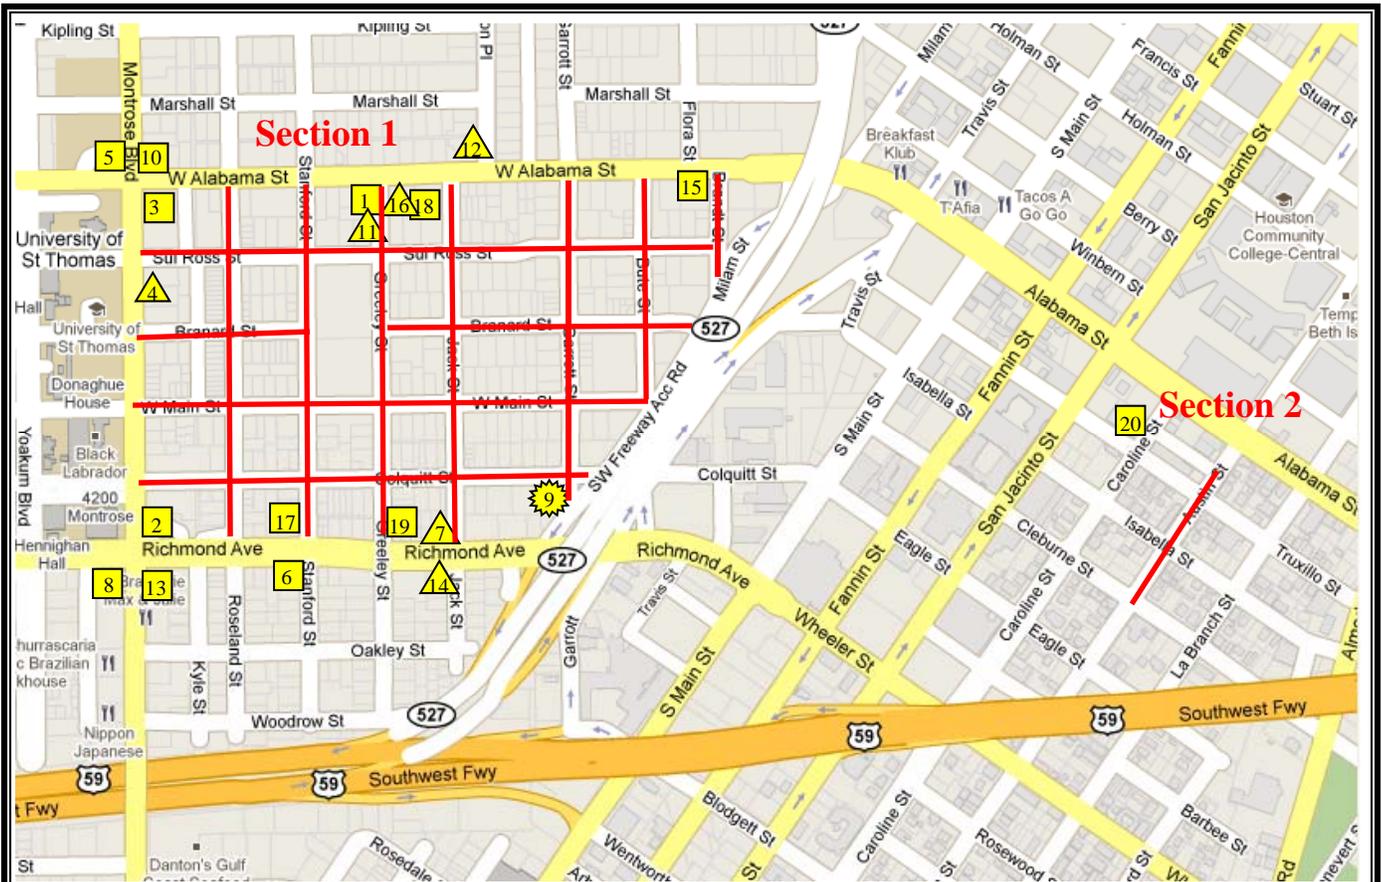

There were other commercial businesses located in the surrounding area, but due to the location and distances of these businesses, no impacts to the Project Area are anticipated.

6.4 Summary of Site Reconnaissance

A site reconnaissance was conducted on January 19, 2010. The Project Area is predominantly residential with mixed commercial located on Richmond, Alabama, & Montrose streets of the Montrose Project Area and primarily residential with mixed commercial located north along the adjoining Caroline, Alabama, & Truxillo St for the Austin Street Project Area. There were access restrictions which limited observations along the ROW including parked vehicles along many of the street segments within the Project Area, and parked vehicles in parking lots on adjoining properties. There were several recognized environmental conditions that could impact the Project Area and they are summarized below.

No.	Site	Address	Information	Distance from Project Area
7	Former PST site and former Houston Linen Service	602/604/606/610 Richmond	This site is a gated condo/ townhome complex. This site was listed as a dry cleaner in 2002. The Houston Linen Service was present in the 1950 fire insurance maps.	Along Jack ROW

11	Al's Washateria	701/703/707 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site was also listed as a washateria and dry cleaners since the 1970s and there are potential impacts from this site.	Along Greely ROW
12	Stanley Cleaners	602/610 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site has been a dry cleaner since the 1970s and there are potential impacts.	75 feet north, up-gradient of Jack
14	Inner Me Dance Studios/ former dry cleaner	607/609/617 Richmond	This site was a dance studio, but has been a dry cleaner (Grand Cleaners) since the 1960s and there are potential impacts.	Adjoining ROW, 100 feet south, down-gradient of Jack
15	Current Pak's Food Store/ Former Circle K and Pilgrims Cleaners and Laundry	301/305 W. Alabama	This site was a dry cleaner from 1970-1984 and various filling stations from 1991 – 2007. There are potential impacts from this site.	Along Brandt ROW
16	Residence	539 W. Alabama	This site was a former dry cleaner from the 1940s – 1970s.	Along Greely ROW
17	Abandoned business/ former 1 st Stop Food Store, U-totem, and car care business	806/810 Richmond	This site was listed as a filling station/ auto shop from 1960 to 2002. There are potential impacts within the ROW.	Along Stanford ROW
19	Former Private Auto Garage	620 Richmond	This site is a gated condo/ townhome complex. This site was listed as a private auto garage in the 1950 fire insurance map.	Along Greely ROW

No	Site	Address	No	Site	Address
1	Former Stop N Go	3807 Greely	11	Al's Washateria	701/703/707 W. Alabama
2	Shell, LPST Site	920 Richmond	12	Stanley Cleaners	602/ 610 W. Alabama
3	Montrose Car Shop / Former LPST Site	3807 Montrose	13	Bank / Former LPST Site and Dry Cleaner	903/ 911/ 917/ 919 Richmond Ave
4	Montrose Dry Cleaners	3939 Montrose	14	Dance Studio / Former Dry Cleaner	607/609/617 Richmond
5	Shell, LPST Site	1010 W. Alabama	15	Pak's Food Store/ no PSTs / Former LPST Site and Dry Cleaner	301/303/305 W. Alabama
6	Notary Service / Former LPST Site	811 Richmond	16	Currently Residence / Former Dry Cleaner	539 W. Alabama
7	Residence / Former Dry Cleaner	602/604/606/610 Richmond	17	Abandoned business / Former Auto Shop and Gas Station	806/810 Richmond
8	CVS / Former LPST Site	1003 Richmond	18	Former Gas Station	513 W. Alabama
9	Spill (13 drums, unknown substance)	507 Colquitt	19	Former Auto Garage	620 Richmond
10	Chevron / Former LPST Site	922 W. Alabama	20	Empty Parking Lot / Former LPST	3816 Caroline

SECTION 7

Summary, Conclusions and Recommendations

7.1 Summary

Corrigan Consulting, Inc. (CCI) was retained by Van de Wiele and Vogler, Inc. (VVI, on behalf of the City of Houston to conduct a Phase I Environmental Site Assessment (ESA) to support the Montrose Area Neighborhood Reconstruction Project (WBS No. N – 000400-0001-3). The project area is split into two sections, both located approximately 1 mile southwest of downtown Houston, Texas. The Montrose Project Area includes the rights-of-way (ROWs) along 12 street segments totaling 17,751 feet in length. The Austin Street Project Area includes the rights-of-way along one segment of Austin Street totaling 485 feet in length. The right-of-ways are assumed to be 20 feet wide on both sides of the street.

The City of Houston has requested this Phase I ESA to assess recognized environmental conditions associated with the Project Area. Because this project does not involve any property acquisition, the main focus of this ESA is to assess the potential for encountering contaminated media during the construction activities for the street reconstruction. The Phase I ESA included a review of the historical use and development of the Project Area and adjoining properties, a review of regulatory agency database records, and a visual site reconnaissance of the Project Area.

7.1.1 Summary of Historical Information

Based on a review of historical aerial photographs and topographic maps, both the Montrose Area and Austin Street Project Areas were developed as residential as early as the 1920s. By the 1960s, there was additional commercial development present on W. Alabama, Montrose, Richmond, and Austin St. The surrounding areas appear to be mixed residential and commercial as early as the 1920s. There was no obvious evidence of oil and gas exploration or production, large scale industrial activities, or commercial waste disposal activities within the Project Area, but there was some land scarring noted and there was extensive commercial development on some streets. Based on the city directory listings and fire insurance maps, there were gas stations, filling stations and dry cleaning facilities present at >20 locations along the ROW within the Project Areas. There are potential impacts from the facilities listed below.

Address	Date(s)	Occupant	Distance from Project Area
301 W. Alabama	1991-2007 1970	Paks Food Store, Tiger Exp, Circle K Pilgrims Cleaners and Laundry	Along ROW
303 W. Alabama	1980	Pilgrims Cleaners and Laundry	Along ROW

919 Richmond	1975 -1995 1920-1970	Carriage Car Care, Metric Motors, Montrose Auto Haus Texaco, Various Service Stations	South of Project Area
920 Richmond	1940-2007	Shell Service Station, Various Filling/ Service Stations	Along ROW

7.1.2 Summary of Records Review

Based on a review of the regulatory database obtained from GeoSearch on January 11, 2010, there is potential for impact to the Montrose Area from the site listed below. There are no impacts anticipated from any of the sites to the Austin Street Area.

Facility Name and Location	Distance from Project Area	Database Listing	Figure 7-1 #
Grand Cleaners 617 Richmond Ave	100 feet south of Jack (down-gradient)	IHW, inactive CESQG	14

7.1.3 Summary of Site Reconnaissance

A site reconnaissance was conducted on January 19, 2010. The Project Area was predominantly residential with mixed commercial located on Richmond, Alabama and Montrose streets of the Montrose Project Area and primarily residential with mixed commercial located north along the adjoining Caroline, Alabama, and Truxillo Streets for the Austin Street Project Area. There were access restrictions which limited observations along the ROW

including parked vehicles along many of the street segments within the Project Area, and parked vehicles in parking lots on adjoining properties. There were several recognized environmental conditions that could impact the Project Area and they are summarized in Section 6.4.

7.2 Summary of Recognized Environmental Conditions

Based on the results of this Phase I ESA, there were recognized environmental conditions associated with the Project Area including those listed below and shown in Figure 7-1:

No.	Site	Address	Information	Distance from Project Area
7	Former PST site and former Houston Linen Service	602/604/606/610 Richmond	This site is a gated condo/ townhome complex. This site was listed as a dry cleaner in 2002. The Houston Linen Service was present in the 1950 fire insurance maps.	Along Jack ROW
11	Al's Washateria	701/703/707 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site was also listed as a washateria and dry cleaners since the 1970s and there are potential impacts from this site.	Along Greely ROW
12	Stanley Cleaners	602/ 610 W. Alabama	An interview was conducted at this dry cleaning facility, it is a drop-off station. No monitoring wells were present. However, this site has been a dry cleaner since the 1970s and there are potential impacts.	75 feet north, up-gradient of Jack
14	Inner Me Dance Studios/ former dry cleaner	607/609/617 Richmond	This site was a dance studio, but has been a dry cleaner (Grand Cleaners) since the 1960s and there are potential impacts.	Adjoining ROW, 100 feet south, down-gradient of Jack
15	Current Pak's Food Store/ Former Circle K and Pilgrims Cleaners and Laundry	301/303/305 W. Alabama	This site was a dry cleaner from 1970-1984 and various filling stations from 1991 – 2007. There are potential impacts from this site.	Along Brandt ROW
16	Residence	539 W. Alabama	This site was a former dry cleaner from the 1940s – 1970s.	Along Greely ROW
17	Abandoned business/ former 1 st Stop Food Store, U-totem, and car care business	806/ 810 Richmond	This site was listed as a filling station/ auto shop from 1960 to 2002. There are potential impacts within the ROW.	Along Stanford ROW
19	Former Private Auto Garage	620 Richmond	This site is a gated condo/ townhome complex. This site was listed as a private auto garage in the 1950 fire insurance map.	Along Greely ROW

7.3 Data Gaps

There were several data gaps in the historical records including the availability and quality of aerial photographs. Due to the scale and poor quality of the aerial photographs, it was impossible to identify all of the commercial activities and or the type of commercial activities and impossible to distinguish between land scarring and poor aerial photograph quality. There were limited fire insurance maps for the Project Area, and city directories were not reviewed for all street segments. The impact of these data gaps on the findings of this report is unknown.

No information was provided by Van de Wiele and Vogler, other than a map of the Project Area. There were access restrictions which limited observations along the ROW including parked vehicles along many of the street segments within the Project Area, and parked vehicles in parking lots on adjoining properties. The possible presence of hazardous substances and petroleum products could not be determined in these areas. The impact of these data gaps on the findings of this report is unknown.

7.4 Conclusions

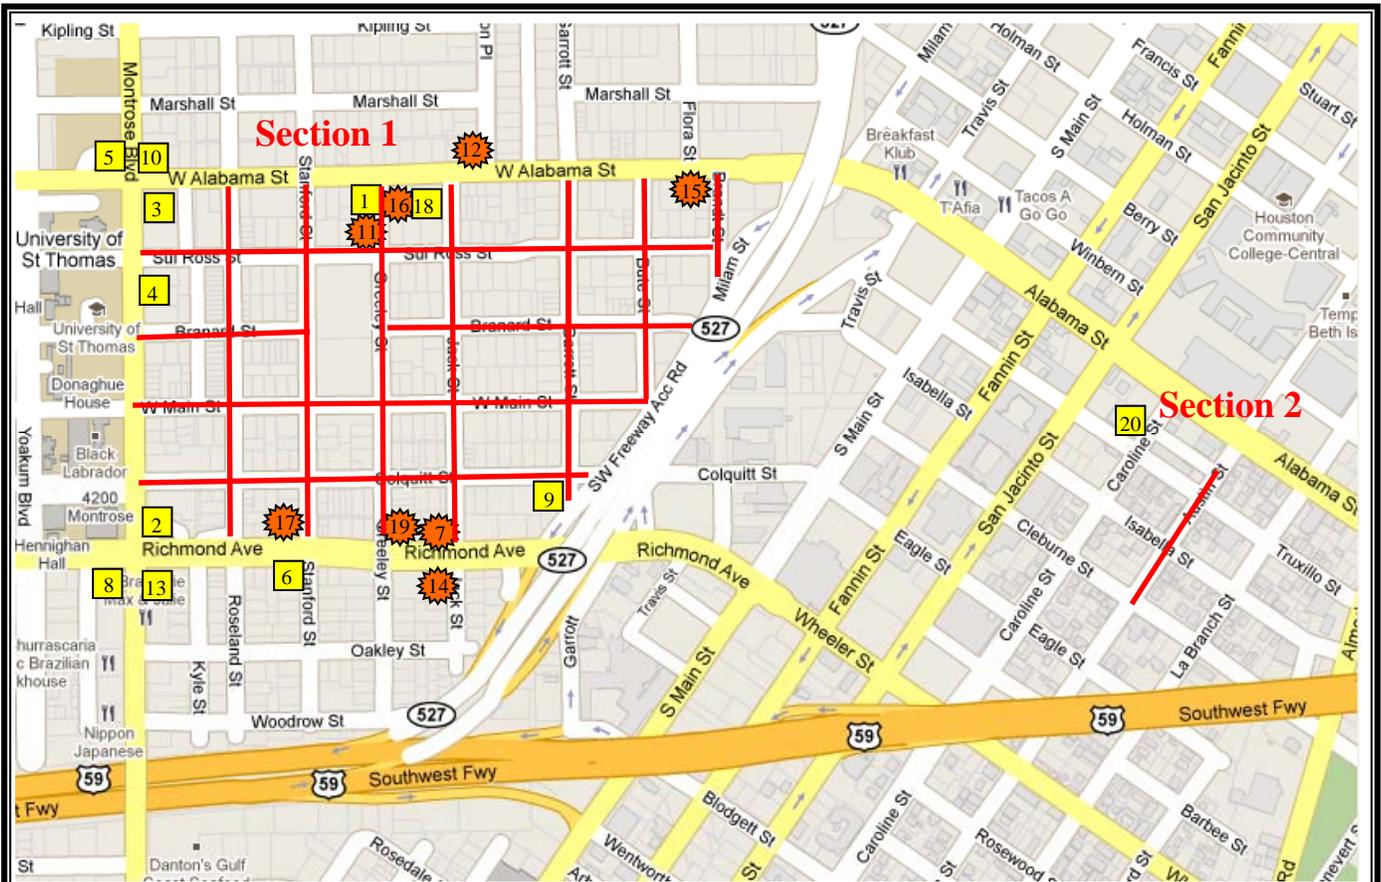

In the professional opinion of Corrigan Consulting, Inc., an appropriate level of inquiry has been made into the previous uses of the Project Area to support the neighborhood reconstruction project as part of this Phase I ESA, but additional investigation is warranted to further evaluate the potential RECs listed below.

7.5 Opinions

It is CCI's opinion that hazardous chemicals or petroleum products could be present at several locations (as shown in Figure 7-1.) Based on the current City of Houston guidelines, which require investigating areas of anticipated contamination, a Phase II ESA should be conducted at the following sites (as shown in Figure 7-1):

- Former Houston Linen Service (602/604/606/610 Richmond) (Site No. 7);
- Al's Washateria (701/703/707 W. Alabama) (Site No. 11);
- Stanley Cleaners (602 W. Alabama) (Site No. 12);
- Inner Me Dance Studio/ former dry cleaner (607/609/617 Richmond) (Site No. 14);
- Former Circle K and dry cleaner (301/303/305 W. Alabama) (Site No. 15);
- Former dry cleaner (539 W. Alabama) (Site No. 16);
- Former U-Totem and auto care (806/810 Richmond) (Site No. 17); and
- Former Private Auto garage (620 Richmond) (Site No. 19).

If groundwater is encountered during the Phase II Investigations, a groundwater sample from each site should be collected for laboratory analysis. In addition, the contractor should be informed that, during the construction of the water lines, if any evidence of spills or releases is encountered, the contractor should immediately notify VVI for further instructions.

No	Site	Address	No	Site	Address
1	Former Stop N Go	3807 Greely	11	Al's Washateria	701/703/707 W. Alabama
2	Shell, LPST Site	920 Richmond	12	Stanley Cleaners	602/ 610 W. Alabama
3	Montrose Car Shop / Former LPST Site	3807 Montrose	13	Bank / Former LPST Site and Dry Cleaner	903/ 911/ 917/ 919 Richmond Ave
4	Montrose Dry Cleaners	3939 Montrose	14	Dance Studio / Former Dry Cleaner	607/609/617 Richmond

**Re: Phase I & II Environmental Site Assessments
City of Houston Neighborhood Street Reconstruction
Project 467
CCI Proposal No. 09PR-1073R2**

Dear Mr. Simeone;

Corrigan Consulting, Inc. (CCI) appreciates this opportunity to propose our services to complete a Phase I Environmental Site Assessment (ESA) of the City of Houston neighborhood street reconstruction project listed above for Van De Wiele and Vogler, Inc. (VVI). VVI provided written description of the project from the City of Houston's RFQ E-10-06, (herein referred to as the "Property"):

- Area bounded by Richmond Avenue, Montrose Blvd, West Alabama Street, and Spur 527, including in particular Branard from Montrose to Spur 527, Brandt from Sul Ross to West Alabama, Bute from West Main to West Alabama, Colquitt from Montrose to Spur 527, Garrott from Spur 527 to West Alabama, Greeley from Richmond to West Alabama, Jack from Richmond to West Alabama, West Main from Montrose to Spur 527, Roseland from Richmond to West Alabama, Stanford from Richmond to West Alabama, and Sul Ross from Montrose to Spur 527, and
- Austin Street from Cleburne Ave. to Truxillo Street.

We understand that the City of Houston is requesting these services to assess recognized environmental conditions prior to the proposed reconstruction of streets, storm drainage, and wastewater in the project area. This ESA will be conducted according to the general provisions of the ASTM E1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and the City of Houston ECRE Standard. The scope of work will not include a chain-of-title because there will not be any property acquisition. The detailed scope of work for completing this project is attached.

Based on the historical and current use of the project area, a Phase II ESA may be warranted for this project. If necessary, a detailed scope of work and estimated cost will be provided based upon the findings and recommendations of the Phase I ESA and in accordance with ASTM E1903-97.

Schedule and Cost

CCI is prepared to begin work upon receipt of a signed purchase order or contract. We can complete the ESA within 4 weeks for a . The cost includes *double cost for records and radius maps and additional time for the site reconnaissance because there are two separate project areas*. In addition, the cost includes additional cost for reviewing records due to the location of the areas within commercial/industrial areas, dating back to the 1900s.

CORRIGAN CONSULTING, INC.

If necessary, then a Phase II ESA detailed scope of work and estimated cost will be provided based upon the findings and recommendations of the Phase I ESA. For budgetary purposes, the cost for a Phase II ESA for this project is estimated to be \$10,000 - \$15,000. We estimate the Phase II ESA will require an additional 4 weeks to complete.

We appreciate this opportunity to work with you. If there are any questions, please feel free to call Mr. Roxie L. Voran, Senior Associate, or me at (281) 922-4766.

Sincerely,

Gail A. Corrigan
President

Attachments

**Standard Scope of Work
Phase I Environmental Site Assessment
For Property Acquisitions**

Corrigan Consulting, Inc. will conduct Phase I Environmental Site Assessments (ESAs) for the City of Houston (City) projects according to the ASTM E1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Title 40 CFR Part 312 – Innocent Landowners, Standard for Conducting All Appropriate Inquiries, with exceptions and/or limitations as noted below. The ESA will be performed and/or directed by an Environmental Professional, as required in these standards. The purpose of the ESA will be to assess the presence of recognized environmental conditions (RECs) associated with the property. In the case of a water line project, the term "property" refers to the "project area".

Item 1: Project Coordination and Kickoff

CCI will coordinate with the City in order to obtain the required information according to the ASTM E 1527-05 Appendix X3: User Questionnaire including:

- A site map with the property boundaries and legal description;
- The name and contact number for the property owner;
- Confirm access arrangements and/or confirm any access restrictions; and
- Obtain any previous reports or information about the property from the City;

CCI will also prepare a Site-specific Health and Safety Plan and will conduct an internal kick-off meeting to review the objectives and any site specific information.

Item 2: Historical Research

In order to assess the current and historical use and development of the property and the possible presence of recognized environmental conditions associated with the property, the following items will be performed:

- Obtain historical aerial photographs and USGS topographic maps (5 year intervals);
- Obtain historical fire insurance maps; and
- Obtain city directories for the property address and adjoining streets.

The standard scope of work will not include the following items unless requested by the City. If any of the other items are subsequently deemed necessary, we will notify you and provide recommendations.

- Chain-of-Title with the historical property ownership;
- City building department records;
- Zoning/Land use records;
- Property tax records;
- Other historical sources (local historians, libraries, etc.); and
- Purchase price and market value.

Upon reviewing the historical information, maps will be prepared including any obvious potential RECs for use during the site reconnaissance.

**Standard Scope of Work
Phase I Environmental Site Assessment
For Property Acquisitions**

Item 3: Regulatory Database Review

In order to assess the presence of regulated sites on the property or in the surrounding area, a database list of regulated sites will be obtained from a commercial source including the following environmental regulatory agency records and search distances as specified below:

<u>Federal Records</u>	<u>Search Distance*</u>
Superfund Sites	1 mile
CERCLIS Sites	1 mile
RCRA Corrective Action Sites	1 mile
RCRA TSD Sites	0.5 mile
RCRA Generator Sites	Property & adjoining properties
ERNS/NRS Sites	Property only
<u>State Records</u>	<u>Search Distance*</u>
Superfund Sites	1 mile
Landfill/Solid Waste Sites	0.5 mile
LPST	0.5 mile
PST Sites	Property & adjoining properties
Voluntary Cleanup Sites	0.5 mile
Brownfields Sites	0.5 mile (if included in database)
Spill Sites	Property only
<u>Additional Records</u>	<u>Search Distance*</u>
Fire Department Response Sites	Property only
Tribal records	Property only

**The search distance will be from the center point in the project area.*

The standard scope of work will not include the following items unless requested by the City. If any of these items are subsequently deemed necessary, we will notify you and provide recommendations.

- Abandoned landfill sites;
- Water well records;
- Harris County Public Health & Environmental Services records
- Other municipality environmental and health department records; and
- Utility company records (related to PCBs).

The standard scope of work will include reviewing site-specific files on regulated sites at the TCEQ Houston office, such as Superfund site records, leaking petroleum storage tank site files, etc. but only the sites adjoining or adjacent to the project area will be reviewed. TCEQ files will not be ordered and reviewed from the TCEQ Austin office.

Upon reviewing the database records, maps will be prepared including any obvious potential RECs for use during the site reconnaissance.

**Standard Scope of Work
Phase I Environmental Site Assessment
For Property Acquisitions**

Item 4: Site Reconnaissance and Interviews

In order to assess the potential presence of RECs on the property or on adjoining properties, a site reconnaissance will be performed according to ASTM E 1527-05, Section 9.1 – 9.4, including the following items:

- The property will be visually inspected by driving or walking all areas that are accessible and any areas that are not accessible will be noted;
- The presence and management of hazardous substances and/or petroleum products and any obvious signs of environmental releases or threat of releases on the property will be noted;
- The obvious presence of possible wetlands will be noted;
- The property boundaries will be driven or walked to assess the potential for releases from off-site sources and the direction of storm water flow will be noted.
- Adjoining properties will be visually inspected to the extent possible from the property and publicly accessible areas to assess the presence of RECs;
- Interviews will be conducted as deemed necessary;
- Areas of suspect RECs identified in the historical research and regulatory database review will be visually inspected during the site reconnaissance;
- The locations of listed regulated sites will be field verified, but only within one block of the property; and
- Photographic documentation will be obtained for potential RECs;
- A site map will be prepared including the locations of site features and the locations of potential RECs.

The following items will not be conducted during the site reconnaissance:

- The interior of residential and commercial/industrial buildings will not be inspected;
- Site reconnaissance of surrounding properties, except the listed regulated sites within one block of the property;
- No interviews will be conducted with past property owners or operators;
- No interviews will be conducted with residential property owners; and
- No sampling or analysis of environmental media will be performed.

Item 5: Site Assessment Report

Upon reviewing all information obtained during the historical research, the regulatory database review, and the site reconnaissance, an assessment report will be prepared similar to the attached Table of Contents and will include:

- The scope of work, limitations, and assessment procedures;
- The environmental setting including property location, topography, surface drainage features, hydrogeology (but will not include description of soils, or geological formations);

**Standard Scope of Work
Phase I Environmental Site Assessment
For Property Acquisitions**

- The historical research results;
- The regulatory database results;
- The site reconnaissance findings;
- A discussion of RECs along with our professional opinion regarding the impact of these RECs on the property;
- A discussion of any data failures, data gaps, and the impact on the ability to identify RECs on the property;
- A discussion of conclusions and recommendations; and
- Copies of all relevant information (aerial photographs, topographic maps, fire insurance maps, regulatory database, site maps with the locations of any RECs, selected site photographs, interview memoranda, etc.).

One draft reports will be prepared and submitted for review by the Client. Any comments will be addressed and two copies of the final report will be provided and one copy in pdf format on a CD, to the Client.

Out-of-Scope Items

As an additional scope of work, the following items can be included in the ESA:

- Lead-based paint survey;
- Mold survey;
- Wetlands delineation and, if needed, submittal for a jurisdictional determination by the U.S. Army Corps of Engineers;
- Threatened and endangered species studies;
- Archeology survey;
- Historical buildings assessment;
- Naturally-occurring radioactive material survey; and
- Compliance assessment (generally warranted for operating facilities).

Standard Limitations

The performance of an ESA is intended to reduce, but not eliminate, the uncertainty of RECs associated with a property. The ESA will include assessing the presence of hazardous substances defined in CERCLA (Section 101(33)), and petroleum products, but will not include controlled substances (21 U.S.C. 802). This assessment will be limited to information that is "reasonably ascertainable" and "practically reviewable" according to the ASTM E-1527-05 standards, considering the time and cost associated with the assessment. For the purposes of this ESA, reasonably ascertainable data is defined as historical aerial photographs, historical topographic maps, fire insurance maps, chain-of-title, city directories, regulatory database records, and tribal records obtained from a commercial source, and information provided by the City and by persons interviewed during the site reconnaissance. The scope of work did not include obtaining or reviewing oil and gas maps, city building permits, zoning/land use records, property tax records, other historical sources, water well records, local municipality environmental, health and planning department records, utility company records, purchase price/market value, interviews

**Standard Scope of Work
Phase I Environmental Site Assessment
For Property Acquisitions**

with the past property owners, and only included interviews as deemed necessary with persons at adjoining commercial and industrial facilities that were available during the site reconnaissance. There is no guarantee of the completeness or accuracy of the information provided by outside sources. The report will be based on the information obtained during the ESA, the site conditions present during the site reconnaissance and the regulations in effect at the time of the assessment. No sampling is included in this scope of work.

Certain conditions, such as those listed below, are not within this scope of work.

- Regulatory compliance;
- Health and safety, and industrial hygiene;
- Radon or other naturally occurring radioactive materials;
- Indoor air quality and mold;
- Drinking water quality including lead in drinking water;
- Health effects of electromagnetic radiation from high-voltage power lines;
- Naturally-occurring toxins in the subsurface soils, rocks, water, or toxicity of on-site flora;
- Biological hazards;
- Flood plain areas;
- Faults;
- Ecological resources;
- Cultural and historical resources; and
- Surface or subsurface contamination.

There is no guarantee that not finding an indicator of hazardous substances or petroleum products during this ESA means that these materials do not exist on property. If additional research or investigation appears warranted based on the findings, we will advise you and provide recommendations. This ESA report will be prepared for the sole use of the City of Houston and should not be distributed to or relied upon by any other party without written authorization and signed contract from Corrigan Consulting, Inc.

Gail A. Corrigan President/Principal-In-Charge

Ms. Corrigan has 30 years of environmental experience including former experience as a Texas Commission on Environmental Quality (TCEQ) enforcement field representative. She is recognized for her regulatory knowledge and extensive expertise in environmental site assessments (ESAs). She has directed hundreds of comprehensive compliance audits and ESAs, as well as site investigations, at commercial, industrial, and Superfund Sites. She developed and taught a 3-day RCRA/CERCLA regulations course under contract to Texas A&M for 5 years. She has also assisted the City of Houston and Houston METRO to develop ESA Standards for their infrastructure projects.

Years of Experience: 30

M.S./1984/Environmental Management,
University of Houston, Clear Lake, Texas

B.S./1977/Chemistry, Purdue University

Texas Hazardous Waste Management Society,
Founder 1985, President 1985, Board of
Directors 1986-88

American Consulting Engineers Council/
Hazardous Waste Action Coalition, Small
Business Chair & Board of Directors 1994-96

Society of Military Engineers, Member 1995-07

ASTM E-50 Phase I ESA Committee 1997-07

40-hour OSHA Certification

Relevant Project Experience

Environmental Site Assessments: Ms. Corrigan has directed over 300 Phase I-III ESAs. She currently provides Senior Review of all Phase I ESAs. Ms. Corrigan has also directed Phase II and Phase III ESAs to investigate and remediate sites including abandoned hazardous substances, PCB-contaminated oil, radioactive wastes, explosive wastes, wastewater, pesticide wastes, asbestos, lab chemicals, oil and gas exploration wastes, naturally occurring radioactive materials and contaminated soil and groundwater. She managed a large Phase I ESA of a 70-year old pulp and paper mill on an accelerated schedule.

Environmental Compliance Audits: Ms. Corrigan has extensive experience conducting compliance audits of a wide range of facilities including commercial hazardous waste disposal facilities, recycling facilities (used oil, solvents, lithium batteries), refineries, chemical plants, pulp and paper mills, airports, schools and universities, pipeline compressor and metering stations, bulk storage terminals, gas processing facilities, brine storage facilities, oil field service companies, and a multitude of commercial facilities. She also conducted the gap analysis audits of NASA's Johnson Space Center and developed the strategies and procedures for implementing the Environmental Management System (EMS) for the center.

RCRA Compliance & Permitting: She developed and instructed RCRA Hazardous Waste Regulations Courses throughout Texas under contract with Texas A&M Engineering Extension Service (TEEX) for 5 years including a 3-day comprehensive RCRA course,

a 1-day refresher course and a special RCRA personnel training at the DOE Pantex Plant.

Ms. Corrigan has conducted and managed compliance and permitting projects for over 20 years on RCRA-regulated sites. She has audited and developed waste classification systems, waste manifesting procedures, personnel training programs, contingency plans and SPCC plans, SWMU inspection procedures, and recordkeeping for drum storage units, tanks, surface impoundments, treatment units, etc. She has assisted many facilities during TCEQ inspections and responded to notice of violations on behalf of the facilities.

Environmental Site Investigations: Ms. Corrigan has directed complex waste classification projects; RCRA facility closures; remediation and corrective action projects; agency negotiations; and risk-based closures as well as Superfund Site remedial investigations. She managed over 6 RCRA Facility Investigations (RFI's) and over 20 RCRA waste storage unit closures. She is also responsible for establishing CCI's QC procedures and ensuring that investigations are conducted in strict compliance with all regulations and in a manner that will support litigation.

Expert Witness Testimony: She testified as an expert witness in a CERCLA cost recovery case and as a fact witness in a Superfund Site hearing on behalf of the TCEQ. She also provided litigation support during property transactions, including five cases with adjacent property owner damage claims involving releases and a high-profile case involving a historical oil pit discovered in an elementary school playground.

Ami K. Lillard
Field Geologist

Ms. Lillard has more than three years of environmental consulting experience conducting field assessments and investigations and preparing technical reports for commercial, industrial and government projects. She has extensive field experience in Environmental Site Assessments.

Years of Experience: 3

B.S. Geology, Morehead State University,
Morehead, KY 2006

40- Hour OSHA HAZWOPER Training

8-Hour OSHA Supervisor Health and Safety
Training

CCI Project Management Training

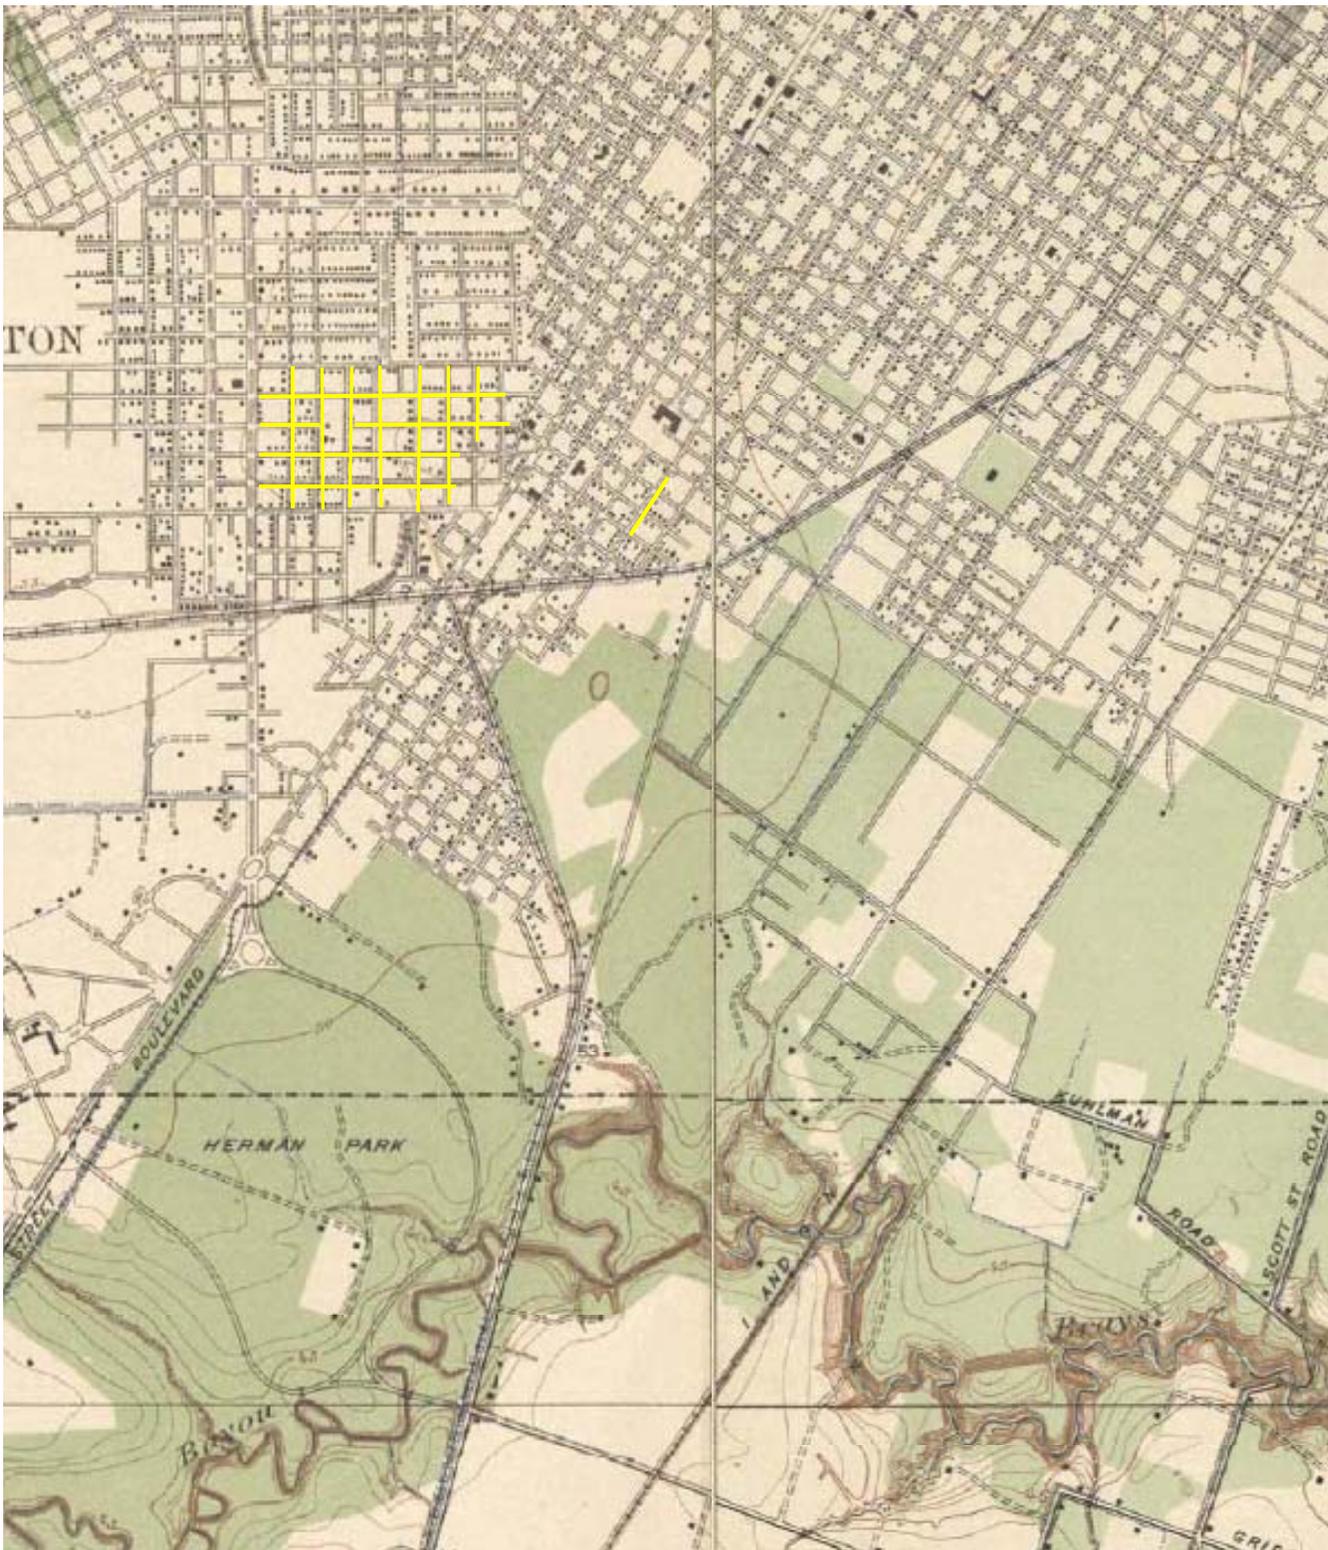

Relevant Project Experience

Project Experience:

- Ms. Lillard has conducted records reviews and field work for >10 Phase I Environmental Site Assessments and assisted in the preparation of the ESA reports. She conducted Phase I ESAs of right-of-way parcels prior to their acquisition for the expansion of light rail service
- She logged soil borings and collected soil samples for analysis of volatile (VOCs) and semi-volatile organic compounds (SVOCs) (including chlorinated hydrocarbon compounds), heavy metals, and total petroleum hydrocarbons (TPH).
- She assisted in site-wide groundwater gauging events involving a network of >150 monitoring wells and piezometers.
- Ms. Lillard conducted low-flow sampling of >70 ground-water monitoring wells and collected samples for VOCs, SVOCs, heavy metals, TPH, and specialty analyses (low-level metals and VOCs).
- She followed a comprehensive TCEQ-approved Quality Assurance Project Plan (QAPP) in the collection of >20 groundwater samples to be analyzed for polychlorinated biphenyls using low-level congener analyses.
- Ms. Lillard assisted in conducting aquifer field tests including slug tests and stepped pumping tests. Her responsibilities included the installation of pressure transducers, monitoring pumping rates, and manually gauging selected observation wells.
- She was also responsible for conducting specialized field tests including assessment for phase-separated product using ultraviolet light instruments and Sudan IV dye testing.
- As field geologist, she was responsible for the preparation of field sampling plans and site-specific health & safety plans and for maintaining field budgets (time and equipment).
- Her field duties also included the preparation of soil boring logs, well construction records, well purge records, well development logs, sample chains-of-custody and keeping up with daily activities in a field notebook.
- Ms. Lillard conducted sampling of drummed waste soils (investigation derived waste – drill cuttings) for RCRA hazardous waste determination. Sampling involved individual drum grab sampling and composite sampling programs.
- She also performed inspections on pipelines, tanks, valves, and instrumentation devices.
- Ms. Lillard has served as field geologist overseeing the installation of >60 soil borings and installation and development of > 20 single and multi-cased monitoring wells. The majority of this work was conducted at a site where three aquifers are impacted by chlorinated ethane and ethane compounds.

Target Property:

Montrose Area

Houston, Harris County, Texas 77006

Prepared For:

Corrigan Consulting, Inc.

Order #: 5778

Job #: 13286

Project #: 09-165

Date: 01/11/2010

TARGET PROPERTY SUMMARY

Montrose Area

Houston, Harris County, Texas 77006

Centroid County: **Harris**

Centroid Zipcode: **77006**

Centroid State: **TX**

USGS Quadrangle: **Bellaire, TX**

Target Property Geometry: **Area**

Target Property Longitude(s)/Latitude(s):

(-95.391189, 29.738775), (-95.391189, 29.738775), (-95.391089, 29.734605), (-95.385782, 29.734623), (-95.385499, 29.734623), (-95.383421, 29.737391), (-95.383401, 29.738950), (-95.391189, 29.738793), (-95.391189, 29.738775)

County/Countries Covered:

Harris (TX)

Zipcode(s) Covered:

Houston TX: 77002, 77004, 77005, 77006, 77019, 77030, 77098

State(s) Covered:

TX

***Target property is located in Radon Zone 3 (Harris County, TX). Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L.**

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem
VERSION DATE: 3/2009

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BF Brownfields Management System
VERSION DATE: 10/2009

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains the activities, including grantee assessment, cleanup and redevelopment, of the various Brownfield grant programs through the Brownfields Management System database.

BRS Biennial Reporting System
VERSION DATE: 1/2003

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The purpose of this report is to communicate the findings of EPA's Biennial Reporting System (BRS) data collection efforts to the public, government agencies, and the regulated community. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations
VERSION DATE: 3/2009

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System
VERSION DATE: 12/2009

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

DNPL Delisted National Priorities List
VERSION DATE: 12/2009

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

DOCKETS EPA Docket Data
VERSION DATE: 12/2005

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location.

DOD Department of Defense Sites
VERSION DATE: 12/2005

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

EC Federal Engineering Institutional Control Sites
VERSION DATE: 12/2009

This database includes site locations where Engineering and/or Institutional Controls have been identified as part of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

ERNS Emergency Response Notification System
VERSION DATE: 12/2008

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRS Facility Registry System
VERSION DATE: 6/2009

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

FUDS Formerly Used Defense Sites
VERSION DATE: 9/2009

The 2008 FUDS inventory includes properties previously owned by or leased to the United States and under Secretary of Defense jurisdiction. The remediation of these properties is the responsibility of the Department of Defense.

HMIRS Hazardous Materials Incident Reporting System
VERSION DATE: 11/2009

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation.

ICIS Integrated Compliance Information System (formerly DOCKETS)
VERSION DATE: 3/2009

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 3/2009

ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

LUCIS Land Use Control Information System
VERSION DATE: 9/2006

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System
VERSION DATE: 3/2009

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NFRAP No Further Remedial Action Planned Sites
VERSION DATE: 10/2009

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities
VERSION DATE: 12/2009

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NLRRCRAG No Longer Regulated RCRA Generator Facilities
VERSION DATE: 12/2009

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities
VERSION DATE: 12/2009

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

NPDES National Pollutant Discharge Elimination System
VERSION DATE: 4/2007

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. Refer to the PCS and/or ICIS-NPDES database as source of current data.

NPL National Priorities List
VERSION DATE: 12/2009

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

ODI Open Dump Inventory
VERSION DATE: 6/1985

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

PADS PCB Activity Database System
VERSION DATE: 9/2009

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCS Permit Compliance System
VERSION DATE: 3/2009

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels.

PNPL Proposed National Priorities List
VERSION DATE: 12/2009

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities
VERSION DATE: 12/2009

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RCRAG Resource Conservation & Recovery Act - Generator Facilities
VERSION DATE: 12/2009

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. See RCRA Description page for more information. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities
VERSION DATE: 12/2009

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 1/2010

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

SFLIENS CERCLIS Liens

VERSION DATE: 10/2009

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/2006

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/2007

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/2002

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

APAR Affected Property Assessment Reports
VERSION DATE: 6/2009

As regulated by the TCEQ, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

BSA Brownfields Site Assessments
VERSION DATE: 9/2009

The BSA database includes relevant information on contaminated Brownfields properties that are being cleaned.

CALF Closed & Abandoned Landfill Inventory
VERSION DATE: 11/2005

TCEQ, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments in the State, has located over 4,000 closed and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail.

DCR Dry Cleaner Registration Database
VERSION DATE: 9/2009

The DCR listing includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

GWCC Groundwater Contamination Cases
VERSION DATE: 12/2008

This report contains a listing of groundwater contamination cases which were documented for the 2008 calendar year. Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The agencies reporting these contamination cases include the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

Services.

HISTGWCC Historic Groundwater Contamination Cases

VERSION DATE: NR

This historic report contains all agency groundwater contamination cases documented from 1994 to 2007. The agencies that reported these contamination cases included the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

IHW Industrial and Hazardous Waste Sites

VERSION DATE: 12/2009

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations.

IOP Innocent Owner / Operator Database

VERSION DATE: 9/2009

Texas Innocent Owner / Operator (IOP) provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

LIENS TCEQ Liens

VERSION DATE: 9/2009

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

LPST Leaking Petroleum Storage Tanks

VERSION DATE: 10/2009

The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality (TCEQ). This listing includes aboveground and underground storage tank facilities with reported leaks.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

MSD Municipal Setting Designations

VERSION DATE: 2/2009

TCEQ defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.

MSWLF Municipal Solid Waste Landfill Sites

VERSION DATE: 8/2009

Sites listed within a solid waste landfill database may include active landfills and inactive landfills, where solid waste is treated or stored.

NOV Notice of Violations

VERSION DATE: 4/2009

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

PIHW Permitted Industrial Hazardous Waste Sites

VERSION DATE: 12/2009

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations.

PST Petroleum Storage Tanks

VERSION DATE: 10/2009

The Petroleum Storage Tank database is administered by the TCEQ (Texas Commission on Environmental Quality). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

RRCVCP Railroad Commission VCP and Brownfield Sites

VERSION DATE: 9/2009

According to the Railroad Commission of Texas, their Voluntary Cleanup Program (RRC-VCP) provides an incentive to remediate Oil & Gas related pollution by participants as long as they did not cause or contribute to the contamination. Applicants to the program receive a release of liability to the state in exchange for a successful cleanup.

RWS Radioactive Waste Sites

VERSION DATE: 7/2006

This TCEQ database contains all sites in the State of Texas that have been designated as Radioactive Waste sites.

SF State Superfund

VERSION DATE: 5/2009

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). Information in this database includes any recent developments and the anticipated action for these sites.

SIEC01 State Institutional/Engineering Control Sites

VERSION DATE: 9/2009

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination.

SPILLS Spills Listing

VERSION DATE: 6/2009

This Texas Commission on Environmental Quality (TCEQ) database includes releases of hazardous or potentially hazardous materials into the environment.

TIERII Tier II Chemical Reporting Program Facilities

VERSION DATE: 12/2007

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2007 calendar years.

VCP Voluntary Cleanup Program

VERSION DATE: 9/2009

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses.

WMRF Recycling Facilities

VERSION DATE: 3/2009

This listing of recycling facilities is provided by the Texas Commission on Environmental Quality's Recycle Texas Online service. The company information provided in this database is self-reported. Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ regulations or other applicable laws.

ENVIRONMENTAL RECORDS DEFINITIONS - TRIBAL

INDIANRES Indian Reservations

VERSION DATE: 1/2000

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

LUSTR06 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 5/2009

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/2006

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

USTR06 Underground Storage Tanks On Tribal Lands

VERSION DATE: 5/2009

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

RCRA DESCRIPTIONS

Acronyms

- RCRAG** - Generator
RCRAT - Treatment, Storage & Disposal (Non-Corrupts)
RCRAC - Corrective Action

Generator Types

Large Quantity Generators

- Generate 1,000 kg or more of hazardous waste during any calendar month; or
- Generate more than 1 kg of acutely hazardous waste during any calendar month; or
- Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or
- Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or
- Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators

- Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or
- Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators

- Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or
- Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time:
 - 1 kg or less of acutely hazardous waste; or
 - 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or
- Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time:
 - 1 kg or less of acutely hazardous waste; or
 - 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

Note: Descriptions also apply to No Longer Regulated RCRA sites
(NLRRCRAG, NLRRCRAT, and NLRRCRAC)

Target Property:

Austin Street

Houston, Harris County, Texas 77004

Prepared For:

Corrigan Consulting, Inc.

Order #: 5779

Job #: 13291

Project #: 09165

Date: 01/11/2010

TARGET PROPERTY SUMMARY

Austin Street

Houston, Harris County, Texas 77004

Centroid County: **Harris**

Centroid Zipcode: **77004**

Centroid State: **TX**

USGS Quadrangle: **Bellaire, TX**

Target Property Geometry: **Corridor**

Target Property Longitude(s)/Latitude(s):

(-95.378041, 29.733929), (-95.378048, 29.733929), (-95.377115, 29.735135)

County/Countries Covered:

Harris (TX)

Zipcode(s) Covered:

Houston TX: 77002, 77003, 77004, 77005, 77006, 77030

State(s) Covered:

TX

***Target property is located in Radon Zone 3 (Harris County, TX). Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L.**

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem
VERSION DATE: 3/2009

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BF Brownfields Management System
VERSION DATE: 10/2009

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains the activities, including grantee assessment, cleanup and redevelopment, of the various Brownfield grant programs through the Brownfields Management System database.

BRS Biennial Reporting System
VERSION DATE: 1/2003

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The purpose of this report is to communicate the findings of EPA's Biennial Reporting System (BRS) data collection efforts to the public, government agencies, and the regulated community. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations
VERSION DATE: 3/2009

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System
VERSION DATE: 12/2009

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

DNPL Delisted National Priorities List
VERSION DATE: 12/2009

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

DOCKETS EPA Docket Data
VERSION DATE: 12/2005

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location.

DOD Department of Defense Sites
VERSION DATE: 12/2005

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

EC Federal Engineering Institutional Control Sites
VERSION DATE: 12/2009

This database includes site locations where Engineering and/or Institutional Controls have been identified as part of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

ERNS Emergency Response Notification System
VERSION DATE: 12/2008

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRS Facility Registry System
VERSION DATE: 6/2009

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

FUDS Formerly Used Defense Sites
VERSION DATE: 9/2009

The 2008 FUDS inventory includes properties previously owned by or leased to the United States and under Secretary of Defense jurisdiction. The remediation of these properties is the responsibility of the Department of Defense.

HMIRS Hazardous Materials Incident Reporting System
VERSION DATE: 11/2009

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation.

ICIS Integrated Compliance Information System (formerly DOCKETS)
VERSION DATE: 3/2009

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 3/2009

ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

LUCIS Land Use Control Information System
VERSION DATE: 9/2006

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System
VERSION DATE: 3/2009

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NFRAP No Further Remedial Action Planned Sites
VERSION DATE: 10/2009

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities
VERSION DATE: 12/2009

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NLRRCRAG No Longer Regulated RCRA Generator Facilities
VERSION DATE: 12/2009

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities
VERSION DATE: 12/2009

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

NPDES National Pollutant Discharge Elimination System
VERSION DATE: 4/2007

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. Refer to the PCS and/or ICIS-NPDES database as source of current data.

NPL National Priorities List
VERSION DATE: 12/2009

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

ODI Open Dump Inventory
VERSION DATE: 6/1985

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

PADS PCB Activity Database System
VERSION DATE: 9/2009

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCS Permit Compliance System
VERSION DATE: 3/2009

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels.

PNPL Proposed National Priorities List
VERSION DATE: 12/2009

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities
VERSION DATE: 12/2009

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RCRAG Resource Conservation & Recovery Act - Generator Facilities
VERSION DATE: 12/2009

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. See RCRA Description page for more information. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities
VERSION DATE: 12/2009

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 1/2010

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

SFLIENS CERCLIS Liens

VERSION DATE: 10/2009

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/2006

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/2007

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/2002

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - FEDERAL

United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

APAR Affected Property Assessment Reports
VERSION DATE: 6/2009

As regulated by the TCEQ, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

BSA Brownfields Site Assessments
VERSION DATE: 9/2009

The BSA database includes relevant information on contaminated Brownfields properties that are being cleaned.

CALF Closed & Abandoned Landfill Inventory
VERSION DATE: 11/2005

TCEQ, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments in the State, has located over 4,000 closed and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail.

DCR Dry Cleaner Registration Database
VERSION DATE: 9/2009

The DCR listing includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

GWCC Groundwater Contamination Cases
VERSION DATE: 12/2008

This report contains a listing of groundwater contamination cases which were documented for the 2008 calendar year. Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The agencies reporting these contamination cases include the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

Services.

HISTGWCC Historic Groundwater Contamination Cases

VERSION DATE: NR

This historic report contains all agency groundwater contamination cases documented from 1994 to 2007. The agencies that reported these contamination cases included the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

IHW Industrial and Hazardous Waste Sites

VERSION DATE: 12/2009

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations.

IOP Innocent Owner / Operator Database

VERSION DATE: 9/2009

Texas Innocent Owner / Operator (IOP) provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

LIENS TCEQ Liens

VERSION DATE: 9/2009

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

LPST Leaking Petroleum Storage Tanks

VERSION DATE: 10/2009

The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality (TCEQ). This listing includes aboveground and underground storage tank facilities with reported leaks.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

MSD Municipal Setting Designations

VERSION DATE: 2/2009

TCEQ defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.

MSWLF Municipal Solid Waste Landfill Sites

VERSION DATE: 8/2009

Sites listed within a solid waste landfill database may include active landfills and inactive landfills, where solid waste is treated or stored.

NOV Notice of Violations

VERSION DATE: 4/2009

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

PIHW Permitted Industrial Hazardous Waste Sites

VERSION DATE: 12/2009

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations.

PST Petroleum Storage Tanks

VERSION DATE: 10/2009

The Petroleum Storage Tank database is administered by the TCEQ (Texas Commission on Environmental Quality). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

RRCVCP Railroad Commission VCP and Brownfield Sites

VERSION DATE: 9/2009

According to the Railroad Commission of Texas, their Voluntary Cleanup Program (RRC-VCP) provides an incentive to remediate Oil & Gas related pollution by participants as long as they did not cause or contribute to the contamination. Applicants to the program receive a release of liability to the state in exchange for a successful cleanup.

RWS Radioactive Waste Sites

VERSION DATE: 7/2006

This TCEQ database contains all sites in the State of Texas that have been designated as Radioactive Waste sites.

SF State Superfund

VERSION DATE: 5/2009

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). Information in this database includes any recent developments and the anticipated action for these sites.

SIEC01 State Institutional/Engineering Control Sites

VERSION DATE: 9/2009

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination.

SPILLS Spills Listing

VERSION DATE: 6/2009

This Texas Commission on Environmental Quality (TCEQ) database includes releases of hazardous or potentially hazardous materials into the environment.

2705 Bee Caves Rd, Suite 330 · Austin, Texas 78746 · phone: 888-396-0042 · fax: 512-472-9967

ENVIRONMENTAL RECORDS DEFINITIONS - STATE (TX)

TIERII Tier II Chemical Reporting Program Facilities

VERSION DATE: 12/2007

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2007 calendar years.

VCP Voluntary Cleanup Program

VERSION DATE: 9/2009

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses.

WMRF Recycling Facilities

VERSION DATE: 3/2009

This listing of recycling facilities is provided by the Texas Commission on Environmental Quality's Recycle Texas Online service. The company information provided in this database is self-reported. Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ regulations or other applicable laws.

INDIANRES Indian Reservations

VERSION DATE: 1/2000

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

LUSTR06 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 5/2009

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/2006

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

USTR06 Underground Storage Tanks On Tribal Lands

VERSION DATE: 5/2009

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

RCRA DESCRIPTIONS

Acronyms

- RCRAG** - Generator
RCRAT - Treatment, Storage & Disposal (Non-Corrupts)
RCRAC - Corrective Action

Generator Types

Large Quantity Generators

- Generate 1,000 kg or more of hazardous waste during any calendar month; or
- Generate more than 1 kg of acutely hazardous waste during any calendar month; or
- Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or
- Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or
- Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators

- Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or
- Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators

- Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or
- Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time:
 - 1 kg or less of acutely hazardous waste; or
 - 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or
- Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time:
 - 1 kg or less of acutely hazardous waste; or
 - 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

Note: Descriptions also apply to No Longer Regulated RCRA sites
(NLRRCRAG, NLRRCRAT, and NLRRCRAC)

Re: Affected Property Assessment Report (APAR) Extension requests for Shell Retail Fuel Facilities located at 1010 West Alabama, Houston, TX; and 21110 TX-249, Houston, TX
LPST ID No. 117458, Fac. ID No. 0033068; LPST ID No. 117462, Fac ID No. 0073604, respectively, R - 12

Dear Mr. Burkey:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the above referenced submittal, dated July 31, 2008. The extensions requested for the sites referenced above are approved. In the future, TCEQ would like to obviate the need for extension requests submitted to this Office. If a site is seen to have issues which may take an extended amount of time to handle within the initial assessment phase, please notify this Office as soon as possible, so that extensions can be sought before deadlines are past. The TCEQ would be appreciative of Shell Oil Products' cooperation.

Please note that the deadline for submission of APARs for the sites mentioned above is November 14, 2008. Questions concerning this letter should be directed to me at (512) 239-1831. Please submit any mail correspondence to the TCEQ Remediation Division at Mail Code MC-137. The information in the reference block, including the LPST and facility ID numbers, should be included in all submittals. We appreciate your cooperation.

Sincerely,

Meagan J. Kunze, Project Manager

Re: Leaking Petroleum Storage Tanks (LPST) ID Number Assignment and Corrective Action Requirements for Shell Retail Fuel Facility, 1010 West Alabama, Houston, Harris County, Texas LPST ID No. 117458; Facility ID No. 33068; R-12

Dear Ms. Davis:

The Texas Commission on Environmental Quality (TCEQ) has become aware that a release has occurred from a storage tank system at the above-referenced facility. Owners and/or operators of storage tank systems are required to immediately abate any release of a regulated substance, conduct an investigation for soil and groundwater cleanup as necessary, and notify all parties affected by the contamination. **The LPST ID number 117458 has been assigned to this case and should be included on all correspondence.** The Environmental Cleanup Section I will be responsible for the regulatory coordination of this facility unless you are advised otherwise in writing.

We request that you contact an environmental consulting firm, registered with the TCEQ as a Corrective Action Specialist (RCAS), to perform an affected property assessment according to the requirements of 30 Texas Administrative Code (TAC) 350, also known as the Texas Risk Reduction Program (TRRP). **Please submit a completed *Affected Property Assessment Report (APAR) form (TCEQ-10325)* to this office by May 12, 2008.** For further information on TRRP rules and guidelines, please visit: <http://www.tceq.state.tx.us/remediation/trrp/guidance.html>. You may also call 512/239-2200 to request information.

As the responsible party, you must pursue whatever actions are necessary to minimize any imminent impacts or threats to human health and safety and to stabilize any adverse conditions caused by this release. Should any emergency abatement actions become necessary as a result of this release incident, you must immediately notify the local TCEQ Regional Office as well as the Central Office in Austin.

If release investigation or assessment activities reveal the presence of nonaqueous phase liquid (NAPL) and interim removal activities are conducted, please report the activities to this office on a quarterly basis using the *Product Recovery Report form (TCEQ-0025)*.

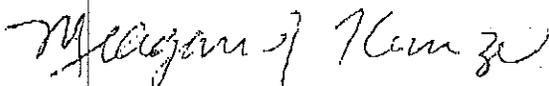

Ms. Joyce Davis

LPST ID No. 117458

Notification requirements in 30 TAC §350.55 state that if, in the course of an affected property assessment conducted pursuant to §350.51, a person collects samples from property they do not own, then the analytical results for those samples and any subsequent samples shall be made available to the owner of that property. In addition, if the person submits samples to the TCEQ which indicates that a COC originating from on-site activities more likely than not exceeds a residential assessment level on property they do not own, the person shall at a minimum make this information and the critical PCLs for the applicable land use classification available to the owner of the property and any easement holders. Additional information on TRRP notification requirements is available in the guidance *Notification Requirements* (RG-366/TRRP-17).

Be aware that if you permanently remove your underground storage tank (UST) system from service, you are required to submit permanent-removal-from-service documentation (if not submitted previously) in accordance with 30 TAC §334.55. For reporting and sampling requirements for both USTs and above-ground storage tanks (ASTs), please refer to Investigating and Reporting Releases from PSTs (RG-411). You must also submit revised UST or AST tank registration forms (TCEQ-0724 or TCEQ-0659, respectively) to the TCEQ PST Registration Team (address is on forms) when tanks are removed from service.

Please note that all correspondence, clearly labeled with both the LPST and facility ID numbers, should be submitted to the Central Office in Austin. Should you have any questions, please contact me at 512/239-1831, and reference the assigned LPST ID number. We appreciate your cooperation.

Sincerely,

Re: Request for Drinking Water Survey - Immediate Response Requested
Shell Retail Fuel Facility, 1010 W Alabama, Houston, Harris County, Texas
Leaking Petroleum Storage Tank (LPST) ID No. 117458; Facility ID No. 33068; R- 12

Dear Ms. Davis:

The Release Determination Report, dated October 8, 2007 was received by the Texas Commission on Environmental Quality (TCEQ) on October 24, 2007. The information submitted indicates that concentrations in groundwater exceed residential health-based standards for ingestion. In order to comply with the requirements of Section 26.408(b) of the Texas Water Code, the TCEQ must notify all owners of private drinking water wells that may be affected by this groundwater contamination.

The TCEQ requests that you immediately conduct a drinking water survey (DWS) in accordance with the enclosed TCEQ guidance document *Preparation of a Drinking Water Survey Report* (RG-428). Note that as part of the DWS, **you are now required to contact the applicable groundwater conservation district (GCD)** to request information on private drinking water wells within the search area. To document your GCD contact, please provide the following information in the DWS: name and phone number of GCD personnel contacted, names of well owners, names of users other than the owner (if any), and well construction details. If contacting the GCD turns up no private drinking water wells, or if there is no GCD within the search area, please state this information in the DWS.

On or before November 2, 2007, please provide written documentation that you intend to comply with the above request. Your response must be submitted by e-mail to msimpson@tceq.state.tx.us or by fax to (512) 239-2216, and must indicate that you will provide the TCEQ with the above-referenced information by November 14, 2007. An original signed copy of your response on company letterhead must follow the e-mail or fax response.

Please submit the survey results as a *Drinking Water Survey Report* along with a completed "*Drinking Water Survey Report Transmittal Form*" to the TCEQ at the letterhead address using mail code number MC-137. You will also need to provide a copy of the completed transmittal form to the TCEQ Region 12 Office in Houston.

Ms. Joyce Davis
Page 2
October 29, 2007
LPST ID No. 117458

If we do not receive written acknowledgment that you will perform the survey or we do not receive the Drinking Water Survey Report by the dates requested in this letter, the TCEQ will use a state contractor to conduct the survey and may seek to recover from you the costs of performing the survey.

Please call me at (512) 239-4848 if you have any questions regarding this letter.

Sincerely,

Mary Simpson, Project Manager
