Re: Phase I Environmental Site Assessment (ESA)
Fulton Street Paving: Tidwell to Parker Road Project
WBS No. N-000542-0003-3
Owner: City of Houston
HVJ Project No. HE0614604.4

Dear Mr. Haq:

Presented herein is our Phase I ESA final report for the above captioned project. Previously, updates of this 2007 Phase I ESA report have been provided in 2010 and 2012. The study was performed in general accordance with our proposal number HE0614604.4 dated June 28, 2012 and revised on June 17, 2013.

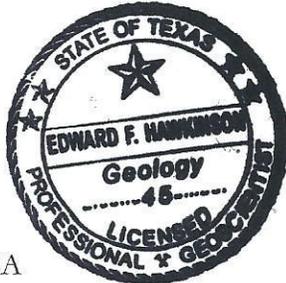

This report presents HVJ Associates' understanding of the project's scope, the methodology we employed in executing the work, and the conclusions we reached subject to the limitations discussed in Section 7 of the report. HVJ Associates is of the opinion that there is no potential for environmental contamination to affect the Subject Project Alignment. Based on our site reconnaissance and review of available information obtained for this project, we recommend no further environmental study of this Subject Project Alignment. It has been a pleasure to work with you on this project, and we appreciate the opportunity to be of service. Please read the entire report and notify us if there are questions or comments or if we may be of further assistance.

Sincerely,

HVJ ASSOCIATES, INC.
Texas Firm Registration No. F-000646

A handwritten signature in black ink, appearing to read 'Edward F. Hawkinson', is written over a light blue horizontal line.

Edward Hawkinson, PG, MS, MBA
Project Manager

EXECUTIVE SUMMARY

HVJ Associates, Inc. has completed a Phase I Environmental Site Assessment (ESA) update in accordance with guidelines contained in the American Society for Testing and Materials Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13) as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements” for the proposed Fulton Street project. This project will include the acquisition of rights-of-way and engineering/construction for the widening of approximately one mile of two-lane roadway with deep roadway side ditches to two 24-foot wide concrete roadways with curbs, sidewalks and necessary underground utilities. The project will connect to an already improved roadway approximately 500 ft. north of the Tidwell intersection. The Subject Project Alignment is currently developed with a combination of commercial and residential occupancy with commercial development concentrated near major intersections along the Subject Project Alignment. The objectives of this study were to identify current or previous land use activities that may have created an environmental concern to the project. The available information for this project is summarized below:

Historical data, maps and aerial photographs revealed that the Subject Project Alignment was developed prior to 1944 with residential structures and dirt roads. By the late 1960’s, the Subject Project Alignment was developed with commercial facilities and single-family residences with streets in roughly their present day configuration.

- A search of regulatory databases for the designated search radii found 12 regulated environmental sites within or near the general Subject Project Alignment. Previously, 45 regulated environmental sites were found with the search area. An open records request was made with the City of Houston Hazardous Materials Response Team (HMRT) of the Houston Fire department to determine if there have been any hazardous materials incidents. Information from HMRT indicates that there have been no recent significant spills in the Subject Project Alignment (see Appendix C for the HMRT search information).
- Our review of historical data, maps, reconnaissance, and the Texas Commission on Environmental Quality (TCEQ) online files and files review at their Houston office found one LPST site at 9812 Fulton Street and two LPST sites at 6402 and 6656 Airline Drive that may impact the Subject Project Alignment.
- The Subject Project Alignment is underlain by clayey soils associated with the Beaumont Formation. Groundwater for domestic and municipal uses occurs at depths ranging from about 400 to 600 feet in the Chicot and Evangeline Aquifers, respectively. Shallow groundwater may also be present and is expected to be about 10 to 20 feet below ground.

Previously, HVJ Associates was of the opinion that a potential existed for environmental contamination to impact the Subject Project Alignment and we recommended a Phase II Environmental Site Assessment at three sites. In 2010, six borings were installed at three locations using direct push (Geoprobe) track mounting drilling rig. The borings were drilled between the subject sites of environmental concern and the Subject Project Alignment along Fulton. The subsurface soils collected consists of fill materials with gravel, shell base and concrete overlying (in general) brown sandy clay with ferruginous nodules, some fine sand and small gravel. One soil sample from each boring was obtained for laboratory analysis of chemicals of concern (COC) petroleum hydrocarbons benzene, toluene, ethylbenzene, and total xylene (BTEX) and total petroleum hydrocarbons (TPH). Groundwater was encountered and sampled at one location along the Subject Project Alignment. No levels of BTEX or TPH above the analytical method detection limit were found in soil and groundwater samples collected for this study. Because no levels of

chemicals of concern (COCs) were found during a Phase II ESA conducted by HVJ Associates in 2010 of the Subject Project Alignment sites with RECs and no sites with RECs have been added along the Subject Project Alignment since our previous Phase I ESA, ESA Updates and Phase II ESA work, we recommend no further environmental investigation of the Subject Project Alignment.

The Subject Project Alignment is not on or near mapped wetland areas. In our opinion, no possible wetland areas are close enough to the Subject Project Alignment to warrant wetland assessment work in accordance with USACE guidelines. Please note that this executive summary does not fully relate our findings and opinions. Those findings and opinions are only related through our complete report.

1. INTRODUCTION

1.1 Project Objective and Qualifications

HVJ Associates, Inc. was contracted by HNTB Corporation (HNTB) to perform a Phase I Environmental Site Assessment (ESA) for a City of Houston street widening project along Fulton Street in north Houston, Harris County, Texas. The objectives of this study were to conduct an update ESA for this Subject Project Alignment according to ASTM guidelines and to determine whether recognized environmental conditions located in or near the construction area or on adjacent parcels, that may lead to an environmental concern, have changed since the date of the previous assessment. We declare that to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a Subject Project Alignment of the nature, history and setting of the Subject Project Alignment. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.2 Project Scope

The scope of services we provided for this Phase I ESA update was performed in general accordance with ASTM designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13) as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements.” The following tasks were performed:

1. Environmental regulatory agency summary records were obtained for regulated environmental sites near the Subject Project Alignment. Following initial review, additional information was obtained through file reviews, field observations, and interviews.
2. Available historical maps, aerial photographs, water and oil/gas/pipeline data and directories were obtained and reviewed to determine if current or prior land owners/occupants may have engaged in activities on adjacent properties that may have been an environmental concern.
3. Available geologic literature was reviewed to characterize the geologic, physiographic, and hydrogeologic settings to determine potential release pathways.
4. A site reconnaissance was performed to conduct interviews, verify environmental and historical records, identify current land-use activities, and identify potential areas of environmental concern based on current conditions and development.

This report was prepared summarizing our findings, conclusions and recommendations. With respect to ASTM E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, the EPA determined that the guidance provided by this practice, a voluntary consensus standard, is consistent with the EPA’s all appropriate inquiry rule. The use of this standard practice constitutes an “all appropriate inquiry” into the previous ownership and uses of the Subject Project Alignment consistent with good commercial or customary practice.

1.3 Significant Assumptions and Exceptions

This Phase I ESA update was performed in general accordance with ASTM E 1527-13 as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements.” The Phase I ESA was limited to information that is “reasonably ascertainable” and “practically reviewable” in accordance with ASTM E 1527-13, considering the time and cost associated with the assessment. HVJ Associates cannot guarantee the completeness or accuracy of the regulatory agency database records and

cannot guarantee that not finding indications of hazardous substances or petroleum products means that these materials do not exist on the Subject Project Alignment. There is a possibility that sources of contamination have escaped detection due to the limitations of this study, the inaccuracy of available governmental records, or the presence of undetected and unreported environmental releases. HVJ Associates cannot be responsible for failure to disclose recognized environmental conditions that may exist on or near the Subject Project Alignment, but were not identified due to limiting the assessment to information that is “reasonably ascertainable” and “practically reviewable” as discussed above.

HVJ Associates reserves the right to alter our conclusions and recommendations based on our review of any information obtained after the date of this report. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by environmental consultants practicing in this or similar localities. No warranty, express or implied, is made as to the professional information included in this report.

1.4 Qualifications of Environmental Professionals

The primary investigator for this Phase I ESA update is Mr. Edward Hawkinson. Mr. Hawkinson holds BS and MS degrees in geology from the Ohio State University and the University of Cincinnati respectively. Mr. Hawkinson is a Registered Environmental Assessor (REA) and a registered professional geologist in Arkansas, Tennessee and Texas. His career encompasses a period exceeding 27 years involving hydrogeology, water resource evaluations, environmental investigations and energy exploration.

2. SITE DESCRIPTION

2.1 Location and Project Description

The Subject Project Alignment is located in north Houston, Harris County, Texas (see Plate 1, Site Vicinity Map). The project will involve acquiring rights-of-way, engineering and construction for the widening of approximately one mile of two lane roadway with deep roadway side ditches to two 24-foot wide median separated concrete roadways with curbs, sidewalks and necessary underground utilities. The project will connect to an already improved roadway approximately 500 ft. north of the Tidwell intersection. Rights-of-way for easements will be obtained. No chains-of-title were reviewed as part of this project for these easements. Some of the proposed construction will be in existing street rights-of-way.

2.2 Site and Vicinity Current Land Use Characteristics

The Subject Project Alignment is located east of IH 45 between Tidwell and Parker Road. We assume rights-of-way for easements will be obtained and proposed construction will be in existing street rights-of-way and on adjoining acquired easements. At HNTB’s request, no chains-of-title data were obtained for these easements. Development in the Subject Project Alignment is currently both commercial and residential. Commercial development is scattered along Fulton Street. The current land use along the Subject Project Alignment and immediate vicinity is depicted on Plates 2A, 2B, 2C, 2D and 2E (Site Vicinity/Land Use Maps) and photographs in Appendix B.

3. RECORDS AND DATA REVIEW

3.1 State and Federal Records

HVJ Associates reviewed federal and state regulatory agency summaries for nearby regulated sites to determine their status and to identify specific addresses and site names that would aid in conducting our field reconnaissance. The general boundary of the search area conformed to the ASTM 1527-13 standards as modified by City of Houston requirements. The search distance for each record is provided in the table below. The environmental sites are shown on the Environmental Sites Map by map number (see Plate 3). A copy of the environmental records report obtained from GeoSearch is included in Appendix A.

Twelve environmental database map locations were found by GeoSearch in the general vicinity of the Subject Project Alignment. The general boundary of the search area includes the Subject Project Alignment and extends about one-quarter to one-half mile for most sites, and one mile for several federal sites and state superfund sites. A copy of the environmental records report with a map showing the regulated sites found within the Subject Project Alignment is included in Appendix A. Below is a listing of the databases searched, the dates these databases were last updated, search distance and sites found within the designated search radii:

Data Records	Locatable Sites	Unlocatable Sites	Search Radius

Note: Numbers in **bold red** show the number of sites listed in the data record category in the previous HVJ Associates ESA for the Subject Project Alignment dated September 28, 2012.

Federal Database

In our original ESA I for the Subject Project Alignment, the federal database listed five environmental sites consisting of two Dockets, one Integrated Compliance Information System (USICIS), one Toxic Release Inventory (TRI) and one Facility Registry System (FRS). The two EPA Dockets sites listed were found to be related to storm water discharge and should not be a concern to the project. One of the Dockets sites, Airline Plating at 6829 Airline was also listed in theUSICIS under the Clean Water Act as discharging without a permit. It was determined that the Alkote Inc. TRI site at 13 Farrell Street was not a concern to the project construction due to distance. The Northside Printing facility at 9625 Fulton adjoining the Subject Project Alignment to the east was listed in the Facility Registry System (USFRS) with no adverse comments. It was determined that this site was not a concern to project construction due to its current status. The current federal database obtained through GeoSearch lists no EPA Dockets, ICIS, TRI, FRS or other database sites.

State Database

Industrial Hazardous Waste (IHW) – This list identifies permitted and non-permitted industrial and hazardous waste sites. Hazardous waste is defined as any solid waste listed as hazardous or possessing one or more hazardous characteristics as defined in federal waste regulations. The six IHW sites reported to exist near the Subject Project Alignment in our previous ESA Update Report have been removed from the database. Previously, the majority of these sites were conditionally exempt small quantity generators and were found to be of no concern to the project due to their status and/or distance from the Subject Project Alignment.

TCEQ Registered Petroleum Storage Tank (PST) – This list identifies parties who own or operate aboveground storage tanks (ASTs) and underground storage tanks (USTs) containing petroleum products or hazardous materials. The five PST sites reported to exist near the Subject Project Alignment have been reduced by seven sites since our earlier report for this project. Previously sixteen tanks at these sites are listed as removed from the ground. Tanks are currently in use at several facilities. Tanks were replaced at the 9812 Fulton Street Kims Store facility (also known as Kees Fulton Grocery) in 2003. With the exception of Kims Store discussed in Section 3.2

and elsewhere in this report, there is no adverse environmental information in the database for these sites.

Leaking Petroleum Storage Tank (LPST) Sites – In our original ESA I for the Subject Project Alignment, ten sites were listed in the database on or near the Subject Project Alignment. The 2012 ESA Update Report lists 13 sites for the Subject Project Alignment. Currently only five LPST sites are listed within the database search radii and only three of these sites are on or near the Subject Project Alignment.

An LPST site at 6656 Airline (the former El Timone Café) adjoins the north end of the Subject Project Alignment (see Plate 3 – Map ID 1). This site is listed as “no groundwater impact, no apparent threats or impacts to receptors” with status code “final concurrence issued, case closed.” This site may be a concern due to its distance from the Subject Project Alignment. An LPST site at 6402 Airline (Annie’s Stop N Shop) adjoins the Subject Project Alignment to the northwest (see Plate 3 – Map ID 2). This site is listed as “assessment incomplete, no apparent receptors impacted” with status code “final concurrence issued, case closed.” This site may be a concern to the project due to its distance from the Subject Project Alignment. The Houser Neon Sign facility at 6411 Airline Drive approximately 0.09 mi. southwest of the Subject Project Alignment is listed in the LPST database as “groundwater impact, no apparent threats or impacts to receptors” with status code “final concurrence pending documentation of well plugging.” The remaining LPST sites should not be a concern to the Subject Project Alignment due to distance and/or current status.

3.2 TCEQ File Review

Based on our review of all available data and our field reconnaissance, a request to review hard copies of four LPST files from the Houston office of the TCEQ was made and results conveyed in our original and updated reports for this Subject Project Alignment. The only file available at the TCEQ was for the Kee’s Fulton Grocery facility at 9812 Fulton (LPST ID No. 113498). It should be noted that this site is no longer listed in the LPST database. The site is currently listed as having groundwater impacted with status code monitoring. File data revealed that the tanks were replaced at this site on April 11, 2003. A summary of analytical results – groundwater table attached to the most recent consultants report in the file lists phase separated hydrocarbons (PSH) in the closest monitoring well for the most recent sampling date (4/30/2004) to the Subject Project Alignment (labeled MW-2) near the southwest corner of the LPST site and near the intersection of Fulton and Luetta Streets. Groundwater in MW-5 northwest of MW-2 and also adjacent to the Fulton Street Subject Project Alignment has no PSH but does have levels of benzene, toluene, ethylbenzene and xylene (BTEX) at 2.97 parts per million (ppm) and total petroleum hydrocarbons (TPH) at 110.7 ppm. The consultants report also contains a soil contamination concentration map dated February 18, 2005 showing a shallow soil sample (8 ft. below ground surface) collected from the location of MW-5 has a TPH level of 56 ppm and no BTEX. Also, a shallow soil sample (4 ft. below ground surface) collected from the location of MW-2 had a TPH level of 1,047 ppm and a BTEX level of 12.91. Some of the documents obtained from the TCEQ through the Texas Open Records Act may contain typographical errors and information that may conflict with database records. HVJ Associates makes no representation as to the accuracy of these file data and provides selected copies of them "as is" in Appendix C.

3.3 Local Hazmat Incidents

An open records request was made with the City of Houston Hazardous Materials Response Team (HMRT) of the Houston Fire Department to determine if there are any hazardous materials incidents to which the Hazardous Materials Response Team has responded since January 1, 1992 to the present for the Subject Project Alignment. In their response, the HMRT reported that while there were several minor spills in the general area, there are no significant hazardous spill incidents listed in their database for the immediate vicinity of the Subject Project Alignment.

3.4 FEMA Floodplain Map Review

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for Harris County, Texas and Incorporated Areas, Panels 660 of 1135 - Map Numbers 48201C0660 K (revised April 20, 2000), the Subject Project Alignment is mapped as "Zone X - Other Areas" described as "areas determined to be outside (the) 500-year floodplain." The nearest down gradient surface water is Little White Oak Bayou west of the Subject Project Alignment. A copy of this map is provided in Appendix C.

3.5 Physical Setting

Site Topography. From a review of the 1995 7.5-minute United States Geological Survey (USGS) topographic quadrangle maps (Plate 4), the Subject Project Alignment lies at an elevation of approximately 65 feet above mean sea level. The regional slope is to the southwest toward White Oak Bayou adjoining the Subject Project Alignment to the southwest. Surface runoff probably drains into storm sewers and drainage ditches, which eventually empty into White Oak Bayou.

Municipal water districts, subdivisions, industrial sites, and local residents in the Subject Project Alignment draw groundwater for domestic, municipal, commercial and industrial usage. Large withdrawal of water in the greater Houston area over the last 94 years has resulted in regional and localized land-surface subsidence. This has resulted in the lowering of elevations in the area by approximately 6 feet since 1906 when subsidence data began being recorded. The primary effects of this have been the alteration of natural drainage patterns in the area and revisions to floodplain and floodway designations.

Geology and Wetlands. A review of the Bureau of Economic Geology 1992 Geologic Atlas of Texas, Houston Sheet indicates that the uppermost geologic formation underlying the Subject Project Alignment is the Pleistocene Beaumont Formation. The Beaumont Formation's sediments consist primarily of clays, silts and sands that were deposited in fluvial (river derived) and deltaic environments during the Pleistocene Epoch. Mapped soils in the Subject Project Alignment include the Addicks-Urban Land complex, Bernard-Urban Land complex, Clodine-Urban Land complex and the Gessner-Urban Land complex.

Over 200 active faults are known in the greater Houston area. While the activity rate of these faults is slow, damage is common when facilities are constructed on the fault zone. Based on our review of available geologic literature, the Eureka Heights Fault system terminates at Little White Oak Bayou west of the Subject Project Alignment.

The Subject Project Alignment is not on or near mapped wetland areas. In our opinion, no possible wetland areas are close enough to the Subject Project Alignment to warrant wetland assessment work in accordance with USACE guidelines.

Groundwater Characteristics. Groundwater occurs in two main aquifers in the Houston area. The Chicot Aquifer is the shallowest aquifer that produces sufficient quantities of water for domestic, commercial and light industrial purposes. In this area, the Chicot is estimated to extend to approximately 500 feet below the ground surface. Below the Chicot is the Evangeline Aquifer. The Evangeline is the main source of groundwater in the Houston area. Its depth in the area ranges from 400 to 1200 feet below ground surface. Both aquifers dip gently toward the coast.

Shallower groundwater is also encountered in this area of Houston. Generally, this groundwater is of lesser quality than that found in the Chicot or Evangeline Aquifers. Typically, the shallow water-bearing zones are first encountered at a depth of 10 to 20 feet below ground surface. Groundwater movement direction is variable from location to location and may not follow the surface flow direction. The rate of groundwater movement in these shallow water-bearing zones is extremely slow and the production rates rarely exceed two gallons per minute.

3.6 Historical Review

Historical review of data, maps and aerial photographs revealed that the Subject Project Alignment was developed prior to the early 1920's with isolated residential structures and a few dirt roads. By the early 1950's, the Subject Project Alignment was developed with single-family residences with streets in their present day configuration.

Historical Topographic Map. Topographic maps for 1915/16, 1947, 1955, 1967 and 1982 for the Houston Heights, Texas Quadrangles were obtained through GeoSearch. The Subject Project Alignment is located on the east side of the Houston Heights quadrangle maps. These maps show that the Subject Project Alignment is undeveloped with widely spaced dirt roads prior to 1915/16. The area appears to have been residentially developed east of Airline Drive during the 1940's. The 1955 map shows the Subject Project Alignment in roughly its current configuration. With the exception of the most current topographic map for 1995, copies of these maps are provided in Appendix C – Historical Documents. No environmental concerns were noted on any of these maps.

Fire Insurance Rate Maps. We requested copies of all available Sanborn fire insurance maps from GeoSearch in Austin, Texas. GeoSearch reviewed Sanborn maps in the collection of the Center for American History at the University of Texas at Austin and from other data providers. No Sanborn maps were available for the Subject Project Alignment.

Historical Directories. City directories have been published in Houston since the early 1900's. We reviewed the following directories: 1955, 1960, 1965, 1970, 1981, 1985/86, 1995/96 and 2001. Listings on the streets within the Subject Project Alignment and in the immediate vicinity were reviewed. Historically the area has been primarily developed with single-family residences and small commercial facilities. No additional commercial enterprises were listed that weren't found elsewhere in the databases reviewed. The Subject Project Alignment was primarily residential prior to 1975. A GeoSearch standard city search report is provided in Appendix C – Historical Documents.

Oil, Gas and Water Wells. GeoSearch found two canceled oil/gas well locations northeast of the Subject Project Alignment. No oil/gas well locations were found on or near the Subject Project Alignment. GeoSearch found one deep City of Houston public supply well northwest of the Subject Project Alignment along Parker Road. No water well locations were found on or near the Subject Project Alignment. GeoSearch found no pipelines on or near the Subject Project Alignment. The GeoSearch Oil/Gas & Pipeline Report for this project is provided in Appendix C – Historical Documents.

Historical Aerial Photographs. Historical aerial photographs (Appendix C) were obtained from GeoSearch for the years 1944, 1953, 1969, 1979, 1989, 1998 and 2004. The photographs were reviewed for land use, development, the presence of uncontrolled dumping, service stations and other industrial facilities.

1944 This photograph shows scattered residential development along Fulton Street. Some cleared/undeveloped areas are seen to the northeast of the Subject Project Alignment. There is extensive commercial development along Airline.

1953 An increase in residential development is visible in the Subject Project Alignment. The area appears fully developed.

1969 This poor quality photograph shows nearly complete residential development throughout the Subject Project Alignment. The general Subject Project Alignment appears to be largely developed and resembles its present day configuration.

1979 Residential development has been completed in roughly its present day configuration. Commercial development is scattered along Fulton Street.

1989 The development in the Subject Project Alignment appears mostly unchanged from the previous photo in 1979. Additional developments along the Subject Project Alignment appear to be residential.

1998 The development in the Subject Project Alignment appears mostly unchanged from the previous photo in 1979. Additional developments along the Subject Project Alignment appear to be residential.

2004 and 2010 The Subject Project Alignment appears much as it does today with a mix of commercial and residential development predominating throughout most of the Subject Project Alignment. No environmental concerns were noted on any of the aerial photographs reviewed.

3.7 Previous Environmental Reports

HVJ Associates original ESA report HE0614604-1 dated April 1, 2010 (updated in 2012) identified three sites of environmental concern along the Subject Project Alignment. The City of Houston Geo-Environmental Services Branch reviewed the ESA report for the Subject Project Alignment and authorized additional assessment work at three sites along the Subject Project Alignment with RECs. These sites are listed below with type of concern, maximum depth of construction and sample analysis:

Fulton Street Paving: Tidwell to Parker Road Project Environmental Issues			
Location of Concern	Type of Concern	Max. Depth of Construction (ft.)	Sample Analysis
Kee's/Kim's Grocery 9812 Fulton	PST/LPST site	16	BTEX and TPH
Former El Timone Café 6402 Airline	PST/LPST site	16	BTEX and TPH
Annie's Stop N Shop 6656 Airline	PST/LPST site	16	BTEX and TPH

The objective of the investigation was to determine the nature of possible environmental contamination associated with these “possible high impact” locations of potential concern and their effect on the design, construction and operation of the proposed facilities. Impacts to the Subject Project Alignment were assessed with six borings (three at the Fulton/Luetta Street location and three split between the two locations on Fulton near the intersection of Airline Drive). These borings were installed during 2010 using a direct push (Geoprobe) track mounting drilling rig. Borings were installed at each location between the subject sites of environmental concern and the Subject Project Alignment along Fulton. One soil sample from each boring was obtained for laboratory analysis of chemicals of concern (COC) petroleum hydrocarbons benzene, toluene, ethylbenzene, and total xylene (BTEX) and total petroleum hydrocarbons (TPH). Groundwater was encountered and sampled at one location along the Subject Project Alignment. No levels of BTEX or TPH at or above the analytical method detection limit were found in the soil and groundwater samples collected for this study. It should be noted that the Kee's/Kim's Grocery facility at 9812 Fulton is no longer listed in the LPST database. The former El Timone Café at 6402 Airline and Annie's Stop n Shop at 6656 Airline are both currently listed in this database.

4. SITE RECONNAISSANCE AND INTERVIEWS

A site reconnaissance was performed during August 2014 by automobile and on foot. The purpose of the site reconnaissance was to observe the streets and adjacent environmental sites for site characteristics, spills, corrective actions, and other potential environmental concerns, and to document present land uses. Photographs taken during the site reconnaissance and during the previous reconnaissance events are included in Appendix B.

We observed that the Subject Project Alignment consisted primarily of commercial and residential development along Fulton Street. For the Subject Project Alignment, no dumping, trash, stained soils or soil piles were observed. No drums and other containers of unknown contents were observed on or near the Subject Project Alignment. No pits, sumps, catch basins or lagoons were noted along the Subject Project Alignment at the time of our observation. Trash dumping was observed at several locations along the Subject Project Alignment. No evidence of the presence of hazardous materials or petroleum products was observed on the Subject Project Alignment. No suspect asbestos containing materials (ACMs) were observed during the site reconnaissance. No solid waste disposal facilities were observed in the Subject Project Alignment. No evidence of chemical spills/releases, stained soil or stressed vegetation or landfill activity was observed during the reconnaissance. No strong, pungent or noxious odors were observed during the reconnaissance. Monitoring well(s) were observed along the Subject Project Alignment. No water wells, cisterns, abandoned wells or septic systems were observed. No wastewater treatment facilities were observed. Overhead power lines, water lines and fire hydrants were observed along the Subject Project Alignment. No evidence of environmental concerns associated with common pesticides, herbicides, fertilizers or other farming waste was observed on the Subject Project Alignment. No pipeline markers were observed on or near the Subject Project Alignment. Sewage disposal services to the Subject Project Alignment will likely be provided by the City of Houston.

Several local residents were interviewed during the drive throughout the residential portion of the Subject Project Alignment. Specifically, we interviewed local residents on Fulton Street. They all indicated that they were unaware of any environmental impairment(s) in the Subject Project Alignment. In addition, we interviewed an attendant (Felipe) at the 10202 Fulton Street Bad Boy Autoworks (formerly the Wonder Hostess Bakery) site regarding the former leaking petroleum storage tank at the facility. He indicated that he was unaware of any environmental concerns at the facility. He allowed a visual inspection of the facilities rear yard. Apparently the tanks were removed and the facility was closed through the TCEQ a couple of years ago. We interviewed David Kim at the 9812 Fulton Street Kim's Grocery former LPST site. He stated that he was not aware of any environmental issues on or near his facility. We noted groundwater monitoring wells in place at this location. During our site reconnaissance in August 2014, we interviewed Jose Lare (employee of SKC Plumbing) at 9617 Fulton Street and Ada Bemios (counter clerk of Video and Wireless) at 6520 Airline Drive and both stated that they were unaware of any environmental concerns in the Subject Project Alignment.

5. FINDINGS AND OPINION

We have performed a Phase I ESA update in conformance with the scope and limitations of ASTM Practice E 1527-13 Standard Practice adapted for projects along rights-of-way for the general area of the Fulton Street construction project as modified by current City of Houston, Department of Public Works & Engineering requirements. Any exceptions to, or deletions from, this practice are described in Section 1 of this report. There were several environmental sites found in the environmental databases that on or near the Subject Project Alignment. Based on the information obtained in this and previous studies conducted by HVJ Associated for the Subject Project Alignment, HVJ Associates is of the opinion that there was the potential for contamination to impact the Subject Project Alignment from the former El Timone Café located at 6656 Airline

Drive and Annie's Stop N Shop at 6402 Airline Drive. The remaining sites in or near the Subject Project Alignment were found to have a low potential for environmental concern.

The Subject Project Alignment is not on or near mapped wetland areas. In our opinion, no possible wetland areas are close enough to the Subject Project Alignment to warrant wetland assessment work in accordance with USACE guidelines.

6. RECOMMENDATIONS

Because no levels of chemicals of concern (COC) were found during a Phase II ESA conducted by HVJ Associates in 2010 along the Subject Project Alignment sites with RECs (see Section 3.6 Previous Environmental Reports) and no sites with RECs have been added along the Subject Project Alignment since our previous Phase I ESA, ESA Update and Phase II ESA work, we recommend no further environmental investigation of the Subject Project Alignment.

7. DATA GAPS

Section 8.3 of ASTM E 1527-13 states that all obvious uses of the Subject Project Alignment shall be identified from the present back to the Subject Project Alignment's first developed use, or back to 1940, whichever is earlier. The term developed use includes agricultural uses. A data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Data failure is not uncommon in trying to identify the use of the Subject Project Alignment at five-year intervals back to first use or 1940. Notwithstanding a data failure, standard historical sources may be excluded if (1) the sources are not reasonably ascertainable, or (2) if past experience indicates that the sources are not likely to be sufficiently useful, accurate or complete in terms of satisfying the objectives.

Records reviewed document that the Subject Project Alignment was developed prior to 1915 with several dirt roads and scattered residential structures. Aerial photographs document that the Subject Project Alignment had been mostly undeveloped with some scattered residential structures and possibly some commercial buildings in an area with some agricultural activity before 1944. City directories document that the Subject Project Alignment was mostly residential in 1955 (directory coverage was not available prior to 1955) and primarily residential prior to 1975. Early topographic maps show the Subject Project Alignment to be developed with scattered residential structures. In our opinion, there are no data gaps resulting in a data failure and all obvious uses of the Subject Project Alignment have been identified from the present back to the Subject Project Alignment's first developed use.

8. DEVIATIONS AND LIMITATIONS

This report is an instrument of service of HVJ Associates, Inc. The report was prepared for and is intended for the exclusive use of HNTB and the City of Houston. The report's contents may not be relied upon by any other party without the express written permission of HVJ Associates. The information and conclusions provided in this report are based on a general knowledge of Subject Project Alignment and the region; regulatory agency database information; historical information; site reconnaissance findings; interviews; etc. The site reconnaissance observations in this report summarize conditions as found on the date the HVJ Associates environmental professional was at and observed Subject Project Alignment. The report's findings are based on conditions that existed on the dates of HVJ Associates' site visits and available records and should not be relied upon to precisely represent conditions at any other time. This study has attempted to identify recognized environmental conditions in connection with Subject Project Alignment; however, there is a possibility that sources of information have gone undetected because of the limitations of this study, inaccuracy of database records, or the presence of undetected and unreported environmental releases. Certain indicators of the presence of environmental conditions, historical sites, or

hazardous materials may have been latent at the time of our site reconnaissance and may subsequently have become unobservable. All discovered information has been disclosed and a good faith effort has been made to consult pertinent sources and appropriately evaluate the information.

This investigation was performed using the standard level of care and diligence normally practiced by recognized professional environmental and engineering firms in this area presently performing similar services under similar circumstances. This report is intended to be used in its entirety. It has been prepared exclusively for Subject Project Alignment. If the location or area of the Subject Project Alignment changes or otherwise differs from the descriptions contained herein, HVJ Associates should be immediately notified and retained to evaluate the effect of the changes on the conclusions and recommendations presented in this report, and to revise them if necessary. The conclusions presented in this report should not be relied upon for other properties or sites without additional evaluation and/or investigation. This document is not intended to constitute or substitute for legal counsel or guidance in connection with decisions regarding Subject Project Alignment acquisition or regulatory actions.

HVJ Associates has based the conclusions included in this report on its observation of existing Subject Project Alignment conditions, its interpretation of Subject Project Alignment history, and its interpretation of the Subject Project Alignment usage information it was able to access. It is possible that HVJ Associates, Inc. research while fully appropriate for an Environmental Site Assessment failed to indicate the existence of important information sources. Assuming such sources actually exist, their information could not have been considered in the formulation of HVJ Associates' findings and opinions. All conclusions are qualified by the fact that no borings were made and no soil, sediment, or groundwater sampling or chemical testing was conducted. Conclusions about Subject Project Alignment conditions under no circumstances comprise a warranty that conditions in all areas within the Subject Project Alignment (and below existing grade) are of the same quality that HVJ Associates has inferred from observable Subject Project Alignment conditions and readily available site history. HVJ Associates' findings and opinions must be considered probabilities based on professional judgment applied to the limited data HVJ Associates was able to gather during the course of the Subject Project Alignment assessment.

10.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare to the best of my professional knowledge and belief I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a Subject Project Alignment of the nature, history, and setting of the Fulton Road Subject Project Alignment. My experience has included but is not limited to ESA preparation, NEPA site assessments, environmental impact statement preparation, remediation assessment and implementation, aquifer characterization, groundwater modeling and Phase II ESA sampling/analysis and reporting. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

8/26/2014

Edward F. Hawkinson, PG, MS, MBA
Project Manager
HVJ Associates, Inc.

Date:

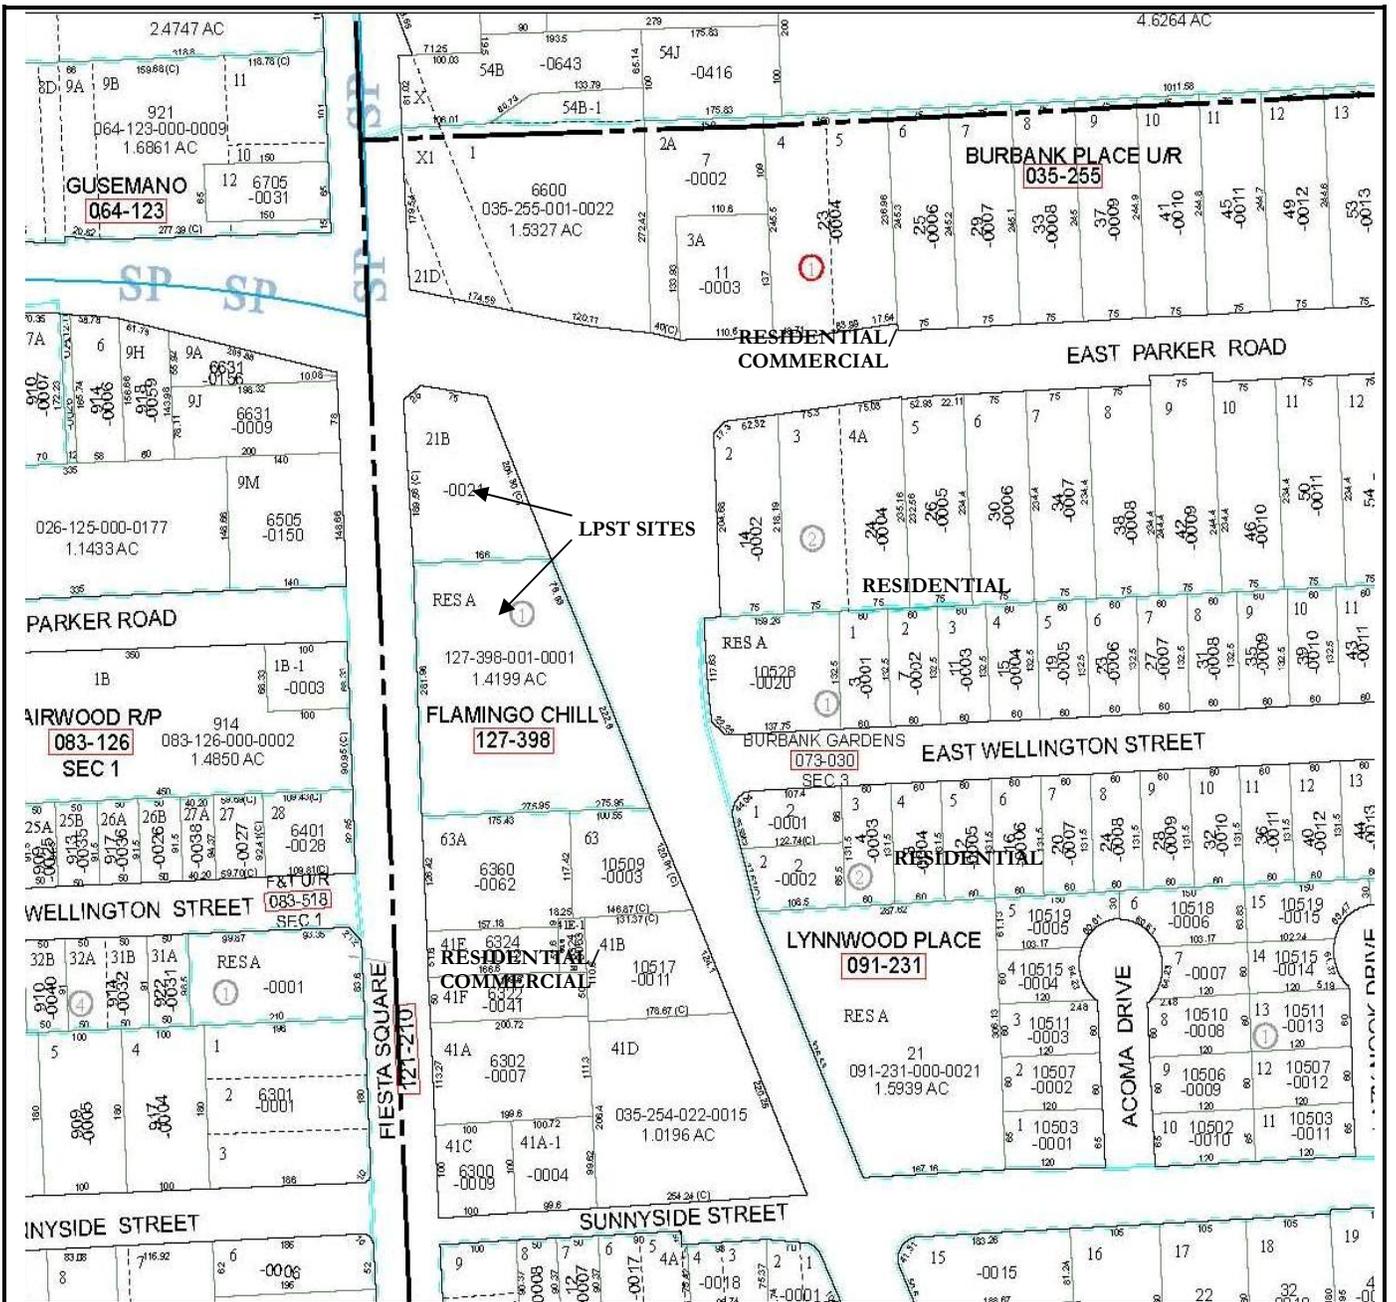

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

HVJ Associates environmental scientist Edward F. Hawkinson, PG conducted the Phase I ESA and prepared this report. Mr. Hawkinson has over 20 years of environmental project management experience. He has been responsible for ESA preparation, NEPA site assessments, environmental impact statement preparation, remediation, aquifer characterization, groundwater modeling and Phase II ESA sampling/analysis and reporting. Over the last 15 years, Mr. Hawkinson has been personally involved in the production of over 500 ESA documents in a multi-state area and Puerto Rico. Mr. Hawkinson is a registered professional geologist in Texas, Arkansas and Tennessee and is a member of the Geological Society of America, Houston Geological Society and the Texas Association of Environmental Professionals. Mr. Hawkinson's resume is provided in Appendix D.

Disclaimer

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquires Rule (40 CFR §312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR §312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers And independent contractors cannot be held liable For actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 04/28/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/11

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 09/06/13

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 01/14/14

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ERNSTX Emergency Response Notification System

VERSION DATE: 12/31/12

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSTX Facility Registry System

VERSION DATE: 08/04/13

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR06 Hazardous Materials Incident Reporting System

VERSION DATE: 01/10/14

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 08/01/12

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

Environmental Records Definitions - FEDERAL

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 08/01/12

In 2006, the Integrated Compliance Information System (ICIS) - National Pollutant Discharge Elimination System (NPDES) became the NPDES national system of record for select states, tribes and territories. ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

LUCIS Land Use Control Information System
VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System
VERSION DATE: 01/30/13

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NPDES06 National Pollutant Discharge Elimination System
VERSION DATE: 04/01/07

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data.

PADS PCB Activity Database System
VERSION DATE: 06/01/13

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCSR06 Permit Compliance System
VERSION DATE: 08/01/12

Environmental Records Definitions - FEDERAL

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

RCRASC RCRA Sites with Controls

VERSION DATE: 01/14/14

This list of Resource Conservation and Recovery Act sites with institutional controls in place is provided by the U.S. Environmental Protection Agency.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/31/09

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/12

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/06

Environmental Records Definitions - FEDERAL

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

NLRRCRAG

No Longer Regulated RCRA Generator Facilities

VERSION DATE: 04/10/14

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

RCRAGR06

Resource Conservation & Recovery Act - Generator Facilities

VERSION DATE: 04/10/14

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the

Environmental Records Definitions - FEDERAL

data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). This database includes sites located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

HISTPST Historical Gas Stations

VERSION DATE: 07/01/30

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

BF Brownfields Management System

VERSION DATE: 04/15/14

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment.

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System

VERSION DATE: 10/25/13

Environmental Records Definitions - FEDERAL

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

DNPL Delisted National Priorities List

VERSION DATE: 10/25/13

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

NFRAP No Further Remedial Action Planned Sites

VERSION DATE: 10/25/13

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 04/10/14

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities

VERSION DATE: 04/10/14

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource

Environmental Records Definitions - FEDERAL

Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

DOD Department of Defense Sites

VERSION DATE: 12/01/05

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 02/01/13

The 2011 Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NPL National Priorities List

VERSION DATE: 10/25/13

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 10/25/13

Environmental Records Definitions - FEDERAL

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 07/01/13

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (TX)

GWCC Groundwater Contamination Cases

VERSION DATE: 12/31/12

This report contains a listing of groundwater contamination cases which were documented for the 2012 calendar year. Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The agencies reporting these contamination cases include the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

HISTGWCC Historic Groundwater Contamination Cases

VERSION DATE: NR

This historic report contains all agency groundwater contamination cases documented from 1994 to 2011. The agencies that reported these contamination cases included the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

LIENS TCEQ Liens

VERSION DATE: 04/11/14

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

MSD Municipal Setting Designations

VERSION DATE: 01/29/14

The Texas Commission on Environmental Quality defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.

NOV Notice of Violations

VERSION DATE: 03/17/14

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is a written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

Environmental Records Definitions - STATE (TX)

SIEC01 State Institutional/Engineering Control Sites

VERSION DATE: 02/19/14

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination. The sites included on this list are regulated by various programs of the Texas Commission on Environmental Quality (TCEQ).

SPILLS Spills Listing

VERSION DATE: 03/17/14

This Texas Commission on Environmental Quality database includes releases of hazardous or potentially hazardous materials into the environment.

TIERII Tier II Chemical Reporting Program Facilities

VERSION DATE: 12/31/12

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2012 calendar years.

DCR Dry Cleaner Registration Database

VERSION DATE: 04/01/14

The database includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

IHW Industrial and Hazardous Waste Sites

VERSION DATE: 04/01/14

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

Environmental Records Definitions - STATE (TX)

PIHW Permitted Industrial Hazardous Waste Sites

VERSION DATE: 04/01/14

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

PST Petroleum Storage Tanks

VERSION DATE: 05/05/14

The Petroleum Storage Tank database is administered by the Texas Commission on Environmental Quality (TCEQ). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

APAR Affected Property Assessment Reports

VERSION DATE: 01/29/14

As regulated by the Texas Commission on Environmental Quality, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

BSA Brownfields Site Assessments

VERSION DATE: 02/19/14

The Brownfields Site Assessments database is maintained by the Texas Commission on Environmental Quality (TCEQ). The TCEQ, in close partnership with the U.S. Environmental Protection Agency (EPA) and other federal, state, and local redevelopment agencies, and stakeholders, is facilitating cleanup, transferability, and revitalization of brownfields through the development of regulatory, tax, and technical assistance tools.

CALF Closed & Abandoned Landfill Inventory

VERSION DATE: 11/01/05

The Texas Commission on Environmental Quality, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments (COGs) in the State, has located over 4,000 closed

Environmental Records Definitions - STATE (TX)

and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail and this historical information is not updated. Please refer to the specific regional COG for the most current information.

DCRPS Dry Cleaner Remediation Program Sites

VERSION DATE: 03/01/14

This list of DCRP sites is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents.

IOP Innocent Owner / Operator Database

VERSION DATE: 02/19/14

Texas Innocent Owner / Operator (IOP), created by House Bill 2776 of the 75th Legislature, provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination. The IOP database is maintained by the Texas Commission on Environmental Quality.

LPST Leaking Petroleum Storage Tanks

VERSION DATE: 05/05/14

The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality. This listing includes aboveground and underground storage tank facilities with reported leaks.

MSWLF Municipal Solid Waste Landfill Sites

VERSION DATE: 04/04/14

The municipal solid waste landfill database is provided by the Texas Commission on Environmental Quality. This database includes active landfills and inactive landfills, where solid waste is treated or stored.

RRCVCP Railroad Commission VCP and Brownfield Sites

VERSION DATE: 04/18/14

According to the Railroad Commission of Texas, their Voluntary Cleanup Program (RRC-VCP) provides an incentive to remediate Oil & Gas related pollution by participants as long as they did not cause or contribute to the contamination. Applicants to the program receive a release of liability to the state in exchange for a successful cleanup.

Environmental Records Definitions - STATE (TX)

RWS Radioactive Waste Sites

VERSION DATE: 07/11/06

This Texas Commission on Environmental Quality database contains all sites in the State of Texas that have been designated as Radioactive Waste sites.

VCP Voluntary Cleanup Program Sites

VERSION DATE: 02/19/14

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses. The VCP database is maintained by the Texas Commission on Environmental Quality.

WMRF Recycling Facilities

VERSION DATE: 11/01/12

This listing of recycling facilities is provided by the Texas Commission on Environmental Quality's Recycle Texas Online service. The company information provided in this database is self-reported. Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ regulations or other applicable laws. This database is no longer maintained and includes the last compilation of the program participants before the Recycle Texas Online program was closed.

IHWCA Industrial and Hazardous Waste Corrective Action Sites

VERSION DATE: 04/21/14

This database is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the mission of the industrial and hazardous waste corrective action program is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes. The goals of this program are to: Ensure that sites are assessed and remediated to levels that protect human health and the environment; Verify that waste management units or facilities are taken out of service and closed properly; and to Facilitate revitalization of contaminated properties.

SF State Superfund Sites

VERSION DATE: 03/01/14

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). As required by the Texas Solid Waste Disposal Act, Texas Health and Safety Code, Chapter 361, the Texas Commission on Environmental Quality identifies and

Environmental Records Definitions - STATE (TX)

evaluates these facilities for inclusion on the state Superfund registry. This registry includes any recent developments and the anticipated action for these sites.

Environmental Records Definitions - TRIBAL

USTR06 Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/30/13

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

LUSTR06 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/30/13

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

APPENDIX D
RESUME OF ENVIRONMENTAL PROFESSIONAL
FULTON STREET: TIDWELL TO PARKER ROAD
WBS NO. N-000542-0003-3

EDWARD HAWKINSON, PG, CAPM
PROJECT GEOLOGIST

EDUCATION MBA, University of Cincinnati, 1977
MS, Geology, University of Cincinnati, 1975
BS, Geology, The Ohio State University, 1968

LICENSE Professional Geologist, TX (45), 2003
Professional Geologist, AR, 1989
Professional Geologist, TN, 1990

EXPERIENCE SUMMARY

Mr. Hawkinson has over 25 years of experience providing a wide range of environmental services including Phase I and Phase II Environmental Site Assessments; NEPA documents including Categorical Exclusion and Environmental Assessment studies; wetland studies and permitting; threatened and endangered species studies, cultural resources studies; underground and leaking petroleum storage tank assessment and remediation; invasive and non-invasive geologic fault studies; hazardous waste assessment and management; RCRA/CERCLA investigations; aquifer characterization and interpretations and remedial system design and construction oversight. Environmental work is conducted in accordance with ASTM standards and applicable city, county, state and federal regulations and guidelines which include EPA, US Fish and Wildlife, Texas Parks & Wildlife, and USACE. Mr. Hawkinson is familiar with the protocols in conducting environmental studies, such as ASTM, ASFE, and TNRCC RBCA procedures.

SIGNIFICANT PROJECT EXPERIENCE

Lake Houston and Lynchburg Reservoir, Harris County, Texas. Project Manager for environmental analysis of recent soil discoloration (possibly due to petroleum hydrocarbons) near the southwest corner of the Lynchburg Reservoir area site, where a large quantity of debris was deposited on and near these sites from Hurricane Ike. The purpose of this study was to provide sampling and testing services to determine if hydrocarbon (or other) contamination is present, and if present, whether impacted soils will require special disposal measures.

Metro Intermodal Transit Facility, Houston, Texas. Project Manager for an environmental assessment for the proposed Transit Facility north of downtown Houston, which will provide commuters easy transfer between many different transit modes and providers. The project is to include the construction of a great circle (terminal area), a train hall, a bus hall, a market facility and development sites.

IH 10 General Engineering Consultant Fault Studies, Houston, Texas. Mr. Hawkinson served on a team that conducted comprehensive geologic fault studies for three sections involving two major interchanges and one overpass. The IH 10 and Loop 610 and I-10 and Beltway 8 interchanges were located on the surface trace of the Eureka Heights and the Long Point Faults, respectively. Investigations included field delineation of fault scarps and marking for detailed

surveying. A Phase I fault study was conducted for the section between SH 8 and Barker-Cypress Road to determine if a potential fault was located in that area. Published records from the USGS and academia indicated the potential for an active fault to cross the roadway in this section.

FM 2234 Roadway Widening: FM 521 to SH 288, Houston, Texas. Project Manager for a hazardous materials initial site assessment for the widening of FM 2234, from FM 521 to SH 288. The project involved widening the alignment from two lanes to four lanes and rights-of-way were acquired.

Kirby Drive Storm Sewer, Houston, Texas. Project Manager for a Phase I and Phase II environmental site assessment for the proposed storm sewer project. The project involved two 10- by 10-foot box culverts; storm sewers including storm sewer leads, inlets and manholes; 24-inch waterline; 8-inch sanitary sewer; six lanes of concrete paving; asphalt transitions, and traffic signal foundations. The Phase I ESA identified the potential for groundwater and soil contamination to impact the project so recommended a Phase II ESA adjacent to the listed sites to determine the nature of any contamination located within the project alignment and to develop recommendations for design and construction of proposed facilities.

Texas A&M Institute for Pre-Clinical Study, College Station, Texas. Project Manager for a Phase I environmental site assessment, threatened and endangered species study, cultural resources study, and wetlands identification for a 10.55-acre tract in College Station. The proposed project involved the construction of a two- to three-story building with a total area of 59,000 square feet and two additional one-to two-story buildings with planned areas of 28,000 square feet each.

Westside Mitigation, Houston, Texas. Project Manager for a geotechnical and hydrogeologic assessment of the Houston Airport System site for a proposed wetland construction project.

Gulf Meadows Wastewater Treatment Plant, Houston, Texas. Project Manager for a background Phase I Environmental Site Assessment (ESA) and a Phase II ESA proposed general demolition of the existing sewage treatment plant and assignment of the former plant for non-industrial use as a park since the property is adjacent to an existing park and school area.

West White Oak Bayou Trail Extension Categorical Exclusion, Houston, Texas. Performed environmental assessment for the proposed hike and bike trail extension along White Oak Bayou under TxDOT environmental guidelines for NEPA projects. Specific tasks included preparing environmental documents, conducting wetlands delineations, and coordination with archeological vendor.

New Luke Road, San Antonio, Texas. Performed an environmental assessment for a portion of the former industrial complex associated with Kelly Air Force Base. Evaluated the threat of hazardous waste plumes (soil and groundwater) to impact the design, construction, and operation of the new facility. Work was conducted as part of an environmental assessment for the TxDOT San Antonio.

West White Oak Bayou Trail Extension, Houston, Texas. Performed an environmental assessment with a finding of a categorical exclusion for a 3-mile segment of a proposed bikeway. Critical issues addressed included wetlands, floodplains, and historical/archeological sites.

Goose Creek Categorical Exclusion, Baytown, Texas. Identified four areas of possible jurisdictional wetland development along Goose Creek, east of Houston near Baytown, using standard USACE wetland delineation methodology. Identified wetland hydrology, wetland and non-wetland soil regimes, and wetland vegetation in these areas of possible jurisdictional wetland development and conveyed these results in a report to the USACE for a determination.

Southeast University Hobby Corridor, Houston, Texas. Performed an environmental study relating to water resources, including data collection and analysis of existing conditions. The study included documentation of surface waters, groundwater, floodplains and drainage, and wetlands and riverine systems for Affected Environment of the Southeast Corridor Draft Environmental Impact Statement. The work was in compliance with all local, state, and federal regulations including the National Environmental Policy Act.

Dairy Ashford No. 2 Lift Station, Houston, Texas. Completed a Phase I ESA for the proposed construction of the Dairy Ashford No. 2 sanitary sewer lift station on a vacant lot once occupied by a wastewater treatment plant to include environmental regulatory agency summary records review, field observations, and interviews; review of available, historical maps, aerial photographs; a review of available geologic literature to characterize the geologic, physiographic, and hydrogeologic setting to determine potential release pathways; and a site reconnaissance to conduct interviews, verify environmental and historical records, identify current land-use activities, and identify potential areas of environmental concern based on current conditions. Developed a report summarizing his findings with conclusions and recommendations.

Environmental Site Assessment, Adjoining Properties, Almeda Sims Sludge Drying Facility, Houston, Texas. Completed a Phase I ESA for the adjoining properties of the proposed new construction of a sludge drying facility at the Almeda-Sims WWTP. The objective of this study was to identify current or previous land use activities that may have created an environmental concern to the project on two properties that adjoin the Almeda-Sims WWTP.

Westway, Homestead, and Chocolate Bayou Wastewater Treatment Plants, Houston, Texas. Project Manager for Phase I environmental site assessments for modifications and improvements at the plants.

Galveston Sewer Replacements, Galveston, Texas. Completed a Phase I ESA for sanitary sewer projects in Galveston, Texas. The objectives of this study were to identify current or previous land use activities that may have created an environmental concern to the project. The projects are located in a mixed area of residential, commercial, and industrial land uses. Based on available information, found that potential impact may include contaminated soils, groundwater, vapors, and impacts associated with waste handling and worker protection. Recommended additional investigations at all three of the project areas to determine the nature and extent, if any, of contamination along the project alignment. Soil borings were recommended as well as groundwater sampling due to the high level of the water table in this area.

Clay Road Improvements Phase I, Houston, Texas. Performed a Phase I environmental site assessment and wetland determination for improvements to Clay Road, from Elrod to Peek Road.

A.D. Dyess Park, Cypress, NW Harris County, Texas. Project Geologist for a multi-phase environmental investigation for A.D. Dyess Park in northwest Harris County. Services included a Phase I ESA, wetlands determination, wetlands delineation, study on the presence or absence of threatened and endangered species, an evaluation of cultural resources, and permit support for Harris County in connection with the wetlands. The wetland delineation study was conducted using those specific procedures for tracts of more than 5 acres, as promulgated in the USACE Wetland Manual.

Collingsworth Bridge Phase II Environmental Site Assessment, Houston, Texas.

Completed Phase I and II environmental site assessments for the construction of a grade separation across the railroad tracks along Collingsworth along an alignment adjoining the South Cavalcade Superfund Site. Conducted extensive review of regulatory agency documents relating to environmental sites in the alignment area, conducted subsurface investigations, and provided recommendations for worker health and safety, materials handling and materials disposal during construction.

Texas Medical Center Transit Center, Subsurface Investigation, Houston, Texas. Supervised the geoprobe boring installation, soil sampling and analysis/reporting for the project. Soil samples were collected in a grid pattern in the vicinity of a former service station location and at locations east and north of this potentially contaminated property. All soil samples were screened with an organic vapor meter and selected samples were submitted for the analysis of "chemicals of concern" typically associated with a leaking petroleum storage tank installation.

Jacintoport and Penninsula Boulevards Reconstruction, Phase I ESA, Harris County, Texas.

Project Manager for conducting a Phase I ESA, which included in the scope an evaluation of Threatened and Endangered Species, Wetlands, and Cultural Resources. The Phase I ESA was conducted per ASTM and ESA Section 404 guidelines. Coordination was conducted with the US Fish and Wildlife Service and the Texas Historical Commission. The project involved the realignment of Jacinto Port Road and Peninsula Boulevard in southeast Harris County.

Elementary School # 36 - FM 1464 on 12.12 Acres, Fort Bend County, Texas. Project Manager for a Phase I Environmental Site Assessment for the location of a proposed elementary school on approximately 12.12 acres. The objectives of this study were to identify current or previous land use activities that may have created an environmental concern to the project. The project was located in an area of vacant land which abutted the West Oaks Village Subdivision. The Phase I ESA did not reveal evidence of recognized environmental conditions in connection with the 12.12-acre parcel. HVJ had no recommendations for further environmental studies involving hazardous materials and/or contamination on the 12.12-acre parcel. Services provided included a review of ASTM E-1527 records and an evaluation of the project to be impact wetlands, cultural resources, or be impacted by active geologic faulting.

Elementary School #38, Fort Bend County ESA, Fort Bend County, Texas. Project Manager for a Phase I ESA for an approximate 8.8-acre tract immediately east of Lexington Boulevard. The objectives of this study were to determine whether recognized environmental conditions may be located on or near the project site or on adjacent parcels that may lead to an environmental concern. In addition to the standard ESA presentation, we provided threatened and endangered species and cultural resources information.

WHCRWA Waterline, Harris County, Texas. Project Manager for a Phase IA environmental site assessment, wetlands reconnaissance study, cultural resources study, and threatened and endangered species study for a proposed 12- to 16-inch water line.

Grant Road Detention Pond, Cypress, Texas. Project Manager for environmental services for construction of a detention basin approximately 5-acres, measuring about 1300 by 160 feet and located on a 10-acre parcel. The parcel is located about 450 feet east of Perry Road, along the south side of Grant Road. HVJ previously conducted a Phase I ESA, wetlands determination, and a review of Threatened and Endangered Species for the Grant Road alignment. The scope of this project included these items as well as a review of cultural resources. The Phase I Environmental Site Assessment will be based on Harris County standard practice document entitled "Minimum Requirements and Guidelines for performing Preliminary Environmental Site Assessments" and ASTM Standards (E-1527).

WHCRWA Waterline, Harris County, Texas. Project Manager for a Phase IA environmental site assessment, wetlands reconnaissance study, cultural resources study, and threatened and endangered species study for a proposed 12- to 16-inch water line.

Karst Invertebrate Survey, San Antonio, Texas. Project Manager for a geologic assessment and Endangered Karst Invertebrate Survey for a 300-foot section of roadway right-of-way at the intersection of Babcock Road and Hausman Road. The property is located within the Edwards Aquifer Recharge Zone and also an area documented as Threatened and Endangered Species in the form of Karst invertebrates.

SAWS ESA - Kelly AFB, San Antonio, Texas. SAWS is proposing to make improvements to the existing stand-alone water distribution system at Kelly USA and Kelly AFB to tie the system into Pressure Zone 4 and provide a reliable water supply for the business park being developed. Project Manager for Phase I ESA.
