Re: Phase I Environmental Site Assessment (ESA)
60-inch Water Line along Monroe and Rockhill
from Airport Boulevard to Glen Valley Drive
Contract 70B (S-000900-0129-3)
Owner: City of Houston
HVJ Proposal No. HE1412160

Dear Ms. Burrer:

Presented herein is our Phase I Environmental Site Assessment (ESA) final report for the above captioned project. The study was performed in general accordance with ASTM E 1527-13 Standard Practice as modified by the City of Houston Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 and our proposal number HE1412160 dated April 4, 2014.

This report presents HVJ Associates' understanding of the project's scope, the methodology we employed in executing the work, and the conclusions we reached subject to the limitations discussed in Section 10 of this report.

It has been a pleasure to work with you on this project, and we appreciate the opportunity to be of service. Please read the entire report and notify us if there are questions or comments or if we may be of further assistance.

Sincerely,

HVJ ASSOCIATES, INC.

Texas Firm Registration No. F-000646

EXECUTIVE SUMMARY

HVJ Associates, Inc. (HVJ Associates) was contracted by Lockwood, Andrews & Newnam, Inc. (LAN) to perform a Phase I Environmental Site Assessment (ESA) of an alignments area (referred to in this report as the Subject Project Alignment) of a proposed 60-inch Water Line along Monroe and Rockhill from Airport Boulevard to Glen Valley Drive in Houston, Texas (see Plate 1 for location). HVJ Associates conducted this ESA in accordance with the guidelines contained in the American Society for Testing and Materials Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13) as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements.” The purpose of this ESA was to identify recognized environmental conditions (RECs) in connection with the Subject Project Alignment. As defined in ASTM E 1527-13, “The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property.”

The Subject Project Alignment is southeast of Loop 610 and IH 45 in Houston, Texas. The proposed work involves water line construction and improvements.

The Subject Project Alignment is located in a mixed use residential and commercial area. The findings and recommendations for the Subject Project Alignment are summarized below:

- Historical data, maps, and aerial photographs revealed that the Subject Project Alignment were undeveloped prior to 1915 in a rural agricultural setting. Early maps (prior to 1967) show no commercial or residential structures near the Subject Project Alignment. The 1967 topographic map shows single family residential development along Rockhill and mainly commercial development along Monroe Road. The 1982 topographic map shows the Subject Project Alignment and adjacent areas developed with residential subdivisions and roadways in roughly their current configuration.
- According to the ASTM Standards and the City of Houston guidelines designated search radii, in the Subject Project Alignment, the regulatory database lists 62 “locatable” non-water well listings involving both federal and state database information within the ASTM search radii. Additionally, according to the City of Houston Fire Department and other spill data sources (including the Federal ERNSTX database and the State of Texas SPILLS database), there were no hazardous materials incidents of concern reported within the area Key Map locations.
- Combined with our review of historical data, maps, reconnaissance and the Texas Commission on Environmental Quality (TCEQ) online files, we identified no sites with a possible recognized environmental condition (REC) near the Subject Project Alignment.
- The Subject Project Alignment is underlain by clayey soils associated with the Beaumont Formation. Groundwater for domestic and municipal uses occurs at depths ranging from about 400 to 600 feet in the Chicot and Evangeline Aquifers, respectively. Shallow groundwater may be present and is expected to be about 10 to 20 feet below ground.

HVJ Associates is of the opinion that there is a low potential for environmental contamination to impact the Subject Project Alignment from the environmental sites with RECs along or near the Subject Project Alignment and we recommend no further environmental study of this Subject Project Alignment.

The National Wetlands Inventory Map for the Subject Project Alignment shows no wetland development along the Subject Project Alignment. One small northeast to southwest trending oval shaped wetland area is located near the south end of the Subject Project Alignment area north of Airport Blvd.

Please note that this executive summary does not fully relate our findings and opinions. Those findings and opinions are only related through our full report.

1.0 INTRODUCTION

1.1 Project Objective and Purpose

HVJ Associates, Inc. was contracted by LAN to perform a Phase I Environmental Site Assessment (ESA) of a proposed 60-inch Water Line along Monroe and Rockhill from Airport Boulevard to Glen Valley Drive in Houston, Texas (see Plate 1- Site Vicinity Map for the Subject Project Alignment location). The objective of this study was to determine whether any RECs are located on or near the Subject Project Alignment or on adjacent parcels that may lead to an environmental concern.

This Phase I ESA was performed as part of the due diligence for the construction on the Subject Project Alignment. This Phase I ESA was performed to qualify for the following landowner liability protection under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA): innocent landowner limitation; the contiguous property owner limitation; or the bona fide prospective purchaser limitation. The purpose of this Phase I ESA was to identify recognized environmental conditions in connection with the Subject Project Alignment. As defined in ASTM E 1527-13, “The term recognized environmental conditions (REC) means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the structures on the property or into the ground, groundwater or surface water of the property.”

1.2 Project Scope

The scope of services for this Phase I ESA was performed in general accordance with ASTM Standard Practice E 1527-13 as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements.” The following tasks were performed:

1. Environmental regulatory agency summary records were obtained for regulated environmental sites near the Subject Project Alignment. Following initial review additional information was obtained through file reviews, field observations and interviews.
2. Available historical topographic maps, aerial photographs, city directories, FEMA data and oil/gas and water well information were obtained and reviewed to determine if current or prior land owners/occupants may have engaged in activities on adjacent properties that may have been an environmental concern. Sanborn fire insurance maps were unavailable for the Subject Project Alignment and adjoining properties.
3. Available geologic literature was reviewed to characterize the geologic, physiographic, and hydrogeologic setting to determine potential release pathways.
4. An on-site reconnaissance of Subject Project Alignment and the adjoining properties was performed to conduct interviews, verify environmental and historical records, identify hazardous substance and petroleum product storage areas and any obvious signs of environmental releases, identify current land-use activities and discover potential areas of environmental concern based on current conditions and development.
5. Interviews were conducted to obtain information relevant to the Subject Project Alignment and adjoining properties.

This report was prepared to document the Phase I ESA investigation and summarizes our findings/results, conclusions and recommendations.

1.3 Authorization

LAN authorized this City of Houston project Phase I Environmental Site Assessment (ESA) in their Work Authorization #130-10667-011 signed by HVJ Associates on May 30, 2014.

1.4 Significant Assumptions and Exceptions

This Phase I ESA was performed in general accordance with ASTM E 1527-13 as modified by City of Houston, Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 “Geotechnical and Environmental Requirements.” The Phase I ESA was limited to information that is “reasonably ascertainable” and “practically reviewable” in accordance with ASTM E 1527-13, considering the time and cost associated with the assessment. HVJ Associates cannot guarantee the completeness or accuracy of the regulatory agency database records and cannot guarantee that not finding indications of hazardous substances or petroleum products means that these materials do not exist on the Subject Project Alignment. There is a possibility that sources of contamination have escaped detection due to the limitations of this study, the inaccuracy of available governmental records, or the presence of undetected and unreported environmental releases. HVJ Associates cannot be responsible for failure to disclose recognized environmental conditions that may exist on or near the Subject Project Alignment, but were not identified due to limiting the assessment to information that is “reasonably ascertainable” and “practically reviewable” as discussed above.

HVJ Associates reserves the right to alter our conclusions and recommendations based on our review of any information obtained after the date of this report. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by environmental consultants practicing in this or similar localities. No warranty, express or implied, is made as to the professional information included in this report.

1.5 Qualifications of Environmental Professionals

The primary investigator for this Phase I ESA is Mr. Edward Hawkinson. Mr. Hawkinson holds BS and MS degrees in geology from The Ohio State University and the University of Cincinnati respectively, and an MBA from the University of Cincinnati. Mr. Hawkinson is a registered professional geologist in Arkansas, Tennessee and Texas. His career encompasses a period exceeding 27 years involving environmental site assessments, hydrogeology, water resource evaluations, NEPA environmental investigations and energy exploration.

2.0 SITE DESCRIPTION

2.1 Location and Project Description

The location of the Subject Project Alignment is shown on Plates 1, 2A, 2B, 3 and 4, on GeoSearch maps contained in Appendix A and on various maps and aerial photographs in Appendix C. The Subject Project Alignment involves water line construction and improvements along Monroe and Rockhill from Airport Boulevard to Glen Valley Drive in southeast in Houston, Texas.

2.2 Current Use of and Improvements on the Subject Project Alignment

The Subject Project Alignment is a mostly developed mixed residential and commercial area of Houston. There are residential structures along/near the Subject Project Alignment (refer to Plates 2A – Local Vicinity and Land Use Map, Plate 2B – Project Location Map and photographs in Appendix B). The City of Houston provides water, sanitary sewer and storm sewer service to the Subject Project Alignment. Current land uses along the Subject Project Alignment and immediate vicinity are depicted on Plate 2A.

2.3 Current Uses of Properties Adjoining the Subject Project Alignment

The following properties adjoin the Subject Project Alignment (refer to maps in Appendix A and photographs in Appendix B):

- To the north are Rockhill Street and a single family residential area.
- To the east is Berry Gully and scattered commercial facilities.
- To the west is mostly single family residential area.

- To the south is the intersection of Airport Blvd. beyond which are scattered commercial facilities. Hobby Airport is on the southwest of the south end of the Subject Project Alignment.

3.0 USER PROVIDED INFORMATION

LAN provided a project description, several project maps and drawings. The ASTM standard User Questionnaire is not appropriate for this type of investigation. Typical user responses generally indicate that the user is not aware of any known or suspect environmental conditions on the Subject Project Alignment and that they do not have any relevant environmental reports or other information pertinent to this Phase I ESA for Subject Project Alignment.

4.0 RECORDS REVIEW

4.1 Environmental Records Sources

On July 8, 2014 GeoSearch conducted a search of environmental database records (standard environmental record sources) for the Subject Project Alignment and surrounding area. The GeoSearch Radius Report is provided in Appendix A. The search radii from the Subject Project Alignment were in accordance with the ASTM E1527-13 approximate minimum search radii for standard environmental record sources (where available). A Site Map showing the radius search area and registered facilities in the database records is included in the GeoSearch Radius Report in Appendix A. Table 1 lists the number of sites identified in the environmental databases that are located within the ASTM E1527-13 and COH Department of Public Works & Engineering Infrastructure Design Manual Chapter 11 minimum search radii.

Table 1 – Sites Identified During Environmental Database Search

4.2 State and Federal Records Summary

The number and types of sites identified in the database records are consistent with the various land uses in the surrounding area. Due to the relatively flat topography there is very minor surface gradient in the area. The groundwater gradient is also minimal and generally to the north toward Sims Bayou north of the Subject Project Alignment. None of the sites identified in the database search are likely to have a significant negative impact on the Subject Project Alignment (refer to ASTM 8.1.9 and the applicable portions of the GeoSearch Radius Report in Appendix A). No sites were identified during the review of the environmental records obtained through GeoSearch as having known or suspected RECs.

HVJ Associates reviewed federal and state regulatory agency summaries for nearby regulated sites to determine their status and to identify specific addresses and site names that would aid in conducting our field reconnaissance. The GeoSearch environmental sites are shown on the Environmental Site Location Map (see Plate 3). For sites found within the search radius, the records include the following type of sites:

NPL - National Priorities List. This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action. The Geneva Industries/Fuhrman Energy facility at 9334 Caniff Road is the only NPL location within the database search radii. This facility is an abandoned refinery which manufactured a variety of organic compounds including biphenyl, polychlorinated biphenyls, phenyl phenol, naphtha and fuel oils from 1967 through 1978. The major contaminants of concern are chlorinated hydrocarbon solvents and volatile organics. This facility should not be a

concern to project construction due to its location approximately 0.7 mi. east of the Subject Project Alignment.

RODS – Records of Decision. These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action. The Geneva Industries/Fuhrman Energy facility at 9334 Caniff Road is the only RODS location within the database search radii. This facility is an abandoned refinery which manufactured a variety of organic compounds including biphenyl, polychlorinated biphenyls, phenyl phenol, naphtha and fuel oils from 1967 through 1978. Numerous remedies for the contaminants of concern are detailed in the RODS documents. This facility should not be a concern to project construction due to its location approximately 0.7 mi. east of the Subject Project Alignment.

IHW – Industrial and Hazardous Waste Sites. This database contains permitted and non-permitted industrial and hazardous waste site information. Four IHW sites are listed within the database search radii. None of these sites are on or adjoining the Subject Project Alignment. The closest IHW site is approximately 0.22 mi. east of the Subject Project Alignment area and is listed as an inactive large quantity generator of hazardous waste with no violations or penalties noted. This site should not be an environmental concern to project construction due to its distance from the Subject Project Alignment. The information contained in this database is not detailed enough to allow site classification as a REC.

PST – TCEQ Petroleum Storage Tank database. This list identifies parties who own or operate aboveground and underground storage tanks (ASTs and USTs respectively) containing petroleum products or hazardous materials. Twenty on storage tank sites were reported to exist within the designated search radii. Two of these sites are adjoining or within 500 feet of the Subject Project Alignment. The Hobby Airport complex south of the Subject Project Alignment area is listed with nine PST locations (see Plate 3, Map IDs #1 and #2). There is no adverse information in the PST database for these sites.

DCRPS - Dry Cleaner Remediation Program. This list of sites is provided by the TCEQ. The DCRP establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents. The only DCRPS facility within the database search radii is Sterling Cleaners at 8312 Broadway Street approximately 0.45 mi. north of the Subject Project Alignment area. This facility should not be a concern to project construction because of its distance from the Subject Project Alignment. No information was found in the database records listing recent petroleum solvents utilization at this facility. The facility is listed in remediation with an unknown status.

IOP - Innocent Owner/Operator Database. The Texas Innocent Owner/Operator (IOP) provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property and they did not cause or contribute to the source or sources of contamination. One IOP site is located within the database search radii. This site is not on or within 500 ft. of the Subject Project Alignment area and should not be a concern to project construction due to its distance from the Subject Project Alignment and current status.

LPST - TCEQ Leaking Petroleum Storage Tank Report lists sites known to have leaks/spills associated with underground or aboveground tanks. It contains summary information about leaking tanks reported to the commission such as identification numbers, location information, responsible party information and priority/status codes.

Twenty one LPST sites were reported within the database search radii. None of these sites are on or within 500 feet of the Subject Project Alignment area. The closest LPST site to the Subject Project Alignment is a convenience store location with multiple names at 8600 Broadway Street (see Plate 3, Map ID #4). This location is listed as having minor soil contamination and status code “final concurrence issued, case closed.” This LPST site should not be a concern to project construction due to its location approximately 0.14 mi. west of the Subject Project Alignment.

MSWLF –Municipal Solid Waste Landfill Sites. Sites listed within this database include active landfills and inactive landfills where solid waste is treated or stored. There is one MSWLF listings within the database search radii. This site is the HIS Soil Technology recycling facility at 8555 Gulf Freeway (Plate 3, Map ID #23) approximately 0.4 mi. east of the Subject Project Alignment.

VCP - Voluntary Cleanup Program Sites. The Texas VCP provides administrative, technical and legal incentives to encourage the cleanup of contaminated sites in Texas. All non-responsible parties receive protection from liability to the state of Texas for cleanup of sites under the VCP. One VCP application was reported within the database search radii. The Gas Path Technology facility at 8301 West Monroe (Plate 3, Map ID #27) is listed for VOC, TPH and metals contamination in site soil and groundwater. This facility should not be a concern to project construction due to its location approximately 0.49 mi. south of the Subject Project Alignment and current status.

IHWCA – Industrial and Hazardous Waste Corrective Action Sites. This database is provided by the TCEQ and is designed to oversee sites contaminated from municipal and industrial hazardous and industrial nonhazardous wastes. Ten IHWCA sites are listed within the database search radii. None of these are located on or within 500 feet of the Subject Project Alignment area and should not be a concern to project construction due to their location. For the most part, information in this database is not detailed enough to allow site classification as a REC.

SPILLS – Spills Listing. This TCEQ report lists releases of hazardous or potentially hazardous materials into the environment. SPILL issues are discussed in Section 4.4.

WETLANDS – The National Wetlands Inventory (NWI) Map for the Subject Project Alignment provided in the GeoSearch GeoPlus Radius Report contained in Appendix A shows no wetland development along the Subject Project Alignment. One small northeast to southwest trending oval shaped wetland area is located near the south end of the Subject Project Alignment area north of Airport Blvd.

A complete list of all government records reviewed is included as an attachment to the GeoSearch report provided in Appendix A. In addition, a list of records reviewed is provided in Section 4.1 – Environmental Records Sources.

4.3 TCEQ File Review

Based on our review of the data and a telephone conversation with TCEQ personnel at their Houston facility, a review of TCEQ file data was not deemed necessary for this project.

4.4 Local Hazmat Incidents

No SPILL events were listed in the State of Texas SPILL database for the Subject Project Alignment or general vicinity. This database includes information obtained from the Houston Fire Department hazardous response team and other sources.

4.5 FEMA Floodplain Map Review

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM) for Harris County, Texas and Incorporated Areas, Map Number 48201C, the western end of the Subject Project Alignment area is in Zone X described as “an area that is determined to be outside the 100 and 500 year floodplains.” The Subject Project Alignment area is in Zone AE where it parallels

Monroe. Zone AE is described as “an area subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods.”

4.6 Physical Setting

Site Topography. From a review of the current Park Place, Texas USGS topographic quadrangle map (Plate 4), the Subject Project Alignment lies at an elevation of approximately 40 to 45 feet above mean sea level. The topographic maps show that the regional slope is to the north toward Sims Bayou north of the Subject Project Alignment. Surface runoff probably drains into storm sewers and drainage ditches, which empties into Sims Bayou.

Municipal water districts, subdivisions, industrial sites, and local residents in the Subject Project Alignment draw groundwater for domestic, municipal, commercial and industrial usage. Large withdrawal of water in the greater Houston area over an extended period has resulted in regional and localized land-surface subsidence. This has resulted in the lowering of elevations in the area since 1906 when subsidence data began being recorded. The primary effects of this have been the alteration of natural drainage patterns in the area and revisions to floodplain and floodway designations.

Geology and Soil Characteristics. A review of the Bureau of Economic Geology 1992 Geologic Atlas of Texas, Houston Sheet indicates that the uppermost geologic formation underlying the Subject Project Alignment is the Pleistocene Beaumont Formation (map symbol Qb). The Beaumont Formation's sediments consist primarily of clays, silts and sands; and include mainly stream channel, point-bar, natural levee, backswamp, coastal marsh and mud-flat deposits in fluvial (river derived) and deltaic environments during the Pleistocene Epoch. The Beaumont Formation is locally calcareous, has concretions of calcium carbonate, iron oxide and iron manganese oxides commonly in zones of weathering and is characterized by a fairly flat, featureless surface with meander patterns and pimple mounds on meander belt ridges.

Over 200 active faults are known in the greater Houston area. While the activity rate of these faults is slow, damage is common when facilities are constructed on the fault zone. No faults were found to be on or near the Subject Project Alignment.

Groundwater Characteristics. Groundwater occurs in two main aquifers in the Houston area. The Chicot Aquifer is the shallowest aquifer that produces sufficient quantities of water for domestic, commercial and light industrial purposes. In this area, the Chicot is estimated to extend to approximately 500 feet below the ground surface. Below the Chicot is the Evangeline Aquifer. The Evangeline is the main source of groundwater in the Houston area. Its depth in the area ranges from 400 to 1200 feet below ground surface. Both aquifers dip gently toward the coast.

Shallower groundwater is also encountered in this area of Houston. Generally, this groundwater is of lesser quality than that found in the Chicot or Evangeline Aquifers. Typically, the shallow water-bearing zones are first encountered at a depth of 10 to 20 feet below ground surface. Groundwater movement direction is variable from location to location and may not follow the surface flow direction. The rate of groundwater movement in these shallow water-bearing zones is extremely slow and the production rates rarely exceed two gallons per minute.

4.7 Historical Review

Based on historic directories, maps and aerial photographs the project vicinity was generally minimally developed prior to 1955. The project vicinity was completed in its present day configuration with the completion of the various main roadways and subdivision streets prior to 1982.

Historical Topographic Map. The oldest available topographic map in the area is the 1915 Park Place, Texas Quadrangle. This maps show the project vicinity to be undeveloped near Alvin Road. The 1947 and 1955 topographic map shows the general Subject Project Alignment area to be undeveloped north of Airport Blvd. The 1982 map shows residential subdivision development and area roadway in

roughly its current configuration. With the exception of the most current topographic map for 1995 (provided as Plate 4), copies of these maps are provided in Appendix C – Historical Documents.

Fire Insurance Rate Maps. The Sanborn Map collection at the Center for American History at the University of Texas was reviewed for coverage on or adjoining the Subject Project Alignment. HVJ Associates and GeoSearch found no coverage for the Subject Project Alignment from 1885 through the present.

Historical Directories. City directories have been published in Houston since the early 1900's. GeoSearch reviewed Monroe Road listings in the directories for Houston and Harris County from approximately 1965 through 2008. Prior to 1965 there were no listings for Monroe Road. Historically the Monroe Road area has been developed with commercial enterprises. GeoSearch reviewed Rockhill Street in the directories for Houston and Harris County from approximately 1955 through 2008. Prior to 1955 there were no listings for Rockhill. Historically Rockhill has been mostly residential. No new environmental site was found during the review of city directory listings for these two streets. Copies of the GeoSearch City Directory Target Property Address search standard reports are provided in Appendix C.

Historical Aerial Photographs. Historical aerial photographs were obtained from GeoSearch for the years 1944, 1953, 1969, 1979, 1989, 1996, 2004 and 2012. The photographs were reviewed for land use, development, the presence of uncontrolled dumping, service stations and other industrial facilities. Copies of all aerial photographs are provided in Appendix C.

1944. This two photographs show the Subject Project Alignment to be undeveloped in a rural agricultural area. The area to the east of the Subject Project Alignment is minimally developed with some farm related structures and single family residences.

1953. This photograph shows the Subject Project Alignment area to be undeveloped north of the recently constructed Hobby Airport. A north to south trending ditch has been constructed crossing what is now Rockhill near the west end of the Subject Project Alignment.

1969. This photograph shows the Subject Project Alignment to be developed in roughly its present day configuration. Rockhill and Monroe have been constructed bordering an area of single family residential development. The photograph for this year is of poor quality and difficult to interpret.

1979. Commercial development has occurred along Airport Blvd. south of the Subject Project Alignment area and Monroe Road.

1989. Commercial development in the Subject Project Alignment has been completed in roughly its present day configuration. The Subject Project Alignments are surrounded by residential development.

1996. Development in the area appears mostly unchanged from the previous photo in 1979.

2004 through 2012. The area appears much as it does today with mixed commercial development mainly along Monroe Road in an area of single family residential development west of Monroe Road and along Rockhill. No environmental issues were noted on any of the aerial photographs reviewed for this study.

4.8 Additional Inquiries

Oil/Gas Well and Pipeline Map Review. The GeoSearch Oil/Gas Report (see GeoSearch GeoPlus Oil & Gas Report in Appendix A) identifies ten oil/gas well locations within 0.5 mi. of the Subject Project Alignment. Based on a review of other records including topographic maps and aerial photographs, it appears that no oil and gas related activities transpired within or near the Subject

Project Alignment. Most wells are clustered east of the Gulf Freeway approximately 0.4 mi. east and northeast of the Subject Project Alignment area. One well is located approximately 0.32 mi. west of the Subject Project Alignment area along Airport Blvd. No pipelines cross on or near the Subject Project Alignment.

Water Well Review. The GeoSearch Water Well Map (see GeoSearch GeoPlus Water Well Report in Appendix A) identifies water well locations from regulatory records within a 0.50 mi. search radius of the Subject Project Alignment. The closest well location is a domestic supply well which adjoins the Subject Project Alignment west of Monroe at the intersection of Cayton Street. Based on a review of topographic maps, other data and a site reconnaissance, it appears that this well should not impact the Subject Project Alignment.

No historical sites with RECs associated with the Subject Project Alignment and the adjoining properties were identified during the review of the historical documents discussed in this section.

5.0 SITE RECONNAISSANCE AND INTERVIEWS

A site reconnaissance was performed during July 2014 by automobile and foot. The purpose of the site reconnaissance was to observe the streets and adjacent environmental sites for site characteristics, spills, corrective actions, and other potential environmental concerns, and to document present land uses. Photographs taken during the site reconnaissance are included in Appendix B. We observed that the Subject Project Alignment is in an area of commercial and residential development. Our field observations of database listings of environmental sites of concern in close proximity to the Subject Project Alignment were in accordance with the database information.

Water lines and fire hydrants were observed along the Subject Project Alignment. Sewage disposal services to the area are provided by the City of Houston. Several local residents and workmen were interviewed during the site reconnaissance. The individuals participated in the interview were Mr. Joseph Alemao (cashier at Get-n-Go), Mr. Mike Khan (clerk at Shell gas station) and Mr. Mark Wilson (local resident). They indicated that they were unaware of any environmental impairment along or near the Subject Project Alignment. Our field observations of database listings of environmental sites in close proximity to the Subject Project Alignment were in accordance with the database information. A detailed summation of our field observations is provided in Table 2 below:

Table 2 – Site Reconnaissance Observations			
Summary of Research and Findings:	Type	Brief Description of Findings and Supporting Evidence Identifying:	Probability of Condition*
Observations or Investigative Methods Used:		Type R - Recognized Environmental Conditions Type H - Historical Recognized Environmental Conditions, and/or Type D - De Minimis Conditions:	
Date of site visit and major exterior observations on Subject Project Alignment	July 2014		
Date of visit and exterior observations on adjoining properties	July 2014		
Any storage of hazardous substances/petroleum items?	N		
Any pits, ponds, lagoons? <u>O</u> n parcel or <u>A</u> djoining?	N		
Any odors, stained soil/pavement, stressed vegetation?	N		

Table 2 – Site Reconnaissance Observations			
Summary of Research and Findings:	Type	Brief Description of Findings and Supporting Evidence Identifying:	Probability of Condition*
Observations or Investigative Methods Used:		Type R - Recognized Environmental Conditions Type H - Historical Recognized Environmental Conditions, and/or Type D - De Minimis Conditions:	
Any above or underground storage tanks?	N		
Any leaking tanks or drums? <u>O</u> n parcel or <u>A</u> djoining?	N		
Any solid waste disposal sites, trash container leaks?	N		
Any wastewater discharges into ditch or streams?	N		
Any dry wells, irrigation wells, injection wells, etc.?	N		
Any septic systems? <u>O</u> n parcel or <u>A</u> djoining?	N		
Any dry cleaners or hazardous item containers? (O or A)	N		
Any electrical or hydraulic equipment w/possible PCBs?	N		
Any RCRA Large Quantity Generators? (O or A)	N		
Any RCRA Treatment Storage Disposal System? (O or A)	N		
Date of visit and interior building observations on Subject Project Alignment.	N/A		
Any interior stains or corrosion (except from water)?	N/A		
Any floor drains and sumps?	N/A		

* K – Known (with certainty), H – High, M – Moderate, L – Low, or N - None

6.0 FINDINGS

None of the sites identified in connection with Subject Project Alignment while performing this Phase I ESA are likely to have a negative impact on the Subject Project Alignment and are insignificant or de minimis environmental conditions. No known, suspect, and historical sites with recognized environmental conditions were found on or adjoining the Subject Project Alignment area (refer to ASTM E1527-13 §12.5).

7.0 OPINION

The ASTM 1527-13 guidance document requires the Environment Professional’s opinion regarding the impact of the conditions identified in the findings section and the rationale for concluding that the condition **is or is not** an REC. In our opinion, there were no environmental conditions found on or near the Subject Project Alignment rising to the level of a REC (refer to ASTM E1527-13 §12.6).

8.0 DATA GAPS

Section 8.3 of ASTM E 1527-13 states that all obvious uses of the property shall be identified from the present back to the property’s first developed use, or back to 1940, which ever is earlier. The term

developed use includes agricultural uses. A data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Data failure is not uncommon in trying to identify the use of the property at five-year intervals back to first use or 1940. Notwithstanding a data failure, standard historical sources may be excluded if (1) the sources are not reasonably ascertainable, or (2) if past experience indicates that the sources are not likely to be sufficiently useful, accurate or complete in terms of satisfying the objectives.

Records reviewed document that the project vicinity was minimally developed prior to 1955. Aerial photographs document that the project vicinity has been mostly undeveloped with some scattered residential structures and possibly some farm related buildings before 1944. City directories and other data document that the project vicinity was mostly residential along Rockhill in 1960 and later and mostly commercial along Monroe Road in 1967 and later (directory coverage was not available prior to 1955 for Rockhill and prior to 1965 for Monroe Road). The 1967 topographic map shows the project vicinity to be developed with subdivisions and commercial development in roughly their current configuration. In our opinion, there are no data gaps resulting in a data failure and all obvious uses of the Subject Project Alignment have been identified from the present back to the property's first developed use.

9.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment of the Subject Project Alignment in Houston, Texas. This assessment has revealed no evidence of recognized environmental condition(s) on or near the Subject Project Alignment. A REC is defined as the "presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property." In our opinion there is a low potential for environmental contamination to affect construction at the Subject Project Alignment and we recommend no further environmental investigation on or near the Subject Project Alignment area.

10.0 DEVIATIONS AND LIMITATIONS

This report is an instrument of service of HVJ Associates, Inc. The report was prepared for and is intended for the exclusive use of LAN and the City of Houston. The report's contents may not be relied upon by any other party without the express written permission of HVJ Associates. The information and conclusions provided in this report are based on a general knowledge of Subject Project Alignment and the region; regulatory agency database information; historical information; site reconnaissance findings; interviews; etc. The site reconnaissance observations in this report summarize conditions as found on the date the HVJ Associates environmental professional was at and observed Subject Project Alignment. The report's findings are based on conditions that existed on the dates of HVJ Associates' site visits and available records and should not be relied upon to precisely represent conditions at any other time. This study has attempted to identify recognized environmental conditions in connection with Subject Project Alignment; however, there is a possibility that sources of information have gone undetected because of the limitations of this study, inaccuracy of database records, or the presence of undetected and unreported environmental releases. Certain indicators of the presence of environmental conditions, historical sites, or hazardous materials may have been latent at the time of our site reconnaissance and may subsequently have become unobservable. All discovered information has been disclosed and a good faith effort has been made to consult pertinent sources and appropriately evaluate the information.

This investigation was performed using the standard level of care and diligence normally practiced by recognized professional environmental and engineering firms in this area presently performing similar services under similar circumstances. This report is intended to be used in its entirety. It has been prepared exclusively for Subject Project Alignment. If the location or area of the Subject Project

Alignment changes or otherwise differs from the descriptions contained herein, HVJ Associates should be immediately notified and retained to evaluate the effect of the changes on the conclusions and recommendations presented in this report, and to revise them if necessary. The conclusions presented in this report should not be relied upon for other properties or sites without additional evaluation and/or investigation. This document is not intended to constitute or substitute for legal counsel or guidance in connection with decisions regarding property acquisition or regulatory actions.

HVJ Associates has based the conclusions included in this report on its observation of existing Subject Project Alignment conditions, its interpretation of Subject Project Alignment history, and its interpretation of the Subject Project Alignment usage information it was able to access. It is possible that HVJ Associates, Inc. research while fully appropriate for an Environmental Site Assessment failed to indicate the existence of important information sources. Assuming such sources actually exist, their information could not have been considered in the formulation of HVJ Associates' findings and opinions. All conclusions are qualified by the fact that no borings were made and no soil, sediment, or groundwater sampling or chemical testing was conducted. Conclusions about Subject Project Alignment conditions under no circumstances comprise a warranty that conditions in all areas within the Subject Project Alignment (and below existing grade) are of the same quality that HVJ Associates has inferred from observable Subject Project Alignment conditions and readily available site history. HVJ Associates' findings and opinions must be considered probabilities based on professional judgment applied to the limited data HVJ Associates was able to gather during the course of the Subject Project Alignment assessment.

11.0 ADDITIONAL SERVICES

No additional services were provided for this assessment. No title and judicial research was conducted to identify environmental liens and activity and use limitations currently recorded against the Subject Project Alignment.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare to the best of my professional knowledge and belief I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the 60-inch Water Line along Monroe and Rockhill from Airport Boulevard to Glen Valley Drive construction project alignments. My experience has included but is not limited to ESA preparation, NEPA site assessments, environmental impact statement preparation, remediation assessment and implementation, aquifer characterization, groundwater modeling and Phase II ESA sampling/analysis and reporting. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

10/8/2014

Edward F. Hawkinson, PG, MS, MBA
Project Manager
HVJ Associates, Inc.

Date:

14.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

HVJ Associates environmental scientist Edward F. Hawkinson, PG conducted the Phase I ESA and prepared this report. Mr. Hawkinson has over 20 years of environmental project management experience. He has been responsible for ESA preparation, NEPA site assessments, environmental impact statement preparation, remediation, aquifer characterization, groundwater modeling and Phase II ESA sampling/analysis and reporting. Over the last 15 years, Mr. Hawkinson has been personally involved in the production of over 500 ESA documents in a multi-state area and Puerto Rico. Mr. Hawkinson is a registered professional geologist in Texas, Arkansas and Tennessee and is a member of the Geological Society of America, Houston Geological Society and the Texas Association of Environmental Professionals. Mr. Hawkinson's resume is provided in Appendix D.

Disclaimer

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquires Rule (40 CFR §312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR §312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers And independent contractors cannot be held liable For actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

GENEVA INDUSTRIES/FUHRMANN ENERGY
ABSTRACT SITE NAME: GENEVA INDUSTRIES/FUHRMANN ENERGY
ADDRESS: 9334 CANIFF RD
CITY & STATE: HOUSTON TX 77017
COUNTY: HARRIS

EPA ID: TXD980748453
EPA REGION: 06

NPL STATUS: CURRENTLY ON THE FINAL NPL

ROD TYPE: RECORD OF DECISION
ROD ID: EPA/ROD/R06-86/012
ROD DATE: 09/18/1986
OPERABLE UNIT(S): 01

MEDIA: GROUNDWATER SEDIMENTS SOILS SURFACE WATER

CONTAMINANT: AROMATICS, OILS, PAHS, PCBS, PHENOLS, TCE, VOCS

ABSTRACT:

THE GENEVA INDUSTRIES SITE IS A 13.5 ACRE TRACT LOCATED IN HOUSTON, TX, IMMEDIATELY ADJACENT TO THE CORPORATE LIMITS OF THE CITY OF SOUTH HOUSTON. APPROXIMATELY 35,000 PEOPLE LIVE WITHIN ONE MILE OF GENEVA. THE CLOSEST RESIDENCES ARE LOCATED LESS THAN 50 FEET FROM THE EAST AND SOUTHWEST SITE BOUNDARIES, AND TWO BUSINESSES ARE LOCATED 300 FEET WEST OF THE SITE. THE SITE IS CURRENTLY LOCATED IN THE 100-YEAR FLOOD CONTROL CHANNEL. GENEVA INDUSTRIES IS AN ABANDONED REFINERY WHICH MANUFACTURED A VARIETY OF ORGANIC COMPOUNDS AND FUEL OILS FROM 1967 THROUGH 1978. SURFACE AND SUBSURFACE ONSITE SOILS HAVE BEEN CONTAMINATED AS A RESULT OF OPERATIONAL SPILLS, LEAKING DRUMS, TANKS, AND LAGOONS, AND LANDFILL/LAND FARMING OPERATIONS. SHALLOW GROUND WATER IS CONTAMINATED ONSITE; SOME OFFSITE MIGRATION HAS OCCURRED EAST OF THE SITE. A PLANNED REMOVAL WAS PERFORMED BY EPA BETWEEN OCTOBER 1983 AND FEBRUARY 1984 TO CLOSE OUT THREE ONSITE LAGOONS, REMOVE ALL DRUMMED WASTE ON THE SURFACE, REMOVE ALL OFFSITE SOILS CONTAINING GREATER THAN 50 PPM PCBS, AND IMPROVE SITE DRAINAGE. OTHER REMOVAL ACTIONS TO PLUG ABANDONED WELLS ONSITE AND REMOVE STORAGE TANK MATERIALS WERE PERFORMED IN MAY AND SEPTEMBER 1984 RESPECTIVELY. FURTHER STUDIES WERE CONDUCTED TO DETERMINE AN APPROPRIATE PERMANENT SITE REMEDY. THE PRIMARY CONTAMINANTS OF CONCERN INCLUDE; VOCS, PAHS TCE, PCBS, PHENOLS AND FUEL OILS.

Record of Decision System (RODS)

THE SELECTED REMEDIAL ACTION INCLUDES; REMOVAL AND DISPOSAL OF SURFACE STRUCTURES IN AN OFFSITE HAZARDOUS WASTE LANDFILL; EXCAVATION OF CONTAMINATED SOILS WITH GREATER THAN 100 PPM OF PCBs AND ALL BURIED DRUMS ONSITE; DISPOSAL OF EXCAVATED SOILS AND DRUMS AT AN EPA-APPROVED OFFSITE DISPOSAL FACILITY; CONSTRUCTION OF A MULTI-LAYER SURFACE CAP OVER THE SITE AND A SLURRY WALL TIED INTO THE CLAY BELOW THE 30-FOOT SAND AROUND THE PERIMETER OF THE SITE; RECOVERY OF TCE CONTAMINATED GROUND WATER FROM THE 30- AND 100-FOOT SAND, TREATMENT ONSITE BY CARBON ADSORPTION, AND DISCHARGE INTO THE ADJACENT FLOOD CONTROL CHANNEL. THE ESTIMATED CAPITAL COST FOR THIS REMEDY IS \$14,990,000 WITH O&M FOR YEARS ONE AND TWO OF \$532,000/YEAR AND \$483,000 FOR YEARS THREE THROUGH THIRTY.

REMEDY:

- REMOVE AND DISPOSE OF SURFACE STRUCTURES IN AN OFFSITE HAZARDOUS WASTE LANDFILL.
- EXCAVATE SOILS CONTAMINATED WITH GREATER THAN 100 PPM OF POLYCHLORINATED BIPHENYLS AND ALL BURIED DRUMS ONSITE.
- DISPOSE OF EXCAVATED SOILS AND DRUMS AT AN EPA-APPROVED OFFSITE DISPOSAL FACILITY.
- CONSTRUCT A MULTI-LAYER SURFACE CAP OVER THE SITE AND A SLURRY WALL TIED INTO THE CLAY BELOW THE 30-FOOT SAND AROUND THE PERIMETER OF THE SITE.
- RECOVER TRICHLOROETHYLENE CONTAMINATED GROUNDWATER FROM THE 30 AND 100-FOOT SAND, TREAT ONSITE BY CARBON ADSORPTION, AND DISCHARGE INTO THE ADJACENT FLOOD CONTROL CHANNEL.

MEDIA: GROUNDWATER SEDIMENTS SOILS SURFACE WATER

CONTAMINANT: AROMATICS, OILS, PAHS, PCBs, PHENOLS, TCE, VOCs

ABSTRACT: THE GENEVA INDUSTRIES SITE IS A 13.5 ACRE TRACT LOCATED IN HOUSTON, TX, IMMEDIATELY ADJACENT TO THE CORPORATE LIMITS OF THE CITY OF SOUTH HOUSTON. APPROXIMATELY 35,000 PEOPLE LIVE WITHIN ONE MILE OF GENEVA. THE CLOSEST RESIDENCES ARE LOCATED LESS THAN 50 FEET FROM THE EAST AND SOUTHWEST SITE BOUNDARIES, AND TWO BUSINESSES ARE LOCATED 300 FEET WEST OF THE SITE. THE SITE IS CURRENTLY LOCATED IN THE 100-YEAR FLOOD CONTROL CHANNEL. GENEVA INDUSTRIES IS AN ABANDONED REFINERY WHICH MANUFACTURED A VARIETY OF ORGANIC COMPOUNDS AND FUEL OILS FROM 1967 THROUGH 1978. SURFACE AND SUBSURFACE ONSITE SOILS HAVE BEEN CONTAMINATED AS A RESULT OF OPERATIONAL SPILLS, LEAKING DRUMS, TANKS, AND LAGOONS, AND LANDFILL/LAND FARMING OPERATIONS. SHALLOW GROUND WATER IS CONTAMINATED ONSITE; SOME OFFSITE MIGRATION HAS OCCURRED EAST OF THE SITE. A PLANNED REMOVAL WAS PERFORMED BY EPA BETWEEN OCTOBER 1983 AND FEBRUARY 1984 TO CLOSE OUT THREE ONSITE LAGOONS, REMOVE ALL DRUMMED WASTE ON THE SURFACE, REMOVE ALL OFFSITE SOILS CONTAINING GREATER THAN 50 PPM PCBs, AND IMPROVE SITE DRAINAGE. OTHER REMOVAL ACTIONS TO PLUG ABANDONED WELLS ONSITE AND REMOVE STORAGE TANK MATERIALS WERE PERFORMED IN MAY AND SEPTEMBER 1984 RESPECTIVELY. FURTHER STUDIES WERE CONDUCTED TO DETERMINE AN APPROPRIATE PERMANENT SITE REMEDY. THE PRIMARY CONTAMINANTS OF CONCERN INCLUDE; VOCs, PAHS TCE, PCBs, PHENOLS AND FUEL OILS.

THE SELECTED REMEDIAL ACTION INCLUDES; REMOVAL AND DISPOSAL OF SURFACE STRUCTURES IN AN OFFSITE HAZARDOUS WASTE LANDFILL; EXCAVATION OF CONTAMINATED SOILS WITH GREATER THAN 100 PPM OF PCBs AND ALL BURIED DRUMS ONSITE; DISPOSAL OF EXCAVATED SOILS AND DRUMS AT AN EPA-APPROVED OFFSITE DISPOSAL FACILITY; CONSTRUCTION OF A MULTI-LAYER SURFACE CAP OVER THE SITE AND A SLURRY WALL TIED INTO THE CLAY BELOW THE 30-FOOT SAND AROUND THE PERIMETER OF THE SITE; RECOVERY OF TCE CONTAMINATED GROUND WATER FROM THE 30- AND 100-FOOT SAND, TREATMENT ONSITE BY CARBON ADSORPTION, AND DISCHARGE INTO THE

Record of Decision System (RODS)

ADJACENT FLOOD CONTROL CHANNEL. THE ESTIMATED CAPITAL COST FOR THIS REMEDY IS \$14,990,000 WITH O&M FOR YEARS ONE AND TWO OF \$532,000/YEAR AND \$483,000 FOR YEARS THREE THROUGH THIRTY.

- REMEDY: - REMOVE AND DISPOSE OF SURFACE STRUCTURES IN AN OFFSITE HAZARDOUS WASTE LANDFILL.
- EXCAVATE SOILS CONTAMINATED WITH GREATER THAN 100 PPM OF POLYCHLORINATED BIPHENYLS AND ALL BURIED DRUMS ONSITE.
 - DISPOSE OF EXCAVATED SOILS AND DRUMS AT AN EPA-APPROVED OFFSITE DISPOSAL FACILITY.
 - CONSTRUCT A MULTI-LAYER SURFACE CAP OVER THE SITE AND A SLURRY WALL TIED INTO THE CLAY BELOW THE 30-FOOT SAND AROUND THE PERIMETER OF THE SITE.
 - RECOVER TRICHLOROETHYLENE CONTAMINATED GROUNDWATER FROM THE 30 AND 100-FOOT SAND, TREAT ONSITE BY CARBON ADSORPTION, AND DISCHARGE INTO THE ADJACENT FLOOD CONTROL CHANNEL.

09/08/1983	48	40674	PROPOSED TO THE FINAL NPL	59.46000
09/21/1984	49	37070	PROMULGATED TO THE FINAL NPL	59.46000

SITE DESCRIPTION

THE GENEVA INDUSTRIES SITE IS AN ABANDONED REFINERY WHICH MANUFACTURED A VARIETY OF ORGANIC COMPOUNDS INCLUDING BIPHENYL, POLYCHLORINATED BIPHENYLS (PCBS), PHENYL PHENOL, NAPHTHA, AND NOS. 2 AND 6 FUEL OILS FROM 1967 THROUGH 1978. PRIOR TO 1967, THE SITE WAS USED FOR PETROLEUM EXPLORATION AND PRODUCTION. THE MAJOR CONTAMINANTS OF CONCERN AT THE SITE ARE THE ABOVE PRODUCTS ALONG WITH CHLORINATED HYDROCARBON SOLVENTS, VOLATILE ORGANICS, AND POLYNUCLEAR AROMATIC HYDROCARBONS.

THE GENEVA INDUSTRIES SITE ORIGINALLY INCLUDED 13.5 ACRES OF LAND LOCATED AT 9334 CANIFF ROAD IN HOUSTON, TEXAS IMMEDIATELY ADJACENT TO THE CORPORATE LIMITS OF THE CITY OF SOUTH HOUSTON. THE SITE IS ABOUT ONE-QUARTER MILE EAST OF INTERSTATE HIGHWAY 45 AND 1 1/2 MILES EAST OF WILLIAM P. HOBBY AIRPORT. THE PROPERTY IS BOUND ON THE NORTH BY CANIFF ROAD, ON THE SOUTHWEST BY EASTHAVEN BOULEVARD, AND ON THE EAST BY THE HARRIS COUNTY FLOOD CONTROL CHANNEL. APPROXIMATELY 12,800 PEOPLE RESIDE WITHIN ONE MILE OF THE SITE, AND SOME RESIDENCES ARE LOCATED LESS THAN 50 FEET FROM THE SITE BOUNDARY. THE SITE AND THE SURROUNDING AREA ARE FLAT AND HAVE A MAXIMUM SURFACE ELEVATION OF APPROXIMATELY 35 FEET ABOVE MEAN SEA LEVEL. THE SITE IS DRAINED BY THE HARRIS COUNTY FLOOD CONTROL DISTRICT CHANNEL, WHICH FLOWS IN A NORTHERLY DIRECTION INTO BERRY BAYOU.

BETWEEN 1967 AND 1978, GENEVA OPERATED A PETROCHEMICAL PRODUCTION FACILITY AT THE SITE. THE FACILITY BEGAN MANUFACTURING BIPHENYL BY DISTILLATION OF TOLUENE DEALKYLATION BOTTOMS IN JUNE 1967, BEGAN PRODUCING PCBS IN JUNE 1972, AND DECLARED BANKRUPTCY IN NOVEMBER 1973. PILOT INDUSTRIES TOOK OVER THE FACILITY IN 1974 AND OPERATED IT UNTIL 1976. INTERCOASTAL REFINING OWNED THE FACILITY FROM 1976 UNTIL 1980; HOWEVER, THE FACILITY CEASED OPERATIONS IN 1978. LONESTAR FUEL COMPANY OWNED THE SITE FROM 1980 UNTIL 1982, AND FUHRMANN ENERGY HAS OWNED THE SITE BEGINNING IN 1982. CURRENTLY, THE PROPERTY AT THE SITE IS DIVIDED INTO A NUMBER OF PARCELS WITH MULTIPLE OWNERS.

THE SHALLOWEST WATER BEARING ZONE AT THE SITE IS THE 30-FOOT SAND, WHICH IS A SEMICONFINED GROUNDWATER ZONE CONSISTING OF SANDY SILT AND SILTY SAND. THE 30-FOOT SAND IS PRESENT BETWEEN DEPTHS OF ABOUT 15- FEET AND 35- FEET. THE GROUNDWATER FLOW IN THE 30-FOOT SAND IS GENERALLY EAST TOWARD THE FLOOD CONTROL CHANNEL, BUT MAY VARY SEASONALLY. SOME DISCHARGE INTO THE CHANNEL IS POSSIBLE ON A PERIODIC BASIS. THE 30-FOOT SAND IS NOT SUITABLE AS A SOURCE OF WATER SUPPLY IN THE SITE VICINITY DUE TO THE HIGH

National Priorities List (NPL)

TOTAL-DISSOLVED-SOLIDS CONCENTRATIONS, WHICH RANGE BETWEEN 2,000 MILLIGRAMS PER LITER (MG/L) AND 10,000 MG/L.

THE NEXT DEEPER WATER BEARING ZONE IS THE 100-FOOT SAND, WHICH IS ALSO A SEMI-CONFINED GROUNDWATER ZONE AND CONSISTS OF SAND WITH COURSE SAND AND GRAVEL ZONES. THE 100-FOOT SAND IS PRESENT BETWEEN DEPTHS OF ABOUT 62-FEET AND 140-FEET, WITH THICKNESS VARYING BETWEEN 50-FEET AND 91-FEET. GROUNDWATER FLOW IN THE 100-FOOT SAND IS TOWARD THE WEST AND SOUTHWEST. BOTH THE 30-FOOT SAND AND THE 100-FOOT SAND ARE PARTS OF THE UPPER CHICOT AQUIFER.

RECORDS FROM THE TEXAS WATER QUALITY BOARD AND THE HARRIS COUNTY POLLUTION CONTROL DISTRICT INDICATE THAT SEVERAL CITATIONS WERE ISSUED TO THE VARIOUS OWNERS FOR UNAUTHORIZED DISCHARGES OF WASTEWATER INTO THE ADJACENT FLOOD CONTROL CHANNEL. THESE RECORDS ALSO INDICATE THAT PLANT OPERATION WAS MARKED BY NUMEROUS SPILLS AND PROCESS LEAKS AND THAT HOUSEKEEPING AND DISPOSAL PRACTICES DETERIORATED WITH TIME. AS OF 1981, THE SITE AND THE ADJOINING PROPERTY TO THE SOUTH CONTAINED PROCESSING TANKS AND PIPING, A LARGE WASTEWATER LAGOON, TWO SMALLER LAGOONS, A CLOSED LAGOON HOLDING SOLID PCB-CONTAINING WASTES, A DIKED TANK AREA, SEVERAL DRUM STORAGE AREAS, A LANDFILL, AND A POSSIBLE LANDFARM. EXTENSIVE SOIL AND SHALLOW GROUNDWATER CONTAMINATION EXISTED AT THE SITE AS A RESULT OF THESE PAST PRACTICES.

THE SITE WAS PROPOSED TO THE NATIONAL PRIORITIES LIST (NPL) IN SEPTEMBER 1983 AND WAS ADDED TO THE NPL IN SEPTEMBER 1984.

THE EPA CONDUCTED A REMOVAL ACTION AT THE SITE FROM OCTOBER 1983 TO FEBRUARY 1984. THIS ACTION INCLUDED THE FOLLOWING ACTIVITIES: (1) CLOSE OUT OF THREE ON-SITE LAGOONS; (2) REMOVAL OF ALL DRUMMED WASTE ON THE SITE SURFACE; (3) REMOVAL OF ALL OFF-SITE SOILS CONTAINING PCB CONCENTRATIONS GREATER THAN 50 PARTS-PER-MILLION (PPM); (4) INSTALLATION OF A 3 1/2 ACRE CLAY CAP ABOUT 12-18 INCHES THICK AND COVERED WITH 4-6 INCHES OF TOPSOIL OVER ALL ON-SITE SOILS CONTAINING GREATER THAN 50 PPM PCBs; AND (5) IMPROVEMENT OF SITE DRAINAGE. APPROXIMATELY 3,400 CUBIC YARDS OF CONTAMINATED SOIL AND SLUDGE, 550 DRUMS OF WASTE, AND 30 TONS OF ASBESTOS WERE REMOVED AND TRANSPORTED TO AN APPROVED DISPOSAL FACILITY IN EMELLE, ALABAMA. OTHER REMOVAL ACTIONS WERE PERFORMED IN MAY AND SEPTEMBER 1984 TO PLUG ABANDONED WELLS ONSITE AND REMOVE STORAGE TANK MATERIALS, RESPECTIVELY.

A REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS) WAS PERFORMED FROM 1984 TO 1986. SOIL BORINGS AND MONITORING WELLS WERE INSTALLED ON AND OFF-SITE DURING THE RI. ON SEPTEMBER 18, 1986, THE RECORD OF DECISION (ROD) WAS ISSUED FOR THE GENEVA INDUSTRIES SITE. THE ROD CALLED FOR SOURCE CONTROL AND GROUNDWATER REMEDIATION.

REMEDIAL ACTION CONSTRUCTION FOR SOURCE CONTROL BEGAN ON MAY 24, 1988, AND WAS COMPLETED ON SEPTEMBER 28, 1990. DEVIATIONS IN THE REMEDIAL ACTION FROM THE ROD WERE PRESENTED IN AN EXPLANATION OF SIGNIFICANT DIFFERENCES (ESD) DATED JULY 1993. THE DEVIATIONS ARE SUMMARIZED BELOW:

- APPROXIMATELY 16,400 CUBIC YARDS OF ADDITIONAL CONTAMINATED SOIL WAS EXCAVATED AND TRANSPORTED TO AN APPROVED DISPOSAL FACILITY IN EMELLE, ALABAMA.
- DURING EXCAVATION ACTIVITIES AT THE SITE, ADDITIONAL DRUMS WERE FOUND IN THREE SEPARATE AREAS. WHILE MOST DRUMS WERE TRANSPORTED OFF-SITE FOR DISPOSAL, THESE DRUMS FROM THE THREE ADDITIONAL AREAS WERE PLACED IN THE BACKFILL BENEATH THE PERMANENT PROTECTIVE CAP AND REMAIN ON SITE.

REMEDIAL ACTION CONSTRUCTION FOR THE GROUNDWATER PORTION BEGAN AT THE SITE ON DECEMBER 21, 1992, AND WAS COMPLETED ON APRIL 22, 1993. THE GROUNDWATER SYSTEM CONSISTED OF 13 RECOVERY AND MONITORING WELLS, A TREATMENT BUILDING CONTAINING AN ACTIVATED CARBON FILTRATION SYSTEM, SIX 30,000-GALLON STORAGE TANKS, AND ASSOCIATED MONITORING CONTROLS, SERVICE UTILITIES, AND PIPING.

National Priorities List (NPL)

THE RECOVERY SYSTEM CONSISTS OF NINE RECOVERY WELLS COMPLETED IN THE 30-FOOT SAND AND ONE RECOVERY WELL COMPLETED IN THE 100-FOOT SAND. PILOT TESTING OF THE SYSTEM WAS COMPLETED AND THE SYSTEM BEGAN OPERATION ON JULY 1, 1993. A HEAVY-OIL SEPARATOR WAS ADDED TO THE SYSTEM IN SEPTEMBER 1994. THE GROUNDWATER REMEDIAL SYSTEM OPERATED UNTIL OCTOBER 1999 WHEN THE OPERATION AND MAINTENANCE CONTRACT WAS TERMINATED AFTER NUMEROUS PROBLEMS AND UNSCHEDULED SHUTDOWNS. THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY (TCEQ) HAS RE-DESIGNED AND INSTALLED REPLACEMENT EQUIPMENT TO RESTART THE RECOVERY SYSTEM, WHICH WAS PLACED BACK ON-LINE IN FEBRUARY 2007.

EFFECTIVE MAY 8, 1997, EPA DELETED A PORTION OF THE SITE FROM THE NPL. THE PORTION DELETED WAS THE SOURCE CONTROL PORTION, WHICH CONSISTED OF THE FIRST SEVEN COMPONENTS OF THE EIGHT REMEDIAL ACTION COMPONENTS OF THE ROD FOR THE SITE. THE PARTIAL DELETION DID NOT INCLUDE THE EIGHTH ROD REMEDIAL ACTION COMPONENT, THE GROUNDWATER PORTION OF THE SITE. THE GROUNDWATER PORTION REMAINS ON THE NPL WITH REMEDIAL ACTIVITIES CONTINUING FOR THE GROUNDWATER SYSTEM OPERATION.

AN ESD ADDRESSING OPERABLE UNIT 1 OF THE SITE WAS COMPLETED IN MAY 2007.

SITE HISTORY - NO SITE HISTORY INFORMATION AVAILABLE -

ACTIONS

TYPE: **RO - RECORD OF DECISION**

START DATE: **NR**

COMPLETION DATE: **09/18/1986**

ACTION TYPE DEFINITION:

THE FINAL RECORD OF DECISION (ROD) IS SIGNED BY THE APPROPRIATE AGENCY INDICATING THAT THE AGENCY HAS CHOSEN THE REMEDY FOR SITE REMEDIATION. ROD SIGNATURE IS SIGNIFIED BY THE COMPLETE DATE.

TYPE: **RN - REMOVAL NEGOTIATIONS**

START DATE: **08/15/1984**

COMPLETION DATE: **08/15/1984**

ACTION TYPE DEFINITION:

REMOVAL NEGOTIATIONS ARE DEFINED AS DISCUSSIONS BETWEEN EPA AND THE POTENTIALLY RESPONSIBLE PARTIES (PRPS) ON THE LIABILITY FOR AND CONDUCT OF A REMOVAL.

TYPE: **RD - REMEDIAL DESIGN**

START DATE: **04/07/1987**

COMPLETION DATE: **03/31/1992**

ACTION TYPE DEFINITION:

THE PROCESS OF FULLY DETAILING AND SPECIFYING THE SELECTED REMEDY IDENTIFIED IN THE ROD OR EDD.

TYPE: **RD - REMEDIAL DESIGN**

START DATE: **03/30/1987**

COMPLETION DATE: **12/18/1987**

ACTION TYPE DEFINITION:

THE PROCESS OF FULLY DETAILING AND SPECIFYING THE SELECTED REMEDY IDENTIFIED IN THE ROD OR EDD.

TYPE: **RA - REMEDIAL ACTION**

START DATE: **03/31/1989**

COMPLETION DATE: **09/29/2004**

ACTION TYPE DEFINITION:

THE IMPLEMENTATION OF A PERMANENT RESOLUTION TO ADDRESS A RELEASE OR POTENTIAL RELEASE OF A HAZARDOUS SUBSTANCE FROM A SITE.

TYPE: **RA - REMEDIAL ACTION**

START DATE: **12/18/1987**

National Priorities List (NPL)

COMPLETION DATE: 09/28/1990

ACTION TYPE DEFINITION:

THE IMPLEMENTATION OF A PERMANENT RESOLUTION TO ADDRESS A RELEASE OR POTENTIAL RELEASE OF A HAZARDOUS SUBSTANCE FROM A SITE.

TYPE: **PA - PRELIMINARY ASSESSMENT**

START DATE: 10/01/1981

COMPLETION DATE: 10/01/1981

ACTION TYPE DEFINITION:

COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

TYPE: **OM - OPERATIONS AND MAINTENANCE**

START DATE: 10/01/2005

COMPLETION DATE: NR

ACTION TYPE DEFINITION:

SITE REQUIREMENTS ASSOCIATED WITH A REMEDY THAT MUST BE PERFORMED AFTER THE COMPLETION OF A REMEDIAL ACTION.

TYPE: **OM - OPERATIONS AND MAINTENANCE**

START DATE: 12/31/2000

COMPLETION DATE: NR

ACTION TYPE DEFINITION:

SITE REQUIREMENTS ASSOCIATED WITH A REMEDY THAT MUST BE PERFORMED AFTER THE COMPLETION OF A REMEDIAL ACTION.

TYPE: **NS - NATIONAL PRIORITIES LIST RESPONSIBLE PARTY SEARCH**

START DATE: 06/25/1990

COMPLETION DATE: 12/12/1990

ACTION TYPE DEFINITION:

THE NATIONAL PRIORITY LIST (NPL) POTENTIALLY RESPONSIBLE PARTY (PRP) SEARCH IS USED TO IDENTIFY PRPS AT A FINAL NPL OR PROPOSED NPL SITE. ACTIONS TYPICALLY INCLUDE TITLE SEARCH, FINANCIAL ASSESSMENTS, AND REVIEW OF APPLICABLE RECORDS. THE NPL PRP SEARCH SHOULD BEGIN UPON COMPLETION OF THE SCREENING SITE INVESTIGATION AND SHOULD BE CONDUCTED CONCURRENT WITH THE NATIONAL PRIORITIES LISTING PROCESS.

TYPE: **NS - NATIONAL PRIORITIES LIST RESPONSIBLE PARTY SEARCH**

START DATE: NR

COMPLETION DATE: 09/30/1983

ACTION TYPE DEFINITION:

THE NATIONAL PRIORITY LIST (NPL) POTENTIALLY RESPONSIBLE PARTY (PRP) SEARCH IS USED TO IDENTIFY PRPS AT A FINAL NPL OR PROPOSED NPL SITE. ACTIONS TYPICALLY INCLUDE TITLE SEARCH, FINANCIAL ASSESSMENTS, AND REVIEW OF APPLICABLE RECORDS. THE NPL PRP SEARCH SHOULD BEGIN UPON COMPLETION OF THE SCREENING SITE INVESTIGATION AND SHOULD BE CONDUCTED CONCURRENT WITH THE NATIONAL PRIORITIES LISTING PROCESS.

TYPE: **WP - REMEDIAL INVESTIGATION/FEASIBILITY STUDY WORKPLAN APPROVAL BY HQ**

START DATE: NR

COMPLETION DATE: 01/15/1984

ACTION TYPE DEFINITION:

APPROVAL OF THE REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS) WORKPLAN, WHICH IS A DESCRIPTION OF THE TASKS AND RESOURCES PLANNED FOR THE RI/FS.

TYPE: **RS - REMOVAL ASSESSMENT**

START DATE: 10/12/1984

National Priorities List (NPL)

COMPLETION DATE: 10/12/1984

ACTION TYPE DEFINITION:

COLLECTING SITE CHARACTERISTICS TO DETERMINE WHETHER OR NOT A REMOVAL MUST BE PERFORMED.

TYPE: **SV - SECTION 107 LITIGATION**

START DATE: 09/28/1989

COMPLETION DATE: 06/09/1993

ACTION TYPE DEFINITION:

JUDICIAL REFERRAL UNDER S107 TO RECOVERY FROM POTENTIALLY RESPONSIBLE PARTIES (PRPS).

TYPE: **NP - PROPOSAL TO NATIONAL PRIORITIES LIST**

START DATE: **NR**

COMPLETION DATE: 09/08/1983

ACTION TYPE DEFINITION:

SITE PROPOSED FOR INCLUSION ON THE NATIONAL PRIORITY LIST BASED ON THE HAZARD RANKING SYSTEM (HRS) SCORE FOR THE SITE.

TYPE: **RS - REMOVAL ASSESSMENT**

START DATE: 05/15/1990

COMPLETION DATE: 05/22/1990

ACTION TYPE DEFINITION:

COLLECTING SITE CHARACTERISTICS TO DETERMINE WHETHER OR NOT A REMOVAL MUST BE PERFORMED.

TYPE: **RS - REMOVAL ASSESSMENT**

START DATE: 12/11/1992

COMPLETION DATE: 12/11/1992

ACTION TYPE DEFINITION:

COLLECTING SITE CHARACTERISTICS TO DETERMINE WHETHER OR NOT A REMOVAL MUST BE PERFORMED.

TYPE: **RV - REMOVAL**

START DATE: 06/03/1983

COMPLETION DATE: 06/06/1983

ACTION TYPE DEFINITION:

RESPONSE ACTION THAT REQUIRES EXPEDITIOUS ATTENTION TO REDUCE IMMINENT AND SUBSTANTIAL DANGERS TO HUMAN HEALTH, WELFARE, OR THE ENVIRONMENT OR AN EMERGENCY RESPONSE REQUIRED WITHIN HOURS OR DAYS TO ADDRESS ACUTE SITUATIONS INVOLVING ACTUAL OR POTENTIAL THREAT TO HUMAN HEALTH, THE ENVIRONMENT, OR REAL OR PERSONAL PROPERTY DUE TO THE RELEASE OF A HAZARDOUS SUBSTANCE. CHARACTERIZATION OF A REMOVAL ACTION AS REMOVAL, NOT IMMEDIATE REMOVAL OR PLANNED REMOVAL, STARTED AT THE BEGINNING OF FY 1987. THIS CODE NOW TAKES THE PLACE OF IMMEDIATE REMOVAL (IR) AND PLANNED REMOVAL (PR).

TYPE: **RV - REMOVAL**

THIS CODE NOW TAKES THE PLACE OF IMMEDIATE REMOVAL (IR) AND PLANNED REMOVAL (PR).

TYPE: SG - SPECIAL NOTICE ISSUED

START DATE: NR

COMPLETION DATE: 10/23/1986

ACTION TYPE DEFINITION:

ISSUANCE UNDER CERCLA SECTION 122 OF A SPECIAL NOTICE LETTER TO POTENTIALLY RESPONSIBLE PARTIES (PRPS). THE ISSUANCE OF A SPECIAL NOTICE LETTER BY EPA TRIGGERS A NEGOTIATION MORATORIUM. SPECIAL NOTICE LETTERS CAN BE ISSUED FOR REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY, REMEDIAL DESIGN/REMEDIAL ACTION NEGOTIATIONS.

TYPE: SI - SITE INSPECTION

START DATE: 10/01/1981

COMPLETION DATE: 10/01/1981

ACTION TYPE DEFINITION:

THE PROCESS OF COLLECTING SITE DATA AND SAMPLES TO CHARACTERIZE THE SEVERITY OF THE HAZARD FOR THE HAZARD RANKING SCORE AND/OR ENFORCEMENT SUPPORT.

TYPE: TA - TECHNICAL ASSISTANCE

START DATE: 09/20/2005

COMPLETION DATE: 03/31/2006

ACTION TYPE DEFINITION:

National Priorities List (NPL)

PARTICIPATION IN THE CONDUCT OF FUND-FINANCED REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS).

TYPE: **TV - NOTICE OF INTENT TO PARTIALLY DELETE**

START DATE: **NR**

COMPLETION DATE: **10/31/1996**

ACTION TYPE DEFINITION:

EPA PUBLISHES THE NOTICE OF INTENT TO PARTIALLY DELETE A PORTION OF A SITE FROM THE NPL IN THE FEDERAL REGISTER.

TYPE: **UA - UNILATERAL ADMIN ORDER**

START DATE: **NR**

COMPLETION DATE: **06/24/1983**

ACTION TYPE DEFINITION:

ADMINISTRATIVE ORDER ISSUED BY EPA UNILATERALLY (UNDER SECTION 106 OF SARA). UNILATERAL ORDERS CAN COMPEL POTENTIALLY RESPONSIBLE PARTIES (PRPS) TO CONDUCT REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY, REMEDIAL DESIGN/REMEDIAL ACTION, AND MAY INCLUDE COST RECOVERY. COMMONLY ABBREVIATED UAO.

TYPE: **UA - UNILATERAL ADMIN ORDER**

START DATE: **NR**

COMPLETION DATE: **08/24/1984**

ACTION TYPE DEFINITION:

ADMINISTRATIVE ORDER ISSUED BY EPA UNILATERALLY (UNDER SECTION 106 OF SARA). UNILATERAL ORDERS CAN COMPEL POTENTIALLY RESPONSIBLE PARTIES (PRPS) TO CONDUCT REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY, REMEDIAL DESIGN/REMEDIAL ACTION, AND MAY INCLUDE COST RECOVERY. COMMONLY ABBREVIATED UAO.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **05/27/1983**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **SG - SPECIAL NOTICE ISSUED**

START DATE: **NR**

COMPLETION DATE: **05/14/1986**

ACTION TYPE DEFINITION:

ISSUANCE UNDER CERCLA SECTION 122 OF A SPECIAL NOTICE LETTER TO POTENTIALLY RESPONSIBLE PARTIES (PRPS). THE ISSUANCE OF A SPECIAL NOTICE LETTER BY EPA TRIGGERS A NEGOTIATION MORATORIUM. SPECIAL NOTICE LETTERS CAN BE ISSUED FOR REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY, REMEDIAL DESIGN/REMEDIAL ACTION NEGOTIATIONS.

TYPE: **GR - PARTIAL NATIONAL PRIORITIES LIST DELETION**

START DATE: **NR**

COMPLETION DATE: **04/08/1997**

ACTION TYPE DEFINITION:

NO FURTHER RESPONSE IS APPROPRIATE FOR A PORTION OF A FINAL NPL SITE. THE PORTION MAY BE A DEFINED GEOGRAPHIC UNIT OF THE SITE, PERHAPS AS SMALL AS A RESIDENTIAL UNIT, OR THE PORTION MAY BE A SPECIFIC MEDIUM AT THE SITE, SUCH AS GROUNDWATER, DEPENDING ON THE NATURE OR EXTENT OF THE RELEASE. THE CRITERIA FOR PARTIAL DELETION ARE THE SAME AS FOR FINAL DELETION. THE START DATE IS THE DATE A NOTICE OF INTENT TO DELETE IS PUBLISHED IN THE FEDERAL REGISTER FOR THE SPECIFIED PORTION OF THE SITE. THE COMPLETION DATE IS THE DATE A NOTICE OF DELETION IS PUBLISHED IN THE FEDERAL REGISTER FOR THAT SPECIFIED PORTION OF THE SITE.

National Priorities List (NPL)

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **05/25/1988**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **10/23/1986**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **AN - REMEDIAL DESIGN/REMEDIAL ACTION NEGOTIATIONS**

START DATE: **11/15/1986**

COMPLETION DATE: **03/30/1987**

ACTION TYPE DEFINITION:

DISCUSSIONS AND INFORMATION EXCHANGE BETWEEN POTENTIALLY RESPONSIBLE PARTIES (PRPS) AND EPA (OR STATE) OVER THE LIABILITY OF THE PRP, WILLINGNESS, AND ABILITY TO CONDUCT THE REMEDIAL DESIGN AND/OR THE REMEDIAL ACTION AS IDENTIFIED IN THE RECORD OF DECISION (ROD).

TYPE: **AR - ADMINISTRATIVE RECORDS**

START DATE: **02/01/1987**

COMPLETION DATE: **09/18/1987**

ACTION TYPE DEFINITION:

SARA SPECIFIES THAT ADMINISTRATIVE RECORDS BE COMPILED AT SUPERFUND SITES WHERE REMEDIAL OR REMOVAL RESPONSES ARE PLANNED, OR ARE OCCURRING, OR WHERE EPA IS ISSUING A UNILATERAL ORDER OR INITIATING LITIGATION TO TRACK ENFORCEMENT CASE BUDGET FUNDS USED FOR ANY RP LEAD ACTIVITY.

TYPE: **AV - ADMINISTRATIVE/VOLUNTARY COST RECOVERY**

START DATE: **NR**

COMPLETION DATE: **07/31/1992**

ACTION TYPE DEFINITION:

REIMBURSEMENT OF TRUST FUND EXPENDITURES IN DIRECT RESPONSE TO DEMAND LETTERS. NO FORMAL SETTLEMENT DOCUMENT EXISTS. IF AN ADMINISTRATIVE ORDER ON CONSENT (AOC) RESOLVES A COST RECOVERY ACTION, IT SHOULD BE CODED AS AC (ACTION CODE FOR AOC) WITH COST RECOVERY REMEDIES.

TYPE: **BB - POTENTIALLY RESPONSIBLE PARTY REMOVAL**

START DATE: **09/27/1984**

COMPLETION DATE: **10/26/1984**

ACTION TYPE DEFINITION:

PROVIDES FOR OVERSIGHT OF POTENTIALLY RESPONSIBLE PARTY (PRP) RESPONSE ACTION FOR REMOVALS, INCLUDING ALL ACTIVITIES FOR MONITORING AND SUPERVISING THE PERFORMANCE OF PRPS TO DETERMINE WHETHER SUCH PERFORMANCE IS CONSISTENT WITH THE REQUIREMENTS OF THE ADMINISTRATIVE ORDERS ON CONSENT, UNILATERAL ADMINISTRATIVE ORDERS, CONSENT DECREES, JUDICIAL DECREES, INFORMATION AGREEMENTS, AND COMPLIANCE SCHEDULES.

TYPE: **CD - CONSENT DECREE**

START DATE: **NR**

COMPLETION DATE: **08/09/1993**

ACTION TYPE DEFINITION:

National Priorities List (NPL)

JUDICIAL AGREEMENT BETWEEN THE FEDERAL GOVERNMENT AND THE POTENTIALLY RESPONSIBLE PARTIES (PRPS) FULLY OR PARTIALLY SETTLING A CLAIM UNDER CERCLA. THIS AGREEMENT MAY SETTLE LITIGATION OR MAY BE PRESENTED CONCURRENTLY WITH THE COMPLAINT (ACHIEVED THROUGH NEGOTIATIONS). THE AGREEMENT MAY BE FOR RESPONSE WORK, COST RECOVERY, OR BOTH.

TYPE: **CM - PRELIMINARY CLOSE-OUT REPORT PREPARED**

START DATE: **NR**

COMPLETION DATE: **09/14/1993**

ACTION TYPE DEFINITION:

A REPORT PREPARED BY THE REMEDIAL PROGRAM MANAGER (RPM) VERIFYING THAT PHYSICAL CONSTRUCTION OF THE REMEDY IS COMPLETE, INDICATING MINOR PUNCH LIST ITEMS THAT REMAIN AND OUTLINING A SCHEDULE OF THE OUTSTANDING ACTIVITIES.

TYPE: **CO - COMBINED REMEDIAL INVESTIGATION/FEASIBILITY STUDY**

START DATE: **12/28/1983**

COMPLETION DATE: **09/18/1986**

ACTION TYPE DEFINITION:

THE PROCESS OF DATA COLLECTION AND ANALYSES OF THE SITE PROBLEM, IDENTIFICATION OF PRELIMINARY REMEDIAL ALTERNATIVES, AND RECOMMENDATION OF A COST-EFFECTIVE REMEDY. THERE CAN BE MULTIPLE REMEDIAL INVESTIGATION/FEASIBILITY STUDIES (RI/FS) CONDUCTED AT A SITE.

TYPE: **DS - DISCOVERY**

START DATE: **NR**

COMPLETION DATE: **08/01/1981**

ACTION TYPE DEFINITION:

THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

TYPE: **EH - EXPLANATION OF SIGNIFICANT DIFFERENCES**

START DATE: **NR**

COMPLETION DATE: **05/31/2007**

ACTION TYPE DEFINITION:

MINOR CHANGE FROM THE ORIGINAL REMEDY SELECTED IN THE ORIGINAL RECORD OF DECISION (ROD), SUCH AS CONTINGENT REMEDY.

TYPE: **FE - FIVE-YEAR REVIEW**

START DATE: **02/25/1998**

COMPLETION DATE: **06/08/1998**

ACTION TYPE DEFINITION:

A REVIEW THAT IS CONDUCTED AT A MINIMUM OF EVERY FIVE YEARS TO DETERMINE IF THE IMPLEMENTATION AND PERFORMANCE OF A REMEDY IS PROTECTIVE OR WILL BE PROTECTIVE OF HUMAN HEALTH AND THE ENVIRONMENT.

TYPE: **FE - FIVE-YEAR REVIEW**

START DATE: **01/14/2003**

COMPLETION DATE: **09/25/2003**

ACTION TYPE DEFINITION:

A REVIEW THAT IS CONDUCTED AT A MINIMUM OF EVERY FIVE YEARS TO DETERMINE IF THE IMPLEMENTATION AND PERFORMANCE OF A REMEDY IS PROTECTIVE OR WILL BE PROTECTIVE OF HUMAN HEALTH AND THE ENVIRONMENT.

TYPE: **FE - FIVE-YEAR REVIEW**

START DATE: **NR**

COMPLETION DATE: **09/26/2013**

National Priorities List (NPL)

ACTION TYPE DEFINITION:

A REVIEW THAT IS CONDUCTED AT A MINIMUM OF EVERY FIVE YEARS TO DETERMINE IF THE IMPLEMENTATION AND PERFORMANCE OF A REMEDY IS PROTECTIVE OR WILL BE PROTECTIVE OF HUMAN HEALTH AND THE ENVIRONMENT.

TYPE: **LR - LONG TERM RESPONSE ACTION**

START DATE: **09/30/1995**

COMPLETION DATE: **09/30/2005**

ACTION TYPE DEFINITION:

SITE REQUIREMENTS ASSOCIATED WITH A REMEDY THAT MUST BE PERFORMED AFTER COMPLETION OF A REMEDIAL ACTION.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **07/18/1983**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **03/17/1983**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **05/27/1983**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **03/17/1983**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

TYPE: **NF - FINAL LISTING ON NATIONAL PRIORITIES LIST**

START DATE: **NR**

COMPLETION DATE: **09/21/1984**

ACTION TYPE DEFINITION:

SITE MOVED FROM PROPOSED LIST TO FINAL NATIONAL PRIORITY LIST.

TYPE: **FE - FIVE-YEAR REVIEW**

START DATE: **11/08/2007**

COMPLETION DATE: **09/23/2008**

ACTION TYPE DEFINITION:

A REVIEW THAT IS CONDUCTED AT A MINIMUM OF EVERY FIVE YEARS TO DETERMINE IF THE IMPLEMENTATION AND PERFORMANCE OF A REMEDY IS PROTECTIVE OR WILL BE PROTECTIVE OF HUMAN HEALTH AND THE ENVIRONMENT.

TYPE: **NE - COST RECOVERY NEGOTIATIONS**

START DATE: **09/21/1989**

National Priorities List (NPL)

COMPLETION DATE: 09/28/1989

ACTION TYPE DEFINITION:

NEGOTIATIONS BETWEEN EPA AND THE PRPS ON THE LIABILITY FOR REIMBURSEMENT TO THE FUND OF PAST EPA EXPENDITURES INVOLVED IN SITE CLEANUP.

TYPE: AC - ADMINISTRATIVE ORDER ON CONSENT

START DATE: NR

COMPLETION DATE: 09/25/1984

ACTION TYPE DEFINITION:

A VOLUNTARY AND ENFORCEABLE AGREEMENT PURSUANT TO CERCLA, SIGNED BY EPA AND POTENTIALLY RESPONSIBLE PARTIES (PRPS), WHEREBY THE PRPS AGREE TO PERFORM AND/OR PAY FOR SOME OR ALL OF THE RESPONSE COSTS INVOLVED IN SITE CLEANUP. THE ORDER DESCRIBES THE PRP RESPONSE TO BE TAKEN AT A SITE, STIPULATED PENALTIES, INDEMNIFICATION, EFFECTIVE DATE, AND MAY BE SUBJECT TO PUBLIC COMMENT. IT CAN BE FOR REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS), REMEDIAL DESIGN (RD), AND REMEDIAL ACTION (RA),PRE-SARA; BUT ONLY REMOVAL AND RI/FS, POST-SARA.

TYPE: LO - LODGED BY DOJ

START DATE: NR

COMPLETION DATE: 06/09/1993

ACTION TYPE DEFINITION:

AN ENFORCEMENT INSTRUMENT (E.G. CONSENT DECREE) IS LODGED BY DOJ WITH THE COURT.

TYPE: IC - ISSUE REQUEST LETTERS (104E)

START DATE: NR

COMPLETION DATE: 05/25/1988

ACTION TYPE DEFINITION:

EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: IC - ISSUE REQUEST LETTERS (104E)

START DATE: NR

COMPLETION DATE: 03/31/1986

ACTION TYPE DEFINITION:

EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: IC - ISSUE REQUEST LETTERS (104E)

START DATE: NR

COMPLETION DATE: 02/25/1983

ACTION TYPE DEFINITION:

EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: HR - HAZARD RANKING SYSTEM PACKAGE

START DATE: 09/01/1983

COMPLETION DATE: 09/01/1983

National Priorities List (NPL)

ACTION TYPE DEFINITION:

A NUMERIC ESTIMATE OF THE RELATIVE SEVERITY OF A HAZARDOUS SUBSTANCE RELEASE OR POTENTIAL RELEASE BASED ON: (1) THE RELATIVE POTENTIAL OF SUBSTANCES TO CAUSE HAZARDOUS SITUATIONS; (2) THE LIKELIHOOD AND RATE AT WHICH THE SUBSTANCES MAY AFFECT HUMAN AND ENVIRONMENTAL RECEPTORS; AND (3) THE SEVERITY AND MAGNITUDE OF POTENTIAL EFFECTS. THE SCORE IS COMPUTED USING THE HAZARD RANKING SYSTEM (HRS).

TYPE: **NE - COST RECOVERY NEGOTIATIONS**

START DATE: **07/15/1992**

COMPLETION DATE: **03/31/1993**

ACTION TYPE DEFINITION:

NEGOTIATIONS BETWEEN EPA AND THE PRPS ON THE LIABILITY FOR REIMBURSEMENT TO THE FUND OF PAST EPA EXPENDITURES INVOLVED IN SITE CLEANUP.

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 04/28/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/11

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 09/06/13

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 01/14/14

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ERNSTX Emergency Response Notification System

VERSION DATE: 12/31/12

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSTX Facility Registry System

VERSION DATE: 08/04/13

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR06 Hazardous Materials Incident Reporting System

VERSION DATE: 01/10/14

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 08/01/12

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

Environmental Records Definitions - FEDERAL

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 08/01/12

In 2006, the Integrated Compliance Information System (ICIS) - National Pollutant Discharge Elimination System (NPDES) became the NPDES national system of record for select states, tribes and territories. ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

LUCIS Land Use Control Information System
VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System
VERSION DATE: 01/30/13

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NPDES06 National Pollutant Discharge Elimination System
VERSION DATE: 04/01/07

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data.

PADS PCB Activity Database System
VERSION DATE: 06/01/13

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCSR06 Permit Compliance System
VERSION DATE: 08/01/12

Environmental Records Definitions - FEDERAL

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

RCRASC RCRA Sites with Controls

VERSION DATE: 01/14/14

This list of Resource Conservation and Recovery Act sites with institutional controls in place is provided by the U.S. Environmental Protection Agency.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/31/09

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/12

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/06

Environmental Records Definitions - FEDERAL

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

NLRRCRAG

No Longer Regulated RCRA Generator Facilities

VERSION DATE: 04/10/14

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

RCRAGR06

Resource Conservation & Recovery Act - Generator Facilities

VERSION DATE: 04/10/14

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the

Environmental Records Definitions - FEDERAL

data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). This database includes sites located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.

Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

HISTPST Historical Gas Stations

VERSION DATE: 07/01/30

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

BF Brownfields Management System

VERSION DATE: 04/15/14

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment.

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System

VERSION DATE: 10/25/13

Environmental Records Definitions - FEDERAL

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

DNPL Delisted National Priorities List

VERSION DATE: 10/25/13

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

NFRAP No Further Remedial Action Planned Sites

VERSION DATE: 10/25/13

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 04/10/14

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities

VERSION DATE: 04/10/14

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource

Environmental Records Definitions - FEDERAL

Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

DOD Department of Defense Sites

VERSION DATE: 12/01/05

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 02/01/13

The 2011 Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NPL National Priorities List

VERSION DATE: 10/25/13

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 10/25/13

Environmental Records Definitions - FEDERAL

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 07/01/13

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (TX)

GWCC Groundwater Contamination Cases

VERSION DATE: 12/31/12

This report contains a listing of groundwater contamination cases which were documented for the 2012 calendar year. Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The agencies reporting these contamination cases include the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

HISTGWCC Historic Groundwater Contamination Cases

VERSION DATE: NR

This historic report contains all agency groundwater contamination cases documented from 1994 to 2011. The agencies that reported these contamination cases included the Texas Commission on Environmental Quality, Railroad Commission of Texas, Texas Alliance of Groundwater Districts, and Department of State Health Services.

LIENS TCEQ Liens

VERSION DATE: 04/11/14

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

MSD Municipal Setting Designations

VERSION DATE: 01/29/14

The Texas Commission on Environmental Quality defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.

NOV Notice of Violations

VERSION DATE: 03/17/14

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is a written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

Environmental Records Definitions - STATE (TX)

SIEC01 State Institutional/Engineering Control Sites

VERSION DATE: 02/19/14

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination. The sites included on this list are regulated by various programs of the Texas Commission on Environmental Quality (TCEQ).

SPILLS Spills Listing

VERSION DATE: 03/17/14

This Texas Commission on Environmental Quality database includes releases of hazardous or potentially hazardous materials into the environment.

TIERII Tier II Chemical Reporting Program Facilities

VERSION DATE: 12/31/12

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2012 calendar years.

DCR Dry Cleaner Registration Database

VERSION DATE: 04/01/14

The database includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

IHW Industrial and Hazardous Waste Sites

VERSION DATE: 04/01/14

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

Environmental Records Definitions - STATE (TX)

PIHW Permitted Industrial Hazardous Waste Sites

VERSION DATE: 04/01/14

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

PST Petroleum Storage Tanks

VERSION DATE: 05/05/14

The Petroleum Storage Tank database is administered by the Texas Commission on Environmental Quality (TCEQ). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

APAR Affected Property Assessment Reports

VERSION DATE: 01/29/14

As regulated by the Texas Commission on Environmental Quality, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

BSA Brownfields Site Assessments

VERSION DATE: 02/19/14

The Brownfields Site Assessments database is maintained by the Texas Commission on Environmental Quality (TCEQ). The TCEQ, in close partnership with the U.S. Environmental Protection Agency (EPA) and other federal, state, and local redevelopment agencies, and stakeholders, is facilitating cleanup, transferability, and revitalization of brownfields through the development of regulatory, tax, and technical assistance tools.

CALF Closed & Abandoned Landfill Inventory

VERSION DATE: 11/01/05

The Texas Commission on Environmental Quality, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments (COGs) in the State, has located over 4,000 closed

Environmental Records Definitions - STATE (TX)

and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail and this historical information is not updated. Please refer to the specific regional COG for the most current information.

DCRPS Dry Cleaner Remediation Program Sites

VERSION DATE: 03/01/14

This list of DCRP sites is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents.

IOP Innocent Owner / Operator Database

VERSION DATE: 02/19/14

Texas Innocent Owner / Operator (IOP), created by House Bill 2776 of the 75th Legislature, provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination. The IOP database is maintained by the Texas Commission on Environmental Quality.

LPST Leaking Petroleum Storage Tanks

VERSION DATE: 05/05/14

The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality. This listing includes aboveground and underground storage tank facilities with reported leaks.

MSWLF Municipal Solid Waste Landfill Sites

VERSION DATE: 04/04/14

The municipal solid waste landfill database is provided by the Texas Commission on Environmental Quality. This database includes active landfills and inactive landfills, where solid waste is treated or stored.

RRCVCP Railroad Commission VCP and Brownfield Sites

VERSION DATE: 04/18/14

According to the Railroad Commission of Texas, their Voluntary Cleanup Program (RRC-VCP) provides an incentive to remediate Oil & Gas related pollution by participants as long as they did not cause or contribute to the contamination. Applicants to the program receive a release of liability to the state in exchange for a successful cleanup.

Environmental Records Definitions - STATE (TX)

RWS Radioactive Waste Sites

VERSION DATE: 07/11/06

This Texas Commission on Environmental Quality database contains all sites in the State of Texas that have been designated as Radioactive Waste sites.

VCP Voluntary Cleanup Program Sites

VERSION DATE: 02/19/14

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses. The VCP database is maintained by the Texas Commission on Environmental Quality.

WMRF Recycling Facilities

VERSION DATE: 11/01/12

This listing of recycling facilities is provided by the Texas Commission on Environmental Quality's Recycle Texas Online service. The company information provided in this database is self-reported. Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ regulations or other applicable laws. This database is no longer maintained and includes the last compilation of the program participants before the Recycle Texas Online program was closed.

IHWCA Industrial and Hazardous Waste Corrective Action Sites

VERSION DATE: 04/21/14

This database is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the mission of the industrial and hazardous waste corrective action program is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes. The goals of this program are to: Ensure that sites are assessed and remediated to levels that protect human health and the environment; Verify that waste management units or facilities are taken out of service and closed properly; and to Facilitate revitalization of contaminated properties.

SF State Superfund Sites

VERSION DATE: 03/01/14

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). As required by the Texas Solid Waste Disposal Act, Texas Health and Safety Code, Chapter 361, the Texas Commission on Environmental Quality identifies and

Environmental Records Definitions - STATE (TX)

evaluates these facilities for inclusion on the state Superfund registry. This registry includes any recent developments and the anticipated action for these sites.

Environmental Records Definitions - TRIBAL

USTR06 Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/30/13

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

LUSTR06 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/30/13

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

State of Texas
WATER WELL REPORT

For TWDB use only
Well No. 65-22-6B
Located on map 255
Received: 68
Form GM 8
Form GM 9

1) OWNER:
Person having well drilled Sylvester Martinez Address 3809 La Branch Houston, Texas
(Name) (Street or RFD) (City) (State)
Landowner Same Address _____
(Name) (Street or RFD) (City) (State)

2) LOCATION OF WELL:
County Harris Labor _____ League _____ Abstract No. _____
NW 1/4 NE 1/4 SW 1/4 SE 1/4 of Section _____ Block No. _____ Survey _____
(Circle as many as are known)
Miles in 1/2 N Hwy 35 direction from International Air Port
(N.E., S.W., etc.) 1/2 mi. → Town Houston NORTH ↑

Sketch map of well location with distances from adjacent section or survey lines, and to landmarks, roads, and creeks.

3) TYPE OF WORK (Check):
New Well Deepening
Reconditioning Plugging

4) PROPOSED USE (Check):
Domestic Industrial Municipal
Irrigation Test Well Other

5) TYPE OF WELL (Check):
Rotary Driven Dug
Cable Jetted Bored

6) WELL LOG:
Diameter of hole 2 in. Depth drilled 95 ft. Depth of completed well 95 ft. Date drilled 8/11/66
All measurements made from 0 ft. above ground level.

From (ft.)	To (ft.)	Description and color of formation material	From (ft.)	To (ft.)	Description and color of formation material
0	15	Clay			
15	60	Sand			
60	80	Clay			
80	95	Water Sand			

(Use reverse side if necessary)

7) COMPLETION (Check):
Straight wall Gravel packed Other
Under reamed Open hole

8) WATER LEVEL:
Static level 17 ft. below land surface Date 8/11/66
Artesian pressure _____ lbs. per square inch Date _____

9) CASING:
Type: old New Steel Plastic Other
Cemented from _____ ft. to _____ ft.

Diameter (inches)	Setting		Gage
	From (ft.)	To (ft.)	
2	0	88	Standard

10) SCREEN:
Type Filter
Perforated Slotted

Diameter (inches)	Setting		Slot size
	From (ft.)	To (ft.)	
2	88	95	1 x 6"

11) WELL TESTS:
Was a pump test made? Yes No If yes by whom?
Yield: _____ gpm with _____ ft. drawdown after _____ hrs
Bailer test _____ gpm with _____ ft. drawdown after _____ hrs
Artesian flow _____ gpm Date _____
Temperature of water _____
Was a chemical analysis made? Yes No
Did any strata contain undesirable water? Yes No
Type of water? _____ depth of strata _____

12) PUMP DATA:
Manufacturer's Name FAIRBANKS MORSE
Type Jet H.P. 1/2
Designed pumping rate 500 gpm gph
Type power unit Elect
Depth to bowls, cylinder, jet, etc., 42 ft. below land surface.

I hereby certify that this well was drilled by me (or under my supervision) and that each and all of the statements herein are true to the best of my knowledge and belief.

NAME Leon E. Davis (Type or Print) Water Well Drillers Registration No. 316
Address 5427 LOTUS HOUSTON, TEXAS 77045
(Street or RFD) (City) (State)
(Signed) Leon E. Davis (Type or Print) DAVIS BROS. WATER WELL DRILL. CO. (Company Name)

Please attach electric log, chemical analysis, and other pertinent information, if available.

Environmental Records Definitions - FEDERAL

NWIS

United States Geological Survey National Water Information System

VERSION DATE: 07/02/14

This USGS National Water Information System database only includes groundwater wells. The USGS defines this well type as: A hole or shaft constructed in the earth intended to be used to locate, sample, or develop groundwater, oil, gas, or some other subsurface material. The diameter of a well is typically much smaller than the depth. Wells are also used to artificially recharge groundwater or to pressurize oil and gas production zones. Additional information about specific kinds of wells should be recorded under the secondary site types or the Use of Site field. Underground waste-disposal wells should be classified as waste-injection wells.

Environmental Records Definitions - STATE (TX)

SDRD Submitted Drillers Report Database

VERSION DATE: 06/02/14

This Texas Water Development Board database was created from the online Texas Well Report Submission and Retrieval System (A cooperative TDLR, TWDB system) that registered water-well drillers use to submit their required reports. The system was started in February 2001 and is optional for the drillers to use.

TCEQ Texas Commission on Environmental Quality Water Wells

VERSION DATE: NR

The Texas Commission on Environmental Quality (TCEQ) maintains a filing system of plotted and unnumbered water wells. Plotted water wells are filed according to the County indicated by the driller and the state well number assigned by State of Texas personnel. Given the available location information provided by the driller, personnel identify where the approximate well location should be. After well placement a state well number is assigned indicating that the well lies within a specific 2.5' section of a 7.5' quadrangle. This method allows for quicker, more refined, reference when researching a specific area. Unnumbered water wells have not been assigned a state well number. This can occur for a variety of reasons; however it does not mean the well cannot be accurately spotted. Unnumbered water well records are filed according to County and are often broken up by year or by a span of years.

TWDB Texas Water Development Board Groundwater Database

VERSION DATE: 05/01/14

The Texas Water Development Board Groundwater Database contains information for more than 123,500 sites in Texas including data on water wells, springs, oil/gas tests, water levels, and water quality. The purpose of the Board's data collection effort over the years has been to gain representative information about aquifers in the state in order to do water planning. It is very important, however, to realize that the wells in the database represent only a small percentage of the wells that actually exist in Texas. A registered water well driller is required by law to send in a report to the State for every well that is drilled. This requirement began in 1965, and we estimate that approximately 500,000 wells have been drilled in Texas since then. Of the 1,000,000 plus water wells drilled in Texas over the past 100 years, more than 130,000 have been inventoried and placed into the TWDB groundwater database. State well numbers have been assigned to these based on their location within numbered 7 1/2 minute quadrangles formed by lines of latitude and longitude. This database contains well information including location, depth, well type, owner, driller, construction and completion data.

WUD Water Utility Database

VERSION DATE: 02/15/11

The Water Utility Database is defined as a collection of data from Texas Water Districts, Public Drinking Water Systems and Water and Sewer Utilities who submit information to the TCEQ. This database is an integrated database designed and developed to replace over 160 stand alone legacy systems representing over 5 million records of the former Texas Water Commission and the Texas Department of Health.

HGSD Harris Galveston Subsidence District Water Wells

VERSION DATE: 02/27/14

The Harris-Galveston Coastal Subsidence District was created by the 64th Texas Legislature as an underground water conservation district in 1975 to provide regulation of groundwater withdrawal to control subsidence.

APPENDIX D

**RESUME OF ENVIRONMENTAL PROFESSIONAL
60-INCH WATER LINE ALONG MONROE AND ROCKHILL
FROM AIRPORT TO GLEN VALLEY
CONTRACT 70B (S-000900-0129-3)**

EDWARD HAWKINSON, PG, CAPM
PROJECT GEOLOGIST

EDUCATION MBA, University of Cincinnati, 1977
 MS, Geology, University of Cincinnati, 1975
 BS, Geology, The Ohio State University, 1968

LICENSE Professional Geologist, TX (45), 2003
 Professional Geologist, AR, 1989
 Professional Geologist, TN, 1990

EXPERIENCE SUMMARY

Mr. Hawkinson has over 25 years of experience providing a wide range of environmental services including Phase I and Phase II Environmental Site Assessments; NEPA documents including Categorical Exclusion and Environmental Assessment studies; wetland studies and permitting; threatened and endangered species studies, cultural resources studies; underground and leaking petroleum storage tank assessment and remediation; invasive and non-invasive geologic fault studies; hazardous waste assessment and management; RCRA/CERCLA investigations; aquifer characterization and interpretations and remedial system design and construction oversight. Environmental work is conducted in accordance with ASTM standards and applicable city, county, state and federal regulations and guidelines which include EPA, US Fish and Wildlife, Texas Parks & Wildlife, and USACE. Mr. Hawkinson is familiar with the protocols in conducting environmental studies, such as ASTM, ASFE, and TNRCC RBCA procedures.

SIGNIFICANT PROJECT EXPERIENCE

Lake Houston and Lynchburg Reservoir, Harris County, Texas. Project Manager for environmental analysis of recent soil discoloration (possibly due to petroleum hydrocarbons) near the southwest corner of the Lynchburg Reservoir area site, where a large quantity of debris was deposited on and near these sites from Hurricane Ike. The purpose of this study was to provide sampling and testing services to determine if hydrocarbon (or other) contamination is present, and if present, whether impacted soils will require special disposal measures.

Metro Intermodal Transit Facility, Houston, Texas. Project Manager for an environmental assessment for the proposed Transit Facility north of downtown Houston, which will provide commuters easy transfer between many different transit modes and providers. The project is to include the construction of a great circle (terminal area), a train hall, a bus hall, a market facility and development sites.

IH 10 General Engineering Consultant Fault Studies, Houston, Texas. Mr. Hawkinson served on a team that conducted comprehensive geologic fault studies for three sections involving two major interchanges and one overpass. The IH 10 and Loop 610 and I-10 and Beltway 8 interchanges were located on the surface trace of the Eureka Heights and the Long Point Faults, respectively. Investigations included field delineation of fault scarps and marking for detailed

surveying. A Phase I fault study was conducted for the section between SH 8 and Barker-Cypress Road to determine if a potential fault was located in that area. Published records from the USGS and academia indicated the potential for an active fault to cross the roadway in this section.

FM 2234 Roadway Widening: FM 521 to SH 288, Houston, Texas. Project Manager for a hazardous materials initial site assessment for the widening of FM 2234, from FM 521 to SH 288. The project involved widening the alignment from two lanes to four lanes and rights-of-way were acquired.

Kirby Drive Storm Sewer, Houston, Texas. Project Manager for a Phase I and Phase II environmental site assessment for the proposed storm sewer project. The project involved two 10- by 10-foot box culverts; storm sewers including storm sewer leads, inlets and manholes; 24-inch waterline; 8-inch sanitary sewer; six lanes of concrete paving; asphalt transitions, and traffic signal foundations. The Phase I ESA identified the potential for groundwater and soil contamination to impact the project so recommended a Phase II ESA adjacent to the listed sites to determine the nature of any contamination located within the project alignment and to develop recommendations for design and construction of proposed facilities.

Texas A&M Institute for Pre-Clinical Study, College Station, Texas. Project Manager for a Phase I environmental site assessment, threatened and endangered species study, cultural resources study, and wetlands identification for a 10.55-acre tract in College Station. The proposed project involved the construction of a two- to three-story building with a total area of 59,000 square feet and two additional one-to two-story buildings with planned areas of 28,000 square feet each.

Westside Mitigation, Houston, Texas. Project Manager for a geotechnical and hydrogeologic assessment of the Houston Airport System site for a proposed wetland construction project.

Gulf Meadows Wastewater Treatment Plant, Houston, Texas. Project Manager for a background Phase I Environmental Site Assessment (ESA) and a Phase II ESA proposed general demolition of the existing sewage treatment plant and assignment of the former plant for non-industrial use as a park since the property is adjacent to an existing park and school area.

West White Oak Bayou Trail Extension Categorical Exclusion, Houston, Texas. Performed environmental assessment for the proposed hike and bike trail extension along White Oak Bayou under TxDOT environmental guidelines for NEPA projects. Specific tasks included preparing environmental documents, conducting wetlands delineations, and coordination with archeological vendor.

New Luke Road, San Antonio, Texas. Performed an environmental assessment for a portion of the former industrial complex associated with Kelly Air Force Base. Evaluated the threat of hazardous waste plumes (soil and groundwater) to impact the design, construction, and operation of the new facility. Work was conducted as part of an environmental assessment for the TxDOT San Antonio.

West White Oak Bayou Trail Extension, Houston, Texas. Performed an environmental assessment with a finding of a categorical exclusion for a 3-mile segment of a proposed bikeway. Critical issues addressed included wetlands, floodplains, and historical/archeological sites.

Goose Creek Categorical Exclusion, Baytown, Texas. Identified four areas of possible jurisdictional wetland development along Goose Creek, east of Houston near Baytown, using standard USACE wetland delineation methodology. Identified wetland hydrology, wetland and non-wetland soil regimes, and wetland vegetation in these areas of possible jurisdictional wetland development and conveyed these results in a report to the USACE for a determination.

Southeast University Hobby Corridor, Houston, Texas. Performed an environmental study relating to water resources, including data collection and analysis of existing conditions. The study included documentation of surface waters, groundwater, floodplains and drainage, and wetlands and riverine systems for Affected Environment of the Southeast Corridor Draft Environmental Impact Statement. The work was in compliance with all local, state, and federal regulations including the National Environmental Policy Act.

Dairy Ashford No. 2 Lift Station, Houston, Texas. Completed a Phase I ESA for the proposed construction of the Dairy Ashford No. 2 sanitary sewer lift station on a vacant lot once occupied by a wastewater treatment plant to include environmental regulatory agency summary records review, field observations, and interviews; review of available, historical maps, aerial photographs; a review of available geologic literature to characterize the geologic, physiographic, and hydrogeologic setting to determine potential release pathways; and a site reconnaissance to conduct interviews, verify environmental and historical records, identify current land-use activities, and identify potential areas of environmental concern based on current conditions. Developed a report summarizing his findings with conclusions and recommendations.

Environmental Site Assessment, Adjoining Properties, Almeda Sims Sludge Drying Facility, Houston, Texas. Completed a Phase I ESA for the adjoining properties of the proposed new construction of a sludge drying facility at the Almeda-Sims WWTP. The objective of this study was to identify current or previous land use activities that may have created an environmental concern to the project on two properties that adjoin the Almeda-Sims WWTP.

Westway, Homestead, and Chocolate Bayou Wastewater Treatment Plants, Houston, Texas. Project Manager for Phase I environmental site assessments for modifications and improvements at the plants.

Galveston Sewer Replacements, Galveston, Texas. Completed a Phase I ESA for sanitary sewer projects in Galveston, Texas. The objectives of this study were to identify current or previous land use activities that may have created an environmental concern to the project. The projects are located in a mixed area of residential, commercial, and industrial land uses. Based on available information, found that potential impact may include contaminated soils, groundwater, vapors, and impacts associated with waste handling and worker protection. Recommended additional investigations at all three of the project areas to determine the nature and extent, if any, of contamination along the project alignment. Soil borings were recommended as well as groundwater sampling due to the high level of the water table in this area.

Clay Road Improvements Phase I, Houston, Texas. Performed a Phase I environmental site assessment and wetland determination for improvements to Clay Road, from Elrod to Peek Road.

A.D. Dyess Park, Cypress, NW Harris County, Texas. Project Geologist for a multi-phase environmental investigation for A.D. Dyess Park in northwest Harris County. Services included a Phase I ESA, wetlands determination, wetlands delineation, study on the presence or absence of threatened and endangered species, an evaluation of cultural resources, and permit support for Harris County in connection with the wetlands. The wetland delineation study was conducted using those specific procedures for tracts of more than 5 acres, as promulgated in the USACE Wetland Manual.

Collingsworth Bridge Phase II Environmental Site Assessment, Houston, Texas. Completed Phase I and II environmental site assessments for the construction of a grade separation across the railroad tracks along Collingsworth along an alignment adjoining the South Cavalcade Superfund Site. Conducted extensive review of regulatory agency documents relating to environmental sites in the alignment area, conducted subsurface investigations, and provided recommendations for worker health and safety, materials handling and materials disposal during construction.

Texas Medical Center Transit Center, Subsurface Investigation, Houston, Texas. Supervised the geoprobe boring installation, soil sampling and analysis/reporting for the project. Soil samples were collected in a grid pattern in the vicinity of a former service station location and at locations east and north of this potentially contaminated property. All soil samples were screened with an organic vapor meter and selected samples were submitted for the analysis of "chemicals of concern" typically associated with a leaking petroleum storage tank installation.

Jacintoport and Penninsula Boulevards Reconstruction, Phase I ESA, Harris County, Texas. Project Manager for conducting a Phase I ESA, which included in the scope an evaluation of Threatened and Endangered Species, Wetlands, and Cultural Resources. The Phase I ESA was conducted per ASTM and ESA Section 404 guidelines. Coordination was conducted with the US Fish and Wildlife Service and the Texas Historical Commission. The project involved the realignment of Jacinto Port Road and Peninsula Boulevard in southeast Harris County.

Elementary School # 36 - FM 1464 on 12.12 Acres, Fort Bend County, Texas. Project Manager for a Phase I Environmental Site Assessment for the location of a proposed elementary school on approximately 12.12 acres. The objectives of this study were to identify current or previous land use activities that may have created an environmental concern to the project. The project was located in an area of vacant land which abutted the West Oaks Village Subdivision. The Phase I ESA did not reveal evidence of recognized environmental conditions in connection with the 12.12-acre parcel. HVJ had no recommendations for further environmental studies involving hazardous materials and/or contamination on the 12.12-acre parcel. Services provided included a review of ASTM E-1527 records and an evaluation of the project to be impact wetlands, cultural resources, or be impacted by active geologic faulting.

Elementary School #38, Fort Bend County ESA, Fort Bend County, Texas. Project Manager for a Phase I ESA for an approximate 8.8-acre tract immediately east of Lexington Boulevard. The objectives of this study were to determine whether recognized environmental conditions may be located on or near the project site or on adjacent parcels that may lead to an environmental concern. In addition to the standard ESA presentation, we provided threatened and endangered species and cultural resources information.

WHCRWA Waterline, Harris County, Texas. Project Manager for a Phase IA environmental site assessment, wetlands reconnaissance study, cultural resources study, and threatened and endangered species study for a proposed 12- to 16-inch water line.

Grant Road Detention Pond, Cypress, Texas. Project Manager for environmental services for construction of a detention basin approximately 5-acres, measuring about 1300 by 160 feet and located on a 10-acre parcel. The parcel is located about 450 feet east of Perry Road, along the south side of Grant Road. HVJ previously conducted a Phase I ESA, wetlands determination, and a review of Threatened and Endangered Species for the Grant Road alignment. The scope of this project included these items as well as a review of cultural resources. The Phase I Environmental Site Assessment will be based on Harris County standard practice document entitled "Minimum Requirements and Guidelines for performing Preliminary Environmental Site Assessments" and ASTM Standards (E-1527).

WHCRWA Waterline, Harris County, Texas. Project Manager for a Phase IA environmental site assessment, wetlands reconnaissance study, cultural resources study, and threatened and endangered species study for a proposed 12- to 16-inch water line.

Karst Invertebrate Survey, San Antonio, Texas. Project Manager for a geologic assessment and Endangered Karst Invertebrate Survey for a 300-foot section of roadway right-of-way at the intersection of Babcock Road and Hausman Road. The property is located within the Edwards Aquifer Recharge Zone and also an area documented as Threatened and Endangered Species in the form of Karst invertebrates.

SAWS ESA - Kelly AFB, San Antonio, Texas. SAWS is proposing to make improvements to the existing stand-alone water distribution system at Kelly USA and Kelly AFB to tie the system into Pressure Zone 4 and provide a reliable water supply for the business park being developed. Project Manager for Phase I ESA.
